FOREWORD

Up-to-date Port information is essential, but heretofore has been difficult to obtain. Nevertheless, *with your help* we will be able to ensure a continuing supply of this essential information.

Shipmasters, Shipowners or Managers, Port Authorities, Administrators and Agents, are earnestly requested to assist our work in up-dating the Guide *by providing written comment, information, amendments or corrections, plus additional details of any ports or terminals, to the following address:*

SHIPPING GUIDES LIMITED,
25 WORMWOOD STREET,
LONDON, E.C.2,
ENGLAND.

All communications will be acknowledged and will be most useful, since it is only by this means that the *Guide* will remain of great value to the user and will be up to date and thoroughly professional in content.

For assistance and guidance in the submission of information, a reprint of the items presently covered by the *Guide* will be found immediately following this foreword. Additional items will also be most welcome.

N.B. It is our intention that amendments, corrections, and additional information sent to the Publishers together with that obtained from our own sources will be printed in the form of six-monthly Supplements to the *Guide* between bi-annual editions, and we ask that all those requiring six-monthly Supplements containing up-dated material should complete the loose form enclosed with this book and return it to Shipping Guides Limited.

PORT INFORMATION KINDLY REQUESTED

1. **DOCUMENTS:** The matter of documentation is one of the most important items to be included in the *Guide*, and we would like to be sure that ALL requirements are included in order that Masters will be in a position to prepare all necessary documentation before arrival and thus ensure speedy clearance. (E.g. Number of Crew Lists, Passenger Lists, Customs Documents, Health Documents, Manifests, Bills of Lading, Ship's Papers, Ship's Certificates, etc., etc.)

2. **PILOTAGE:** Manner in which vessel approaching the port applies for a Pilot. That is, telegraphic address of Pilot Station, amount of advance notice of ETA required, and VHF channel or frequency to be used when contacting Pilot Boat or Pilot Station. If possible, a description of Pilot Boat; particular light or sound signals to be made by vessels requiring a Pilot; the *exact* area where the Pilot Boat is located or where the Pilot has to be taken on board and also any alternative area in the event of bad weather and Pilot Boat not in usual station; details of any specific requirements on the part of Pilots with respect to boarding and safety measures; location of anchorage for vessel awaiting a Pilot.

3. **ANCHORAGES:** Boundaries, areas and depths of safe anchorages.

4. **RESTRICTIONS:** Details of any restrictions imposed upon entry, for example at night time, or in accordance with state of tide and draft restriction.

5. **MAX. SIZE:** Maximum permissible length, breadth, and draft for any vessel entering the port or for oil-carriers proceeding to installations outside the main port area, also state of tide governing these dimensions.

6. **HEALTH:** Pratique procedure and action necessary to obtain pratique. Also action necessary in the event of any suspected disease or fever on board. Also when pratique is automatic, for example vessels entering after calling at another port in the same country.

7. **RADIO:** Name and call sign of radio station through which it is best for a vessel to route ETA cables to Agent, Receivers, etc.

8. **RADAR/VHF:** Details of existing Port Radar Service (if any) in so far as Port Radar Service may be of assistance to the Shipmaster on port entry; also if the Master may contact the Radar Service by means of ship's radio or by VHF, and therefore the channel number or frequency to be used.

9. **TUGS:** Position where tugs normally join the vessel. Also whether usual for ship's lines or tug's lines to be used, and if optional the usual charge for use of tug's lines.

10. **BERTHING:** Any specific requirements relating to berthing in the port, particularly if certain arrival times required to reach certain berths. Details of available berths and depths alongside.

11. **BRIDGES:** Details of any particular arrival times required in order to pass through particular bridges.

12. **STEVEDORES:** Any particular ETA advices required in order to arrange gangs, and including details of main commodities and average load or discharge rates.

13. **MEDICAL:** Whether necessary for Agents to receive advance notice of required medical attention and the amount of notice required; also if hospital facilities available; also any other relevant medical information such as particular inoculations required, vaccination/fever certificates, etc.

14. **TANKERS:** Any specific requirements applicable only to oil-carriers; for example, diameter of load/discharge lines in order that Masters may know whether or not it is necessary to fit reducing pieces before arrival; slop (residue) discharge facilities, and S.G. and A.P.I. of local types of oil (loading ports only). Also number of tanker berths and maximum permitted drafts at these berths.

15. **DENSITY:** (SALINITY): Average salinity of water in the port.

16. **FRESH WATER:** Availability, method of delivery, rate of delivery and approximate cost per ton.

17. **FUEL:** Grades (viscosities) available, amount of advance notice required, and method of delivery.

18. **FIRE PRECAUTIONS:** Any specific precautions particularly respecting tankers (that is, other than usual non-smoking precautions, etc.).

19. **DEVELOPMENTS:** Details of expected draft increases, new installations, berths, etc., expected in the foreseeable future together with expected dates of completion.

20. **GANGWAY/DECK WATCHMEN:** Whether service of watchmen necessary or to be recommended and if so, the cost of watchmen.

21. **HATCHES:** Whether opening/closing is normally carried out by crew or stevedores.

22. **CUSTOMS ALLOWANCES:** (Tobacco/Wine Spirits). Quantity permitted for each crew member to be held out of Bond.

23. **CARGO GEAR:** Whether load/discharge effected by shore gear or by ship's gear, and details of any special cargo equipment, e.g. heavy lift cranes, etc.

24. **IDENTIFICATION CARDS:** Whether shore passes issued or whether seaman's book is sufficient.

25. **CONSULS:** Names of countries having Consuls at the port.

26. **REPAIRS:** Whether all types of deck and engine repairs are possible, and if not then what types of repairs are able to be carried out.

27. **DRY DOCKS:** Dimensions of largest dry dock and also the number of smaller docks.

28. **REPATRIATION:** If facilities exist for effecting crew changes and arranging any necessary repatriation.

29. **AIRPORT:** Distance from airport and whether airport is served by regular airlines; otherwise number flights per day or week.

30. **TIME:** Local time in relation to GMT and dates/details of any alterations made to clocks during the year.

31. **HOLIDAYS:** Dates and details of official holidays and advice whether or not cargo work can be arranged on those days.

32. **POLICE/AMBULANCE/FIRE:** Telephone numbers of these three services, that is, the nearest departments.

33. **TELEPHONES:** Whether arrangements exist for placing telephones on board and if so the approximate cost for this connection.

34. **SERVICES:** Details of any special services available, e.g. tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, etc., etc.

35. **SHORE LEAVE:** Whether crew members are allowed ashore or not.

36. **PORT REGULATIONS:** Any particular or unusual regulations for the port.

37. **DELAYS:** What delays in berthing, load or discharge or bunkering can normally be expected.

38. **GENERAL:** Any other information that you feel may be of value to the Shipmaster that is not already covered by the previous questions.

AGENTS: At the foot of some of the ports in this *Guide* we have an additional heading entitled "Agent". The purpose of including this item has been to provide Shipowners, Managers, and Operators with prompt access to the name, address, telephone, telex numbers, and cable address, etc., of an experienced Agent at the port concerned.

Of course, it will be understood that the Agents named in the *Guide* are not necessarily the only Agents at that port; however, demands on available space preclude the inclusion of other reputable Agency companies and we trust that other such companies will understand and appreciate the position. We have been obliged therefore to include details of one Agency company only, but by doing so we hope to have provided a further service to the user of the *Guide.*

K. A. ORCHARD, *Editor,*
Shipping Guides Ltd.

ACKNOWLEDGEMENT

I would like to express my thanks to all those Port Authorities and Agents throughout the world who have assisted me in the production and compilation of the *Guide to Port Entry* by providing information, suggestions, and also considerable support and encouragement.

It is my hope that with the publication of the *Guide*, all those persons from every country in the world who have been so helpful will feel that their support has been proved worth-while, and that by maintaining the exchange of up-to-date information, the later editions of this book and the intermediate Supplements will continue to be of great value to the Shipping Industry.

To all users of the *Guide* I would like to say that I hope you will find this book and its later editions of value and a great help to you in your work.

ARZEW: 35.50 N. 0.16 W.

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
Cargo Manifests.
Maritime Declaration of Health.
APPROACHES: There are numerous good navigational aids visible from seawards to vessels approaching Arzew Bay. The oil storage tanks are visible for a considerable distance seawards, and the methane gas flare in the South-west corner of the bay is clearly visible at night. In addition to Isle de Arzew lighthouse, the mooring buoys are fitted with red winker lights, visible one mile, but too much reliance must not be placed on these last lights. The pillar buoys on the berths are fitted with blue winker lights. All these buoys form a good radar target and are clearly visible over 5 miles on radar screen,
PILOTAGE: Pilotage is compulsory. A Pilot from the pilotage station of Oran/Arzew will board vessels and assist Master to berth.
Communications from tankers will be via the international radio station at St. Lys, who are in telex communication with the Arzew terminal. Contact with the Arzew terminal can be made on VHF Channel 16. Vessel will then be informed by the control room of the frequency to use, either Channel 12 or 14 for mooring purposes.
Masters are advised to provide for safe access of port personnel an accommodation ladder rigged to end 10 ft. above the water, and a pilot ladder alongside to provide access to the accommodation ladder.
TUGS: Two tugs required for berthing and unberthing.
MAX. SIZE: *Sonatrach Terminal.* Three sea-line berths are located about one mile from Arzew harbour breakwater in approx. position 35° 50′ N. 0° 16′ W.
At sea-line berths No. 1 and No. 2: minimum deadweight 23,000 tons; maximum deadweight 100,000 tons; minimum length 590 ft; loading rate 3,000 tph.
At sea-line berth No. 3 maximum deadweight 150,000 tons; minimum length 640 ft.; maximum length 948 ft.; draft up to 68 ft.; loading rate up to 5,500 tph.
Tankers over 80,000 dwt must be capable of loading and deballasting at the same time. Minimum depth of water in the berthing area is 73 ft.
HEALTH: Health officer boards vessel on arrival. Pratique granted automatically provided Health Declaration is satisfactory.
RADIO: St. Lys Radio.
BERTHING: Use of ship's anchors will not be permitted when manoeuvring into berth. Two tugs are available to assist in berthing. On arrival vessels should have ready eight mooring lines, four forward and four aft and a tow rope at each end as it will be necessary to position the vessel with her own gear before securing to the heavy wires. Good rope messengers should be ready at each end of the vessel to pick up these wires.
There are three mooring buoys at the bow and three at the stern. All buoys are fitted with 5 in. wire ropes. Ships of moderate tonnage may be moored using two bow buoys and two quarter buoys only. Hoses will be lifted from both sides of the vessel using ships gear and crew.
The port and starboard derricks must be ready for use before berthing. The safe working-load must be at least 5 tons. The loading Master can refuse to berth a tanker whose lifting tackle is not correctly rigged or in good working condition.
Three 12 in. hoses are connected for loading, 2 on one side and one on the other. Loading rates up to 5,500 tph.
BALLAST: Pilots are empowered to refuse to berth a vessel if in their opinion the vessel has insufficient ballast or her trim is such that it would prevent safe handling.
Dirty ballast can be received at the Arzew deballasting plant. Pumping out by ship's means at an average rate of 1,200 tph.
Clean ballast may be discharged to sea, subject to Master's sole responsibility for oil pollution risks.
Heavy slops, e.g. tar, or non-oil sediments are not accepted at the deballasting plant.
Each berth is provided with a 20-in. deballasting line with 12-in. hose connection to the ship.
FRESH WATER: Not available at Sonatrach terminal.
FUEL: Not available at Sonatrach Terminal.
TIME: GMT. No alterations.
CUSTOMS ALLOWANCES: Only 40 cigarettes per man. No alcohol.
AIRPORT: Nearest at Algiers.
CONSULS: Nearest at Algiers.
AUTHORITY: Sonatrach.

All to be signed by Ship's Master. Other necessary Official Forms prepared by Agent.

PILOTAGE: When Pilot required outside Harbour Entrance, vessel must request via Agent at least 12 hours before arrival. Otherwise Pilot boards inside Lobito Bay before vessel berths. Pilot boat: grey hull, white housing. Max. speed entering Bay – 8 knots.

ANCHORAGE: Lobito Bay excellent holding ground, depths over 33 feet and easily accessible day and night the year round.

ENTRY RESTRICTIONS: No restrictions, vessel may enter harbour day and night. Vessels not visited by Port Authorities between approximately 1900 hours to 0700 hours.

MAX. SIZE: Length 900 ft., draft 34 ft., max. depth 35–37 ft. (normal tidal range: 3 ft. 3 in., maximum: 6 ft.).

WEATHER: March/May rain season. Heavy wind and rain can effect cargo work.

HEALTH: Pratique never given by radio, but granted after Port Authorities (including Doctor) board vessel between 0700–1900 hours. Pratique granted if no contagious illnesses aboard, otherwise quarantine restrictions imposed. Ships calling from other Angolan Ports – except coasters – subject same procedure.

RADIO: Because Lobito Radio (call sign CQZ) operating MW range 200/400 miles only, all ETA messages, etc., must be routed via Luanda Radio (call sign CQW). Agent uses same routing.

TUGS: Tug (usually one only) joins vessel whilst berthing and sailing. Ships' lines used.

BERTHING: Unless Masters indicate preference, Port decides which side alongside. No vessels allowed berth after sunset. Sailing after dark allowed at Port Authorities' discretion, up to 2400 hours. No vessel permitted berth without Pilot. Before berthing, vessel must effectively cover water outlets, prepare accommodation ladder and have anchors "at the ready". (Authority fine any vessel ejecting water or waste on to Quays.) Ships carrying explosives not permitted berth before Port Captain inspects cargo.

STEVEDORES. Important vessel gives accurate ETA at least 24 hours in advance to enable Agent order necessary gangs. (Gangs ordered 0700 and 1500 hours.) No work allowed Sundays.

MEDICAL: Radio before arrival if medical assistance necessary on entry. Good hospital facilities available, but specialised treatment and surgery is not. Yellow Fever, Cholera and Smallpox Vaccinations Certificates inspected on arrival.

TANKERS: No oil to be pumped overboard into Territorial waters. Heavy fines imposed for oil pollution, however slight. Three 8 in. diameter pipelines discharging into local storage tanks. No slop Tanks available. Two Tanker Berths, Nos. 5 and 8, maximum drafts 30 ft. and 35 ft. respectively.

DENSITY: 1024.

FRESH WATER: Normal requirements readily available and delivered by 3 in. hose. Loading rate very slow as pressure usually low. Costs: First 50 cu. m., Esc. 20.00, then gradual reduction to Esc. 7.50 for 1,500 cu. m.

FUEL: Fuel Oil (Ordinary) available, viscosity up to 1500 sec. Redwood. Twenty-four hours' notice bunker requirements essential. Gas oil available. No Diesel.

GANGWAY/DECK WATCHMEN: Compulsory, both day and night. Approx. cost, Esc. 800/1000 per day.

OPENING/CLOSING HATCHES: When closed or opened by Stevedores, costs per time, Esc. 100.00 per hatch. (Crew allowed to carry out this operation.)

SHIPS' CERTIFICATES: Registered Tonnage Certificate, De-Ratisation Certificate to be shown. (Vessels of Communist Countries advised to carry all relevant Certificates for vessels' tonnages, measurements, gear and crew.)

WINE/SPIRIT ALLOWANCE: No restrictions. Custom's Guard supervises opening and resealing of bond.

CARGO GEAR: Normal routine gear: wire and rope slings, nets, chain-slings, baskets, grabs, and shore-cranes (capacity 3–10 tons) available. Heavy lifts of over 10 tons must be discharged using ship's derricks. One crane 10 tons available, but not always accessible.

CREW IDENTIFICATION CARDS: On arrival, all crews' and passengers' passports must be handed Immigration Police, who retain these and issue shore-passes. Passes must be carried at all times when on shore. If lost, a fine of Esc. 1150.00 per Pass is imposed.

CONSULS: At Lobito, Norwegian and Belgian Consulates and French Consular Agency. At Benguela – 30 kilometres from Lobito – Italian Vice-Consulate.

BALLAST HEAD, Kangaroo Is.: 35.45 S. 137.48 E.

In Eastern Cove, Kangaroo Island. Small private bulk loading installation from which charter vessels load gypsum for shipment to factories in Eastern Australian states. No facilities for discharging cargo and no Customs, health or other government departments' facilities available.
DOCUMENTATION: For vessels chartered to carry gypsum to Eastern Australian ports, bills of Lading prepared on completion of loading.
PILOTAGE: Not available.
ANCHORAGE: Sea approach is unobstructed, with deep water anchorage and turning basin of Eastern Cove, three miles wide and extending ½ mile South of berth. Minimum depth about 35 ft. Sand bars exist immediately South of berth but well inside line of dolphins.
RESTRICTIONS: Vessels may proceed to anchorage at any time, but can berth only during daylight hours. Loaded vessels can leave berth or anchorage at any time without concern for tide conditions.
BERTH: The berth consists of a line of eight dolphins running North/South, 600 ft. overall length forming a T-head jetty with loading conveyor gantry. Depth of water alongside 26 ft. LWOST. Berthing signals by radio instruction or mast head.
MAX. SIZE: Jetty can accommodate vessels up to about 7,000 tons dwt. Maximum length 400 ft. Maximum breadth 55 ft. Ships must exercise extreme care in berthing to avoid damage to dolphins or head frame.
LOADING FACILITY: Loading equipment consists of conveyor system to fixed loading gantry supporting buffing boom conveyor. Discharge from boom conveyor feeds to gimbal-mounted chute that can be pivoted mechanically in any direction up to 20° off vertical to trim to square of hatch. Boom conveyor operates only in horizontal position and loading chute does not telescope. Fixed loading gantry situated at centre of line of berthing dolphins. Maximum workable distance from wharf edge to centre line of loading unit – 26 ft. Distance from low water level to outlet end of loading chute in loading position – 19 ft. 3 in. Loading rate of rock gypsum – 575 tons per hour.
RADIO: Ship–shore VHF radio. Call sign "Ballast Harbour". Frequencies, 150·80 mgc/s for distress and calling; 156·60 mgc/s for working.

(i) Auckland Point Wharf containing three berths is 1,651 ft. in length. No. 1 berth coal loading 850 ft. length, 120 ft. width minimum depth alongside 37 ft. LWOST. Loading by movable conveyor belt, gantry, at 750 tons per hour. No. 2 and No. 3 berths general cargo, and oil tanker berths. Minimum depth alongside berths 33 ft. LWOST, width 120 ft.

(ii) Barney Point Wharf 677 ft. long, minimum depth alongside 40 ft. LWOST. Maximum size ships this berth approx. 60,000 tons deadweight.

(iii) South Trees Island Wharf 1,305 ft. long, minimum depth 45 ft. LWOST alongside. This wharf used exclusively for import bauxite/export alumina. Maximum size ship accommodated at wharf 70,000 tons deadweight, 835 ft. LOA.

HEALTH: Pratique granted when alongside wharf, unless proceeding anchorage inside port, which case quarantine officials board anchorage. Agents should be advised in advance in event any suspected fever or disease on board. Pratique granted in Australian ports normally covers vessel for any subsequent ports; there are, however, some ports (for example Weipa) which are exceptions. Also see "Melbourne".

RADIO: Radio messages passed to Agents via any costal radio station. Nearest Rockhampton Radio (VIR). All shipping cables to Agents, etc., should be prefixed "Shipserv" to enable delivery destination outside ordinary postal hours if necessary.

TUGS: Three tugs in service. Tugs normally join vessel in vicinity South Trees Point. Use of ship's or tug's lines optional. Charge of $10 if tug's line used.

BERTHING: Large vessels requiring load coal either Auckland Point Wharf or Barney Point Wharf normally swing and berth starboard side to, head to sea, on flood tide. Smaller vessels using these berths either port or starboard side to, depending upon tide. Vessels requiring discharge bauxite South Trees Island Wharf berth at periods of slack water (high or low) only. Vessels loading alumina this wharf berth either on flood tide or slack water – *never* on ebb tide. Tankers with petroleum products do not berth during hours of darkness.

STEVEDORES: Special ETA advices necessary if week-end labour required and must be ordered by 2 p.m. on previous Friday. Monday labour for vessels arriving after Friday must be ordered by 3 p.m. on Friday. Main commodities (other than coal, bauxite and alumina) requiring shore labour, are frozen meat and grain. Average loading rate frozen meat 7–8 tons per hour/per gang. Wheat approximately 1,500 tons per day of 8 hours.

MEDICAL: Dependent duration stay in port, prior notice for medical attention not required (other than notice of infectious diseases). Hospital facilities available. Current vaccination certificate for each member of crew required.

TANKERS: Diameters of discharge lines 8 in. for white oils and 6 in. black oils. No slop discharge facilities. Main tanker berth at Auckland Point Wharf minimum depth alongside 33 ft. LWOST. Black oil also discharged South Trees Island Wharf for use in alumina plant only.

DENSITY: Average density 1027–1028.

FRESH WATER: Available all wharves. Fresh water hydrants placed at intervals along wharves. Approximate cost $0.40 per 1,000 gallons.

FUEL: Diesel fuel, distillate and coal bunkers available. At least three days prior notice for fuel required. New bunkering facilities available June 1971.

FIRE PRECAUTIONS: Loading or discharging of petroleum not permitted except between sunrise and sunset. Where petroleum and goods of dangerous inflammable character are being unloaded, watchman shall be employed to collect matches from all persons in vicinity and to patrol wharf within the limits in which petroleum cargo is being handled. Every vessel carrying inflammable liquids when in any Queensland port shall display red flag, not less than three (3) ft. square with white circular centre six (6) in. in diameter.

DEVELOPMENTS: Planned to extend Auckland Point Wharf and provide grain silos and grain loading elevators. An additional berth with bulk-loading facilities at Barney Point is planned for 100,000 dwt vessels. Completion end 1972.

GANGWAY/DECK WATCHMEN: Services of watchmen is not recommended except in the case of petroleum tankers previously mentioned. Cost of watchmen approximately $1.30 per hour.

OPENING/CLOSING HATCHES: Either by ship's crew or shore labour.

SHIP CERTIFICATES: List of certificates usual for Australian Ports. See "Melbourne".

CUSTOMS ALLOWANCES: ½ lb. of tobacco or 200 cigarettes, to be opened. 1 only 26 ounce bottle, to be opened.

CARGO GEAR: To be in accordance with Commonwealth Navigation (Loading and Unloading Safety Measures) Regulations. See "Melbourne".

IDENTIFICATION CARDS: See "Melbourne".

CONSULS: None.

REPAIRS: Minor engine and deck repairs are undertaken.

DRY DOCKS: None available. Slipway capable of lifting vessels up to 125 tons displacement with maximum beam 23 ft. and maximum draft forward of 6 ft.

REPATRIATION: Facilities for effecting crew changes and necessary repatriations can be arranged. Prior notice required.

AIRPORT: Airport approximately 5 miles from port and is regularly served by two internal airlines. Twice-daily flights to Brisbane where connections with overseas airlines.

TIME: GMT plus 10 hours.

HOLIDAYS: Only five official holidays in year when it is *not* possible to arrange cargo work: Christmas Day; Anzac Day (25th April); Labour Day (1st Monday in May); Good Friday; Picnic Day (2nd Friday in July).

POLICE/AMBULANCE/FIRE: Telephone number these services in cases of emergency only is "000" and ask to be connected to the required service. Emergency call to Hospital is 72.1033.

TELEPHONES: Public phones available on wharf.

GENERAL: No cranes on wharves, Mobile cranes available for hire. No lighterage facilities. No provision for supply of electricity to ships. Passengers not normally embarked or disembarked this port, as no facilities for them.

SERVICES: No tank cleaning facilities. No slop facilities.

SHORE LEAVE: Crew members allowed ashore providing vaccination certificates in order.

DELAYS: No unusual delays other than berth availability or unusual tidal conditions.

GROOTE EYLANDT (Milner Bay) N. Territory: 13.59 S. 136.54 E.

DOCUMENTS:
3 Crew Lists.
5 Passenger Lists.
1 Port of Call List.
3 Stores Lists.
1 Crew's Personal Effects List.
Derat. Certificate.
Clearance from last port.

PORT LIMITS: The waters in Milner Bay bounded by a line commencing at the HW mark on the N.W. coast of Groote Eylandt in position lat. 13° 50′ 05′ S. long. 136° 24′ 29′ E. and proceeding in a 260° 44′ 10″ direction to a point in lat. 13° 50′ 28″ long. 136° 22′ 3″ E. at the high-water mark on the East coast of Connexion Islet; thence by a line following the contour of the coast of Connexion Islet at the HW mark to "Boulder" in position lat. 13° 50′ 46″ S., long 136° 20′ 14″ E.; thence by a line bearing 151° 30′ to a position lat. 13° 53′ 34″ S. long. 136° 21′ 47″ E.; thence by a line bearing 80° 44′ 10″ to a point being lat. 13° 52′ 54″ S. long. 136° 25′ 58″ E. thence by a line following the contour of the coast at high-water mark to the point of commencement.

PILOTAGE: *There is no Pilot at Milner Bay* and Masters are required to berth and depart from the jetty themselves. Approaching Groote Eylandt from Northwards, vessels should steer to a position 10 miles North of the North-east Islet, which is rocky on the Northern coast and rises to grassy hills. From the above position, steer to pass about 3 miles North of Chasm Islet until the recommended track on Chart Aus. 234 is reached. This track 221° passes about 1 mile East of Brady Rock (Light GP. FL. Ev 6 secs.) and continues on this course until Hand Islet (FL. 6 secs.) bears 250° when the course should be altered to steer for Hand Islet on the recommended track (250°) until reaching the position to alter course to 195° to pass down the middle of Warwick Channel. It is recommended to remain on this course until reaching the recommended track to the jetty, keeping clear of the 3 *fathom patch* south of Connexion Island.

If vessels enter via the Connexion passage, care must be taken to avoid the 3 fathom patch off N.W. Bluff and keep clear of the 27 ft. patch about 3½ miles North-eastward of Connexion Islet.

ANCHORAGE: Good holding ground is found ½ mile West of the jetty where there is a good sand bottom free of obstructions with about 40 ft. of water. Quarantine is granted at this anchorage.

MAX. SIZE: Vessel Maximum LOA 605 ft., maximum width 84 ft. 5 in., maximum draft 35 ft.

RADIO: The port is able to communicate with vessels which are fitted with VHF radio through normal international maritime channels and the call sign is: "Groote Eylandt".

HEALTH: Pratique granted at quarantine anchorage provided ship is healthy. If vessel has suspected disease or fever on board it should be reported to Health Department by radio before arrival.

BERTHING: The ore-loading jetty is situated in approximately 13° 56.5′ S. 136° 25′ E., with a depth of water alongside of 35 ft. MLWOST with a tide range of 6 ft. A launch is provided for running lines and for assisting in the mooring of the vessel.

The jetty consists of four breasting dolphins and two mooring dolphins which run in a 331° 44′ direction, parallel to the tidal flow which is predominately to the Northwards. As there is no tidal information for this area, the tidal direction should be checked with the shore prior to berthing, as the tidal stream is sometimes different half a mile from the jetty.

The line of dolphins is offset 8° from the jetty stem which runs out 1,350 ft. from the shore in a 249° 45′ direction so that care must be exercised in placing the vessel for loading. All breasting dolphins are fendered with vertical timbering.

When berthing, vessels should keep well clear of the loading head in the centre of the jetty, as it is possible that a vessel on a too fine approach could cause damage to the loading boom with the flare of the bow. Vessels usually berth port side to under normal conditions.

Loading rate is between 800 and 1,000 tons per hour and the vessel is required to shift ship to load each hatch as the loading boom is fixed. Shore labour is available to shift lines, etc., as required.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: 200 cigarettes, one bottle spirits, three bottles of beer per man.

MEDICAL: There Is a hospital and medical staff available if necessary. Valid vaccination certificates are required, covering the requirements of the Australian Government Department of Health.
FIRE PRECAUTIONS: There are no fire-fighting facilities at the jetty except fire extinguishers and the Master of the ship alongside is responsible for supplying any necessary equipment.
TIME: Time kept is Northern Territory "Standard Time" GMT plus 9 hr. 30 min.
HOLIDAYS: Cargo worked on most holidays by arrangement.
SHORE LEAVE: The area is a nature reserve and *no shore leave allowed to the crew.*

AGENT: The Groote Eylandt Mining Company Pty. Ltd. act as ships' Agents in all cases. Tel. address is: Manager Groote Eylandt, c/o Hematite Darwin N.T.

HOBART, Tasmania (including Electrona, Port Huon Risdon): 42.53 S. 147.20 E.

DOCUMENTS: See "Melbourne".
PILOTAGE: Pilotage not compulsory. Pilotage fee payable whether pilot employed or not, unless master holds valid certificate of exemption from pilotage. ETA usually sent vessels' agent at least 24 hours prior arrival. Advisable also send ETA to Harbour Master, Hobart. Continuous watch maintained on VHF, channel 16, call sign "Hobart Harbour". Pilot launches also maintain watch on channel 16 having established contact, converse on channel 6.

Three launches used for pilotage work. Usual vessel is 41 ft. steel built launch painted dark blue. Upperworks light grey. Word "Pilot" painted on each side of hull. No specific sound signals required for calling pilot.

For pilotage purposes Hobart divided into two areas, namely, Hobart, and the Huon and Channel Ports. In the case of Hobart or Risdon, pilot boards on imaginary line joining White Rock and Crayfish Point. For Huon and Channel Ports vessel from eastwards embarks pilot on imaginary line joining Kelly Point, and Piersons Point, or from Westward, on imaginary line joining Southern end of Partridge Island and Southport Island. No alternative pilot grounds.

Specific requirements for embarking pilots are those in force in most ports, namely, provide a good lee, a pilot ladder fitted with spreaders and manropes adequately lit at night.
ANCHORAGE: Anchorages with excellent holding can be found everywhere in estuaries of Derwent and Huon Rivers. Quarantine Anchorage situated off Kangaroo Bluff where excellent holding obtained in 10 to 13 fathoms.
RESTRICTIONS: With exception of oil tankers carrying petrol or similar highly flammable oil, there is no restriction on entry. White-oil tankers may not berth between hours of sunset and sunrise. Tide does not affect entry.
MAX. SIZE: Length 900 ft., beam 97 ft. 2 in., draft 34 ft. Vessels up to 35 ft. draft accommodated at Risdon.
HEALTH: Vessels requiring pratique anchor in quarantine anchorage and there boarded by doctor, immigration and customs officials. Full crew muster required. Quarantine authorities must be informed of suspected disease or fever at least eighteen hours prior arrival. Pratique automatic if granted at previous port (for all Australian ports). Also see "Melbourne".
RADIO: Hobart Radio, call sign VIH. Hours of duty, 0700 to 2000 Eastern Standard Time.
TUGS: Normally join vessels approximately one mile from berth. Usual to use tug's line for which additional charge of $2.50 is made, but ship's line may be used.
BERTHING: Port operates on a 24 hour per day basis, and, with exception of tankers carrying petrol and other light volatile oils, berthing of vessels can take place at any time. Tankers may berth only between hours of sunrise and sunset.
BRIDGES: Only one bridge, the Tasman Bridge, requires to be navigated and this only when berthing at Self's Point Oil Wharf or at Electrolytic Zinc Company's Wharf at Risdon. With exception of white-oil tankers, there is no restriction on the time of passing through this bridge. Clearance 150 ft. above mean water level.
STEVEDORES: Gangs ordered by 1600 on previous day, or 1400 on Fridays.
MEDICAL: Advance notice of required medical attention necessary including if possible, symptoms of complaint. As much notice as reasonably possible is required. Vaccination for smallpox compulsory. Inoculation against yellow fever or plague necessary if vessel has visited a port where either disease proclaimed.
TANKERS: Tankers when sending their ETA must state whether or not there are any leaks in the hull. All oil discharge lines 8 in. in diameter. 2 Oil berths, maximum draught allowance 32 ft.
DENSITY: 1025.
FRESH WATER: No restriction on availability. Rate of delivery approximately 30 tons per hour/per hose. Water available all berths. No water boats. Cost per 1,000 gallons 45 cents or part thereof.
FUEL: The following grades of fuel are kept in stock: marine fuel oil, light diesel and gas oil. Twenty-four hours notice required for bunkering.
FIRE PRECAUTIONS: No special fire precautions other than non-smoking or lighting of fires or use of naked lights.
GANGWAY/DECK WATCHMAN: Gangway watchmen are recommended. Watchmen work 12-hour shift. On Saturday, Sundays and holidays, twice normal rate.
OPENING/CLOSING HATCHES: Normally by stevedores.
CERTIFICATES: Register, Load Line Certificate, Deratisation Certificate, light dues, Articles of Agreement, clearance from previous port.
CUSTOMS ALLOWANCES: If vessel arrives as first port, allowance of tobacco for crew is 200 cigarettes in opened carton or equivalent in tobacco or cigars. Allowance of wines or spirits is any opened bottle, but not exceeding 26 fluid ounces.
CARGO GEAR: No additional requirements. See "Melbourne".
IDENTIFICATION CARDS: See "Melbourne".

Radio Pratique: Concession of Radio Pratique is to all vessels carrying surgeons, provided these officers medical graduates of a university. Following requirements to be met in the case of a vessel requiring Radio Pratique.

(*a*) (1) ETA.

(2) that individual inspection of all persons on board has been made by Ship's Surgeon within twenty-four hours of expected time of arrival and no cases of quarantinable diseases or varicella in an adult or coloured person, not associated with cases in children, then existed on board or had occurred or had been on board within previous fourteen days: and

(3) that all members of crew currently satisfactorily vaccinated against smallpox (i.e. not less than eight days nor more than three years previously in the case of revaccination) and a satisfactory Vaccination Register is kept on board;

(4) that all passengers over age of 12 months have been satisfactorily vaccinated against smallpox before embarkation and are in possession of current valid International Certificate of Vaccination against smallpox (i.e. all certificates, duly authenticated, show that vaccination has taken place not less than eight days nor more than three years previously in the case of primary vaccination and not more than three years previously in the case of revaccination) except those who before embarkation submitted a medical certificate stating that they have a medical disability which would make vaccination inadvisable and except those who before embarkation signed a statutory declaration stating that they object to vaccination on religious grounds.

(*b*) Commonwealth Director of Health will advise master by wireless whether Radio Pratique is granted or not.

(*c*) A vessel granted Radio Pratique will fly "Q" flag by day and Quarantine signal by night and will on arrival at quarantine anchorage be boarded by Quarantine Officer with Immigration and Customs Officers. Quarantine Officer will inspect crew Vaccination Register and passenger manifest on which must be stated full name, address in Australia and vaccinal status of each passenger and will see cases of illness brought to notice by Ship's Surgeon, including all cases infectious disease and will receive Primary Health Report. If no cases of illness as referred in sub-paragraph (*a*) (2), Quarantine Officer will confirm Radio Pratique and issue Pratique Certificate for all ports. Master will not be required to submit Supplementary Health Report at subsequent ports. When Pratique confirmed, "Q" flag may be lowered.

(*d*) Notwithstanding that pratique for all ports may have been granted, Master will still be responsible for reporting any case of infectious diseases which may subsequently occur whilst vessel in Australian waters.

Should a case of infectious disease (not being a quarantinable disease or varicella in an adult or coloured person not associated with cases in children) occur on board whilst vessel at sea in Australian waters Master will be required to advise by radio Commonwealth Director of Health for State in which next port situated, who will arrange for a Quarantine Officer to see case on arrival, Master will not be required to fill in a Supplementary Health Form and vessel will be permitted to proceed direct to berth without flying "Q" flag.

Should a case of suspected quarantinable disease or a case of varicella in an adult or coloured person occur on board whilst at sea in Australian waters, Master required radio details to Commonwealth Director of Health for State in which next port situated and await instructions. Commonwealth Director of Health will decide according to circumstances whether inspect vessel outside Quarantine Line or permit it to proceed to berth and will advise Master.

(*e*) Should it come to notice in any particular case that Radio Pratique has been granted as a result of a wireless message sent in accordance with sub-paragraph (*a*) whereas in fact wireless message contains false information, matter will be investigated throughly and reported to the Director General of Health who will decide whether Radio Pratique will be denied in future to vessels on which Master and the Ship's Surgeon hold responsibility.

PORT PHILLIP, Vic.

CERTIFICATES/DOCUMENTS: See "Melbourne".
PILOTAGE: Two vessels, *Wyuna* and *Akuna,* one of which kept on station outside Port Phillip Heads, within limits of cruising station, except for short periods when making shore contacts and from 0900 to 1100 local time each Monday. *Wyuna* has two masts, buff coloured hull and funnel with white painted superstructure.

The *Akuna* relief pilot vessel, steamship, one mast, buff coloured hull, funnel and white painted superstructure. Pilot vessel on station exhibits by day from foreyard mast, horizontal striped flag, upper half white and lower half red. At night lights as prescribed in Rule 8 of the International Collision Regulations for a pilot vessel over 65 ft. in length.

Cruising Station: Cruising station extends seaward to 15 miles 221° from centre of fairway between Port Phillip Heads, from which position the Western boundary extends in 334° direction towards coast at Zealey Point, and Southern boundary in 092° direction towards Cape Schank until Arthur's Seat bears 050°, which line towards coast forms Eastern boundary of station. Generally, pilot vessel cruises from 2 to 5 miles 225° from Point Lonsdale Lighthouse in order keep Westward of confused seas caused by tide race through entrance.

Radio message sent direct to pilot vessel 24 hours prior to arrival advising ship's deepest draught and estimated time of arrival at Port Phillip Heads, subject to confirmation pilot vs. If not in sight, vessels stand off at least 5 miles from Point Lonsdale and make inquiries addressed by visual signals or VHF radio telephone to Point Lonsdale Signal Station.
RADIO: Masters requiring Pilots are informed that a W/T watch is kept on pilot vessel at the following times;

GMT	Corresponding to	Melbourne Time
0000–0200	,, ,,	1000–1200
0400–0600	,, ,,	1400–1600
0800–1000	,, ,,	1800–2000
1200–1400	,, ,,	2200–2400

Call sign for *Wyuna* is VKVS, frequency 500 kc/s, and *Akuna,* VLBX, frequency 500 kc/s. Continuous watch also kept on VHF radio telephone 156·8 Mc/s, channel 16. Fog Signals: In thick weather, pilot vessel will, in addition to normal fog signal, sound four short blasts on whistle or siren to identify itself.

Stringent regulations regarding pilot access. Ladder firmly to ship's side not less than 5 ft. (1·5 metres), not more than 30 ft. (9 metres). Treads of ladder not less than 19 in. (48 cm.) long, 4½ in. (11·4 cm.) wide and 1 in. (2·5 cm.) thick. In rough weather deep-laden tankers and bulk carriers rig from centre castle. Spreaders to prevent twisting. Two 3 in. man ropes secured on deck each side of ladder and long enough to reach water. Adequate lighting.
ANCHORAGE: Quarantine Anchorage: if, from Quarantine Regulations, southerly gales, or other causes, it is necessary to anchor off Quarantine Station, a vessel drawing more than 20 ft. should anchor to Northward, with jetty bearing 195°, in depths of from 48 to 54 ft., from 3 to 6 cables off-shore; and at night in white sector of jetty light, visible from 126° through South to 195°, preferably with that light bearing 180°, and Point Lonsdale light bearing 280°.

Symonds Channel Anchorage: good anchorage clear of all fairways, in red sector of Low light, and well to windward of southern shore in northerlies, is to be had in the middle of Symonds Channel close to its Southern end. A good berth is in a depth of about 40 ft. with Queenscliff High Light bearing 286°, and No. 3. (Tuckey) West Channel in transit with Coles Channel Light. Queenscliff Anchorage: in anchoring off Queenscliff, care should be taken to keep clear of West Channel fairway by bringing up as near as possible to North-western side of channel. A good berth in a depth of 38 ft. and in red sector of Low light, may be obtained with High Lighthouse bearing 284° distant half a mile, and fixed green light at Queenscliff South pier head bearing 336°.

Vessels awaiting berths in the Port of Melbourne are normally directed to anchor at pilot's discretion South of Gellibrand light and clear of the Melbourne ship channel.
RESTRICTIONS: Tides at Port Phillip Heads: see cautionary Notice No. 2 Admiralty Chart No. 1171.

In entrance tidal stream runs at strongest at times of High and Low water and ebb stream may at times exceed 9 knots. Care must be exercised to keep Westward off tidal stream in the Fairway whilst awaiting or embarking pilot.

Low-powered vessels and vessels over 34 ft. draught are requested to radio Pilot vessel as to a suitable time to arrive at Pilot Boarding Ground as their passage through the Entrance is governed by tidal stream.
MAX. SIZE: The maximum size draught restriction at Port Phillip Heads is 38 ft.; however, current depths of internal channels limits the maximum draught of vessels to 36 ft.
HEALTH: Pratique procedures and required information should be sought from the Department of Shipping and Transport, 35 Elizabeth Street, Melbourne, 3000. Also see "Melbourne".
RADIO: "Melbourne Radio" (Call sign VIM) station through which vessels can best route ETA cables. Cables to Pilotage establishment should be addressed "Seapilots" Melbourne.

VHF:
1. PORT OPERATIONS AND INFORMATION SERVICE
Service co-ordinates flow of shipping traffic within Port of Sydney to ensure expeditious movement of vessels in safety, and provides information to Pilots and Exempt Masters as aid to safe navigation in Port.
Maritime VHF Radio Service operated by Board for Ports of Sydney, Newcastle, Botany Bay and Port Kembla is integrated into Port Operations and Information Service.
Service manned continuously on watch-keeping basis, each watch being under control of qualified Master Mariner, known as Port Operations Officer, who is responsible to Harbour Master.
Rules to be observed by shipping contained in Port Operations and Information Service Manual, and all shipping using port will be required to observe these rules.
Instructions concerning Maritime VHF Radio Service have been revised to fit in with Port Operations and Information Service. The revised instructions also contained in Port Operations and Information Service Manual.
Copies of Manual may be obtained, on request from the Harbour Master's office.
2. SHORE STATIONS: (Call sign "Harbour Control".)
Interconnected system of stations handling messages for Signal Stations at Newcastle, Sydney and Port Kembla operated from central control using call sign "Harbour Control", will exercise control of service and provide facilities indicated below for area from 50 miles North of Newcastle to 50 miles South of Port Kembla and a distance of 50 miles to seaward.
Ships requested maintain watch on Channel 16 when in this area. If Channel 16 in use for distress, urgency or safety communications, Shore Station will maintain continuous watch on Channel 12 and ships may establish contact with Shore Station on this channel.
On the hour "Harbour Control" will give identification call followed by any general messages or navigational warnings.
On request Shore Station will provide following services:
(*a*) Navigational information.
(*b*) Locking weather reports from Signal Stations.
(*c*) Booking of ship's telephones, shore power supply, temporary lighting and other port services provided by Maritime Services Board of N.S.W.
(*d*) In addition, Shore Station on request from Pilots or Exempt Masters, allocates a channel for use between ships and attendant tugs during berthing operations.
Radiotelephone Discipline. To ensure that the full advantage of efficient communications is achieved, strict radio discipline and attention to procedure, particularly on the Safety and Calling Channel No. 16 is imperative. Messages must be as brief as possible.
3. ADVICE OF ETA – SYDNEY AND NEWCASTLE HARBOURS
Vessels proceeding to Sydney and Newcastle required advise either Shore Station, "Harbour Control" (per medium of Maritime VHF Radio) or "Marboard" (per medium of the coastal radio service) of estimated time of arrival at entrance to port concerned at least two hours prior to such time.
"Harbour Control" maintains continuous watch on Channel 16 for ships reporting ETA.
4. CHANNELS IN USE

Channel No.	*Title*	*Use*
16	Safety and Calling	Initial contact or emergency use. The calling entry to either Port Information, Port Operation or Intership channels.
12	Port Operation (Port information)	Primarily for ships passing and receiving navigational information to and from shore Station ("Harbour Control").
6	Intership	1. For intership communications. 2. Working channel for Pilot Vessels. 3. Allotted by "Harbour Control" for temporary use between ships and attendant tugs at *Port Kembla* on request of Pilot or exempt Master.
8	Berthing Operations	1. Allocated by "Harbour Control" upon request by Pilot or exempt Master for use in *Sydney Harbour* between ships and tugs during berthing operations.
13	Berthing Operations	1. Allocated by "Harbour Control" upon request by Pilot or exempt Master for use in *Newcastle harbour* between ships and tugs during berthing operations. 2. Allocated by "Harbour Control" on request of Pilot or exempt Master for preliminary instruction to tugs prior to commencement of Berthing Operations (Sydney only).
14	Berthing Operations	1. Allocated by "Harbour Control" upon request by Pilot or exempt Master for use in *Botany Bay* between ships and tugs during berthing operations. 2. Allocated by "Harbour Control" for Naval berthing operations and other special purposes.

5. DISTRESS AND EMERGENCY
In the case of fire, explosion, loss of life, sinking, collision, or such emergency, vessels should immediately call on Channel 16 (Safety and Calling) using international R/T distress signal "Mayday" or urgency signal "Pan", followed by name of vessel and signal letters, giving its position and type of emergency and if assistance required.
Other vessels on hearing a distress message must cease any transmissions immediately.
The signal "Mayday" should be used only when ship sending it is threatened by grave and imminent danger and requires immediate assistance.
The signal "Pan" (pronounced Panne) should be used by a station having a very urgent message to transmit concerning its safety, or that of another ship, or of some person on board or in sight.

TORRES STRAIT

Maximum draft for vessels piloted through Torres Strait is 39 ft. subject to height of tide and keel clearance required by Pilots.

Information from Australian Notices to Mariners is quoted hereunder:

(*a*) "*Gannet Passage.* This is the controlling area for traversing Torres Strait and the whole barrier reef. The latest survey shows an available depth of 5 fathoms 3 ft. in a passage 2·0 cables in width and 6·0 cables in length with Goods Island light bearing 086° 30′. Two light buoys mark the N. and S. sides of the passage. 'N' 305½° 2·59 miles and 'S' 299½° 2·59 miles from Booby Island light respectively

Mean HHW at Booby Island is 11·9 ft. and the mean LLW is 3·1 ft.

(*b*) "*Prince of Wales Channel.* Most of the water along the recommended track is between 6 fathoms 2 ft. and 7 fathoms." (A.H. 70/116, 25th Nov. 1966.)

"The Queensland Coast and Torres Strait Pilot Service will in future pilot vessels through Torres Strait and the inner route with a minimum keel clearance of 3 ft. (1 metre when the charts are changed to the metric system) in the Southern trade winds season from April 15th to December 14th inclusive, and with a minimum under keel clearance of 5 ft. (1½ metres) in the North-west trade winds season from 15th December to 14th April inclusive. The maximum draft at no time to exceed 39 ft. Masters of deep draft vessels are advised that reduction of speed may be necessary when traversing the above-mentioned area". (N. to M. No. 149, 23rd Jan. 1970.)

LWOST for 1,700 ft. from inshore end and 28 ft. at outer, berth length 600 ft.

DENSITY/TIDES: Specific gravity of water approximately 1028 to 1035 therefore vessels must load light. Considerable variation rise

and fall of tide, which approximately 5 to 6 ft. Spring tides 8 to 9 ft. In northern part of Spencer Gulf most marked weather effects on tide occur with passage of deep depression across Southern Ocean, on track from Cape Leeuwin to Tasmania. With onset of Northerly winds, as barometer starts falling, tides are below prediction; but as wind backs to North-west increase in level occurs, with gradual build up if wind remains steady. A strong gusty North-west wind, with such depression, backing to West-south-west at about time of low water, will cause storm surge of maximum amplitude, and heights may be expected from 2 ft. to 5 ft. above prediction. High levels will continue until wind backs and barometer starts to rise; but unless depression's passage is blocked wind easily backs rapidly to South-south-east within 12 hours, and with rapidly rising barometer tides return to normal (or below) in about that time.

PILOTAGE: Presently no signal station and Masters requested telegraph ETA at least 48 hours in advance with subsequent amendments as necessary to agents, who will inform Pilots. Pilot normally boards in approximate position one mile North of Western end of Hog Island (Paradise Island). When port closed due bad weather a red flag will be displayed at Western end of Hog Island by day and red light in same location at night. Vessels may anchor in vicinity of pilot station where depth of water allows. There are four Pilots and boats are clearly marked "Pilot" and display international pilotage signals. Pilots are accustomed boarding by pilot ladder.

ANCHORAGES: Anchorage just off Nassau Harbour extends over area North and East of Western point of Hog Island to approximately half a mile off shore, where it becomes too deep.

ENTRY RESTRICTIONS: No restrictions apart from adverse weather conditions or excessive draft which may make it advisable to enter on certain state of tide.

MAX. SIZE: No restriction length or breadth but safe draft is considered 35 ft. Largest vessel to enter harbour to date gross tons 34,172, length 715 ft., draft 31 ft. 7 in. Safe draft cargo pier 25 ft.

HEALTH: Provided vessel healthy Customs grant free pratique on receipt international declaration of health form completed and signed. If any suspected disease or fever on board Master should advise Agent by cable, who will inform appropriate authorities and advise Master clearance procedure. Once vessel obtained free pratique in one Bahamas Port and proceeds another there are no further procedures at next port.

RADIO: Communications can be directed through Radio Nassau on following frequencies:

W/T	Call letters	ZFR1	Transmitting	5320 K/cs.
			Receiving	5300 K/cs.
		ZFR3	Transmitting	4031 K/cs.
			Receiving	3695 K/cs.
R/T	Call letters	VPN2	Transmitting	2558 K/cs.
			Receiving	2198 K/cs.
		VPN3	Distress	2182 K/cs.

Agents normally use this station when sending messages.

TUGS: Tugs normally join vessel at entrance to turning basin. Usual for vessel to provide tow line.

BERTHING: No specific requirements but due congestion essential that Agent is kept well informed of ETA.

BRIDGES: No bridges affecting entrance to main berths.

STEVEDORES: Master should include in ETA number gangs required and tons per hatch for discharge, as shipping documents do not always arrive in advance. Discharge rate approximately 10 tons per hour.

MEDICAL: Full medical services available. In serious cases requiring immediate attention Agent should be advised so that doctor may board on arrival.

TANKERS: Limited facilities provided for tankers at Clifton Pier on South-west side of Island. Vessels moor to dolphins off shore and discharge through submarine pipe line. Vessels proceeding Clifton Pier (unless otherwise advised) should pick up pilot off Nassau and clear customs. Only oil imports are for domestic purposes and there is no oil refinery. Maximum draft Clifton Pier 36 ft.

DENSITY: 1025.
FRESH WATER: Available Prince George Wharf on old section but not yet provided on new deep water pier recently completed. Rate 10–15 tons per hour from hose connections on dock. Public Water Department supplies hose and connections. Price approximately 0·57 c. per ton depending on amount required. No water barges available.
FUEL: No fuelling facilities available with exception of small quantities diesel which may be delivered by road tanker. Nearest bunkering station Freeport, Grand Bahama.
PORT FIRE PRECAUTIONS: No special requirements. Vessels carrying explosives should notify Agent in advance so that Authorities may be advised.
FUTURE PORT DEVELOPMENTS: New cargo terminal constructed on Arawak Cay which is an Artificial Island produced when entrance channel and turning basin were dredged. Is situated on Western side of harbour with depth alongside 26 ft. Roll-on and roll-off facilities will also be available.
GANGWAY/DECK WATCHMEN: Vessel to supply own watchman if required.
OPENING/CLOSING HATCHES: Roller hatches usually opened and closed by vessel's crew but older wooden hatches and tarpaulins handled by stevedores.
SHIP CERTIFICATES: Only certificate normally required for inspection is Derat. Certificate.
CUSTOMS ALLOWANCE: Quantity should be reasonably based on individual requirement and length of stay in port. Actual amount is at discretion of Customs Officer clearing vessel.

MAX. SIZE: Average size of ships handled range between 450 ft. and 550 ft. in length and having breadths of between 60 ft. and 70 ft. (Also see "Pilotage".)
HEALTH: Port Health Authorities board vessel on arrival at berth alongside Deep Water Jetty and grant pratique.
RADIO: Vessels intending call Mina Sulman should advise Agents via Bahrain Radio, call sign GNV, their ETA, draft, hatch distribution and any other requirements, giving as much notice as possible.
TUGS: Will usually join vessel between Nos. 7 and 8 Channel Buoys during final approach to Deep Water Jetty.
BERTHING: Arrangements are made with Harbour Master by ship's Agents for necessary berthing as required.
VHF: Vessels equipped with VHF should, when within range, contact Mina Sulman Harbour Office on Channels 6 or 16 which have frequencies of 156·30 and 156·80 respectively.
MEDICAL: Upon application to ship's Agent, the medical examination of crew members can be arranged. Personnel will either be sent to private doctor or to Public Health Department as circumstances dictate. Serious cases will be referred to government hospital doctor.
FRESH WATER: Well water available and can be delivered on berths at Deep Water Jetty at rate of approximately 20 tons per hour per hose.
BUNKERS: Bunkers available Mina Sulman and provided by barge of 8,700 barrels capacity, which is owned by the Bahrain Petroleum Company. All usual grades of commercial oil available.
GANGWAY/DECK WATCHMEN: Not customary to employ deck watchman.
IDENTIFICATION CARDS: These cards necessary for any crew member wishing to proceed ashore. Identification card is surrendered to Immigration Authorities at main entrance to port in return of a pass. On return to port, the pass is surrendered and seaman's identity card returned to him.
REPAIRS: Good facilities for both hull and engine repairs which can be effected by the two principal slipway companies. Facilities exist to receive single vessels of 1,000 tons deadweight, and a tower crane capable of a 15 tons lift at 40 ft.
REPATRIATION: It is possible for whole crews or just individual crew members to join or leave vessels at Bahrain. As much notice as possible should be given to Agents to enable arrangements to be made for their reception, hotel accommodation and transportation.
AIRPORT: Bahrain International Airport regularly served by main international airlines, with frequent services to Europe, U.S.A., Far East, and Australia. Also frequent inter-gulf flights.
TIME: GMT plus 4 hours.
OFFICIAL HOLIDAYS: Public holidays in accordance with Muslim calendar as follows: 3 days during Ied al Fittr; 3 days during Ied Al Adha; 3 days during Muharram; 12th R'Awal Prophet's Birthday; Accession of H.H. The Ruler, 16th December; 25th December; 1st January. Apart from 6 days, two during each of the religious anniversaries, all holidays will be worked in the port as on Fridays, the Sabbath day.
TELEPHONES: Can be provided at each berth on Deep Water Jetty at charge of BD's 1,200 fils per day per phone (approx.). In case of emergency, dial 79 for ambulance; 77 for Duty Police Officer; 75 for Fire Brigade.
SERVICES: Bahrain well provided for services including repairs, stores and supplies, fumigation surveys, adjustments, radar and gyro compas repairs, professional diving, and underwater brushing.
SHORE LEAVE: Permitted.
AUTHORITY: Director General of Customs and Ports, Bahrain Government. Port Office, POB 453, Bahrain, Arabian Gulf.
AGENT: See "Sitra".

SITRA: 26 09 N. 50.40 E.

OPERATORS: The Bahrain Petroleum Co. Ltd., Awali, Bahrain. Cables: "Bapco Bahrain".
DOCUMENTS: Crew list 3 copies. Passenger list 3 copies. Customs Declaration 2 copies. Health Declaration 2 copies. Log Book for Inspection by Customs Officers.
PILOTAGE: Not normally provided between Bahrain Light Vessel and Sitra Anchorage. For vessels navigating Sitra Deep Water Channel with drafts in excess 40 ft. Company will, upon request, arrange pilotage assistance where possible. Mooring Master boards vessel on arrival Sitra Beacon if berth available. If pilot does not approach vessel arriving, vessel should anchor in anchorage. Freighters will not be berthed until Agent has given pratique. Pilot boat, a tug or launch exhibiting International pilot flag by day and lights by night.

APPROACHES: Without accepting any responsibility, following suggestions made by Bapco marine staff, for Masters not familiar with approaches to Sitra. Courses inbound will depend upon draft. Vessels wishing utilise "Deep Water Departure Channel" should follow reciprocal of courses described for "Deep-water departure Channel". Vessels with drafts less than 30 ft. requested to *Keep Clear* of this channel, and use "Sitra Inward" buoy as follows.

(a) *Under 30 ft. Draft*

(i) From position (Lat. 26° 27.8′ N. Long. 51° 00′ E) 2½ miles S.E. of No. 3 Beacon (Lat. 26° 28.5′ N. Long. 50° 57.4′ E) course should be set to position ¾ mile North of "Sitra Inward" buoy (Lat. 26° 21.2′ N. Long. 50° 49.7′ E), leaving "Caisson Wreck" buoy (Lat. 26° 24.2′ N. Long. 50° 52.7′ E) at least ½ mile to starboard.

(ii) From position ¾ mile North of "Sitra Inward" buoy course should be set towards No. 16 buoy (Lat. 26° 12.9′ N. Long. 50° 46.3′ E).

(iii) When vessel has reached a position with No. 16 buoy, 1½ miles ahead, course can be adjusted to due South, passing westwards of "Vidal" buoy (Lat. 26° 14.1′ N. Long. 50° 47.2′ E) until "Sitra Beacon" bears due West. Course can then be altered to pass South of No. 18 buoy (Lat. 26° 10.3′ N. Long. 50° 43.9′ E), and thence to Sitra Anchorage, thus keeping clear of the deep water channel.

(iv) "Sitra Beacon" located at South end of North Shoals (see "Pilotage" and "Anchorage").

(b) *Deep-water departure Channel*

(i) Following "Alteration of Course" Positions, based upon radius of turn of 5 cables. This may necessitate an increase in Engine Revolutions, together with Full Helm, in some vessels.

(ii) The Company Mooring Master unberthing the vessel will normally leave vessel after having crossed Sitra Middle Ground Bar; marked by small Pillar buoys on the 43-ft. contour, North and South; and with the vessel proceeding to pass 2 cables South of "Sitra Beacon" (Fl. 6 sec.) and close North of No. 18 Buoy (Qk. Fl. R.).

(iii) When No. 18 Buoy comes abeam, course should be altered to 090° (T) which will bring Sitra Beacon dead astern, bearing 270° (T).

(iv) As No. 27 Buoy (Qk. Fl. W.) comes abeam to port, course should be altered to 022° (T), until buoys 21, 23 and 25 are sighted in line, bearing 344° (T), whence course should be altered to 344° (T).

(v) On course 344° (T) Buoy No. 25 (Fl. 5 sec.) and Buoy No. 23 (Int. Qk. Fl.) will be passed close on the port side and Buoy No. 16 (Fl. R. 6 sec.) a "Middle Ground Mark" on the starboard side.

(vi) As No. 21 Buoy (Gp. Fl. (3) 5 sec.) comes abeam to port, course should be altered to 015° (T), which should bring Buoy No. 12 dead ahead and Buoy No. 21 dead astern. The bearings of these buoys should be watched closely to gauge and correct for cross set which is sometimes quite strong on this course and the next. On this course No. 14 buoy (Fl. R. 10 sec.) will be left to starboard.

(vii) On No. 19 Buoy (Fl. 3 sec.) coming abeam, course should be altered to 002° (T) bringing Buoy No. 15 (Occ. 5 sec.) dead ahead. Buoy No. 12 (Fl. R. 2 sec.) will then be left close to starboard and No. 17 Buoy (Qk. Fl. W.) will be left to port.

(viii) In order to pass over a cable eastwards of Buoy No. 15, course should be altered to 016° (T) as Buoy No. 10 (Gp. Fl. (3) R. 10 sec.) comes abeam to starboard and then altered to 356° (T) as Buoy No. 15 comes abeam to port. This course would pass 3½ cables West of Bahrain Approach Beacon (Gp. Fl. (2) W. 10 sec.). It may be advisable to reduce engine revolutions shortly after steadying on course 356° (T), in order to be able to increase if required to provide better steerage on rounding the beacon.

(ix) When the Bahrain Approach Beacon bears 051° (T) course should then be altered to 051° (T). As this heading is approached, it should be found that Buoys No. 8 (Fl. R. 2 sec.) and No. 6 (Gp. Fl. (3) R. 6 sec.) are in line to starboard, as Bahrain Approach Beacon comes abeam at 2½ cables, and then should commence to open. Buoys No. 13 (Int. Qk. Fl.) and No. 11 (Qk. Fl.) are parallel to the course on the port side of the vessel, give clearance on the 43 ft. patches and give the extent of the bar which should be traversed at Slow Speed.

(x) On No. 11 Buoy coming abeam to port, course should be altered to 054° (T) passing between No. 9 Buoy (Fl. 10 sec.) and Buoy No. 4 (Qk. Fl. R.), followed by Buoy No. 7 (Fl. 5 sec.) to port.

(xi) When Buoy No. 2 (Gp. Fl. (2) R. 10 sec.) bears East, course should be altered to 071° (T) to pass close South of Buoy No. 5 (Fl. 3 secs.).

(xii) Buoy No. 5 should be close abeam to port, when the course is altered to 057° (T) and speed reduced to cross the spit which extends in a southerly direction from No. 3 Beacon (Fl. 6 sec.) in a minimum depth of 44 ft. at Chart Datum.

(xiii) When Buoy No. 1 (Fl. 1 sec.) bears 040° (T), course should be altered to 040° (T) bringing the Bahrain Light Vessel Gp. Fl. (3) 20 sec.) on the starboard bow. One and a half miles after Buoy No. 1 has been left to port, the minimum depth of water is greater than 50 ft., and it is safe to go Full Ahead.

(xiv) Masters can expect to have to make adjustments from time to time, to the recommended courses, due to set. Effects of tide and current should be watched for at all times.

ANCHORAGE: Within Port of Sitra vessels must anchor North of imaginary line between Sitra Beacon and Sitra middle ground outer buoy, order keep departure channel clear. Good holding ground in about 8 fathoms. Vessels *must not* obstruct fairway or approaches to wharves by anchoring South of above-mentioned imaginary line. Northern limit of anchorage marked by North Shoals Beacon on 5-fathom line. Due presence of pipes and power lines, anchoring or use of anchors prohibited in vicinity of or between No. 1 (Island) Wharf and No. 2 wharf except upon advice of Company Mooring Master.

ENTRY RESTRICTIONS: Berthing carried out night and day Draft restrictions see "Size of Vessel". Merchant vessels carrying explosives not permitted enter Sitra Anchorage, unless permission has been granted and anchorage allocated. Such vessels advised anchor in position 2 miles due East of South Shoals Beacon.

SIZE OF VESSEL: No. 1 (Island) Wharf overall length 923 ft., consisting of two berths (Nos. 5 & 6), which normally accommodate vessels up to 900 ft. LOA. Maximum draft 44 ft. No. 2 (T-Head) Wharf has continuous overall length 1,666½ ft. Vessels up to 820 ft. normally accommodated on two outer berths (Nos. 1 & 2), but this flexible depending remaining Wharf frontage after first vessel berthed. Maximum draft 43 ft. Two inside berths at No. 2 (T-Head) Wharf, berths No. 3 & 4, are divided by approach trestle and restricted to overall length 560 and 550 ft. respectively. Maximum drafts up to 32 ft. Coastal tanker wharf is single berth and can accommodate up to 240 ft. LOA. Maximum draft 16 ft. Deep-water channel between Sitra Anchorage and Bahrain Light Vessel has minimum depth in shoaler areas of 44 ft. Chart Datum. This permits unrestricted use of channel for vessels drawing up to 40 ft. Drafts up to 44 ft. permitted by utilisation of tidal range over shoaler areas. Additional channel for drafts up to 30 ft. provided to south-east of main deep-water channel. Purpose of this channel is to keep main deep-water channel free for deep-drafted vessels.

Masters who intend utilise Deep Water Departure Channel with drafts in excess of 40 ft. are requested advise Port Captain, Sitra, not later than 48 hours in advance.

Masters of departing vessels requiring utilise rise of tide, to cross bar N.E. of Bahrain Approach Beacon, and that South of No. 3 Beacon should be underway, passing Sitra Beacon not later than *3½ hours before* next predicted *High Water Mina Sulman*, or at a time not later than that which would allow vessels to make the passage between Bahrain Approach Beacon and No. 3 Beacon at reduced speed of 8 knots, having full benefit of tide, and passing first beacon *1½ hours* before predicted *High Water Mina Sulman*.

HEALTH: Bahrain Port Health Regulations based on International Sanitary Regulations adopted by World Health Organisation May 1951. Quarantine signals must be prominently displayed approaching Sitra. Pratique normally granted by Bahrain Government Port Health Officer or Agents' representatives. If neither available, Company Mooring Master also authorised grant Pratique to healthy tankers scheduled for immediate berthing.

RADIO: All radio communications routed through "Cable & Wireless", Manama Bahrain. Cable address "Bapcoship Bahrain" through Bahrain Radio Station Call Sign "GNV". Vessels requested keep "Bapcoship Bahrain" fully advised estimated times of arrival and provide "Bapcoship Bahrain" with ETA, arrival draft and draft to which vessel loading, not later than 48 hours steaming time from Sitra. Times should be quoted and shown as being GMT.

BERTHING: Vessels required be sufficiently ballasted with clean ballast water before coming alongside. Minimum tanker drafts normally acceptable are:

16,000 DWT to 20,000 DWT 12′F 20′A
20,000 DWT to 30,000 DWT 14′F 22′A
30,000 DWT to 40,000 DWT 15′F 24′A
40,000 DWT to 50,000 DWT 16′F 25′A
50,000 DWT to 60,000 DWT 19′F 26′A
60,000 DWT to 70,000 DWT 21′F 27′A
70,000 DWT to 90,000 DWT 23′F 28′A
Over 90,000 DWT 25′F 29′A

Mooring Masters may decline berth vessels if not sufficiently ballasted. Berthing operations conducted on 24-hour basis at discretion

of Mooring Master; wind, weather, tide and other circumstances permitting. Mooring Masters will decline berth vessels if not properly equipped with satisfactory mooring lines, or if deck appliances inoperable, or if steering gear, telegraphs and whistles not in an efficient condition. Anchors and cables should be cleared ready for letting go. Master should notify Mooring Master of any defects or peculiarities pertaining to vessel. Masters requested maintain continuous watch on VHF for berthing instructions. Vessels must be equipped with *at least* five lines forward and four lines aft. These lines must be sufficient length enable moorings to be "doubled up" in bad weather. Method of mooring at discretion of Mooring Master.

TUGS: Tugs normally join in Sitra Anchorage after pilot has boarded. Tugs lines used during berthing operations. During unberthing ship's lines used for forward tug, and tug's line for after tug. Mooring Master will decide number of tugs.

MEDICAL: Advance notice to Agents preferable. Good hospital and medical facilities.

RESIDUES: Limited slop tank facilities for oily residues at all berths.

DENSITY: Average 1,030 oz. cu. ft.

FRESH WATER: Limited quantities of well-water available at Sitra Wharves. Is saline and mainly used for washing purposes, although can be used for drinking. Delivery rate about 15 tons per hour. Nominal delivery charge. Vessels berthed for water only in emergency and additional docking charge. Water by lighter available Sitra Anchorage by arrangement with Agents.

FUEL: Bunkers available all berths and by Lighter. Fuel Oil maximum 1,500 secs. Redwood. Marine Diesel. Diesel Gasoil. Vessels should give at least 24 hours notice.

FIRE PRECAUTIONS: Vessel receives full details regulations on berthing. Vessels must have firewires, and engines must not be immobilised whilst alongside.

DEVELOPMENTS: Aluminium terminal under construction for bulk carriers up to 35 ft. draft.

GANGWAY/DECK WATCHMEN: An officer must be on deck during all loading or discharging operations. A deck watch must be maintained for moorings and hose connections.

TOBACCO ALLOWANCE: No restriction.

WINE AND/OR SPIRIT ALLOWANCE: Ship's requirements. Bond sealed but can be re-opened upon application. Liquor trafficking between vessels alongside Wharves or between vessels and shore strictly prohibited.

CREW IDENTIFICATION CARDS: Discharge Book or Passport to be deposited with Immigration when going ashore.

CONSULS: British Political Agent. United States Consul in Ras Tanura can come to Bahrain on request through Agents.

REPAIRS: Local marine repair companies can undertake limited repairs of general nature.

REPATRIATION: Facilities for crew change and repatriation by sea or air.

AIRPORT: Served by regular Airlines located about 15 miles from Sitra.

TIME: GMT+4 hours. No changes during year.

HOLIDAYS: Numerous holidays do not affect operation of Port, which operates 24 hours a day, seven days a week. Local Sabbath is Friday.

TELEPHONES: No facilities for placing telephones on Ships.

NAVIGATION: Port Captain will be available for advice concerning navigation of channel.

SHORE LEAVE: Permitted, but consult Agents.

PORT REGULATIONS: Port Captain should be contacted for any queries not covered by lists of regulations provided on arrival.

REPAIRS: Minor repairs can be carried out by Central Foundry Ltd.

DRY DOCK: One small dry dock length 240 ft., breadth 46 ft., depth 13 ft. Lifting capacity 800 tons.

REPATRIATION: Facilities for crew changes available.

AIRPORT: Served by regular lines. Distance from harbour about 13 miles. Island is served by 8 weekly flights from Europe, and 39 weekly flights from N. America.

TIME: GMT Minus 4 hours (permanent). No alteration in clocks during the year.

GENERAL: Bridgetown dredged to minimum depth of 32 ft. LWOST, and well-buoyed fairway gives easy access to mouth of harbour which open to the North. A breakwater with jointed arm runs roughly South then South-east to connect with a cross berth running East, which in turn meets quay wall running North. All roads and apron surface 8 to 10 ft. above sea level. Mean tidal variation about 2 ft. 6 in. Quay wall 1,200 ft. long has two transit sheds each 50 ft. away from wall face. One shed 475 ft.×90 ft., and the other 425 ft.×90 ft., making total floor area 81,000 sq. ft. They are both 24 ft. high at eaves. A third smaller transit shed lies on cross berth

and has floor area 21,600 sq. ft. with height of 18 ft. at eaves. Approximately 6,000 sq. ft. of South-western end of this shed allocated for Customs examination of incoming passengers, and space in this area also provided for tourist information bureau and duty-free shop where liquor, handicrafts and other items available duty free. Inland and East of the two large transit sheds is stacking area with approximately a quarter of a million sq. ft. of surface and further to East of this lies another similar area reserved for further development.

Outer end of breakwater is 1,650 ft. long, used mainly for passenger ships. However, when transit shed berths are occupied it is possible to work cargo ships on this area which approximately 30 ft. wide, by using short wheel-base trailers from breakwater arm to transit sheds. When passenger vessels berthed alongside breakwater a service of small mini-buses is operated. Inner arm of breakwater just over 980 ft. long carries three sugar-loading towers capable of transferring sugar into vessels at a total rate of approximately 500 tons per hour. Towers connected by conveyor-belt system to bulk sugar located in South and East of stacking area and capable of holding about 80,000 tons sugar. Adjacent to sugar store are tanks for fancy and vacuum pan molasses. Underground pipes lead from these tanks to delivery points on breakwater adjacent to sugar-loading towers.

Cross berth of harbour 500 ft. long erected on concrete piles with wave slope on south side where surging into harbour dissipated. All berths in harbour equipped deliver fuel in bulk and following pumping rates possible:

Bunker "C"	6,000 barrels per hour
Marine diesel	4,000 barrels per hour
Marine diesel medium	1,000 barrels per hour
Intermediate fuel oil	600 barrels per hour

All berths equipped with telephone, outlets and connections for delivery of fresh water.

Cargo handling is by ship's gear to apron where removed by fork-lift trucks to transit sheds. Deliveries made to the rear of the shed where loading ramp at platform height provided. One mobile crane 5 tons maximum capacity and one 20 tons available. Management must be notified prior to acceptance any lift in excess 5 tons.

PILOTAGE: Access to the river Scheldt via Wielingen channel (west), Belgian sea-pilot cutter near buoy A1 (51.22 N. 2.53 E.). Black hull with a white number on bow, yellow funnel with black top, red flag with white letter P. Via Oostgat channel (North), Dutch sea-pilot cutter near Middelsteenbank buoy (51.39.30 N. 3.19 E.), blue flag with white letter L. Signals P or G of international code for both channels. VHF contact Channel 6. At Flushing Roads, Pilot disembarks and river pilot boards vessel until reaching locks where dock-pilot takes over until moored in berth. In case of suspension due heavy weather, Flushing pilot station can be contacted on VHF Channel 14.

DEEP-SEA PILOTAGE: See "Dover" or "Brixham".

ANCHORAGE: There is sufficient anchorage for deeply loaded vessels at all times around the A1 buoy, and for smaller vessels around the MSB buoy. Unlimited possibilities for anchoring at Flushing roads. Limited at Middelgat.

RESTRICTIONS: No restriction on night entry except for tankers destined for Petrol Pier South, or Hemiksem, which are not allowed to pass during darkness.

MAX. SIZE: Ships up to 820 ft. length, 125 ft. beam and 36 ft. 6 in. to 42 ft. draft can enter subject to tide and weather conditions. ETA required at least 24 hours in advance. Any vessel in excess of above dimensions should get prior approval.

HEALTH: No special requirements to obtain free pratique. Vaccination Certificates must be valid. Recent Derat Certificate required. In case of contagious illness aboard, advise Agent.

RADIO: Cable agents ETA Flushing, maximum fresh water draft, and requirements via Ostend Radio–OST or OSU (radio telephone). Radio Antwerp–OSA operates only on medium frequency.

TUGS: Tugs ordered at Pilot's request according to weather conditions and tide. Generally at Liefkenshoek for Van Cauwelaert and Baudouin locks and between N. Ballast and Saaftingen for Zandvliet lock. For supertankers, tugs may join at Bath. Ship's lines are usually used for towage. If ship asks for tug lines there will be a charge of 600 Fr. per line.

BERTHING: Deeply loaded vessels normally moor two hours before high water and two hours after high water.

STEVEDORES: To enable agents to order gangs, important to obtain in good time accurate ETA Flushing. Latest time to order gangs; normal day-shift 0800/1600 before 0630 same day; first shift 0600/1400 before 1600 previous day; Monday from 0600/1400 before 1600 previous Friday. Failure to give exact ETA may result in losing 12/24 hours also cost idle time gangs. No work performed Saturday and Sunday unless overtime paid.

RADAR/VHF: Chain Stations from Saaftingen to Kruisschans Roads, but radar only to help pilot determine position. In fog vessels do not normally proceed. Masters can keep close contact day and night on VHF; pilot cutter; Channel 6 (156·30 mHz). Flushing Radio; Channel 14 (156·30 mHz). Kruisschans Radio; Channel 12 (156·60 mHz). Vessels not equipped with VHF can rent a portable portaphone.

MEDICAL: Ample medical attendance in the port and hospital facilities available.

TANKERS: Five major tanker berths accepting vessels up to 42 ft. draft.

SIBP: hoses all 12 in., slop discharge possible for vessels discharging at their installation.

Esso: hoses 10–12 in, 14–16 in. hydraulic couplings, slop discharge possible when berth is free.

Albatross: hoses 24 in., slop discharge possible but vessel to shift. Max. size allowed 35,000 dwt.

Petroleum Pier South: Max. draft 31 ft. 6 in. for length 580 m.; max. draft 25 ft. for length 620 m. One hose 16 in., no slop discharge.

DENSITY: Fresh water in docks, slightly brackish in the river.

FRESH WATER: All berths supplied by shore connections.

FUEL: All grades available. Minimum 24 hours advance notice preferred.

FIRE PRECAUTIONS: No floating objects allowed alongside during loading/discharge/ballasting.

DEVELOPMENTS: The navigable channel and estuary are dredged continuously, draft of 45 ft. expected in 1972/1973. Brazil

ANGRA DOS REIS: 23.01 S. 44.18 W.

DOCUMENTS: See "Rio de Janeiro".
PILOTAGE: When requested by the Agents, a pilot launch meets incoming ships off the automatic lighthouses of Itacuatiba and the Lage Branca, depending on whether the ships approach from the East or West, respectively.
ANCHORAGES: In the Bay of Ilha Grande; approximately midway between the ports of Rio de Janeiro and Santos; offering excellent anchorages, amongst which may be mentioned: Enseada das Estrêlas, Enseada do Abraão, Enseada das Palmas, Enseada Sitio Forte, and Enseada de Araçatiba.
RESTRICTIONS: The Bay of Ilha Grande possesses two entrances, from the East and the West, permitting immediate access to the Port of Angra dos Reis from the direction of Rio de Janeiro or the Port of Santos, without any change of course. Both access channels are adequately marked, enabling ships of up to 14 metres draft to navigate in complete safety as far as the port basin about one mile from the wharf, where they may lie at anchor and take on cargo from tenders tied up alongside. There is another basin with a mud bottom even nearer the wharf, permitting anchorage and docking manoeuvres for ships of up to 10 metres draft.
HEALTH: Port doctor visits all ships on arrival and requires Maritime Declaration of Health, Deratisation Certificate, 2 Crew Lists. Vessels from another Brazilian port automatically receive free pratique and should not fly Quarantine Flag. If suspected disease or fever on board it is advisable to cable Agent before arrival.
TUGS: Available: 4 tugs of up to 600 h.p.
BERTHING: A wharf 1,300 ft. in length, with 1,050 ft. available for tying-up. The wharf is being extended 600 ft. and will be dredged the entire length of the quay so as to receive ships of up to 10 metres draft.
MEDICAL: All facilities available. If doctor needed on arrival or making emergency call to land sick persons, cable ETA 12 hours before arrival.
FRESH WATER: At present furnished by the port, at the rate of 15 tons per hour, from the city's system.
FUEL: Not available.
REPAIRS: Various mechanical workshops for the execution of shipboard repairs, equipped with lathes, presses, planes, electric and acetylene welding, drills, power-saws and grindstones, etc. The big shipyards of Verolme are situated in the Bay of Jacuecanga, near the port of Angra.
CUSTOMS ALLOWANCES: For each crew member, 2 cartons of cigarettes and one bottle wine or spirits.
WATCHMEN: Gangway watchmen strongly recommended for any vessels working cargo with shore labour on board. Watchmen from shore not necessary for coal, iron ore and oil cargoes.
CONSULS: There are no Consuls in this port. They are situated in Rio de Janeiro.
TIME: The local time is GMT minus 3 hours.
HOLIDAYS: 1st January; 1st May; 29th June; 7th September; 8th December; 25th December; 31st December.
AUTHORITY: Capitania dos Portos em Angra dos Reis.

BELEM: 1.25 S. 48.25 W.

DOCUMENTS:
6 copies of Crew List.
6 copies of Passenger List.
3 copies of Stores List.
2 copies Crew Declaration.
2 copies each of Information sheets, containing information required by (*a*) Maritime Police, (*b*) Custom's Authorities, (*c*) Port Health Authorities.

Manifests, etc., issued in sealed envelope addressed to the Custom's by the Brazilian Authorities in port of loading. Vessels also issued with a document to be handed to Custom's commencing with first port of loading, and each port thereafter, for each port of call in Brazil.
PILOTAGE: Pilot usually ordered through vessel's Belem Agent, ETA at least 72 hours in advance and confirming not less than 24 hours prior to arrival. Vessels can apply direct to pilot station (on condition that local radio station is operating). Telegraphic address "Praticagem – Salinopolis", and call sign of Salinopolis (or Salinas) radio station is PPL. Pilot boards at a point 7 miles North of Salinas lighthouse; a red motor-launch is used. Launch carries a red flag with a black P; it also has a black P painted on each side and on cabin roof. If pilot boat not in position on arrival of vessel, position 7 miles North of the light is a safe anchorage. Masters who do not know area should approach Salinas with caution.
BERTHING: Berthing alongside 5,000 ft. of quay governed by draft, and maximum safe draft is 22 ft. Vessels between 22 ft. and 24 ft. 6 in. can work safely at anchorage of Val de Caes, about three miles from quay. Vessels deeper than 24 ft. 6 in., remain at anchorage of Icoaraci, 7 miles from the port. Between Icoaraci and Val de Caes, there is a shallow spot at Tapaná, which ships should approach with caution, although bottom is soft mud and sand.
TANKERS: At oil terminal of Miramar (Val de Caes), vessels of the Shell "H" class (18,000 tons dw) may berth or unberth at any state of the tide, subject to draft. Maximum depth alongside berth at low water 26 ft., the same as that of approach channel. Mooring at this berth is to buoys inside the line of the "T" jetty.
HEALTH: Maritime Police, Customs and Port Health board vessel on arrival at whichever anchorage is used, or alongside. Pratique granted on the presentation of documents. If port *not* first Brazilian port of call, Port Health Authorities not required, although Police and Customs will still board. After first Brazilian port, Port Health only required in cases of illness or death. The use of quarantine "Q" flag not necessary.
RADIO: No VHF facilities in the area. Suggested that ship contacts Belem Agent through Barbados Radio, and this is also usual way that vessels are contacted by Belem. An alternative to Barbados Radio is the United States radio station at Chatham, Virginia.
TUGS: Tugs in area are small, underpowered and useless for berthing or unberthing. Brazilian Navy maintains four deep-sea tugs (Corvettas), for use in cases of extreme emergency.
STEVEDORES: Stevedoring gangs for day shifts 0630 and 1230 hrs. and 1630 hrs. for night shift. Loading and discharging rates exceptionally good, particularly if vessel working at anchorages into lighters. Any delays to vessels alongside can usually be put down to the lack of official clearances in case of loading export cargo.
MEDICAL: Notice of required medical assistance should always be given in advance. There are a number of first-aid posts for minor complaints. Vaccination Certificates for smallpox are essential, and, although not required officially, yellow fever vaccinations recommended.
DENSITY: Strong outflow of Amazon and its tributaries is such that water at Salinas is only semi-salt. In the river itself, the water becomes slightly brackish, and half way to Belem, is absolutely fresh.
FRESH WATER: Fresh water only obtainable alongside main quay, and not at oil berth. It should be well chlorinated before use for drinking. Boiler water may be taken direct from the river at a point named Capim, near the entrance to Marajo Bay.
FUEL: Available, but due to Brazilian Custom's laws, as much advance notice as possible should be given in order to obtain correct documentation. A minimum of one weeks' notice recommended.
GANGWAY/DECK WATCHMEN: The employment of gangway watchmen recommended.
HATCHES: Hatches normally opened and closed by stevedores, but if it is raining they are inclined to shelter before closing.
CUSTOMS ALLOWANCES: Custom's Authorities do not normally search ship's crews, and reasonable quantity can remain in the possession of crew members. However, no attempt should be made to take more than a reasonable amount ashore.
CONSULS:

Belgium	Holland	Republic of Dominica
Bolivia	Italy	
Colombia	Japan	Spain
Costa Rica	Mexico	Sweden
Denmark	Norway	United States
France	Peru	Uruguay
Great Britain	Portugal	Venezuela

REPAIRS: Deck and engine repairs of all types can be carried out by the Brazilian Naval Dockyard, or by repair shops of the Companhia Docas do Para.
DRY DOCKS: At Naval Base, there is a dry dock measuring 730 ft. by 74 ft. with a depth over the sill of 25 ft. There are also several small floating docks, but they are not adequate for sea-going vessels.
REPATRIATION: There are three international flights each week from Belem. Miami 1 flight per week, Wednesday. New York 2 flights per week, Monday, Friday. In addition, daily flights to Rio de Janeiro. Airport of Val de Caes is about four miles from the city centre.
TIME: Local time GMT minus 3 hours. Summertime (1 Dec.–28 Feb.) GMT minus 2 hours.
HOLIDAYS: New Year's Day (1st January); Carnival (variable); Labour Day (1st May); Corpus Christi (25th May); Independence Day (7th September); All Souls' Day (2nd November); Proclamation of the Republic (15th November); Christmas Day (25th December). Work could be carried out on these days, but costs would be prohibitive.
POLICE/AMBULANCE/FIRE: Maritime Police 1325; Ambulance 1509; Fire Brigade 4166.
TELEPHONES: Telephones can be put on board vessels alongside main quay, but this facility is seldom used, Belem telephones being extremely erratic and unreliable.

AGENTS: Messrs. Booth (Brazil) Limited. Avenida Presidente Vargas, 119, Caixa Postal 190, Belem, Para, Brazil. Tel. 4562, 4563, 4564, 4565, 4566. Telegrams "Booth. Belem. Brazil".

CABEDELLO: 6.58 S. 34.50 W.

DOCUMENTS: See "Recife".
PILOTAGE: Contact Pilot's Headquarters by radio via vessel's Agent located at João-Pessôa (24 kilometres from Cabedello). As no radio station available at João-Pessôa or Cabedello such messages are usually relayed by Olinda Radio PPA – Fortaleza Radio PPC – Amaralina Radio PPA – or Rio Radio PPR. All messages are delivered by National Telegraph – Telegrafo Nacional. Pilots maintain day and night watch from Cabedello beach. Pilots' launches painted red with capital "P".

ANCHORAGE: Vessels anchor off entrance to approach channel, with Pedra Seca light-tower bearing 245, distant about 8½ cables, in a depth of 5½ fathoms but caution is necessary, as bottom is rocky in places.
RESTRICTIONS: For Masters calling at Cabedello for first time it is preferable not to enter during darkness.
SIZE OF VESSEL: Max. length 200 metres, draft spring tide 23 ft., neap tide 21 ft.
HEALTH: No Health Authority visits vessels. If Master suspects contagious disease aboard he must report to Agent who will contact Brazilian Health Authorities at João-Pessôa.
TUGS: No tugs are available.
BERTHING: Safe drafts at bar entering or sailing: spring tide 23 ft., neap tide 21 ft. Berthing takes place in accordance with vessel's draft. Master must always give Agent vessel's draft arriving off Cabedello.
STEVEDORES: Advise Agent ETA at Cabedello 48 hours prior to arrival to make arrangements with dock and stevedores for discharging or loading.
MEDICAL: For urgent cases recommended that vessel call at Recife instead of Cabedello as Recife has better facilities. If vessel must enter patient will be removed to João-Pessôa Hospital as no hospital available at Cabedello. Arrangements must be made if possible 24 hours prior to vessel's arrival as it is necessary to assign doctor and ambulance to proceed to Cabedello.
TANKERS: Cabedello not a loading port for petroleum products. Messrs. Esso–Brasileira de Petroleo, have tanks for reception of gasolene and other petroleum products which are carried by Brazilian fleet of Tankers "Fronape" – Frota Nacional de Petroleiros. At Cabedello only berth No. 1 is suitable for discharging petroleum products or to bunker vessels since pipeline is only connected to berth No. 1. Tankers enter and sail during dark hours from Cabedello.
DENSITY: Varies from 1020 to 1025 at high water.
FRESH WATER: Supplied by a pipe-line alongside quays; only good for boilers. Water for human consumption brought by road from João-Pessôa; recommended that vessels take drinking water at other ports of call prior to Cabedello.
FUEL: Available. Suppliers Messrs. Esso–Brasileira de Petroleo. Pipe-line at berth No. 1 where vessels can bunker alongside. Pipe-line fuel oil, 8 in.; pipe-line diesel, 8 in.
DEVELOPMENTS: Brazilian Govt. intention is to dredge the bar to enable vessels whose drafts are above 23 ft. to enter since limitation of draft at bar is a handicap to many steamship Owners whose vessels cannot enter owing to the draft. There is also talk about improving the port installations, but nothing has been done so far.
GANGWAY/DECK WATCHMAN: Watchmen available. Also the hours of work agree except that Captains have option to choose suitable times when their services are required.
OPENING/CLOSING HATCHES: By stevedores. Crew assist when stevedores not familiar with modern hatches.
CUSTOMS ALLOWANCES: One carton cigarettes per crew member at Customs discretion and one bottle of whisky or any other kind of spirit, subject to Customs discretion.
IDENTIFICATION CARDS: Not required.

REPAIRS: Minor repairs only.
DRY DOCKS: None.
REPATRIATION: Repatriation can be arranged via Recife or direct from João-Pessôa to Rio de Janeiro. No direct Air Service from João-Pessôa available for foreign destinations.
AIRPORT: 9 kilometres from João-Pessôa. Small Airport utilised by National Lines whose planes make regular calls.
TIME: 1 April – 31 Oct. GMT minus 3, Nov. 1 – 31 Mar. GMT minus 2.
HOLIDAYS: For holidays see "Recife". Work is possible during holidays and Sundays provided the Dock Administration and Stevedores are advised in anticipation say 24 hours before commencement. Usually on Good Friday, Christmas day and Independence day work at the Cabedello dock is not obtainable. Same applies to the third Day of Carnival.
POLICE/AMBULANCE/FIRE: Police (located at João-Pessôa) 4848. Cabedello has a small Police Station but no telephone available. Ambulance (located at João-Pessôa) 4065 and 4076 (24 kilometres from Cabedello). Fire Brigade (located at João-Pessôa) 4212.

PARANAGUÁ: 25.30 S. 48.30 E.

DOCUMENTS:
A copy of the manifest and a copy of each Bill of Lading in sealed envelope.
Should vessel have called at any port, Brazilian as well as foreign, and no cargo loaded, still require a negative cargo declaration be presented to local Customs Authorities. Also required 3 Crew Lists, 2 General Store Lists, 2 Personal Effects Lists, and a passenger List or negative passenger list whichever applies.
PILOTAGE: The Paranaguá port area is some 17 nautical miles from bar and from sea buoy where Pilots board. For entry, necessary for Agent to requisition a Pilot five hours prior to ETA Paranaguá Bar. For sailing from port, a two-hour previous advice to Pilot necessary.
It is possible to requisition a special Pilot for entrance and sailing from Paranaguá within a lesser period than required officially by Pilotage Association. At present, no attendance to requisitions for services of Pilot between 12.00 hours on a Saturday and 0700 hours the following Monday, and between 1730 hours on a week-day and 0700 hours the following day. The Pilotage Association will attend unannounced vessels during those periods not covered by their regular office hours. This entails the requisitioning of a special Pilot earning 100% on the total ordinary bill. Pilotage very expensive.
RESTRICTIONS: No restrictions to entry in Paranaguá Bay day or night. Sometimes, entrance channel not usable after dark because of buoys drifting out of alignment; however this is rare.
MAX. SIZE: No limitations as to length. Officially, maximum draft to pass bar safely at Paranaguá is 23 ft. but in fact, vessels sail with 27 ft. on springtide and 24 ft. on any high tide. Dredging has been going on for past two years and shortly expect that new sounding of the bar by the Navy will be published.
ANCHORAGES: Ample and secure in inner harbour.
HEALTH: Health Authorities visit any vessel arriving from foreign port.
RADIO: No local radio. Messages should be routed: vessels coming from South via Rio de Janeiro radio or Santos radio; vessels coming from North via Florianopolis radio (PPJ).
TUGS: Two small-powered, primarily for assisting berthing and unberthing.
VHF: Operates on international Channels 5 and 11. With inauguration of this service unannounced vessels may request Pilots and also through local telephone service be connected with their Agents.
MEDICAL: All facilities available. Crew members should hold valid International smallpox inoculation certificates.
TANKERS: Proceed to the inflammable berth. Maximum draft alongside inflammable berth 23 ft.
FUEL: All types of bunkers and diesel are generally available. Lubricating mixtures can be obtained but require considerable advance notice. Furnishing of these supplies must be contracted for about a week in advance.
GANGWAY/DECK WATCHMEN: Use of a gangway watchman not obligatory but recommended.
OPENING/CLOSING HATCHES: Usually done by stevedores but can be done by ship's crew.
CUSTOMS ALLOWANCE: Each crew member allowed to keep out of bond one carton of cigarettes and one bottle of wine or spirits.
FRESH WATER: Ample available and of good quality. Pumping rate about 20 tons per hour. Cost: US.$0.15 per ton including overtime.
IDENTIFICATION CARDS: Required for going ashore.

PORTO ALEGRE: 30.05 S. 51.15 W.

This information does not apply to Tramandai Oil Terminal which is listed separately.
DOCUMENTS: From each loading port, vessels must bring Manifest plus simple copy of each Bill of Lading in sealed envelope addressed to "Inspector of Customs, Porto Alegre". If vessel called at any port (including Brazilian ports) where no cargo was loaded for Porto Alegre, a negative cargo declaration must be presented

from each such port of call. Three Crew Lists, two General Store Lists, two Personal Effects Lists must be presented, also one Passenger List or negative passenger list, whichever applicable.

PILOTAGE: Porto Alegre situated 164 miles up the Lagôa dos Patos, a large freshwater lake, and vessels must take on a Pilot after receiving pratique at Rio Grande, which lies at sea entrance of lake. Pilot and authorities board after arrival at Rio Grande inner anchorage. Pilots arranged by Agent upon receipt of vessel's radioed ETA via Rio Grande Radio (PPJ). Since 40-mile channel between Rio Grande and Lagôa dos Patos is unlit, vessels should proceed from Rio Grande only by daylight, allowing 3 hours to negotiate channel. No restrictions on night navigation in Lagoa.

RESTRICTIONS: Vessels approaching Porto Alegre from the Lagôa should do so only by daylight since 30 mile access channel leading from the Lagôa to Porto Alegre poorly lit. If necessary, vessels should anchor off Itapoan Lighthouse at head of the Lagôa, to await daylight before proceeding. On arrival at Porto Alegre, free pratique must again be obtained, and crew lists, store lists, etc., again presented to authorities, who usually visit vessel in berth alongside.

MAX. SIZE: Draft considerations make it necessary that vessels of more than 130 metres water-line length should not arrive or sail from Porto Alegre with a draft exceeding 16 ft. f.w. Vessels of less than 130 metres l.w.l. are limited to 16 ft. 3 in. fresh water draft and vessels of less than 100 metres l.w.l. to 16 ft. 6 in. Not recommended that vessels of more than 615 ft. l.o.a. or 75 ft. width attempt to reach Porto Alegre.

ANCHORAGES: Inner harbour. Not normally used unless port congested.

HEALTH: Vessels receive clearance on passing Rio Grande. No yellow flag required.

RADIO: All messages should be routed via Rio Grande Radio (PPJ).

TUGS: Only small low-powered tugs available. These normally used for unberthing only. Ships' lines normally used.

BRIDGES: Vessels proceeding up-river from Porto Alegre to oil berth must pass under bridge with lifting-span. Span is lifted when approaching vessel sounds prolonged blast on siren.

MEDICAL: Full facilities available. Crew members should hold valid International smallpox inoculation certificates.

TANKERS: Proceed to oil and LPG berths on Gravataí River for discharge. These berths accessible only to small tankers of up to 1,600 dwt. Refer to "Tramandai".

DENSITY: Fresh water at all times, unaffected by tides.

FUEL: Very expensive. Only diesel and bunker oil available; no heavy diesel mixtures. About five days' advance notice required.

GANGWAY/DECK WATCHMEN: Not obligatory, but employment of gangway watchmen recommended.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CUSTOMS ALLOWANCE: Each crew member allowed to keep out of bond one carton of cigarettes and one bottle of wine or spirits.

FRESH WATER: Available from hydrants at all berths. Delivery rate 10 tons per hour. Cost: US$0.20 per ton including overtime.

IDENTIFICATION CARDS: Necessary.

RECIFE (Pernambuco): 8.04 S. 34.52 W.

DOCUMENTS:

International Maritime Health Declaration, signed by the Master.
6 Crew Lists.
Deratisation Certificate.
4 Store Lists.
2 Lists of Crew Personal Effects.
6 Passenger Lists.
6 Manifests of cargo to be discharged. 2 copies of Bills of Lading (owners or their Agents send advance copies of these documents by Airmail).
Quantity of fuel oil and lubricating oil on board and information as to the daily consumption at sea and in port. (This information only required when the vessel takes bunkers.)
Certificates, Consular, if possible, that the vessel has loaded no cargo at any port that she may have called at on the voyage.
If a vessel calls in cases of emergency, or for bunkers, etc., the Master must sign a declaration for the Customs stating reason for call.

PILOTAGE: Contact Pilot Headquarters only by radio. Messages should be addressed to "Associação Praticagem – Recife". Pilots maintain a permanent watchman during day in station which overlooks port area and outer roads to observe any vessel approaching and requiring their services, displaying "G" flag. At night only means of contacting shore is by radio. Pilot boats or launches are painted red, with letter "P" in black.

ANCHORAGES: Most favourable position for ships to await pilot boat is 1·5 miles in direction 303° from "Picao", also just outside the 6 fathom line. In fine weather ships can sail to a position 8 cables from "Picao" in same direction just South of buoy. Anchorage in fine weather between above-mentioned places; in bad weather more than 1·5 miles in direction 303° from "Picao" and North and South of line, so in water of 7 and 8 fathoms depth.

RESTRICTIONS: Vessels only enter port at night in cases of necessity.

MAX. SIZE: Vessels 600 ft. in length can enter, max. draft 30 ft.

HEALTH: The Brazilian Health Authorities only visit vessel at the first Brazilian port of call. Master must report if all crew is well and in case of sickness on board on arrival Port Doctor when visiting vessel must be informed. After visit Port Doctor gives Master a certificate that vessel has been cleared. Captain must retain certificate on board to show to Health Authorities at other Brazilian ports of call if requested. Heavy fine imposed if document not presented.

RADIO: Usually vessels calling at Recife communicate with Agents through Rio-Radio-PPR, Fortaleza Radio-PPC or Amarakina–Radio–PPA–Salvador, which messages are relayed via The Western Telegraph Co. Ltd. who have stations in above-mentioned cities. Recife Radio Station PPO-Olinda Radio, located at local Post Office building at centre of City of Recife Avenida Guararapes and has very poor range. Customary for Olinda Radio to relay messages to distant vessels from Recife (port) via other vessels in near range. By no means a sure and reliable method.

TUGS: Pilot brings vessels to inner harbour where tugs available to help to go alongside; not practice for tugs to meet vessels on outer roads. Three tugs available.

BERTHING: Vessels arriving at Recife roads with 26 ft. can enter port on low tide and can go alongside from berth No. 1 to No. 7, over 26 ft. it is better to wait for high tides to enter, 30 ft. being the max. draft for entering Recife.

STEVEDORES: Advise Agents of ETA at least 48 hours prior to arrival to make necessary berthing arrangements and hire dock labourers and stevedores in time.

MEDICAL: In *urgent cases* communicate with Agents immediately by means of Radio at least 48 hours prior to vessel's arrival if possible. It is necessary for vessel to enter port to enable sick person to land because on outer roads there is too much swell. Not necessary to Dock. Port Doctor must be advised by Agents and will board to see sick person and grant permission to land in Recife temporarily. Hospitals available also First Aid Stations equipped with ambulances. Crews should always have yellow fever and small-pox innoculation certificates.

TANKERS: Oil companies who keep petroleum products here are: Esso Brasileira de Petroleo, The Texas Co., Shell, Atlantic Refining Co. To discharge petroleum products tankers utilise berth No. 1 – considered by the Port Authorities as inflammable berth. Tankers can berth also at Nos. 2 and 3 where pipe-lines exist. For discharging fuel oil in bulk berths No. 5 and 6 can be utilised. Maximum safe draft for a tanker to enter Recife is 30 ft. and entry must take place on high tide.

DENSITY: Low water density in summer time 1·028. High water density in summer time 1·027.

FRESH WATER: Supplied by Port Administration by means of pipe-lines in the docks. Vessels can be supplied alongside any quay; water fit for human consumption.

FUEL: Available but expensive.

DEVELOPMENTS: Plans to build berth for exclusive use of tankers.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally by stevedores but crew helps when stevedores not familiar with hatches of modern vessels.

CUSTOMS ALLOWANCES: One carton cigarettes and one bottle spirits allowed each man at Customs discretion.

PILOTAGE: Entrance to Guanabara Bay is one mile wide between Ponta de Santa Cruz and Ponto de Sao Joao. This is divided into two parts by Ilha Lage 0·6 mile W.N.W. of Ponta de Santa Cruz. Main channel for entering port is on the East side of Ilha Lage, depth 30 to 50 metres. The channel between Ponto de Sao Joao and Ilha Lage, depth 5·7 metres should be avoided.
Vessel should anchor in position 22.53 S. 43.09 W. where Authorities and Pilot board by motor launch. It is not necessary to cable the pilot station, but the Agent should be kept informed of vessel's ETA. International Code Pilot signals are to be used.
ANCHORAGE: After clearance by the Authorities, Pilot will direct vessel to berth or to a safe inner anchorage.
RESTRICTIONS: Port is accessible to all vessels at all times and states of the tide. Attention must be paid to messages sent by Rio Radio about forbidden areas due to Marine exercises with live ammunition along the coast near entrance to the port.
MAX. SIZE: No limits for entering port. Draft limited by berth depth See below.
HEALTH: Port doctor visits all ships on arrival, and requires Maritime Declaration of Health, Deratization Certificate, two Crew Lists. Vessels from another Brazilian port automatically receive free pratique and should not fly quarantine flag. If suspected disease or fever on board it is advisable to cable Agent before arrival.
RADIO: Rio Radio, Rio de Janeiro, Call sign PPR. Working frequencies; 17,194, 13,105, and 8,364 kc/s.

PILOTAGE: Bar pilotage compulsory. Vessels must await pilot at whistle light buoy No. 10, identifiable by black and white vertical stripes and lies approximately one mile to E.S.E. of end of Easterly breakwater. Pilot launch or pilotage association have no means of communication with the ship; in daytime, the launch can be identified as it is painted red. Requests for a Pilot to be made by Agent at least 12 hours in advance for vessels entering and two hours for vessels sailing. Bar Pilots either bring vessels with cargo to discharge/load direct to berth, or up to inner anchorage (when no berth is available or in case of vessels en route to Porto Alegre).
ANCHORAGES: Official anchorage situated at a point between inner light buoys Nos. 4 and 5, just before entrance proper to inner approach channel. In case of necessity, vessels may discharge/load to/from lighters at anchorage where depth is over 35 ft.
RESTRICTIONS: Depending on weather conditions and subject to prior arrangements with Bar Pilotage, vessels drawing less than 24 ft. may enter or leave any hour of day or night. Vessels drawing over 24 ft. usually have to wait for daylight to enter/sail but if weather conditions are exceptionally favourable and paramount reasons are involved it is possible for vessels drawing up to 26 ft. to enter/sail at night.
MAX. SIZE: *Bar:* Maximum official safe draft on bar, in fair weather, is 29 ft. salt water. *Port and Anchorage:* Official draft for inner approach channel and for berthing/loading alongside is 28 ft. fresh water. Density of water in port may vary considerably in a matter of hours, from completely fresh to brackish and even practically fully salt, depending on wind direction, but, as a rule the density is in the region of 1005. For this reason it is safer to consider official safe draft within port as 28 ft. fresh-water basis. Vessels wishing to complete loading down to maximum 29 ft. salt-water bar draft may do so at anchorage, ex-lighters.
HEALTH: (*a*) Vessels arriving from a foreign port of call must receive visit of Port Health Authority. Each passenger (whether to land or in transit) and crew member must be in possession of a valid international vaccination certificate against smallpox.
(*b*) Maritime Health Declaration has to be made out and handed to Doctor at time of visit. When all papers have been examined and found in order, the Doctor will authorise lowering of the yellow flag and hand over free pratique.
(*c*) Vaccination against smallpox can be made on board and respective international certificate issued.
(*d*) In case of death, suspected disease, serious accident, etc., on board before vessel arrives in port, Master should radio Agent giving full particulars so that necessary steps may be taken with Health/Police authorities.

RADIO: Radio Junção, call sign PPJ, situated on outskirts of Rio Grande, is a receiving/transmitting station, operating on a wavelength of 600 metres (500 kc/s). There is telephone communication between radio station and shipping offices so that, normally, messages are relayed without any appreciable delay. Radio messages may also be despatched through Florianopolis Radio, via Western Telegraph, and these are also received quickly, under normal conditions.

TUGS: Not compulsory but weather conditions at Rio Grande usually make employment imperative. Customary to use one tug to assist vessels to berth and two on sailing (see also "Berthing"). Tugs usually join vessel as soon as she has come through approach channel, in the port proper, but in the case of deeply-laden vessels, normally attend before vessels enter inner approach channel. Ship's lines always used.

BERTHING: No mooring buoys. Vessels berth alongside quay to load/discharge. If weather conditions permit, recommended that vessels should berth starboard side to wharf in order to facilitate sailing, especially if there is a possibility of night departure. Turning vessel round before coming alongside, however, may not always be advisable or safe because of wind and current conditions at time. Vessels loading down to maximum safe draft must be starboard side to quay on sailing. If weather does not allow ship to turn on arrival, she must do so as soon as conditions permit, before being too deeply laden.

Oil Carriers: Tankers measuring over 200 metres long have entered and berthed at Rio Grande, coming alongside port side to berth. On sailing, they go out stern first, turning after negotiating approach channel and reaching anchorage. Favourable conditions of wind and current necessary for this manoeuvre.

Installations for discharge of petroleum products: All fuel oil discharged at tanker berth within port proper – i.e. subject to a maximum draft of 28 ft. White petroleum products may also be discharged at this berth. A deep-water tanker pier has been constructed close to the anchorage but it is in limited operation for white products only, because pipe-lines to main storage tanks and refinery have not yet been installed. This pier, which is capable of accommodating two vessels of 160–180 metres overall length, has a depth of over 35 ft.; it also has installations for supplying fresh water which may, in case of necessity, be used by cargo vessels. No facilities for the discharge of residues.

STEVEDORES: Working hours, straight time, 0730/1130 – 1300/1700 (week-days). During week-days, labour for morning shift which commences at 0730 hours, may be ordered up to 0715 hours; at 1245 hours extra gangs may, if necessary, be engaged for afternoon shift commencing at 1300 hours. For night work longshoremen (i.e. dock labourers as distinct from stevedores) must be ordered before 1600 hours; stevedores, tally-clerks, etc., for night work may be engaged up to 1845 hours for shift that starts at 1900 hours. Sunday/holiday work must be ordered previous day, up to 1600 hours.

MEDICAL: Two hospitals available which have adequate facilities to deal with majority of cases. Only vaccination required at present is against smallpox.

FRESH WATER: Water can be supplied ex-quay hydrants at rate of about 10–15 tons per hour, at any point of wharf. No barges available for supplying fresh water which has to be taken alongside.

FUEL: Bunkers can be supplied direct from alongside, either by pipe-line or from trucks. Oil companies have to receive prior authority from their principals and local taxes and charges have to be paid before bunkers are supplied. Rate of loading ex-pipe-line is about 150–200 tons per hour and from trucks 10–15. No barges available to supply bunkers. Cost of fuel/diesel oil very high – about three times that of normal supply ports.

DEVELOPMENTS: Reported that there are plans to dredge port and channels (approach and bar) to permit following safe drafts: Bar – 33 ft. Port/inner approach channel – 31 ft.

GANGWAY/DECK WATCHMEN: Advisable to employ gangway watchmen, day and night. Deck/hold watchmen may also be engaged whenever necessary the rates being about 50% higher than for gangway watchmen.

OPENING/CLOSING HATCHES: Opening and closing of conventional hatches normally done by stevedores, without any extra cost; advisable, however, for steel hatches to be handled by crew.

CUSTOMS ALLOWANCES: Each crew member allowed one carton cigarettes (or the equivalent in pipe tobacco) and one bottle of spirits, per week. Ships that remain in port for over a week may request Customs, through their Agent, to open bond for another weekly issue.

IDENTIFICATION CARDS: Not required.

GENERAL: *Flags to be flown.*

(*a*) Brazilian flag at the top of the foremast.

(*b*) Yellow flag (to be hoisted until the doctor's clearance is given). Vessels arriving from a Brazilian port, with no disembarking passengers, must *not* hoist yellow flag unless there is sickness on board requiring presence of the Health Authorities.

(*c*) Pilot flag.

(*d*) Customs flag (to be hoisted after the vessel is cleared by the Customs and flown during the vessel's stay in port).

PILOTAGE: Application for Pilot cabled by Master to Agent who makes all arrangements with Pilots' Association. Advance notice of ETA should be cabled by Master 48 and 24 hours before arrival. Pilot boat painted red. The location where Pilot has to be taken is indicated on all charts.

ANCHORAGES: Inner anchorage can accommodate vessels with a draft of up to 33 ft., but there is sufficient depth of water in the outer anchorage to accommodate vessels with any draft.

MAX. SIZE: Maximum draft 30 ft., maximum length about 250 metres. The 10 metres quay situated next to the docks, where vessels discharge aviation gas, kerosene, etc., maximum draft of 33 ft., maximum length of about 250 metres. For vessels which load crude oil at the Madre de Deus terminal, or discharge lubricants, maximum draft 40 ft. Terminal situated about 18 miles up the bay from the port.

HEALTH: The Doctor only boards the vessel when Salvador is first Brazilian port of call or when there are passengers from abroad to disembark, in which case Master should advise Agent who will then take the necessary steps required by Port Health. A yellow flag should be flown if Port Health Doctor is required on board.

RADIO: Master should always endeavour to contact Agent through Radio Amaralina coastal station, call sign PPA, and Agent will contact Master the same way. Since this station has a limited range, the Agent at Salvador may be contacted via Rio Radio when northbound, or Olinda Radio/Fortaleza Radio when South-bound.

TUGS: Tugs are rarely used for berthing, but occasionally used for unberthing. When used, the line is supplied by vessel. Vessels unberthing at Salvador usually avail themselves of a line to a buoy. For tankers berthing at 10 metres quay, a tug is usually supplied to help vessel moor and unmoor. When coming alongside tug joins vessel inside port.

BERTHING: No restrictions, but if draft over 28 ft. some Pilots prefer to manoeuvre in daylight. Tankers at 10 metres quay may unberth at any time, but Pilots usually refuse to berth during hours of darkness because of the bad lighting on this length of quays.

STEVEDORES: When vessels are due to arrive on Sundays or holidays, and work is to be undertaken during these days, Master must cable Agent giving details of distribution of cargo, as gangs must be taken out on previous working day. Average loading rate at Bahia about 20 tons per gang/hour for usual commodities loaded such as sisal, tobacco, cocoa butter, cocoa beans, etc.

MEDICAL: When vessels arrive over week-ends or during holidays advisable that Master cable Agent giving advance notice of medical attention required if case is serious. For routine medical attention

no previous advice required as ample medical and hospital facilities available.

TANKERS: For tankers discharging aviation gas, kerosene, etc., at the 10 metres quay, a pipe-line of 4 in. is used. Only one tanker at a time may berth at this quay. For loading crude oil and discharging lubricants at Madre de Deus terminal, a pipe-line of 12 in. used. Four berths available at this terminal with drafts of 40, 36, 30 and 25 ft.

DENSITY: Salt water.

FRESH WATER: Fresh water available and is pumped on board with hoses at the rate of about 20 tons per hour. At 10 metres quay, fresh water is pumped on board at the rate of 5–10 tons per hour.

FUEL: Marine gas oil and fuel oil available.

DEVELOPMENTS: The normal dock quay has been joined to the 10 metres quay closing off a small basin. Dredging is presently being undertaken and vessels will be able to come alongside the new length of quays in the future with a draft of up to 30 ft. When the closed off basin has been completely filled in, new warehouses are to be built for the handling of dry cargo. The breakwater running parallel with the quays is being extended in its Northern end by about 280 metres. Work however, on both these projects is comparatively slow, and it is impossible to foresee when either will be completed.

GANGWAY/DECK WATCHMEN: A gangway watchman is recommended, cost per 24 hours, including all meals and continuation periods is week-day NCr.18.71, Sunday NCr.27.01, holiday NCr.36.02.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: Customs authorities only permit each crew member one carton of cigarettes out of bond. However, if a vessel is staying in port for a long period Master may request Customs to break seal and make a new issue of tobacco, as many times as reasonably required. Each crew member allowed one bottle of spirits which must be opened.

SANTANA: 0.15 S. 51.08 W.

DOCUMENTS:

Maritime Health Declaration.
Vaccination Certificates.
5 Crew Lists.
3 Stores Lists (incl. deck/engine).
3 Personal Effects Declaration.
Bunkers Declaration.
Passenger List or negative passenger list.

From each loading port a Manifest plus simple copy of each Bill of Lading addressed to "Inspector of Customs". If vessel called at any port (including Brazilian ports) where no cargo was loaded for Santana, a negative declaration of cargo must be presented.

PILOTAGE: No Pilots available either for the North Channel entrance and/or for docking and casting off operations.

ANCHORAGE: In front of the port, protected anchorage between mainland and Santana Island, where vessels can safely anchor at any location. Bottom is mud.

RESTRICTIONS: Vessels can depart at any stage of tide. Night transit in North Channel is at Master's discretion.

MAX. SIZE: On East side of floating ore pier, general cargo pier has a depth alongside of 30 ft. Along floating ore pier depth ranges from 35 to 90 ft. (at low water). 35 ft. on East end of pier. Tidal range about 9 to 11 ft. Tidal current at middle of river ranges from 2 to 3 knots, while close inshore along ore dock it runs approximately 1–1½ knots. Amazon river water at Santana is fresh in spite of tides.

HEALTH: Health authorities visit vessel arriving from abroad. Authorities require regular ship's gangway to be lowered. Jacob's ladders not accepted. After master having handed over Declaration of Health, medical authorities issue free pratique. If entering after calling at another Brazilian port, free pratique automatically granted.

RADIO: Vessels scheduled to load ore at Santana must radio Belém (Pará) Agents (preferably via Chatham or Amagansett Radio) at least 48 hours prior to ETA North Channel. Other means of communication not satisfactory and result in delay. ICOMI maintains own radio-telegraph service between Macapá and Belém. Macapá station located at port of Santana, call letters ZZK5, sends on 6765 kc. and receives on 6200/6400.

TUGS: No tugs available.

BERTHING: Recommended that amidship hatches be used for Santana cargo. Vessels berth according to direction of tidal current. Berthing operations assisted by a motor craft to place lines on shore, East of pier. On West side, lines moored to the bitts on floating fender. Linesmen available to assist berthing and shifting. Ore carriers have preference when docking.

STEVEDORES: Stevedores come from Macapá about 25 km. by road from the port. Also checkers and coopers. Conveyor belt for ore loading fixed, consequently vessels must be shifted by own winches to load various hatches. Effective average loading rate 1,000–1,100 long tons per hour. Special caution must be taken not to pump all ship's ballast before loading starts, since the height of boom is 40 ft. above water level. Cargo belt trimmed only. Hire of trimmers is for ship's account and is performed at anchorage.

MEDICAL: Medical attention may be arranged at Macapá through ship's Agent.

TANKERS: Tankers discharge at floating pier, where one pipe line leads to tanks ashore (distance from pier about 700 m.). Storage tanks have capacities for 20,000 barrels of diesel oil and 5,000 barrels of gasoline. Discharge of different bulk liquids effected after flushing pipe line. Vessels liable to fines, by Port Captaincy, for oil discharged in port area.

DENSITY: The Amazon river water at Santana is fresh in spite of tides.

FRESH WATER: No drinking water available.

FUEL: No bunkering facilities available.

GANGWAY/DECK WATCHMEN: Watch by crew members sufficient.

OPENING/CLOSING HATCHES: Ore-carriers: service carried out by crew. General cargo vessels: service executed by stevedores.

CUSTOMS ALLOWANCES: Limited quantity for use during ship's stay.

CARGO GEAR: No additional requirements as to gear. A heavy-lift stiff leg derrick mounted on the pier. Boom: 60 ft., Mast: 37 ft. 6 in., Capacity: 65 metric tons. Mobile crane (maximum lift 2·5 tons) available for discharge of general cargo from small vessels.

IDENTIFICATION CARDS: No restrictions by local authorities. Crew members should carry identification papers when on shore.

CONSULS: None. Documents which are to be visaed by a Consul must be sent to Belém.

REPAIRS: Only in cases of extreme emergency and then only minor repairs.

REPATRIATION: Effected by ship's Agent. No Immigration authorities at Macapá.

AIRPORT: Macapá airport 25 km. from Santana near city of Macapá. Numerous scheduled domestic flights from Macapá to Belém, a trip of 1 hour and 15 minutes.

TIME: GMT minus 3 hours. Summertime (one hour forward) as from November 1st till February 28th.

HOLIDAYS: New Year's Day (January 1st); Tiradentes (April 21st); Martyr of Independence; Labour Day (May 1st); Independence Day (September 7th); Proclamation of the Republic (15th November); Christmas Day (December 25th).

TELEPHONES: No facilities for placing telephones on board.

GENERAL: Port of Santana: For establishment of tide times at Santana (00° 03′ 26″ S.–51° 10′ 58″ W.), 40–45 minutes must be added to the times shown in the tables for Macapá.

Alongside the ore-loading pier, the tidal current continues to run for 10–15 minutes beyond the time computed from the tables. In mid-stream, the delay in the change of current is 60–90 minutes.

Vessels can dock or depart at any time without regard for tidal conditions. Special caution must be taken not to pump all ship's ballast before loading starts, since the height of the boom is 40 ft. above the water level.

PILOTAGE: Pilotage compulsory and request for Pilots should be made through Agent at least three hours in advance. Pilot station equipped with a VHF phone operating at Channel 6. Pilot launch is red and flies a red flag with a black "P" in the centre. When Pilot launch unable to meet vessel in outer roads due to bad weather,

Pilot Association will contact Masters with instructions to come closer to port, indicating a given point where Pilot can be safely transferred.

ANCHORAGE: Outer roads. Centre of anchorage located at (24° 00′ 51″ lat., 46° 20′ 39″ long.) a bearing of 074° one mile from Palmas Island.

Anchoring West of 46° 22′ 15″ and North of 24° 00′ 24″ *is not allowed.* Pilot will normally board at this area; however when requested by pilot station (VHF Channel 6), usually in bad weather, vessels should proceed from their anchorage to 23° 59′ 57″ lat. × 46° 20′ 05″ long. and from that point take true course 057° up to 23° 59′ 33″ lat., 46° 19′ 26″ long. proceeding from there on at 094° until meeting pilot boat (maximum 1 mile).

MAX. SIZE: Regulations in force stipulate that vessels drawing maximum 28 ft. and not exceeding 750 m. in length may enter/leave the port at any state of tide, day and night. Those drawing 28 ft./30 ft. are subject to tide. These are the official drafts for the port, however in practice, depending on tide, vessels up to 32 ft. may also enter/leave the port.

HEALTH: Port Health Authorities consisting of one doctor and one assistant will check all vaccination certificates and issue a free pratique pass, which shall remain on board for presentation at subsequent Brazilian ports of call. Masters can obtain free pratique by radio, which does not mean that the doctor will not come on board, but only that other authorities can board the ship before his arrival.

Free pratique by radio: Master should radio to Agent (in Portuguese) as follows: "Para Sa Portos condições sanitárias a bordo satisfatõrias" (Master's name) which means: "Sanitary conditions on board satisfactory". *N.B.* "Sa Portos" is the cable address of Port Health Authorities.

TUGS: Tug service for mooring/unmooring not compulsory and depends ultimately on Captain's decision/Pilot's advice. Fleet of 5 tugs (funnel mark: W) equipped with two-way radios (VHF Channel 6); the largest is of 1,600 h.p. These tugs are used by all foreign lines.

BERTHING: *Wharves.* Total length 6,013 metres. Inner Harbour (Saboo New Quay) 800 metres (depth 11 metres). Barnabé Island pier 300 metres (depth 10 metres).

Special cargo handling facilities. Refrigerated cargo: Refrigerated cargo after discharge is deposited in the cold storage (between warehouses 23 and 25). The receiver is usually responsible for cartage and storage arrangements as well as for the required temperature to be maintained in cold chambers.

Bulk cargo. Grain elevators: There are 3 elevators in Santos from which wheat can be discharged direct into freight cars, owned by: Cia. Docas (with external silos) between Sheds 25 and 26; Moinho Paulista between Sheds 12A and 13; Moinho Santista between Sheds 8 and 9.

Cosipa Terminal, depth 10 m.; Ultrafertil Terminal, depth 10 m.

Fertiliser, sulphur, etc. in bulk can be discharged at any point along the quay where 6-ton cranes equipped with automatic motor-driven grabs or shovels are in operation. Alternatively, cranes with ordinary hand-filled buckets are used. The usual place for handling this type of cargo is by the Saboo bend.

Heavy lifts: Cia. Docas operates 2 floating cranes – one 60 ton and one 150 ton. The 150 ton crane reaches 22 metres in height and can handle lifts within a radius of 10 metres.

Special/valuable cargo: Special or valuable cargo, objects of art, precious metals, etc., are discharged without special formalities and may be kept in Shed 12A, where there is a special safe.

STEVEDORES: All longshoremen are in employ of Cia. Docas, which holds charter for general operations at Santos Docks. Their services can be requisitioned up to 1500 hrs. for vessels at berth/expected to berth next day. Stevedores ordered but not used shall be paid full day or night. Therefore, if the men should be kept standing by (inactive) at 0700 hrs., their period runs up to 1700 hrs., and at 1900 hrs., their period runs up to 0400 hrs.

FRESH WATER: Adequate supply of fresh water is always available from hydrants along the quay (day and night) or from water-barges (Pilões). Water barges cannot supply more than 2 ships per day, their capacity being only 250 tons, which can be pumped into the ship's tanks at the rate of 80 tons per hour. Cia. Docas should be advised 24 hours in advance, priority being given to passenger vessels.

FUEL: MFO/MDF/Gas oil can be supplied at Vallongo by Shed No. 1 or at the Saboõ new quay extension, or by barge, if up to 300 tons. Approval by the National Petroleum Board local is required, after a gauge is carried proving vessel really requires fuel. Supplies will only be enough to reach the next foreign port of call, with a safety margin of 10%. Applications for supplies should be made a few days in advance to avoid delay in delivery. Lubricants in bulk: not available.

TANKERS: Discharge terminals at Saboõ Quay, and at Ilha Barnabé. Maximum draft 30 ft.

REPAIRS: There are several workshops at Santos; however only capable of handling small jobs. Complicated engine repairs should be avoided as much as possible.

WATCHMEN: Masters of vessels may at their own discretion have crew members posted as watchmen, but are strongly recommended to have shore people for the job, specially when vessel is carrying any kind of pilferable cargo.

GANGWAY GUARDS: The Maritime Police and Customs House, frequently send on board some personnel to keep gangway watch during vessel's stay. On passenger liners the Maritime Police keeps a guard of 5 men plus one foremen while Customs keeps 3 men. On cargo ships, 2 men and 1 man, are assigned respectively. These officials always expect to be granted a cabin, plus regular meals.

HOLIDAYS: No work is effected on the following days: New Year's Day; Carnival (2nd Day); Labour Day. On Christmas Day no labour available except for passengers' luggage. Working overtime on holidays is possible provided application is made not later than 1500 hours on the preceding day. On Sundays work stops at 1900 hours for freighters, and is allowed to continue for passenger vessels when only handling luggage.

TELEPHONES: Every vessel berthing between Sheds 1 to 30 will have a telephone on board, available only for local calls.

GENERAL: Flags to be shown by incoming/outgoing vessels: (*a*) National flag. (*b*) Brazilian flag. (*c*) Yellow Flag – (Q) (whenever doctor's clearance is required and up to obtainment). (*d*) Customs flag (blue with a white star – to be flown 24 hours a day, after clearance is granted.)

DOCUMENTS:
General Declaration.
Deratisation Certificate.
Maritime Declaration of Health.
12 Crew Lists.
3 Stores Lists.
3 Personal Effects Lists.
APPROACHES: The port is sheltered by the São Sebastião Island and is formed by a Channel of easy access, which has an ample basin for manoeuvring with drafts normally above 20 metres. Lightering operations of crude oil have taken place in this area during the last ten years in order to bring large tankers up to a safe arrival draft of 30 ft. 6 in. at Santos. As the new terminal is now completed, full discharge can be accomplished for oil for the President Bernardes Refinery (Cubatao).
DEVELOPMENTS: The 120 km. pipe-line connecting the installations at São Sebastião with the Cubatao Refinery near Santos is ready, but the crude oil for the Uniao Refinery is still being lightered in São Sebastião, to bring ships to a draft which permits discharge of the balance in Santos. The pipe-line connecting São Sebastião and the Uniao Refinery is still being laid down.
HEALTH: Port doctor visits all ships on arrival and requires Maritime Declaration of Health, Deratisation Certificate, 2 Crew Lists. Vessels from another Brazilian Port automatically receive free pratique and should not fly Quarantine Flag. If suspected disease or fever on board it is advisable to cable Agent before arrival.
TUGS: There are 2 tugs operating to assist berthing.
BERTHING: *Terminal Maritimo Almirante Barroso (TEBAR):*
Discharge Pier: Length 379·50 metres (both sides usable). Draft (outside) 19·00 metres (low tide). Draft (inside) 15·00 metres (low tide).
Dock: Length 127·00 metres, from platform "A" to "B".
Defenses: Baykin fenders (Sandwich).
Coupling method: Articulated arm (chicksan).
Piping: Diameter: Chicksan 12 in., oil pipe 24 in., flange 12 in. Number of flange holes 12 in. Diameter: flange holes $\frac{15}{16}$ in., flange bolt size $\frac{7}{8}$ in. × $4\frac{1}{2}$ in. Maximum pressure: 150 p.s.i.
Eight tanks of 217,000 bbls. each, three tanks of 125,000 bbls. each. Receiving capacity 4,770 m^3 = 30,000 bbls. per hour.
FRESH WATER: Can be supplied to vessels direct from the pier.
FUEL: Not recommended to refuel except in extreme emergency, due to Brazilian customs formalities.
MEDICAL: All facilities available. If doctor needed on arrival or making emergency call to land sick persons, cable ETA 12 hours before arrival.
REPAIRS: Petrobas does not have facilities, but minor repairs can be arranged by Agent.
CUSTOMS ALLOWANCES: For each crew member, 2 cartons of cigarettes and one bottle wine or spirits.
HOLIDAYS: Tankers not affected: 1st January; 1st May; 29th June; 7th September; 8th December; 25th December; 31st December.
SHORE LEAVE: The pier is 1,600 metres long. The crew can use it to get ashore, but special passes are required for this purpose. There is, however, a launch service provided by Agent, which dispenses with this formality.
AUTHORITY: Petroleiro Brasileiro S.A.

TRAMANDAI (PORTO ALEGRE) 30.01 S. 50.06 W.

TRAMANDAI TERMINAL (ALMIRANTE SOARES DUTRA): The oil discharge terminal operated by Petrobras is a single point buoy mooring located in position 30° 00′ 40″ S. 50° 05′ 42″ W. The terminal is situated 2 miles from shore in open water with depths of 65 ft. in the vicinity of the buoy mooring. The berth is designed to accommodate tankers up to 105,000 dwt.
DOCUMENTS:
General Declaration.
Deratisation Certificate.
Maritime Declaration of Health.
12 Crew Lists.
3 Stores Lists.
3 Personal Effects Lists.
PILOTAGE/RADIO: When 20 miles from buoy, Masters should contact the launches by radio, transmitting and receiving on 2638 kcs. Contact with the shore station within 20 miles can be made on 2647.5 kcs frequency (transmitting) and 2815 kcs (receiving).
The Mooring Master boards about 3–5 miles East of the buoy mooring, or at the anchorage. Sea Pilot not required.
ANCHORAGE: Tankers must not anchor within one mile of the buoy mooring or between the buoy and the shore. The usual waiting anchorage is 2 to 3 miles East of the mooring buoy in depths of 13 fathoms. Bottom is fine sand and mud. Current about 1 knot.
MAX. SIZE: Maximum permitted draught 49 ft.
HEALTH: Port doctor visits all ships on arrival and requires Maritime Declaration of Health, Deratisation Certificate, 2 Crew Lists. Vessels from another Brazilian port automatically receive free pratique and should not fly Quarantine Flag. If suspected disease or fever on board it is advisable to cable Agents before arrival.
BERTHING: With the assistance of Mooring Master and launches, vessel secures by the bow only to the mooring buoy using two floating nylon cables each of 12 in. circumference. Berthing/unberthing at night is presently not permitted.
Two floating 16 in. pipelines are connected by 12 in. hoses to the midships manifold. Vessel's derrick, minimum SWL 5 tons is required for hose lifting. Flange connections are ASA 150 standard for 12-in. hoses.
Mooring ropes and wires are handled by ship's crew. Hoses are lifted by shore personnel with vessel's assistance.
CUSTOMS ALLOWANCES: For each crew member, 2 cartons of cigarettes and one bottle wine or spirits.
BALLAST: The vessel must be prepared to leave the mooring at any time in case of rough weather, and for this reason may be required to commence ballasting before completion of discharge. Strict precautions should therefore be taken to avoid admixture of cargo and ballast and to avoid oil pollution. No slops may be discharged into the sea within 20 miles of the shore. There are no ballast reception facilities at the terminal.
FUEL: Not available.
FRESH WATER: Not available.
GENERAL: Lighters not available. Launch connection with shore is entirely dependent on weather conditions and must be considered unreliable.
SHORE LEAVE: Not possible.
AUTHORITY: Petrobras.

PILOTAGE: *Brunei:* If Pilot required by vessel proceeding to Brunei town wharf, a written request must be given at least 24 hours before ship scheduled to arrive. This must include position where pilot is required to embark, (i.e. at Outer Bar or Sapo Point). Senior Pilot prepared pilot ships across bar at Pulau Chermin, up to following dimensions: (*a*) Single screw ships up to 260 ft. long, 16 ft. draft with height of tide at least 6 ft. above Chart Datum. (*b*) Twin screw ships up to 280 ft. long, 16 ft. draft with height of tide at least 6 ft. above Chart Datum.

Tanjong Selirong: For vessels loading logs at Tanjong Selirong, if pilot required, normally embarks at Outer Bar to bring ship to loading point. Position for loading logs at Tanjong Selirong is 4° 52′ 52″ N. 115° 05′ 19″ E. about 18 miles from town wharf. A Customs Officer and Agent's clerk proceed to Tanjong Selirong from town wharf and remain on board whilst vessel loading, accommodation and food provided by ship; stevedores and tally clerks provide their own food.

ANCHORAGE: Vessels entering port without berthing space at town wharf will be anchored at anchorage opposite Customs substation about 1 mile from town wharf. If so desired, ships may discharge their perishable cargo at anchorage into lighters. Consignees have to make arrangements with Agent and obtain permission from Customs, who will provide a Customs Officer to attend to discharging.

HEALTH: (*a*) Immigration: Immigration Officer will board vessel and clear her inwards after pratique granted by Port Health Authority. Immigration will require 2 copies of passenger list and 2 copies of crew list. Vessel's inward are cleared up to 2000 hours only.

(*b*) Quarantine: For vessels coming from outside State of Brunei, Port Health Authority will board on arrival at wharf or anchorage. Port Health Authority requires complete copy of Entry Declaration of Health and copies of passenger and crew lists.

BERTHING: (*a*) Wharf position, 4° 53′ 16″ N. 114° 56′ 29″ E. Length 731 ft. Three ships can berth at Brunei Town wharf at same time. Linesmen, usually hired stevedores, are available to receive a vessel's lines. In event berthing space being fully occupied, a black sphere is hoisted at Customs substation near anchorage. The ship then has to be anchored at anchorage, waiting for her turn, as berthing right at the town wharf is based on first come first served basis. No berthing priority given to any ship.

STEVEDORES: Stevedoring is in hands of contractors who supply gangs as required. Working hours are: 0700 hours to 1200 hours. 1400 hours to 1700 hours. 1900 hours to 2300 hours (overtime). Overtime is usually worked from 1900 hours to 2300 hours. No tally clerks available. All tallies made by ship's own tally clerks.

MEDICAL: Government General Hospital is only hospital in Brunei Town. General hospital well equipped with facilities to carry out normal surgery. Innoculation and vaccinations given free of charge.

FRESH WATER: Can be supplied from wharf. No water boat in the State.

FIRE PRECAUTIONS: Fire floats stationed at Fire Brigade substation near Customs sub-station opposite anchorage.

CONSULS: British High Commission: Jalan Residency, Tel. 2231.

HOLIDAYS: The Brunei Government working days are Monday to Thursday and Saturday. Friday and Sunday being holidays. Fort William is a natural harbour comprised of the Kaministiquia River, Mission River and McKellar River. The Kam River and Mission Rivers are dredged to 25 ft. with the McKellar River being dredged to only 19 ft. The Mission River entrance and turning basin will be dredged to 27 ft. as of July 1, 1966. In general terms, for most vessels two tugs are required for safe river navigation. The maximum draft should not exceed 23 ft. for safe loading and navigation.

There is one General Cargo berth, CPR Shed 7 situated at the Kam and Mission River junctions. Maximum depth alongside is reported to be up to 24 ft.

The majority of elevators maximum depth alongside ranges from 19 ft. to 25 ft. with the exception of Searles at the entrance to the Mission River, which is presently dredged to 27 ft.

There is one open storage Bulk of General Cargo berth, Valley Camp Coal Dock on the Mission River. This dock has two overhead gantry cranes with lift capacity of one, 12–14 tons and the other 22 tons. The berth is 1,600 ft. long with a depth alongside of 25 ft. This dock has recently been extended with modern belt loading facilities, for handling iron ore and similar materials in bulk.

"Coastwise Vessel" means a vessel operating exclusively between Canada and the island of St. Pierre and Miquelon or between Canada and the United States, including Alaska. A "coastwise vessel" loses coastwise status and is subject to quarantine inspection on its next arrival at a Canadian port when at any time it touches a foreign port other than those mentioned above.

Where sufficient quarantine information can be given by wireless, radio pratique may be obtained between the hours of 9 a.m. and 5 p.m. the day preceeding arrival:

(*a*) From "Quarantine Halifax" by vessels bound for Halifax. Nova Scotia.
(*b*) From "Quarantine Saint John" by vessels bound for Saint John, New Brunswick.
(*c*) From "Quarantine Quebec" by vessels approaching Canadian ports via the Saint Lawrence River.
(*d*) From "Quarantine Victoria" by vessels bound for ports in British Columbia via the Strait of Juan de Fuca, other than vessels coming from an Asiatic port except ports in Japan.

For the purposes of radio pratique vessels are required to give the following information:

(*a*) Name and nationality of vessel.
(*b*) Ports called at during voyage.
(*c*) Date and place of last fumigation or deratting exemption certificate.
(*d*) Nature of cargo.

BERTHING: *Old Dock* – 2,200 ft. dock divided into three berths. The South-east or loading berth is 800 ft. in length and is fendered with large truck tires mounted over the dock face. The adjoining 800 ft. (mooring or waiting berth) is also fendered with large truck tires. The third and last section 600 ft. in length, is a government berth used for general cargo. Dredged depth at the loading and mooring berths is 37 ft. at mean low water. Designed depth at the government berth is 27 ft. At the loading berth, iron ore is loaded into vessels by means of two travelling boom conveyors with a design capacity of 8,000 long tons per hour. The distance from mean low water to loaders in horizontal position is approximately 35 ft. Loaders can operate at an angle of up to 12 degrees from the horizontal. Vessels should present for loading with a maximum distance of 40 ft. from waterline to hatch coaming.
New Dock – A new deep-water berth some 900 ft. South-west of older facilities and extending about 230 ft. further into bay. This single berth is open-cell construction with 9 cribs giving a berthing face of approximately 925 ft. A tenth transfer house crib, with mooring bollards and access, allows a total mooring length of approximately 1,000 ft. Cribs are fendered with double sets of extra large truck tires. Dredged depth is 60 MLW and dock will be fitted with two travelling shuttle boom conveyors.
Distance from mean low water to loaders in horizontal position will be approximately 55 ft. Loaders operate in a range from 15 degrees above to 15 degrees below the horizontal.

Cape Verde Islands

ST. VINCENT (Archipelago of Cape Verde, Overseas Province of Portugal):

PORT: Porto Grande at 16° 52′ 55″ N. 25° 00′ 25″ W. City: Mindelo.
HARBOUR: Porto Grande is a natural semi-circular harbour sheltered and safe, facing island of Santo Antao over a channel approximately 10 miles wide at nearest points. In this channel but nearer St. Vincent is the rock of Ilheu dos Passaros on which is a lighthouse. Entry to harbour is from North or South. Weather conditions throughout year usually good to excellent.
DOCUMENTATION: On arrival Master should hand Agents:
3 Crew Lists. 3 Passenger 3 Crew Lists.
3 Passenger Lists.
1 Maritime Health Declaration Certificate.
1 copy of Stores List.
Port Doctor will also wish to sight Ship's Deratisation Certificate.
When discharging cargo a minimum of 5 copies of Bill of Lading and 5 copies of Manifest are required. No special forms for Passenger Lists and Crew Lists and those in general use by the vessel will be accepted.
PILOTAGE: Radio notice of estimated time of arrival must be sent by Master to Agent at least 48 hours before arrival. Pilot boards at entrance to harbour and prefers to use Jacob's ladder. Signal for Pilot is 2 long and 1 short on ship's siren. Time between Pilot boarding to anchoring or berthing at piers is 10 to 45 minutes.
Important: The Harbour Master requests Masters not to anchor in harbour before Pilot on board. Pilots available day and night. Pilotage compulsory for all vessels entering harbour for anchoring, or berthing. When sailing, pilotage not compulsory for vessels which anchored in harbour. Pilotage compulsory for all vessels berthing and unberthing at piers.
ANCHORAGE: Anchorage berth in 4 to 20 fathoms.
MAX. SIZE: The harbour of Porto Grande can accommodate vessels up to any size. Also see "Berthing" and "Tankers".
HEALTH: Free pratique can be obtained before arrival on application by radio to Guarda Mor (port doctor) of Sao Vicente de Cabo Verde confirming that crew are good health. The port doctor, however, usually boards vessel on arrival in company with police and Customs guards, order provide any medical assistance which may be required. Crew and passengers should be in possession of Smallpox Vaccination Certificates. Production of these certificates will not, however, be called for unless there is a very good reason for doing so.
RADIO: Advice of estimated time of arrival should be sent by radio to Agents at least 48 hours prior entering port. Bunker and water requirements, if any, should also be requisitioned in same message. Cash to Master, provisions, cigarettes, spirits, etc. should be also added. ETA message should also advise number of hatches to be worked and number of tons in each hatch.
St. Vincent radio operates on CQA–500 kc/s and 8·738 mc/s twenty-four hours a day – working frequency 435 kc/s on 8 mc/s. Listening every two hours over the hour and again each half hour on the hour.
BERTHING:

Pier No.	*Maximum Depths metres*	*Length of Pier metres*
1*	11·50	310·00
2	11·50	310·00
3	9·50	160·50
4	9·50	160·50
5	8·50	90·00
6	6·50	122·00
7	4·50	61·50
8	3·50	106·75
9	3·50	40·00
10	4·50	100·00
11	5·50	100·00

(* This pier is open to the sea and usable subject to prevailing winds and swell).

Floating and suspended fenders are available at the piers. Suspended fenders are each of 3 lorry tyres, 3 ft. wide with a diameter of 2 ft. 6 in. suspended at intervals of 70 ft. Floating fenders are of 5 tyres with a wooden core and are 4 ft. 6 in. long and 3 ft. 6 in. in diameter and are placed at intervals between the suspended fenders. Cruising vessels normally berth at pier No. 2.
Height of Pier No. 2 above sea level approximately 2 metres. Vessels moor port side to pier. No shore gangways available. Cruising vessels with drafts too deep to berth alongside piers can anchor in harbour about 1,250/1,500 metres distance from Custom House pier where passengers may land. Ship's launches must be used for the transport of passengers to and from shore. With tug assistance vessels may berth or unberth at any time of day or night at piers Nos. 2, 3 and 4, but in adverse weather or other adverse conditions berthing at night may be prevented. Berthing and unberthing at night at other piers generally not possible.
STEVEDORES: If quantity for loading or discharging is of 10 tons or under, and in comparatively small parcels, then cargo can be loaded or discharged using the only small lighter available for vessels at anchorage. If larger quantity to be handled vessel must berth alongside quay. In both instances ship's tackle must be used. Discharging rate for bagged cargo, i.e. flour, rice, etc. is about 30 tons per hour per hatch. In all cases vessel's derricks and winches are used. There are no lighters available, therefore as described above all cargo in excess of 10 tons must be loaded or discharged at the piers. The opening/closing of hatches is the responsibility of the crew on board, but can be done by the stevedores by arrangement with the master under the supervision and responsibility of the ship's officers.
TANKERS: Maximum length 775 ft.; Maximum draft 36 ft. Underkeel clearance 4ft. Maximum dwt 53,000 tons.
Discharge effected by barge from starboard side of tanker at anchorage, also through submarine pipe line in harbour at: Lat. 16° 53′ 30″ W. Long. 25° 00′ 50″ W. Length of line, 1,000 metres; diameter, 20 in.; berth, Buoys; hoses, 12 in.; number of hoses, 7; position of hose connection, midships starboard side; Maximum rate per hour, 2,000 metric tons; density of water at berth 1025.
Submarine pipeline buoy berth. Tankers moored to one forward buoy and three stern buoys. Tanker also uses port anchor which is dropped before tying up to buoys. Nature of bottom is coarse sand and gravel. Berthing at buoys carried out daylight only and port tugs of up to 1200 h.p. used always on berthing and on unberthing according to weather conditions.
Cleaning tanks: 50 miles from shore only.
Gas freeing: At present no facilities available.
FRESH WATER: Can be supplied at anchorage or at piers ex lighter day or night. Water suppliers request at least 43 hours notice giving quantity required. Price about Escudos $60 per ton and minimum charge covering cost of supply of 20 tons made on supplies for or under that quantity. To supply over 750 tons during a 12-hour stay in port with two lighters giving between 25 to 50 tons per hour per hose would be difficult. Connections of hose couplings from water barges are 3 in. male, 11 threads per inch.
FUEL: Oil bunkering carried out ex lighter at anchorage at rate of up to 300 tons per hour dependent upon speed at which vessel can receive. Both fuel and diesel oil bunkers can be supplied. Gas oil can be supplied in drums to vessel at anchorage or in bulk ex pipeline on piers. By the end of 1970 it was hoped to supply fuel and diesel bunkers ex pipelines at piers. Vessels loading or discharging cargo at piers can, if required, be bunkered ex barge. All bunkering at anchorage ex barge takes place on starboard side of vessel.
DEVELOPMENTS: Facilities expected improve in near future. A synocholift Dock to take two vessels up to 60 metres long by 20 metres wide, is planned which together with other workshop amplifications are expected to be fully operational by 1975.
GANGWAY/DECK WATCHMEN: Two Maritime Police are always in attendance and are compulsory.
CUSTOMS ALLOWANCES: Tobacco and Wine and/or Spirits, no restrictions within reason.
CONSULS:

REPAIRS: At present voyage repairs of limited scope carried out, but slipping facilities are available for craft up to 250 tons only.
REPATRIATION: Facilities exist for effecting crew changes by air, but recommend that TAP Lisbon be contacted by Owners for crew making flights into Sal Island order join vessel St. Vincent. Agents should also be informed to make necessary arrangements for flight on local plane from Sal Island to St. Vincent. All crew travelling to Cape Verde must have transit visa issued by Portuguese Consul in country of origin. All crew, except cases for hospitalisation, must be in possession of a passport before Portuguese police will permit them disembark for repatriation. Crew possessing valid passports or sailors' books can land in Cape Verde for medical and/or hospital treatment or for repatriation to country of nationality provided it is country with whom Portugal has diplomatic relations and provided Agents of vessel take full responsibility on behalf of Owners for all expenses.
AIRPORT: Airport served by Dove planes for inter-island service only. 20 flights a week in and out of St. Vincent, 4 direct from Praia and 6 via Sal Island inwards. 5 via Sal and 5 direct Praia outwards. Main Airport is at Sal Island where two flights a week by Boeing 727 call to and from Lisbon. At Sal Island the only hotel is situated at the Airport.
TIME: 2 hours behind GMT all the year round.

Ceylon

COLOMBO: 06.56 N. 79.50 E.

DOCUMENTS:
5 each of Crew and Passenger Lists.
8 Manifests.
1 Arrival Report for Pilot.
1 Master's Declaration for Immigration, and same for Police.
2 Private Property Lists of officers and crew for Customs.
2 copies of Preliminary Report by Master for Customs.
1 Maritime Declaration of Health for Port Health Officer.
1 Master's Declaration of Cargo for Quarantine Department.

PILOTAGE: Vessels approaching port apply for Pilot by flying the G flag by day or two red lights at night. They can, in addition, flash the pilot station or use VHF Channel 16. The telegraphic address of pilot station is "Pilot Station Port Commission Colombo" and a provisional ETA 24 hours ahead is advisable with corrections thereafter. However, these are best channelled through the vessel's Agent. Pilot boat is a wooden motor launch with the word "Pilot" on its side. It flies the H flag by day or red and white lights by night according to the international code. The Pilot boards within an area of about 1 mile of the harbour entrance. Advice of where to anchor can be obtained from the Pilot by VHF or signal light.

ANCHORAGES: The usual anchorage off port is within 3 miles of the harbour mouth where up to 14 fathoms of water is available. 18 fathoms of water is available within 6 miles.

RESTRICTIONS: Entry may take place at all hours of the day and night but it is unusual for the Pilot to board vessel between midnight and 0400 hours.

MAX. SIZE: The maximum draft is 36 ft. and a length of 800 ft. is permissible. Beam is not critical. There is no appreciable rise and fall of tide.

HEALTH: The vessel entering port must fly the Q flag until boarded by the Port Health Officer to grant pratique. Pratique may be granted by radio if there is a doctor on board provided the ship is not calling from a port in India. A radio message should be sent within 24 hours of the vessel's ETA in the following terms "Last port —— no quarantinable disease on board – Doctor on board" and the Port Health Officer will reply to the Agent confirming pratique being granted by radio. Pratique is automatic if the vessel enters after calling at another port in Ceylon. If any quarantinable disease on board double Q flags must be hoisted prior to entering harbour.

RADIO: "Colombo Radio" with a call sign 4PB is the usual channel for communicating with Colombo.

The pilot station is presently available on VHF Channel 16 and the Port (Cargo) Corporation on VHF Channel 11.

TUGS: Tugs normally join the vessel at the harbour mouth and use their own lines.

BERTHING: There are no specific requirements relating to berthing space but early advice of draft is most advisable.

STEVEDORES: The stevedores at Colombo are the Port (Cargo) Corporation, a nationalised concern having the monopoly of stevedoring and lighterage. ETA at least 24 hours in advance if possible. Gangs for the day shift which commences at 0730 hours must be ordered by 0700 hours and gangs for the evening shift, commencing at 1630 hours, by 1600 hours. This excludes the Poya Day on which only the day shift is worked, and gangs must be ordered by 0930 hours on the previous day.

MEDICAL: Although advance notice of medical assistance required is helpful, particularly when port stay is limited, it is not essential. Comprehensive hospital facilities are available either in private nursing homes or in the Government hospitals. The following inoculations are required: Smallpox and cholera, yellow fever if calling from ports in East Africa and Mozambique.

TANKERS: The diameter of discharge lines is crude oil 24 in. at 1,000 tons per hour, white oil 10 in. at 250 tons per hour, gasoline 10 in. at 170 tons per hour, export of furnace oil 14 in. at 500 tons per hour and export of naphtha 12¾ in. at 450 tons per hour. Pumping will not be commenced after night-fall. No residue discharge facilities are available. There are three tanker berths. One of 650 ft. for white-oil tanker with a maximum draft of 33 ft., one of 700 ft. for crude oil with draft of 34 ft. and the other of 550 ft. for fuel oil imports with a maximum draft of 31 ft. and this same berth is used for exports, but permissible draft is 33 ft.

DENSITY: 1025.

FRESH WATER: Fresh water is readily available by barge. The rate of delivery is approximately 40 tons per hour and the cost is Rs.28.60 per 1,000 gallons plus 10% of cost of water after 1630 hours on work days and after 1230 hours on pre poya and 20% of cost of water on poya days. The water is of good quality.

FUEL: Furnace diesel and gas oil available. Advance notice of at least 24 hours is advisable as the bunker requirements of the port often exceed the ability of the oil companies to supply immediately. Supplies are by barges which can pump at 150/200 tons per hour.

DEVELOPMENTS: One new alongside dry-cargo berth with a draft of 34–42 ft. should be ready by 1973 and there are plans for further development.

GANGWAY/DECK WATCHMEN: Watchmen are available and are to be recommended unless members of the crew are available to provide this service. The cost of watchmen is Rs.22.50 per man per shift of 8 hours and overtime at Rs.10.00 per man per 4 hours or part thereof on week-days. On poya days Rs.30.00– per 8 hour shift and Rs.12.50 every 4 hours or part thereof.

OPENING/CLOSING HATCHES: This work is normally carried out by the stevedores except in the case of McGregor or similar hatch covers which they will not handle.

CERTIFICATES: Register showing vessels name, port of registry, gross and nett tonnages and owner. Safety Equipment Certificates quadrenninal and annual, Ship's Articles (British) and clearance from previous port and deratisation Certificate.

CUSTOMS ALLOWANCES: Cigarettes 25 per man per day. Tobacco 1 oz. per man per day. Snuff 1 oz. per man per day. Spirits ¼ bot. per man per day. Wine 1 bot. per man per day. Beer 2 bots. per man per day.

IDENTIFICATION CARDS: These are not essential but the crew is expected to carry some form of identification with a photograph on it when they leave the vessel.

REPAIRS: Most main engine and boiler repairs and minor hull repairs can be effected.

DRY DOCKS: Maximum length 630 ft. overall 72 ft. breadth deepest draft 30 ft. Maximum possible notice required for booking.

REPATRIATION: There is no difficulty in arranging repatriation and crew change.

AIRPORT: It is 18 miles to the international airport which is served by regular airlines. The second airport, for domestic flights, is 8 miles away.

TIME: Ceylon standard time is 5½ hours in advance of GMT, and no alterations are made during the year.

HOLIDAYS: Do not follow the normal pattern of weekends in Ceylon and instead of Saturdays and Sundays the days of the four quarters of the moon are observed as weekly holidays, with the day before observed as the weekly half holiday. Cargo work can normally be arranged on all except the following holidays:

1st January; 4th February; Sinhalese & Tamil New Year 1 day in April; 1st May; Wesak Full Moon in May; 26th September; Christmas Day.

POLICE/AMBULANCE/FIRE: Harbour Police tel. 21075; Ambulance 20428; Ambulance launch: Exhibit A.L. flags; Port Fire Brigade 32331.

TELEPHONES: None are available for placing on board.

GENERAL: Ships should not discharge oil within territorial waters, dispose any waste into harbour or on to quays, immobilise main engines without prior permission, use radio for transmission in harbour. Ships should hoist national flag during daylight hours.

SHORE LEAVE: There is no restriction on crew members being allowed ashore.

DELAYS: Delays for vessels working cargo vary considerably and it is impossible to generalise. However, it is very unusual for vessels calling for bunkers, fresh water, stores, etc., to be delayed for more than, say, 24 hours.

AGENT: Aitken, Spence & Co. Ltd., Lloyd's Building, Sir Baron Jayatilaka Mawatha, PO Box 5, Colombo 1. Tel. 27861–7 (7 lines). Telex 142. Cable Address "Aitken Colombo."

GALLE: 06.01 N. 80.14 E.

DOCUMENTS: Pilot brings on board:
Arrival Report and Maritime Declaration of Health.

Port Health Officer boards vessel after berthing and collects Crew List, Passenger List, Maritime Declaration of Health. Examines crew, passengers and International Certificates of Vaccination.

Customs. Manifests, Bonded List, Passenger List, Cargo List, List of Currency, Port Declaration.

Immigration. 3 Crew Lists.

PILOTAGE: Apply for Pilots via local Agents. Send ETA not more than 24 hrs. prior arrival via Colombo Radio. Vessels telegraph direct to Master Attendant, Galle, via Colombo Radio. Vessels advised listen-in on Channel 16, VHF.

Pilot launch about 60 ft. long with white hull carrying word "Pilot". Pilot launch proceeds to vessels from Master Attendant's Office and Pilot will board about ¼ mile to South of bell buoy. Vessels should anchor until pilot launch arrives and heave-up on approach of pilot launch; due to heavy swell prevalent *essential* vessels provide good lee for Pilot. Proper pilot ladder and two man ropes should be ready. Vessels anchoring should do so to the South or East of bell buoy. See "Anchorages".

ANCHORAGES: Best anchorage lies to Eastward of bell buoy where depth 9 fathoms. To Southward of bell buoy depth increases to 15 fathoms. Vessels should anchor about ½ mile from bell buoy.

RESTRICTIONS: Vessels should not proceed north of bell buoy. Entry prohibited after 1700 hrs. and may be delayed by bad weather. Generally a wind force of over 25 kts. and a swell of over 4 ft. delays entry.

MAX. SIZE: North-east Monsoon. 1 vessel of 500 ft. up to 30 ft. draft, 2 vessels of 500 ft. up to 26 ft. draft, 1 vessel of 450 ft. up to 23 ft. draft, 1 vessel of 350 ft. up to 20 ft. can be berthed at stream berths. South-west Monsoon. 1 vessel of 475 ft. up to 25 ft., 1 vessel of 450 ft. up to 21 ft., 1 vessel of 350 ft., up to 18 ft. can be berthed at stream berths.

2 alongside berths available for vessels 18 ft. draft. Alongside berths being dredged to accommodate vessels of up to 24 ft. draft, but at the moment only vessels of up to 350 ft. length permitted alongside. 750 ft. of quay space available, but this being extended to over 1,000 ft.

HEALTH: The International Declaration of Health, handed to Master by Pilot, must be completed and returned to Port Health Officer, who boards after berthing. PHO also requires 2 Crew Lists, synopsis of Vaccination Certificates, De-ratisation Certificate and examines Certificate of Vaccination.

RADIO: Colombo Radio.

TUGS: At present only one tug of 250 h.p. available throughout year. If sufficient notice given (over 24 hrs.) an additional tug could be sent from Colombo (only available during N.E. Monsoon). Proposal to station a 2,000 h.p. tug permanently in Galle under consideration. Tug meets vessel at berth, tugs lines used. Charges for tugs included in port (pilotage) charges irrespective of ownership of towing lines.

BERTHING: Vessel berthing in stream lies to both anchors and picks up 4 to 6 mooring lines from buoys aft. To pick up mooring lines, vessel should have ready at stream two messenger wires of $2\frac{1}{2}$ in. diameter and 60 fathoms length.

STEVEDORES: All stevedoring carried out by Government Corporation gangs, lighters, etc., are all arranged by Corporation.

MEDICAL: Vessel arriving in Galle and requiring medical attention should cable Agents at least 12 hrs. in advance.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Cannot be supplied under any circumstances.

DEVELOPMENTS: In addition to alongside berths now available, proposed to build breakwater from Watering Point to Secundra Rock continuing to Fort. Blasting in progress off Watering Point and breakwater may take 10 years to complete. Blasting not dangerous to vessels lying at Watering Point berths. (Also see "Max. Size".)

GANGWAY/DECK WATCHMEN: Ceylon police station two policemen aboard every vessel in harbour. For vessels berthed alongside policemen stationed aboard through day. For stream vessels policemen stationed only during hours when cargo worked.

OPENING/CLOSING HATCHES: Shore labour, but there is no objection to hatches being opened prior to labour boarding.

CUSTOMS ALLOWANCES: Present allowance 200 cigarettes/week, 2 bottles beer/day. Others proportionally.

CONSULS: All consular officers in Colombo, 72 miles away, 3 hours by train, 2 hours by road.

REPAIRS: No repairs possible as Galle open to S.W., essential that vessels have engines ready at all times. No shutdown permitted.

REPATRIATION: Via Colombo. Government Agent in his capacity as collector of Customs acts as Shipping Master and will sign on/off properly authorised crew changes.

AIRPORT: Colombo.

TIME: Ceylon standard Time GMT plus $5\frac{1}{2}$ hrs.

HOLIDAYS: Non-working days in the Port (dates variable yearly): National Heroes' Day, Independence Commemoration Day, Sinhala and Tamil New Year Day, Good Friday, May Day, Vesak Full Moon Day, Poson Full Moon Day, Christmas Day.

POLICE/FIRE/AMBULANCE: Harbour Police 325; Ambulance 251, 252. No fire brigade available.

TELEPHONES: No telephones available aboard.

SHORE LEAVE: Crew allowed ashore.

AUTHORITY: Assistant Master Attendant, Master Attendant's Office, Galle, tel. 324.

DOCUMENTS:

International Maritime Declaration of Health.
6 copies Crew List.
6 copies Passenger List.
Smallpox Vaccination Certificates are compulsory.
Cholera or Yellow Fever Certificates required if vessel is arriving from an infected port.

PILOTAGE: No means of communication between Pilot Station and vessels calling at port. Vessels should indicate ETA through Colombo Radio, either to Agent or direct to Deputy Master Attendant, Trincomalee, at least twenty-four hours before arrival. No night pilotage. Pilot boards incoming vessels between hours of 0600 and 1800 about 2 cables Northward of Round Island (8° 30′ 48″ N. 81° 13′ 24″ E.). Vessels embarking pilot should whenever possible lower an accommodation ladder; if this is not practicable should let down a pilot ladder and provide two man ropes not less than three inches in circumference. Vessels awaiting a pilot should anchor half a mile North-westward of Round Island light tower in depths from 11 to 13 fathoms.

ANCHORAGES: Trincomalee Harbour is the only entirely sheltered natural harbour in Ceylon. Good anchorage may be found in almost any part of harbour in good weather.

RESTRICTIONS: Vessels may enter during hours of daylight only. Range of tide is very small and does not restrict entry.

MAX. SIZE: Almost unlimited length and draft can be accommodated in anchorage. Only one berth which can accommodate up to 600 ft. length, and 32 ft. draft. This jetty used for discharging tankers and bunkering.

HEALTH: The Port Health Officer boards vessels after arrival at anchorage to grant pratique. Pratique automatic for vessels arriving from another port in Ceylon.

RADIO: All cables to Deputy Master Attendant, Agents, Receivers, etc., should be routed through Colombo Radio; call sign 4 PB.

TUGS: One tug attends when required. Tow-lines generally not used; but if required tug lines used.

STEVEDORES: Stevedoring operations have been nationalized and are carried out by the Port (Cargo) Corporation, Trincomalee.

RADAR/VHF: At present there is no radar or VHF communication.

TANKERS: One tanker berth at which vessels of 600 ft. length and 32 ft. draft are discharged.

DENSITY: Salt water.

FRESH WATER: Available, supplied by water lighters.

FUEL: Marine heavy diesel and furnace oil can be supplied at 24 hours notice.

GENERAL INFORMATION

1. Arrival Advice: Ships' Masters are required to give the Captain of the Port 24 hours notice of arrival, stating time and date in their radio messages. They should also inform their Agents of ETA.

The telegraphic address of the Captain of the Port at all Chilean ports is "Maritgob".

2. Chilean Ports Time-table: Chilean ports are open at 07.00 hours from 15th April to 14th October and at 06.00 hours from 15th October to 14th April. They close down at 21.00 hours, unless the Maritime Authorities dispose otherwise due to urgent circumstances. Punta Arenas during summer (November – December) closes at 22.00 hours.

By special arrangement, and subject to payment of overtime to the authorities involved, vessels may be received and cleared in overtime hours.

All Administrative and Customs personnel in the port receive overtime after 18.00 hours on week-days, and on Sundays and feastdays; Customs' personnel additionally receive overtime after 12.00 hours on Saturdays.

3. Health. All vessels arriving from abroad are required to call at one of undernoted ports for free pratique: Arica, Valparaiso or Punta Arenas. Vessels are also allowed to call direct to Tocopilla, Iquique, Antofogasta, Coquimbo, San Antonio, Talcahuano and San Vicente.

Vessels can be exempted from call at one of these ports, and proceed direct to the port of loading and/or discharge provided permission is obtained, with 8 days notice from National Health Service.

Following details in order to apply for exemption on behalf of a vessel are required:

Name and flag of vessel.
Net registered tonnage.
Last port of call.
Cargo carried, or if in ballast.
Port of arrival in Chile and date of arrival.

4. Use of Sound Signals is forbidden in Port.

PILOTAGE: Compulsory. Ships approaching port should fly international signal flag "G" to request Pilot. Pilot boat is small craft painted white, with "P" or "H" flag on the mast. Pilot boards incoming vessels at pilot station, located 3 cables and 165° from red light at end of breakwater. If more than one ship is awaiting Pilot, vessels are requested to hoist, below the flag "G", a numeral, indicating order of arrival, especially if arrived overnight. Vessels waiting to be docked can anchor in Road at pilot station in 10 fathoms of water.

ANCHORAGE: Safe anchorage for vessels arriving after sunset can be found in a line bearing 194° Faro Isle Alecran distance 7 cables in depths varying from 9 to 10 fathoms.

RESTRICTIONS: Port officially closes at 21.00 hours; however, if necessary, ships docked and undocked at any time, weather permitting, if application presented in advance to port Captain,

MAX. SIZE: Six berths available within port area. They are numbered from East to West.

Berth No. 1.
Small ships length not exceeding 180 ft. and a maximum draft of 13 ft.

Berth No. 2.	vessels up to	460 ft.	length and a	maximum	draft of	20 ft.

Berth No. 5.	,,	544 ft.	,,	,,	,,	37 ft.
Berth No. 6.	,,	544 ft.	,,	,,	,,	37 ft.

If necessary, vessels over 600 ft. in length can be accommodated in berths 4 to 6, providing the area available for docking. Oil carriers have mooring buoys outside port area in depths of 48 ft. water. Installations consist of two groups of buoys, located in the North part of the bay, outside the port but sheltered from the swell prevailing in the coast, by the breakwater. 3 buoys are used to moor tankers loading crude oil from Bolivia. 2 buoys are used to moor tankers discharging clean products for city service.

HEALTH: Health officer boards ship after pilot has docked. Pratique granted after routine inspection of certificates and papers requested internationally. Yellow flag is lowered to signal the rest of the boarding party to embark to clear the ship.

In case of fever, and/or suspected diseases on board, Captains are to radio to Port Captain of the above situation. Upon arrival, vessels will be anchored in Quarantine, and inspected according to international procedures. From another Chilean port, pratique is automatic.

RADIO: COSTERA ARICA. Call sign CBA – 4. Frequency of transmission 8·478 kc/s. Frequency of reception 8·360 kc/s. Hours: from 0800 to 1900 on even hours.

TUGS: Only one tug in this port and normally joins vessel at the end of the breakwater. Tug is compulsory for docking and undocking. Tug provides the line at no extra charge.

STEVEDORES: Generally, stevedores are nominated the day before ship arrives, according to ETA, by the Agent. Also nomination can be made during the day. Working hours are A.M. 08-00 – 12-00, P.M. 14-00 – 18-00.

MEDICAL: Medical assistance can be obtained at any time requiring no advance notice. Hospital in the city.

TANKERS: Two sets of mooring buoys for tankers. Loading lines connection is 10 in. Discharging lines flanges 8 in. Pumping ballast into the bay is strictly forbidden. Ballast can be discharged through pipe-lines, to tanks ashore intended for this use.

DENSITY: Sea water: 1.025.

FRESH WATER: Fresh water is available. Hoses to be provided by vessels. Rate of delivery about 10 tons per hour. Cost of cubic metre US $0·23.–.

FUEL: No fuel facilities.

FIRE PRECAUTIONS: Red label explosives stowed in cargo hatches, require special permission to discharge within the port. Explosives for Arica are discharged into lighters, at mooring buoys located outside the port area. For tankers who load or discharge outside the port area, usual fire precautions are enforced.

DEVELOPMENTS: Project to build a new mole in the Northern part of the port, with accommodation for two ships of approximately 540 ft. The Port Authority is completing the actual installations, adding electric cranes, rails alongside, and a shed to store ore in bulk.

GANGWAY/DECK WATCHMEN: Port regulations call for a gangway watchman.

OPENING/CLOSING HATCHES: Riggers provided to attend to these services, nomination is by number of hatches working. 5 men to a hatch.

CERTIFICATES:

Tonnage Certificate.
Lighthouse Dues (Chilean).
Safety Radio Certificate.

CUSTOMS ALLOWANCE: One carton cigarettes per man, and one bottle wine/spirits per man.

TUGS: No tugs available, only motor launches to assist the Pilot and for passing mooring lines.
BERTHING: Buoys: Santa Fe Mining Company has 2 private buoys at berth 2 for mooring ore vessels using the portable and semi-mechanised system of loading.

Mooring Mole: 375 metres long, for 2 vessels of 180 metres each with draught of 30 ft. Berth number 1 is on the South side and number 2 on the North. Can be used at all times except during stormy weather, or when heavy swell is experienced.

Passenger Mole: to the S. of mooring mole.

Rail Mole: is an extension of berth number 2 and serves for mooring small vessels.

North of berth number 1, Santa Fe Mining Company has installations for storing ore in bulk, consisting of two subterranean ore yards. The loading system includes some incline conveyors, some field conveyors, a stacker conveyor, a loading conveyor and a 77·5 ft. loading tower featuring a 56 ft. aluminium boom. All these components are movable on rubber tyres.

Ore through a system of belt conveyors is passed to these portable conveyors made up in sections and then to loading tower with a loading boom from which ore is loaded direct to ship's hatches. Usually, vessels are shifted when changing hatches. Rate of work is 600 tons per hour and vessels moor with the bow to the North, port side alongside.

Discharge of Explosives and Ballast – Explosives are discharged direct to quay prior to authorisation by Maritime Authorities and due precautions being taken.
STEVEDORES: Ordinary rate of loading per gang, hatch, hour: Sacked goods up to 80 kilos each 25 tons; Cases, boxes, etc., 18 tons; Sacked ores 40 tons; Copper concentrates 60–80 tons; Manganese ore in bulk 80–100 tons; Iron ore 100–1000 tons.

Unloading: Wheat in Bulk 60 tons; Coal 50 tons; Timber 30 tons; Rails 33 tons.

TUGS: CAP at Guacolda has own tug. At Huasco there are 4 motor launches for use of Pilot, and lighters.
BERTHING: *Santa Barbara Mechanised Quay*, property of Santa Barbara Mining Company and used exclusively for loading iron ores. 80 metres long by 10 metres wide. Conveyor belt ending at a fixed loading tower, which loads at 600 tons per hour. Vessel has to be shifted to receive cargo in different hatches.

Height of loading tower is 25·60 metres over low tide, loading boom is 14·20 metres over medium sea level and depth alongside quay is 12·60 metres. Vessels with a maximum draft of 14·50 metres (48 ft.) can go alongside. Santa Barbara Mining Company provide riggers for shifting the vessel.

Guacolda: Quay is 183 metres long by 16 metres wide with a minimum depth of 13 metres and a medium of 20 metres at the head permitting any type of vessels to go alongside; in fact vessels of 80,000 tons have moored without difficulty. Quay has a conveyor belt ending in a mobile loading tower, with loading average of 2,500 tons per hour. Vessels moored port side to quay.
STEVEDORES: There are 50 stevedores for up to 4 gangs. In addition there are 20 longshoremen and 14 lightermen. Working hours are a.m. 07.00–12.00, p.m. 14.00–21.00.
MEDICAL: There is only a first-aid station. Freirina, 15 km. distance, has a small hospital and there is a first-class hospital at Vallenar, 52 km. away. A modern hospital under construction at Huasco.
FRESH WATER: No means for supply to vessels. Guacolda maritime terminal could deliver water in a very limited quantity and only in case of emergency.

PILOTAGE: Compulsory. During day-time pilot vessel flies blue ensign marked with a "P" and during night the usual pilot lights. Pilot boards 1,570 metres from Serrano Island lighthouse or 3 cables from the end of the breakwater. Pilotage hours for mooring operations are from 6 a.m. onwards; for vessel's departure no restriction, but preferably before midnight.

ANCHORAGE: Masters arriving for the first time in this port keep watch for numerous fishing boats. These boats leave port between midnight and 3 a.m., they are all equipped with navigation lights. The bay of Iquique is wide and offers good anchorage. Vessels awaiting a berth or those not mooring, find good anchorage in depths from 40 to 14 metres with sandy bottom; the best anchoring place is found 900 metres from the breakwater lighthouse and 500 metres from the mooring quay. Tankers mooring to buoys use both anchors. Vessels carrying explosives or gunpowder moor 1,400 metres from lighthouse situated at the end of the breakwater. There are two zones where there are submarine cables and where it is forbidden to anchor.
RESTRICTIONS: Fogs occur more frequently from December to March. A current runs from S. to N. at ½ to 3 miles per hour and is stronger at Point Piedras and Cavancha. Rough seas are more frequent from May to September, but they are relatively weak within the harbour.
MAX. SIZE: Berthing areas are as follows:
1. Embankment of 526 metres length; berths 1, 2 and 3, depth of 9 metres LW.
2. Pier, West side; 335 metres length, berths 4 and 5, depth between 9 and 12 metres LW.
3. Pier, East side; 280 metres length, berths 6 and 7, depth between 9 and 12 metres in berth No. 7 and 12 to 15 metres in berth No. 6.

RADIO: The Chilean Navy has a navy radio station (C.B.I.) for general marine service and another radio station, Radio Coastal Service (S.R.C.) situated in the same building of the Port Captaincy for cases of emergency.

PILOTAGE: Compulsory for foreign vessels. Vessel entering from Pacific will usually embark Pilots in Valparaiso or any other nearest port. Vessels coming from the Atlantic embark Pilots in Bahia Posesion, 30 miles to the West side of the Eastern entry of Magallanes Strait. Pilot vessel is a landing craft called "Concon" which has radio-telephone frequencies of 2,182 and 2,638 ks. Four hours before arrival of the vessel, the craft keeps watch on 2,182 ks. Craft carries International Pilot lights; the hull is black with white housing. ETA at Bahia Posesion has to be given at least 24 hours in advance. Pilots have to be requested at Valparaiso 5 days in advance minimum. This is normally done by Agent. In bad weather, vessel to anchor and wait in lat. 52° 17′ 5″ South, long. 69° 12′ West. Pilots usually board near the buoy of Banco Narrow and disembark off the lighthouse of Punta Delgada.
ANCHORAGE: Recommended anchorage area is 4–5 cables from the head of the Fiscal Quay, 11 fathoms depth. Anchorage is prohibited within 300 metres of the quay.
RESTRICTIONS: No tidal restrictions, vessels can come alongside day or night.
MAX. SIZE: 6 berthing places, two of which are for vessels 600 ft. length, 27 ft. draft. Tankers: See below. No limits for vessels at anchor.
HEALTH: At first Chilean port, doctor will come aboard with Authorities. In other Chilean ports there is no need to ask for pratique or to hoist the "Q" flag as pratique is automatic.
RADIO: There are two radio stations: (*a*) CBM Radio Naval of Magallanes permanent watch on 500 ks. Telegraphy (A1). (*b*) CBM2 Radio Costera Magallanes operating from 0830 to 1830 on frequencies 4390, 8694 (transmitting) and 4085, 8360 (receiving).
TUGS: Not normally used to go alongside in Punta Arenas but only to berth in tanker terminals – ship's lines used.
STEVEDORES: Gangs to be requested 24 hours before arrival. Loading/discharge rate depends on type of cargo but can be estimated at an average of 15 tons/hour/gang. According to the working rules of this port, when a vessel starts its operations of loading or discharging without working overtime, it has to follow them for the whole time, but if it starts working with overtime, it must continue doing overtime every day.
MEDICAL: No advance notice to Agent required. There is a hospital with all facilities. International anti-smallpox vaccination required to go ashore.
TANKERS: There are the following terminals for tankers:

Terminal	*Lat.*	*Long.*	*Max. Length*	*Draft*

PILOTAGE: As port is narrow, pilotage compulsory for entering or clearing the artificial port. Pilots board vessels about one mile outside the artificial port, weather permitting. Vessels should wait for Pilot in position bearing 159° and 1,080 metres from Panul Lighthouse.
ANCHORAGE: Vessels over 100 metres length must anchor in position bearing 240° and 1,400 metres from South mole beacon. Vessels under 100 metres length find good anchorage in sandy and muddy bottom, 20 metres deep in position bearing 240° and 650 metres from the above beacon. Only in event of bad weather or strong winds which prevent pilot boarding vessels outside harbour vessels under 100 metres length can anchor inside North pool and wait for Pilot.

Mooring buoys: inside small or North pool, are two mooring buoys. Fiscal Buoy: situated at 280° and 170 metres from head of Port Authorities' pier can be used for vessels up to 31 ft. draft.

PSNC Buoy: Property of shipping company, situated at 185° and 50 metres from above pier, can be used for vessels up to 40 ft. draft.
RESTRICTIONS: San Antonio is a narrow and a difficult manoeuvering port, entrance to artificial port is subject to weather conditions and during hours the port is open; see "CHILE", General Information.

Entrance is effected during daylight only. In emergency and specific cases (weather permitting) this can be done up to 22.00 hours. Sailing permitted any time, day and night, weather permitting.
MAX. SIZE: The following is maximum length and draft allowed in different berthing places:

Berth 2	length 80	metres,	20 ft. draft	
Berth 3	,, 60	,,	18 ft.	,,
Berth 4	,, 160	,,	22 ft.	,,
Berth 5	,, 100	,,	17 ft.	,,
Berth A	,, 100	,,	or more, 30 ft. draft	
Berth B	,, 160	,,	29 ft.	,,
Berth C	,, 150	,,	27 ft.	,,

Berth A has a mechanised plant for discharging coal bulk cargo.

TUGS: There are 3 tugs available.

BERTHING: At mooring pier, facing small pool are berths 1, 2, 3 now joined together forming useful mooring berth 250 metres long, and facing the large pool berths 4 and 5. Berths 1–4 are only used by foreign vessels and coastal vessels while berths 2–3 and 5 are only used by coastal vessels.

Mechanised mole: situated at head of South mole, berth A for mechanised discharge of coal and bulk cargo. Vessels up to 110 metres length can discharge without any difficulty. Vessels over this length will have to be shifted to work number 1 and 2 hatches provided berth B is available. The maximum draft is 30 ft.

Only when raining is work stopped. but as the ground swell is strong and the mole is not well protected, it is recommended that ships be provided with good fenders and moored in a secure manner.

STEVEDORES: 614 labourers, stevedores, tally-clerks, crane men, watchmen, etc. Cargo is worked expeditiously, especially copper. Port works from 08.00 to noon and from 14.00 to 18.00 hours, or straight through up to 23.00 hours and paying overtime. The rate of cargo handling capacity is as follows:

Loading: Copper 30–40 tons/hour per hatch/gang.
Bagged cereals, 20–30 tons/hour per hatch/gang.
General cargo, 20–30 tons/hour per hatch/gang.

Discharge: Phosphates (bagged) 20–30 tons/hour per hatch/gang.
Cereals 50–80 tons/hour per hatch/gang with mechanical grabs.
General cargo, 20–30 tons/hour per hatch/gang.

MEDICAL: Hospital with 100 beds and necessary surgeons.

FRESH WATER: All berths equipped with standpipes to supply fresh water direct to vessels at a rate of about 10 tons per hour, but during day rate may be less due to low pressure.

FUEL: Coal: in case of emergency, coal can be received by railway car from the mechanised plant at berth A, or by lighters.

Fuel can be supplied to vessels in case of emergency provided this is requested with sufficient advance notice.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Done by stevedores.

IDENTIFICATION CARDS: Required.

CONSULS: Brazilian, French, Norwegian, Swedish and Italian.

REPAIRS: Three workshops; several slipways for repair of small craft.

REPATRIATION: Facilities exist.

AIRPORT: at Los Cerrillos near Santiago, national and foreign airlines services.

TIME: Local time GMT minus 4 hours.

GENERAL: Fumigation: all vessels arriving with a complete cargo of cereals are compelled to be fumigated according to Chilean law. To effect this vessel is tied up at North mooring buoy. Only the hatches are fumigated and all crew members must go ashore.

Fumigation takes about 18–20 hours. It is recommended these vessels arrive provided with strong ropes (special nylon) and good fenders as protection against heavy swell.

SHORE LEAVE: Allowed.

DELAYS: South-west winds generally blow at dawn calming at sunset, leaving a heavy and strong swell in the bay. It is therefore recommended to arrive at the port daybreak from September to March, so as to enter the artificial port immediately. South winds also develop a Northerly current. Fogs are frequent from November to March.

TUGS: Port has 2 tugs, one of 120 h.p. and the other of 115 h.p., Shipyard has 2 tugs each of 600 h.p.

BERTHING: Naval Quay: Called Pier Quinientos. Situated South of inner harbour for repairs afloat, on West side of bay. 500 metres long but only 240 metres are available for merchant marine. Vessels up to 29 ft. draft can moor alongside at high water. No difficulties are experienced on account of length of vessels.

Fiscal Pier: Situated short distance East of La Viuda Rock and on the S.W. coast. 320 metres long (but only 195 metres usable) and 65 metres wide. Vessels up to 28 ft. draft and not exceeding 195 metres length can moor on East side.

Fiscal Quay: 1·5 metres of water, for mooring tugs and lighters, at present out of use.

Passenger Mole: At a distance of 80 metres from the Fiscal Quay and on the Blanco Encalada Mole is the Passenger Pier with concrete steps for passenger traffic.

Chacabuco Quay: Situated on the Inner Harbour for repairs. Vessels up to 21 ft. draft can moor. No railway line or cranes, therefore vessels must work with own derricks to vans. "Asmar" tugs are used for mooring.

STEVEDORES: 12 gangs available Loading: assorted goods 12 tons per hour/gang/hatch. Cereals 25 tons per hour/gang/hatch. Timber 100 tons per hour/gang/hatch. Newsprint 20 tons per hour/gang/hatch.

Discharge: assorted goods 12 tons per hour/gang/hatch. Bagged cargo 25 tons per hour/gang/hatch.

When loading is carried out by means of lighters, this is usually done from privately owned moles belonging to the principal commercial firms of the port from their warehouses situated inside the Morro Channel. Working hours are a.m. 08.00–12.00, p.m. 14.00–18.00.

MEDICAL: Public hospital with board and sanatorium for infectious/contagious diseases. In addition, private clinics and a naval hospital.

FRESH WATER: Vessels in roads can receive water from tugs. Vessels moored alongside supplied direct from pipes at rate of 10 tons per hour.

FUEL: Can be supplied only to vessels moored alongside quay and this in small quantities up to 100 tons, by means of cistern-truck or in drums.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Done by stevedores.

PILOTAGE: Compulsory. Pilot must be waited for in position bearing 116° and 1,830 metres from Punta de Angeles Lighthouse.
ANCHORAGE: Outside the harbour and close by vessels find good anchorage in 25–15 fathoms water. It is always prudent to secure a good anchorage owing to possible strong winds during all periods of the year and causing heavy swells.

In winter, vessels anchor with one anchor with full chain and have another ready for emergencies. During winter it is not convenient to anchor near the coast due to the risk of dragging; during summer the nearer to coast, the better.

With the object of keeping clear the entrance to Valparaiso Bay and to assure a proper anchorage when arriving at this port, the Harbour Master has fixed the following anchorages according to arrival, so that vessels may proceed to berth in order of arrival.

Anchorage No.					
1	104°	True and	980 m.	from breakwater's red light.	
2	099°	,,	1,400 m.	,,	,,
3	079°	,,	820 m.	,,	,,
4	083°	,,	1,220 m.	,,	,,
5	056°	,,	980 m.	,,	,,

9	052°	,,	1,550 m.	,,	,,
10	059°	,,	1,900 m.	,,	,,

If any vessel does not occupy the anchorage assigned, she shall be shifted by a Pilot of the Harbour Master's Office for Account of Owners.

Should the ten anchorages be occupied when vessel arrives, a provisional one shall be expressly given by the Harbour Master's Office to the vessel that requires it.
RADIO: Naval Radio Station of Valparaiso in Playa Ancha which attends the public maritime service. Coastal Radio Service (SRC) with its station situated in the Port Captaincy Building, also attends the public maritime service, both national and foreign (CB V–2).

CHINESE PEOPLE'S REPUBLIC

Up-to-date information of port entry requirements for Ports in the Chinese People's Republic is unobtainable.

We have been advised by the Head Office of the China Ocean Shipping Agency at Peking that Shipmasters of foreign vessels calling at Chinese Ports should contact the Branch Office at the Port concerned (cable address "Penavico") in order to be provided in due time with necessary information relating to port entry requirements.

We hope that in due course all necessary information will be passed to us by the Authorities and should this be the case, such information will be included either in Supplements to this Guide or in later editions.

RESTRICTIONS: Maximum draft for crossing bar is 32 ft., one hour before or after high water. Bar is located in position 03.48 N. 77.19 W.
MAX. SIZE: No restrictions on the length of vessel. Draft alongside wharf approximately 24 ft. low tide, up to over 32 ft. high tide.
HEALTH:
(*a*) As soon as vessel anchored by Pilot within bay, port authorities including doctor, will board by means of ladder which must be lowered when port area entered.
(*b*) In case of sickness on board, Master must advise order doctor may determine whether vessel will be under quarantine or not. This will apply even if vessel arriving from a port of the same country.
(*c*) Time-table for meeting vessel: Ordinary or regular time – ordinary time: 0800/1200–1400/1800; overtime – 0700/0800–1200/1400–1800/2200. Sundays and holidays, overtime.
(*d*) After 2200 hrs. and up to 0700 of following day it is not possible to make arrangements for meeting vessels, unless in emergency.
RADIO: (Also see "Pilotage".) Port has receiving-transmitting radio station Buenaventura/Colradio HKC. For listening and transmitting there are following frequencies:

Listening	*Transmitting*
8354 to 8374 kc/s.	8574 kc/s.
12531 to 12561 kc/s.	13087·5 kc/s.
6265 to 6280 kc/s.	6386·5 kc/s.

In emergency: Listening: 500 kc/s. Transmitting: 441 kc/s. Station operates 24 hours a day.

TUGS: Normally only required for berthing. Tug operation handled by Pilot. Generally tug service consists of pushing from stern or bow as required. When necessary to use ropes, they must be supplied by vessel. 4 tugs of 1,200 h.p. each, 1 of 350 h.p. and 1 of 60 h.p.

BERTHING: Wharf divided into two sections, one for import cargo and one for export cargo. Berthing arranged by turn accordance hour of anchoring in Bay for each vessel. Tidal currents alongside berths.

STEVEDORES: (See "Pilotage".) Port has at present time 80 gangs of 16 men each. The working hours during ordinary or regular time are from 0800/1130 and from 1400/1730. Overtime from 1800/2400 and from 0000/0800, and 1200/1400 (24 hours are worked).

MEDICAL: Agent must be given advance notice of urgent medical attention. Properly equipped hospital. All members of crew and passengers must have International Certificates of vaccination against smallpox.

TANKERS: Independent oil pier with capacity to accommodate vessels of medium size. Four 8 in. hoses for discharge of petroleum products, and two 6 in. hoses for unloading chemicals. Average rate of discharge of gasoline is 5,000 barrels/hour (approx.). Fuel oil and chemicals 1,500 barrels/hour.

DENSITY: 1,012 (approx.) average.

FRESH WATER: Drinking water unlimited quantity. Delivered through hose from end of wharf. Rate of delivery: 6 tons per hour. Cost per ton U.S. $0.60 (approx.).

FUEL:

(*a*) Two kinds of fuel, marine gas oil and bunker "C" fuel. Characteristics of gas oil: gravity 33·0 to 60°F. Specific gravity: 8602. Characteristics of bunker "C" fuel: gravity, 13·2 to 60°F. Specific gravity, 9779.

(*b*) To take bunkers vessel must berth between holds (warehouse) 2 to 9, and for delivery of gas oil between warehouse 1 to 5.

(*c*) Rate of delivery (approx.), 250 barrels/hour for bunkers and 700 barrels/hour for gas oil.

(*d*) Deliveries depend on quantity available when order placed, consequently Agent must know well in advance vessel's requirements.

(*e*) Cash payment according to prevailing prices at time of delivery; otherwise, according to contracts between Ship owner and supplier.

FIRE PRECAUTIONS: Fire station within port installations with proper equipment. In city also another fire station, co-operating if necessary.

DEVELOPMENTS: Improvement in wharf installations, warehouses and equipment and dredging is scheduled to deepen the depth alongside wharf.

WATCHMEN: Service necessary both by crew members and Agents personnel. There is not an established body of watchmen; the steamship agencies carry out this work with their own personnel with previous request by Master. The port has a port police body and Custom house guards which co-operate in vessels' watch.

OPENING/CLOSING HATCHES: All Agents have special gangs to handle this operation and to fix the vessel's rig for discharge and/or loading. These personnel permanently stand by on board on account of climateric conditions of port with frequent and sudden rains. No prohibition against crew carrying out such operations when charter parties are involved and which stipulate that such operation must be done by crew. It is known from experience, however, that vessel's personnel are not, on occasions, sufficient to do this work.

CUSTOMS ALLOWANCES: No regulations establishing quantities which each crew member may have outside bond, but must not be excessive order avoid problems with authorities.

CARGO GEAR: Ship's gear used. Also see "General".

IDENTIFICATION CARDS: Agent will supply special cards to crew and passengers in transit so that they may go ashore. Cards valid for entering and leaving port installations and for identification with the immigration authorities. Must be returned before vessel departure.

REPAIRS: According port regulations vessels must at all times be ready with engines to sail, consequently repairs of engines not allowed when ship berthed at wharf. No prohibition against minor repairs on deck. When engine or deck repairs taking a long time are necessary, vessels not being loaded and/or discharged simultaneously with repairs must go to anchoring ground, since crowding of vessels at port does not permit vessel being inactive occupying space while other vessels are anchored waiting for berth.

REPATRIATION: Authorities render co-operation for change of crew and arrangements of repatriation in co-ordination with ship's Agent.

AIRPORT: Located 18 kilometres from Buenaventura. Serviced by a regular airline, Aerotaxi, which has several daily flights from Buenaventura to Cali and a daily flight from Buenaventura to Bogota. Small planes which take 40 minutes from Buenaventura to Cali and 1½ hours from Buenaventura to Bogota. Airport is small and has no facilities for international flights. Agent in charge of the repatriation of a crew member must handle necessary connection in Cali or Bogota, where there are international airports.

TIME: GMT minus 5 hours. Permanent.

POLICE/AMBULANCE/FIRE: A voluntary firemen corps in the city. Alarm, tel. 22–22; Guard, tel. 22–23; Firemen of the Maritime Terminal, tel. 28–30; Ambulance, tel. 2830; Police, tel. 27–38.

GENERAL: Provisions available. Cable service to all parts of the world. Telephone and telex service inside country and to foreign countries through Bogota. Weather conditions: generally rainy. Explosives: if the vessel is transporting dynamite and detonating caps they are placed in separate lighters, and armed guards are required on board any vessel transporting explosives. In such cases, the vessel must anchor in front of Buoy No. 9 and discharge to lighters during daylight. No vessel can berth at the wharf if transporting explosives, and only permitted with dynamite in closed hatches, which will not be opened at the wharf according to government regulations. Port is equipped with following shore cranes: 2 × 80,000 lb. capacity (mobile), 1 × 60,000 lb. capacity (mobile), 3 × 20,000 lb. capacity (mobile), 2 × 14,000 lb. capacity (mobile), and 4 × 10,000 lb. capacity (2 mobile and one fixed). Floating cranes: 1 × 45 tons capacity.

Lighters available: 3 with following characteristics:

Size Length/width	*Capacity*	*Type*
1–24·40 × 9·45 m.	200 tons	Flat surface
2–34·40 × 7·60 m.	150 tons	Flat surface
3–38.80 × 10·60 m.	150 tons	Flat surface

No refrigeration space available.

SHORE LEAVE: Permitted (with ID cards).

DELAYS: At anchorage in Bay average delay of one day while waiting for berth. On account of the rainy condition of the port, discharge or loading is at times stopped up to 12 hours.

RADIO: Radio traffic addressed "Sagoc Tibu" via Barranquilla or Cartagena radios.

TUG: Tug-pilot-boat leaves dock on sighting vessel.

BERTHING: Vessels use stb. anchor with approx. 5 lengths of chain, and 2 stb. mooring booms aft; two port mooring buoys aft and 2 port mooring buoys forward. All mooring lines should be 120 fathoms. Prevailing wind 310°. Terminal is a sea-berth approx. 1 mile from illuminated marker buoy.

MEDICAL: Doctor on call at any time. Twelve-bed hospital.

LOADING: Hoses connected on port side 2×10 in., each 2½ tons, to be lifted by ship's boom and winch. Pipeline 20 in. 7,300 ft. from pump station to berth. Average pumping rate: 2,000 tons per hour. Max. pressure ashore: 120 PSI. 3 grades of oil handled by same pipeline. Approx. API gravity of crudes: heavy Barco 32·5, Cicuco 45·5, Valasquez/Barco mix 24·0°.

DENSITY: 1·021.

IDENTIFICATION CARDS: If required by Customs, issued by Sogac.

CONSULS/REPAIRS/DRYDOCKS/FUEL/FRESH WATER: None.

REPATRIATION: Only if sick crew member left ashore after vessel sails.

AIRPORT: Barranquilla. Flights to U.S.A., Europe and other S. American countries.

TIME: Eastern standard time. G.M. T. – 5.

HOLIDAYS: Loading carried on during holidays and week-ends.

SHORE LEAVE: At discretion of Captain. Crew uses private motor vessel at own risk.

REGULATIONS: Vessels should arrive with clean ballast. No dirty ballast to be pumped into bay, violation subject to penalties. If impossible to arrive with clean ballast, dirty ballast will be discharged through cargo lines and 3,000 barrels of dirty water displaced into vessel. Capacity of slop receiving facility unlimited.

DELAYS: Only when other vessels occupying mooring.

AUTHORITY: South American Gulf Oil Company, Covenas.

POZOS COLORADOS TERMINAL: 11.09 N. 74.15 W.

DOCUMENTS: See "Santa Marta".

LOCATION: North Coast of Colombia, approx. 6 miles South-west of Santa Marta.

MAX. SIZE: Berth in approx. 55 ft. of water and can accommodate vessels of up to 69,000 dwt. with max. draft 45 ft.

PILOTAGE: Mooring Master will meet vessels approx. 1 mile seaward of terminal location.

CLEARANCE: Port authorities board with Mooring Master to enter ship and attend all formalities.

BERTHING: Vessels lie in berth in approx. due North heading; vessel's lines run by means of mooring launch to stern, quarter, and breast buoys. Vessels up to 20,000 dwt. require at least five good manila lines; vessels in excess of 20,000 dwt. require at least seven good manila lines. These lines must be of not less than 120 fathoms

length. Synthetic lines of equivalent strength may be used. Vessels equipped with wire mooring winches may use wires in lieu of fibre lines. When mooring, required use both bower anchors, each having at least 150 fathoms of chain and be prepared handle five-ton lift on starboard side at ship's manifold. Because of rigidity of submarine hose, a small movement of vessel out of correct position could damage submarine equipment. Extreme caution must be exercised to assure that vessel is correctly moored. During loading operation slack must be kept out of submarine hose by adjustment of vessel's anchor and lines.

HOSES: Submarine hose 16 in. with 16 to 12 in. reducer for connection to vessel's 12 in. deck hose. For vessels not equipped with 12 in. deck hose, a 12 to 10 in. reducer is available. A 25 ft. length of 10 in. deck hose is also available for vessels not having a deck hose on board. Ship's crew performs all hose connecting, disconnecting, etc.

CARGO HANDLING: Rio Zulia Crude Oil has following specifications: Gravity, approx. 41·2° API. Flash, below atmospheric temperature. Reid vapour pressure, 5 to 8 PSI. Pour point, +85°F. Sulphur, wt. %, 0·3. Wax, wt. %, 16.

Rio Zulia Crude has high wax content (about 16% by weight). Above 90°F. Rio Zulia Crude will flow easily and is about same viscosity as heavy No. 2 oil. Below 90°F. it rapidly becomes more viscous until it is similar to petroleum jelly or heavy lubricating grease.

Temperatures: Loading temperature of this cargo at Pozos Colorados between 85 and 90°F. Vessel should maintain loading temperature in wing tanks or if necessary gradually raise temperature to approximately 85° to 90°F. Approx. 2 to 3 days prior arrival discharge port, vessel should start to heat cargo in centre tanks so that upon arrival discharge terminal, average cargo temperature is between 100° and 105°F. for both wing and centre tanks. This temperature should be maintained throughout discharge. When discharge is through a submarine line in cold waters or over docks, when ambient temperatures are extremely cold, it is recommended that above temperature be increased 5° to 10°F.

Tank preparation: Cargo tanks which on previous voyage contained sour crudes (similar to those loaded in Arabian Gulf) should be machine washed with hot water at maximum pressure order remove from tank bottoms all free oil remaining from previous voyage. Machines should be spotted low in tanks so as obtain maximum washing over tank bottoms. Upon completion of deballasting, cargo tanks should be stripped dry and cargo pumps and lines drained so that tanks, pumps and lines free of pumpable water when cargo loaded into them.

Cargo discharging: When discharging Rio Zulia Crude, each cargo system should be discharged by main cargo pump directly connected to that system and forward tank on each system should be discharged first. Operations should then work aft with tanks on each system being discharged in rotation. This will keep vessel trimmed by stern throughout discharge and keep tanks being stripped draining to suction lines. This will also permit stripping operations to be carried out while main cargo pumps are discharging cargo in remaining tanks.

By discharging cargo tanks as recommended above, cargo loss resulting from crude congealing on bottom surfaces will be minimised. Each tank should be discharged as quickly as possible using main cargo pump, then stripped as well as possible. About 20 minutes after stripping each tank should be stripped again. Then in about 20 minutes each tank should again be stripped. During discharge of each tank, cargo heating coils should be left on until completion of stripping operation. When initial stripping operation is started, steam-to-steam heating coils should be reduced sufficiently so that cargo temperature will not rise above 120°F. If cargo temperature rises much above 120°F., there is danger that stripping pumps will become vapour locked.

BALLAST: Facilities for receiving a limited quantity of ballast.

FUEL: No bunkers available at terminal.

REPAIRS: Limited repair facilities available in Santa Marta, approximately 6 miles from terminal.

MEDICAL: Doctor and hospital located at Santa Marta.

1 Arrival Declaration form.
1 Merchant Ship Voyage Report (for Port Marine Police).
1 Maritime Declaration of Health (International Form Med. 20).
1 Declaration of all articles obtained outside Cyprus or during voyage by Master, officers and Crew (wines, and spirits, tobacco cigarettes, cigars, perfumery, jewellery, cameras, watches, arms and ammunition, etc. – Form C.121).
5 Crew Lists.
5 Passengers' Lists (landing and in transit).
1 List of Ship's Stores.
1 Dangerous Cargo List.
PILOTAGE: Masters to cable ETA 24 hours before arrival to Agent who will arrange berthing and piloting-in. Radio ETA message to Harbour Master not necessary except at times of congestion, when Agent will advise Master to do so for purposes of registering turn.
In normal weather conditions Pilot boards vessel at Turning-buoy or at anchorage. In bad weather conditions, Pilot will advise Master to proceed entrance of Outer Harbour, where Pilot will board. Communications between pilot Station and Vessels approaching port or anchored at roadstead by VHF Channel 16.
Pilot boat: open motor launches (about 150 hp.), light grey colour, flying pilot's flag. Light or sound signals for Pilot requirements: International signals apply.
ANCHORAGES: Vessels not berthing on arrival, to anchor at roadstead; a recommended position is 281°–1·4 miles from F. White

and Red Reef Lighthouse. In case of very bad weather a safe anchorage to be sought further North, near Boghaz Area.

RESTRICTIONS: Passenger vessels (vessels built to carry more than 12 passengers) allowed to enter port up to 23.00 hours, provided such vessels will be at Turning buoy by that time and also if berth space is available.

Cargo vessels allowed to berth latest up to 20.00 hours provided berth space available and that vessel will immediately operate with at least two gangs.

No tide restrictions, but for vessels entering Inner Basin maximum draft 22 ft., and for Outer Basin maximum draft 30 ft.

MAX. SIZE: Vessels berthing in Inner Basin 22 ft. draft and 430 ft. LOA. Vessels berthing in Outer Basin 30 ft. draft and 720 ft. LOA.

HEALTH: For passenger vessels, with surgeon on board, Master to cable to "Quarantine Department Famagusta", advising that all on board are in good health. For cargo vessels, pratique will be arranged soon after vessel has berthed. If vessel called at Cyprus port prior to Famagusta, pratique will be automatic.

In case of suspected disease or fever on board, the Health Authorities will take the necessary precautions and issue instructions according to the prevailing circumstances.

RADIO VHF: Cyprus Radio – 5BA. Vessels can also call Harbour Master Famagusta on VHF, Channel 16.

TUGS: Two tugs at Famagusta – One 500 h.p. called "Desdemona" and the other 1,350 h.p. called "Othello" on which VHF is also available. Tugs join vessel at entrance of Outer Basin, and ship's lines are used. Use of tugs is at discretion of Pilot. No charges made for the use of tugs, which are Government property.

BERTHING: According to rotation of arrival. If port is congested, vessels at anchorage should fly respective numerical flag denoting their number according to rotation of arrival.

STEVEDORES: For week-day work, gangs to be ordered by 15.30 hours previous day. For Sunday work, gangs to be ordered by 11.30 hours Saturday. For week-day work, it is also possible to apply for gangs in the morning or during the day subject to gangs available. Average rate of discharge on piece-work: general cargo 10–15 tons, bagged cargo 15–20 tons per hour/gang.

MEDICAL: Advisable for Master to include in ETA message to Agent if any medical attention required; hospital and private clinics facilities available. Smallpox vaccination necessary; other inoculations or vaccinations according to prevailing circumstances.

DENSITY/TIDE: Mediterranean salt sea water. Difference of 1–2 ft. between low and high water.

FRESHWATER: Water hydrants installed alongside quay, both in Inner and Outer Basins and delivery through hoses; rate of delivery 10–15 metric tons per hydrant per hour.

Approx. Cost: 12s. per metric ton plus £1.– for rigging hoses plus overtime, if applicable. Suppliers: Famagusta Waterboard.

Note: Certain limitations to quantities deliverable can be possible during summer months (June–August) owing to general shortage of water.

FUEL: No bunkering facilities alongside quay or in the port elsewhere. Limited fuel deliveries to vessels alongside quay can be made by lorry-tankers of 8–10 tons each. (Example of fuel available 530 seconds Redwood No. 1 at 100 degrees Fahrenheit.)

DEVELOPMENTS: Outer Harbour (2,100 ft. linear quay – 30 ft. draft) was recent extension to Inner Harbour (1,700 linear quay – 22 ft. draft) and any quay extension not foreseen in near future. The constructions of new sheds particularly for export and a passengers' terminal as well as a silo is under study and work may commence in the near future.

GANGWAY DECK WATCHMEN: Not obligatory, but available and most Masters engage watchmen. Day wages £3. Night wages £3 10s. (approx).

OPENING/CLOSING HATCHES: Carried out by crew; stevedores on board are sometimes willing to help but they are not obliged to do so.

CUSTOMS ALLOWANCES (Tobacco): Each crew member allowed maximum quantity of 40 cigarettes (or its equivalent in tobacco or cigars), or a quantity based at 25 cigarettes per day for number of days in port; for longer stays, further quantities can be issued from Bond. Master allowed larger quantity.

(Wine and/or Spirits): Each crew member allowed to one open bottle of spirit and one bottle of wine. Master allowed 2–3 bottles of each.

CARGO GEAR: Mostly supplied by shore stevedores or other contractors on hire, and it is expected to be tested and safe. Any gear supplied by the vessel must be certified tested and suitable for purpose used.

CREW IDENTIFICATION CARDS: Passports are accepted by the Police and Immigration Authorities. Identification cards, however, are advisable as crew members on shore leave must carry either their passport or identity card and the loss of the former, whilst ashore, may involve complications.

MORPHOU BAY

GENERAL SITUATION: Morphou Bay situated on North-west coast of Cyprus. Bay is well situated geographically, as owing to high hills all round there is shelter from all winds except those between N.W. and N.N.E. Loading records for many years past show that, whilst wind fairly frequent from N.W., winds of storm force practically unknown. Tides and currents are negligible.

1. Xeros Pier – Karavostassi, operated by Cyprus Mines Corporation, and,
2. Another loading installation at Karavostassi operated by Hellenic Mining Company.

1. Xeros Pier – 35° 08′ 16″ N. 32° 49′ 14″ E.
ORE LOADING: Ships moored in open roads; loading and discharging effected by lighters towed by tug to and from Jetty. Loading effected by grabs, each weighing about 10 cwt. and carrying about 20 cwt. of ore. Ship's winches must therefore be capable of lifting at least 40 cwts. Loading operations normally carried out 17 hours per day. Average loading rate is 3,000 to 3,500 tons per loading day of 17 hours. Ships load in turn and normally only one ship loaded at a time.
Inward cargoes only handed by special arrangement.
JETTY LIGHT: Corporation's Jetty 400 ft. long. A red light (electric) flashing every 3 seconds (duration of flash 0.2″; eclipse 2.8″) is on shore end of Jetty (lat. 35° 8′ N. long. 32° 51′ E.). Jetty berth not available to ocean-going vessels, depth being only 11 ft. Jetty equipped with electric crane with maximum lifting capacity 5 tons.
MOORINGS: Vessels ride to own anchors and depend on them for safety and security, using Corporation buoy as stern mooring to assist in loading. Buoy is in about 7 fathoms and located about 1,500 ft. from end of Jetty. Holding ground in anchorage is of tenacious sand and clay sloping away from shore.

PILOTAGE: Compulsory. Boards incoming vessels about one mile from the dock. (The Pilot's working hours from 8.00 a.m. to 12.00 noon, 2.00 p.m. to 5.00 p.m.; a fee of $15.00 charged after working hours. A fee of $15.00 is also charged for movements in harbour.) Ships will be received Saturdays and Sundays and at night for the same rate of $15.00 for the Pilot.
ANCHORAGE: Vessels that cannot be docked on arrival will find safe anchorage to the East of the dock where there is plenty of swinging room, in about 20 fathoms of water, with good holding ground of mud and sand.
APPROACHES: Coast Guard Service recommend that a ship, entering Manzanillo Bay from the East, should stay well out until it has rounded shoals surrounding Seven Brothers Islands. At approximately 19° 58′ West longitude, a course of 127° will bring it into the bay near the wharf. A ship arriving from the West should stay about six miles off Cape Haitian Light. When abreast the light a course of 111° will lead into the Bay a short distance North of the pier.
RADIO: Radio Station HIL31. This station is private and for the use of Grenada Co. only. Messages of ETA, etc. from vessels should be sent via Miami WAX or New Orleans Radio WNU.
TUGS: No heavy duty tugs available but there is a launch for the handling of ship lines.
BERTHING: Prevailing winds are Easterly and sometimes interfere with docking or undocking. On the East side vessels should dock bow in, since there is not enough room to swing vessels safely around for a port docking. On the West side vessels can dock either side to the pier, depending on the direction and force of the wind. In general banana vessels will be docked on West side of the pier and cargo vessels on the East side. Pier has a concrete deck 744 ft. long, 72 ft. wide. Both sides of the pier are protected with a pine fender system. The water depth at land end of pier is 10 ft. and at the seaward end 60 ft.
MEDICAL: Small dispensary in Manzanillo. Hospital facilities in Monte Cristi, 30 kilometres away.
STEVEDORES: Available.

Form CU. 10 Entry Outwards with cargo.
Form CU. 25 Entry Outwards (details of previous and forthcoming voyages.
Health Form.
"Jerque" Note (list of bonded stores on board on arrival).
Crew List must also be presented with personal declarations of dutiable possessions (i.e. radios; T.V.s; record players, etc.).
PILOTAGE: Limits of Dublin Pilotage District are waters of River Liffey between Butt Bridge and of sea Westward of Sixth Meridian between parallels of latitude passing through Bailey Lighthouse on North and through Sorrento Point on South including all bays, creeks and harbours and all tidal and closed docks within such area. Following classes of ships exempted from compulsory pilotage if not carrying passengers:
(1) Ships trading coastwise of not more than 200 tons gross tonnage.
(2) Home trade ships (including ships trading coastwise), of not more than 450 tons gross tonnage, excluding ships carrying petroleum or explosive cargo.

Incoming Vessels: Pilots board incoming ships from black-hulled pilot cutter in Dublin Bay. Cutter only cruises when vessels are expected, and accurate ETA requested to avoid delay.

ETAs should be given 12 hours before arrival and amendments may be made up to 2 hours before original ETA.

ETAs and any subsequent amendments should be passed by radiotelephone (VHF Hague Channel 16; call sign Dublin Harbour Office) or radiotelegram to "Harmaster Dublin".

Visual signals accepted by Pilot Shore Station or Hailing Station at Eastern Breakwater, as follows:
By Day (1) Flag "G" International Code.
(2) Flags "PT" International Code.
(3) Pilot Jack displayed at Fore.
By Night (1) Blue pyrotechnic light exhibited every fifteen minutes.
(2) Bright white light flashed or exhibited at short or frequent intervals just above the bulwarks for about a minute at a time.
(3) International Code Signal "PT" made by flashing lamp.
N.B. In poor visibility letter "G" in Morse Code may be sounded on whistle, siren or fog horn.

Holders of Dublin Pilotage Certificates should indicate this by flashing single letter signal "C" when approaching pilotage area between sunset and sunrise.

Vessels Outward Bound or Shifting: Order for Pilot should be made early as possible through Harbour Office tel. 48771 or Telex No. 5476 during office hours; and tel. 48772 outside office hours. Following details should be given: name and situation of vessel, destination, draught, time of departure. It must be stressed that such orders must be made in sufficient time making due allowance, particularly at night, for accessibility of vessel.

PILOTAGE: Compulsory. (*a*) Vessels requiring Pilot use International Code Signals. (*b*) Pilot boards vessel at a distance between 1 and 2 miles from the port, where vessel should wait with engine stopped. (*c*) Pilot ladder required for boarding. (*d*) Gangway ladders should be raised and folded, derricks and cranes inside, anchors ready for berthing.
ANCHORAGE: There is no specific anchorage area. Pilot meets the vessel and immediately proceeds alongside. If there are no berths available the vessel could be anchored anywhere outside the dock.
MAX. SIZE: One berth for vessels of 31 ft. draft, 590 ft. length; one berth for vessels of 37·5 ft. draft, 590 ft. length; three under construction, 31 ft. draft, 600 ft. length; one 37·5 ft. draft, 600 ft. length; sea line tanker berth (R.A.S.A.), 40·0 ft. draft, 700 ft. length.
HEALTH: If there is any suspicion of illness aboard, Captain has to inform by radio 24 hours in advance, indicating nature of disease and

all details. On arrival, vessel should anchor with yellow flag hoisted, to wait for the doctor of the port.
RADIO: Port VHF service open 24 hours a day. Contact through Channels 16 and 27. Channel 27 receives at a frequency of 157·35 megahertz and transmits at 161·95 megahertz frequency. Channel 16 receives and transmits at 156·8 megahertz frequency, being the most usual communication from port to vessel. There is no special key for calling.
TUGS: Tow lines not usually used; in case necessary the tug lines have to be used, their price included in the whole service. Tugs meet the vessel, usually at the dock.
BERTHING: Vessels can berth in safety at any time day or night.
STEVEDORES: Time of arrival required 24 hours in advance by radio-telephone.
MEDICAL: There are doctors in the port who attend normal cases and specialists and hospitals in Sonsonate city at 20 km. (by road) and in San Salvador, capital of the Republic, 85 kms. from the port.
TANKERS: Moor at R.A.S.A. buoy berth. Depth of water about 50 ft. Diameter of pipelines: 2 of 10 in. for clean products, 1 of 30 in. for crude oil and fuel oil. There are no facilities for residues discharge.
DENSITY: Salt water.
FRESH WATER: Delivered by hoses at the price of C0·65 (U.S. $0.26) metric ton.
FUEL: Possible to supply diesel and Bunker "C" only in limited quantities delivered by lorries. Viscosities: Bunker "C" 175 Sec. Saybolt furol. Diesel 40 Sec. Saybolt universal.
FIRE PRECAUTIONS: Inspection of hoses; no smoking; not allowed to solder or light any kind of fire; isolation of the place of loading and discharging operations; fire equipment to be ready.
PORT DEVELOPMENTS: Three new berths will have a depth of 9·4 metres (31 ft.) and one other 11·4 metres (37·5 ft.).
GANGWAY/DECK WATCHMEN: This service is done by the port staff free of charge.
OPENING/CLOSING HATCHES: This work is carried out by stevedores.
SHIP CERTIFICATES:
Vessel has to carry the Ship's Register (showing the register tonage).
Derat. Certificate.

CUSTOMS ALLOWANCES: Customs allow to take out of the vessel only tobacco for personal use. Not allowed to take any wine or spirits out of the vessel.
CARGO GEAR: The whole loading equipment has to be in good state with certificates showing capacity and safety.
IDENTIFICATION CARDS: Not required, but each member of crew has to be in possession of a valid passport.
CONSULS: No consulates in the port. In Sonsonate City there is the Consul of Guatemala Republic, tel. 51–0739, and in San Salvador City are Consulates for most countries.
REPAIRS: Possible to do minor engine and deck repairs. Other repairs can be carried out in San Salvador City. Any repairs that will delay sailing of vessels cannot be done without previous and specific authorisation of the manager of the port.
REPATRIATION: There are facilities for repatriation.
AIRPORT: There is an airport served by regular airlines in San Salvador at 95 kms. approximately from this port (by road).
TIME: No alterations in time during the year; local time is GMT minus 6 hours.
HOLIDAYS: 1st January, Maundy Thursday, Good Friday and Saturday, 1st May, 10th May, 6th August, 15th September, 2nd November, 25th December; the port stops working only on 1st January, Good Friday and 25th December.
POLICE/AMBULANCE/FIRE: National Police (Sonsonate) tel. 51–0838; Ambulance (Sonsonate) tel. 51–0589; Fire (CEPA, Acajutla) tel. 52–3000 (ext. 257); Fire (San Salvador) tel. 21–8661.
TELEPHONES: No possibilities to install telephones aboard.
GENERAL: Quarantine authorities pay strict attention to the meat on board and its residuum to prevent fever and it is forbidden to remove any kind of meat from the vessel. Berthed vessels need, in case of swell, special hawsers and wires provided by the port. Hire of these lines is C1.50 (U.S. $0.60) each one, and for every 1,000 tons of net register.
SERVICES: No facilities to discharge tank-washings.
SHORE LEAVE: Members of the crew are allowed to go ashore.
DELAYS: There are no delays for mooring, loading and discharging. Refuelling bunkers operates slower than normal loading and discharging.

PILOTAGE: Vessels requiring a Pilot use International Code signals. No official pilot service.
ANCHORAGE: Depths of 60 ft. available. Vessels can anchor at a minimum distance of 1 km. from the quay. All dry cargo vessels work cargo at the anchorage. No quay berths available.
HEALTH: On arrival vessel should anchor and wait visit of Port Authorities. Any suspected diseases should be notified 24 hours in advance.
RADIO: Service of radio-telephone VHF 24 hours a day. Channel 10 Citizen Band with a transmission and receiving frequency of 27·075 megahertz.
TUGS: No tugs required or available.
STEVEDORES: 24 hours notice required to arrange gangs and barges.
MEDICAL: Inform Agent as soon as possible to arrange a medical visit. The port has doctors to attend normal cases, and there are specialists and hospitals in San Salvador (capital of the Republic) at 35 kms. by road from this port.
TANKERS: At Esso Standard Oil, S.A. terminal, vessels anchor and moor to three buoys about 900 yards South-east of the shore and about 1,000 yards South-south west of the pier. Pipeline extends from La Puntilla in a south-easterly direction. Two pipe-lines for discharging products to Esso Standard Oil, S.A. The end of each pipe-line is marked by a metallic buoy, the cargo hoses for *1 and *2 pipe-lines are connected by separate chain to a "Spreader" which by single chain is attached to a metallic marker buoy. On the "Spreader" there is marked, by welding, *1 and *11 where the chains are attached, indicating what pipe-line they are connected to. Ship's crew is used in connecting and disconnecting cargo hoses.

Vessels should moor only on high water during daylight hours; however, they may unmoor day or night. Launch available for mooring and running lines. Approach is made from the Eastward on a true course 270°, a marker buoy is placed temporarily at a distance of 700 ft. seaward from end of pipelines to guide vessel in mooring operations. The marker buoy should be passed on the inside at a distance of 50 ft. Port anchor should be dropped first when the end of the pier is in true bearing 006°. When about 7 shots of chain have run out, the starboard anchor should be dropped. The stern of vessel will swing or may be worked to Northward (starboard). A mooring line should be run to the port stern buoy from port side assisting in swinging the vessel into position. Vessel should tie up securely with three lines to each buoy, and anchor spread 60° with 60/76 fathoms of chain on each. The eyes of all lines to buoys should be well protected to prevent chafing on the buoys. When in position, the pipeline hose buoy is taken on board at the starboard side.
DENSITY: Salt water.
FRESH WATER: Not available.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: There is a service of watchmen provided by Customs.

LA UNION (Cutuco): 13.20 N. 87.51 W.

DOCUMENTS: See "La Libertad".
PILOTAGE: Obtained usually through Agent, can be cabled request to Port Captain-La Union.
ANCHORAGE: La Union Bay – up to 34 ft. Approximately 14 Class II and a large number of Class III anchorage berths are available in the harbour. Five Class II berths are in the vicinity of the pier in depths of 33 ft. to 30 ft., and approximately 9 more, in depths of 70 to 30 ft., are just Westward of Isla Zacatillo. The first area has a mud bottom; the second is sandy and rocky. The large number of Class III berths are in an area Northward of the pier and in the area between the two anchorages providing Class II berths. The least depth in each of the areas is 25 ft. A large number of relatively unsheltered anchorage berths of all classes is available outside the harbour in the Gulf of Fonseca.
RESTRICTIONS: Enter any time – preferable on flood tide with draft over 24 ft.
MAX. SIZE: Largest vessel that can be accommodated in harbour would occupy an anchorage berth with a minimum depth of 43 ft. and a diameter of 3,300 ft. Largest vessel that can be accommodated alongside wharf would occupy a berth with least depth of 25 ft.; length is not a limiting factor, although a maximum 550 ft. is recommended, due to strong currents, 3 knots, and pressure on part of any vessel extending for any greater distance beyond length of wharf.
HEALTH: Disease should be reported. Pratique necessary on each occasion.
RADIO: Direct to Agents or Guarailco, Sansalvador.
TUGS: No tugs required.
BERTHING: Berthing usually carried out on slack tides due to cross currents, up to 3 knots. The estimated military port capacity is 1,800 tons of general cargo per day. Port can accommodate two standard-type ocean-going cargo vessels, and possibly one alternative class T/C (small ocean-type tanker under favourable conditions) alongside berths, and approximately 14 ocean-type cargo vessels, and a large number of Class III (coaster-type cargo vessels) at anchorage berths.
STEVEDORES: Prior advice preferable. Stevedore force consists of 12 gangs of up to 16 men per gang for on-board work. Similar gangs are available on pier, and up to 300 labourers, crane and fork-lift operators comprise shore gangs.
MEDICAL: Services available – no special restrictions.
TANKERS: Drafts 25/34 ft. fore and aft. Tankers of up to 550 ft. in length can be accommodated at either side of pier, where adequate connections of 6–8 in. and 10 in. pipe-lines are located. Largest vessel that can be accommodated alongside would occupy a berth with a least depth of 25 ft.; length is not a limiting factor, except as noted previously.
FRESH WATER: Four 2 in. connections on each side; volume estimated at 10 tons per hour.
FUEL: Bunkers and diesel – can be delivered when berthed.
GANGWAY/DECK WATCHMEN: Not required – National Marines on guard.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCE: Not controlled, but restricted ashore.
IDENTIFICATION CARDS: Passes for leaving ship to have Captain's signature.
CONSULS: Nicaragua – Honduras.
REPAIRS: No facilities.
REPATRIATION: Can be arranged.
AIRPORT: San Salvador – 120 miles away – regular airlines.
TIME: GMT minus 6 hours. No alterations.
HOLIDAYS: Easter Thursday, Good Friday. Port not worked only on those dates.
POLICE/AMBULANCE/FIRE: In La Union – proximate to Port.
TELEPHONES: None available.
SHORE LEAVE: Allowed.
AUTHORITY: International Railways of Central America.

Fiji Islands

LAUTOKA: (Vuda Point): 17.36 S. 177.26 E.

DOCUMENTS/HEALTH: Refer to "Suva".
PILOTAGE: Not compulsory at present. However, most vessels avail themselves of a Pilot, who boards at Navula Passage, 20 miles South of Lautoka. Masters should telegraph to their Agents ship's ETA and indicate whether they require a Pilot or not at least 24 hours in advance. Pilot boards from a small cabin launch in a position approximately 1 mile outside the passage on the line of the leads. In rough seas, it may be necessary for vessel to enter passage to enable Pilot to board. There is no anchorage outside the passage.
Pilot launch is not equipped with VHF but Harbour Master's Office maintains a listening watch on Channel 20 only during the following hours: from 08.00–13.00 and from 14.00–16.30, Mondays to Fridays, inclusive.
Vessels requiring pratique should anchor approximately 1 mile to Westward of Vio Island in Lautoka Harbour. Pilot for those vessels not employing one from Navula but requiring a Pilot berthing will board at the quarantine anchorage above.
ANCHORAGES: The whole of area enclosed by a circle of diameter approximately 1 mile between Vio Island and Pinder Reefs is an acceptable anchorage with depths ranging from 9 to 13 fathoms.
MAX. SIZE: Minimum depth in approaches to wharf 32 ft., depth alongside 36 ft. Generally speaking, any vessel not exceeding 32 ft. draft can be accommodated. Main wharf is only 457 ft. long but overhangs are allowable, dolphins for mooring lines being situated off each end of the wharf. Range of tide approximately 5½ ft. at springs and 3 ft. at neaps, but state of tide does not affect the foregoing.
At Vuda Point, the tanker berth of Lautoka, tankers in the 18,000 to 24,000 dwt. class can be handled. This is a submarine pipe-line installation, the ship mooring to four buoys, available depth being about 36 ft.
TUGS: No tugs available. Can be obtained from Suva if necessary.
BERTHING: Berthing and unberthing at Vuda Point only in daylight. Berthing at Lautoka is at discretion of Harbour Master or Pilot, but in normal conditions is effected at any hour of day or night.
TANKERS: See "Max. Size" above. No slop discharge facilities. Discharge line 8 in. diameter.
DENSITY: 1025.

DEVELOPMENTS: A modern pilot vessel of approximately 55 ft. in length will come into service in 1971.
CONSULS: None.
REPAIRS: Only comparatively minor repairs can be effected such as welding jobs and repairs to pumps and other auxiliaries.
REPATRIATION: Repatriations can be effected through vessel's Agents.
AIRPORT: Nadi International Airport is 16 miles from Lautoka. Frequent flights to all parts of the world by several major airlines operating through Nadi.
TIME: GMT plus 12 hours. No alterations to clocks.

DIRECTION FINDING: (Harmaja Radio Beacon) Harmaja Radio Beacon (frequency 298·8 kc/s) transmits:

(*a*) Non-directional radio signals, with a modulation frequency of 395 c/s. By listening to these signals with a direction finding receiver, equipped with frame aerial, a ship can determine her bearing to the beacon.

(*b*) Directional radio signals, with a modulation frequency of 752 c/s. By listening to these signals with an ordinary radio receiver a ship can follow the course-line of the radio signals from the open sea to Harmaja. The course-line direction is about 7° and it coincides approximately with the leading line Harmaja–Suomenlinna Church. On the east side of the course-line you can hear the radio signals A (·—) and on the western side N (—·). On the course-line the signals blend together and the ship hears a long continuous signal.

(*c*) Air fog signals, given by nautophone, with a tone-height of 300 c/s. The air fog signals are synchronized with the non-directional radio signals in such a way that the distance to the radio beacon can be determined by listening to both signals simultaneously.

Depth of channels:
(1) From Porvoo via Kuggsund and Hevossalmi Canal 2·4 m.
(2) From Porvoo to outer roads via Kalvö and straits at Kustaanmiekka 7·3 m.
(3) From Pellinki to Helsinki 7·3 m.
(4) From Helsinki Lighthouse to Helsinki 9·6 m.
(5) From Barösund to Helsinki outer route 5·5 m.
(6) From sea south via Porkkala 7·9 m.

TUGS: several available: charges based upon time when tug leaves station berth until moment of return to same station.
BERTHING: Port and equipment owned by Municipality of Helsinki. Five principal parts of port are South and West Harbours, Sornainen Harbour, and Herttoniemi and Laajasalo Oil Harbours. North Harbour serves only passenger-launch traffic to surrounding islands.

South Harbour mainly for piece-goods traffic used by Baltic and North Sea traffic. Foreign passenger traffic concentrated on this harbour.

West Harbour handles main part of transoceanic traffic, heavy goods and bulk cargoes. This part of port is Helsinki's coal harbour with necessary discharging equipment and coal storage facilities; also, silos of two flour-milling plants (Vaasan Hoyrymylly Oy and State Granary), into which grain discharged by suction. On silo quay pneumatic grain unloader owned by State Granary travels along 71 m. long bridge alongside ship to be unloaded. Equipment is 30 m. above quay level and range of suction pipe 11 m. from edge of quay. Unloading equipment can handle 100 tons per hour. Mass export articles such as cellulose, paper and wood goods, loaded chiefly in this harbour. In West Harbour is free-zone warehouse, which offers same privileges as free port.

Sornainen Harbour is timber export harbour, where timber can be loaded direct from railway wagon or motor truck. Technical establishments of city located in Sornainen Harbour, and coal imports effected through that harbour. Technical Works and Harbour Authorities have 18 cranes in that harbour.

Sornainen Harbour being reconstructed and harbour for passenger ferry traffic being built.

Herttoniemi and Laajasalo form the oil harbour, where the leading oil companies have oil storage tanks and own piers.

Bassens-Amont. 10 berths, total length 1,250 m. Depth alongside up to 9 m.
Bassens-Aval. 10 berths, total length 1,250 m. Depth alongside more than 9 m. at low water.
TANKERS: *Verdon Terminal*: Main berth. The ship is berthed on elastic dolphins (steel pipes) with an available depth of 16·00 m. Ship makes fast with own hawsers on four mooring dolphins, two up and two down on the wharf and set back about 35 m. from the face. This mooring is strengthened by very flexible steel warp hawsers of 55 and 60 mm. diam. Five hawsers of this type may be placed at each end of vessel according to needs and weather conditions. Ships must have strong chain or claw-stoppers for turning on bitts.
For crude oil, the berths have following equipment: one 30 in. line connecting the main berth to storage; one 16 in. line connecting the coaster berth to the foresaid line; One 10 in. line connecting the coaster to the main berth; One 6 in. line for bunkering.
Arms for connecting pipe-lines to ship. Connecting of the crude oil pipe-lines is made by ASA type, 16 in. Mannesmann arms (3 at main berth – 1 at the coaster berth). The Port Authority has a number of connecting collars in various dimensions and types. Ships are requested to inform before arrival on the type and data of their own collars. Connecting to the bunkering line is made by flexible hoses (ships must use their own handling gear).
Fire wire must be rigged on forecastle and poop, the eye one metre (3 ft.) above the water (all the time) when ship is light. Each fire wire must have a ten metres (30 ft.) coil laying between bitts and fair lead.
If no other request, the ship is assisted by two tugs (with Kort-nozzle 23 ton thrust) one of which stays at disposal during the call.
Secondary berth. This berth is for the use of shuttle-service ships, lighters and coasters, depth of 6·50 m. alongside.
Fire-fighting line. A 12 in. line supplies the wharf and the two berths with sea water under pression. At each berth there are fire-fighting hydrants. The first help material for fire-fighting is ready to use at each call. It includes spray nozzles, water and foam hoses, emulsion liquid containers, powder extinguisher systems (movable and portable).
Bunkering. Supply is made by lighters mooring at the coaster berth. Tying lighters alongside tankers is forbidden, except with special permission of the Port Authority.
Telephone. Telephone is connected to every ship on arrival. In that way the ship is regularly connected to the French telephone network (tel. No. 83 – Le Verdon).
Pauillac. Oil installation operated by Shell-Berre, 36 ft. alongside.
Bec d'Ambes. Terminal for tankers up to 200 m. length, 32 ft. 6 in. draft. Operated by Société U.I.P.
Blaye. Small tankers are accommodated at the private jetty of La Société Desmarais.

PILOTAGE: Pilots do not stay out at sea, but only go to meet ship at estimated time of arrival as sent by ship. Normally pilot boat positioned on the line Toulinguet lighthouse and Beuzec (or Charles Martel) buoy, about 2·5 miles N.W. Toulinguet lighthouse. If strong S.W. wind, pilot boat waits for ship at entrance of Camaret Bay, about 1·5 miles N.E. Toulinguet lighthouse. If sea too rough to allow pilot boat to sail out, boat waits for ship at entrance of Brest Roads, near Portzic lighthouse.

Ships proceeding Brest must send last message giving ETA pilot station (stating if *local time or GMT*), about 5 hours before arrival. Message to be addressed "*Brest Pilot Office*" through Brest Le Conquet radio station (call sign FFU). Day and night watch at pilot office. Radio station phones message direct as soon as received. Any alteration in ETA should be passed pilot office immediately.

Pilot boat sails from Brest harbour about 1½ hours before ship's ETA, and ½ hour later pilot boat takes radio-telephony watch on 2·182 kc/s, calling ship from time to time on same frequency. Ships fitted with radio-telephony should listen and call on 2182 kc/s. Pilot boat also equipped VHF Channels 16–9–6–12 and pilot office Channel 9.
ANCHORAGE: At Pilot's discretion. Anchoring in main approaches restricted as indicated on charts.
RESTRICTIONS: Entry subject draft and height of tide on day in question. Two entrances to port, one dredged to 6 m. below zero of charts and the other 5·8 m. below zero. Depth at quays varies according berth from 6 m. to 11 m. below zero.
MAX. SIZE: Inside harbour max. length 300 m. Draft up to 35 ft. subject to tide.
HEALTH: If from foreign port, cable Maritime Health Service 48 or 24 hours prior arrival requesting free pratique. If risk of contagious disease exists, vessel will be held in Roads until cleared. If from another French port, free pratique automatic.
RADIO: Brest Le Conquet – FFU.
TUGS: 2 port tugs of 250 and 750 h.p. Tugs wait at main entrance. Marine Nationale places tugs at ship's disposal for all port movements. Generally, tow-rope supplied by tug at additional charge.
BERTHING: According to draft, ships may have to wait in Roads before berthing, depending on height of tide in fairways. Also see "Restrictions".
BRIDGES: No bridges in port enclosures.
STEVEDORES: Agent has responsibility of making all arrangements for unloading, and is in touch with stevedores who arrange necessary gangs.
RADAR/VHF: No port radar service. VHF see "Pilotage".

2 Crew Lists.
5 copies of a Special Arrival form (supplied on arrival).

PILOTAGE: No pilot station at Cannes. A tender with Company's flag on top of its mast will meet the vessel: (*a*) If ship is proceeding to anchorage No. 1, in Golfe de la Napoule, about 1 mile South of the lighthouse at end of Cannes port Pier (Quai Lauboeuf); (*b*) If ship is proceeding to either anchorage No. 2 or 3, in Golfe-Juan, 1½ miles North of Ile Ste Marguerite.

The tender will lead to anchorage and will give one blast of the siren when correct position has been reached. At night, tender has a fixed white light at top of its mast, which replaces the flag. Should it not be possible to advise by wireless before arrival at anchorage and weather conditions making it necessary for ship to anchor at either position No. 2 or 3, boat will meet ship in Golfe de la Napoule, 2 miles South of Cannes port lighthouse. In this event, ship must proceed to anchorage No. 2 or 3 as appropriate, steaming to South of Ile St. Honorât, whilst tender will proceed by channel between Ile Ste Marguerite and the mainland.

ANCHORAGE: Advice of anchorage is passed to Captain via Grasse Radio usually about one hour before arrival. There are three anchorages, any of which may be used according to the weather:

No.1 off the port of Cannes, approximately ½ mile South of end of breakwater, used by calm sea or by East or North-east winds.

No.2 is situated to North of Ile Ste Marguerite, used by South-east or South-west or South winds.

No. 3 to the East of Cap de la Croisette, used by West or North-west winds.

It could happen during the call, winds may change direction and movement from anchorage No. 1 to No. 2 or No. 3 become necessary. Shift takes about one hour.

HEALTH: Port officials will embark immediately the ship anchors. Free pratique may be granted by wireless telephone one hour before arrival at ship's surgeon request stating: "no illness on board".

FRESH WATER: Three tankers of respectively 65, 75, and 95 tons capacity are available with 72 hours' notice. Water can be pumped at an average of 1,500 tons per 24 hours, with 2 hoses of 2½ in. diameter on each tender.

GANGWAY/DECK WATCHMEN: Watchmen for gangways will be provided and passengers are requested to present their landing cards every time they use the gangways.

PILOTAGE: Requests for pilotage must indicate arrival time at the buoy CH1. They may be addressed to Agent or direct to pilot station, telegraphic address "Pilotage Cherbourg" or through the Homet look-out station by means of the usual signals. To avoid delay it is well to warn the pilot station four hours in advance of arrival. As a general rule, the pilot boat always comes out, whatever the weather. In bad weather, it follows the vessel and Pilot boards as soon as shelter permits. Ships which arrive between 18.00 hrs. and 08.00 hrs. without having given their ETA, must take up a waiting anchorage to the North of the main breakwater between the meridian of the West Fort and that of the Central Fort. They must signal their presence to the Homet look-out.

ANCHORAGE: Anchoring must be made strictly according to the instructions of the Pilot so as not to get in the way of movements and anchorage of steamers. Depths vary from 6 to 12 metres in safe anchorages.

RESTRICTIONS: In the wet dock, the bridge is opened one hour before until one hour after high water.

MAX. SIZE: Length and breadth are unlimited, draft maximum 11 metres.

HEALTH: From French port to French Port, no formalities. From foreign port to French Port, request for free pratique (yellow flag). In case of sickness on board, warn the Agent in advance. No crew member may leave ship before consultation and agreement of Port Doctor.

RADIO: The stations which offer the best facilities are Boulogne Radio, Brest le Conquet Radio, and Saint Lys for ships which are a long way off.

TUGS: Tugs generally join vessel in the main approaches. With regard to the tow rope, a charge of about 50 F. is made.

BRIDGES: Only the swing bridge at the entrance to the wet dock, which is opened on request from 1 hr. before until 1 hr. after high tide for the entry and exit of ships.

STEVEDORES: Agent needs ETA, to arrange personnel and equipment to be used for handling cargo.

MEDICAL: Warn Agent of any requirements at the same time as ETA. There are two hospitals, civil and military, both very well equipped.

TANKERS: There is only one discharge berth, max. draft 9 metres.

WATER: Water points on all quays, price: 1,57 F. – minimum 3 tons.

FUEL: Available from local suppliers – Esso, Shell, etc.

WATCHMEN: Every ship in port must have a watchman, usually a crew member.

OPENING/CLOSING HATCHES: At the discretion of Master, crew may perform this.

CUSTOMS ALLOWANCES: Free allowance for each crew member – 200 cigarettes or 50 cigars, and 1 litre of alcohol.

IDENTIFICATION CARDS: Each crew member must carry his seaman's card.

PILOTAGE: Compulsory. Pilot boards 4 miles from breakwaters. Pilot boat is ready to put to sea from 2½ hours before to 2½ hours after high tide. During this period maintains radio telephone watch.

ANCHORAGE: It is recommended to anchor in zone bounded by following points: (*a*) 49° 56′ 55″ N. 01° 04′ E.; (*b*) 49° 58′ 40″ N. 01° 02′ 45″ E.; (*c*) 49° 57′ 42″ N. 00° 59′ 20″ E.; (*d*) 49° 55′ 50″ N. 01° 00′ 30″ E.

This anchorage area includes buoy D.I and depths are from 6 to 12 m. with sand and broken shell bottom. Larger vessels anchor approximately ½ mile to North of buoy D.I in depths of 10 to 12 m. To keep access to port free, it is forbidden to anchor in front of port entrance.

RESTRICTIONS: All except very small vessels enter port only at full tide slack water (—2 h. to +2 h.). In principle passenger ferries have priority. The Pilot is rarely prevented from turning out by bad weather, but it can happen once or twice a year, with a strong wind from the North. In this case ships seek shelter near the English coast. Entering and leaving signals are made day and night at the following stations:

To be given to Medical Officer: Health Declaration.

PILOTAGE: Two Zones.

Outer Zone: Limited by: N. 3 miles north of low-water mark. W. Meridian of Calais lighthouse. E. Meridian of 2·27 East. S. Calais pilotage zone, coast and inner zone below.

Inner Zone: Limited by: N. Parallel 51° 04′ 30″ North. W. Meridian 2° 20′ East. E. Meridian of Dunkirk lighthouse.

Pilotage compulsory in inner zone for ships over 150 t. (net tonnage), in outer zone for ships over 1,000 t. (n.t.).

Call Pilot 12 hrs. before for ships coming from West, 2 hrs. before for ships coming from East, giving ETA at lightship Dyck through Boulogne Radio (telegraphy); on radio on 2,182 Khz (radiophony); on VHF Channel 16 near pilot boat; Aldis Lamp or with flags within sight of pilot boats; with sound signals close by pilot boat. Telegraphic address of pilotage: Pilodux. Telex: 82902.

Pilot boat, about 50 m. long, black hull with white horizontal stripe. "Pilot Dunkerque" written on hull. Black funnel with white anchors insignia.

Position of pilot boat: between lightship Dyck and buoy CA 2. In bad weather, pilot ship may heave to on a parallel South of wreck buoy (British Liberty) and buoy DC., or put into port.

ANCHORAGES: Ships can anchor east of meridian of East jetty head, 7 to 17 m. deep, good mooring ground of sand and mud. Large vessels waiting for slack water between piers must anchor in the West of channel between buoys DB and DC. In bad weather, ships may anchor off English coast, in the roads of Les Dunes, with good mooring ground of sand and mud 20 m. deep. Non-piloted ships, or ships not having contacted Dunkirk Harbour, must anchor east of buoy E.11 not to disturb the entrance of ships.

RESTRICTIONS: Vessels more than 180 m. long normally enter only at slack water, i.e. between 3 hours before high water and 2 hours after high water. With bad weather from North, the Watier Lock may be restricted by swell.

MAX. SIZE: At any tides. Length 230 m.; width 35 m.; draft 11·50 m. before high tide, 11·00 m. after high tide. During 1971 limitations will be increased to 250 m. length, draft 14·50 metres.

HEALTH: For ships coming from (*a*) *All European countries:* Declaration of health is not obligatory but general international certificates are controlled. (*b*) *Other Harbours:* Admission subject to declaration of health and usual controls of certificates. Admissions in free pratique only in day-time except special cases (intervention of a physician). Request for free pratique may be made to Sani-Port, Dunkirk, through Boulogne Radio. In case of necessity, health service can – on request – intervene at night.

RADIO: Dunkirk Harbour Station (FFF) for messages about port service through VHF Channel 12. Communications other than in VHF made through Boulogne Radio (FFB).

TUGS: Tugs join ship between buoys DW 14 and DW 16. Small boats take their tow in outer port. Charge for use of tugs line: 66 fr.

BERTHING: Berthing priority is decided by Port Captain's office. Ship is informed by radio of the location and priority given to her.

BRIDGES: Bridges of locks and wet docks are closed to navigation to allow trains or work hands to go. The maritime traffic is practically never disturbed.

STEVEDORES: Each captain will contact his consignee.

RADAR: There is radar at the control tower of harbour. It is not a guiding radar. Radar service may indicate to a ship, on her request, the bearing of her position without responsibility of harbour being involved. Contact can be made on VHF through Dunkirk port station.

MEDICAL: Hospitals and all medical facilities.

TANKERS: Main Wharf, North, draft 12 m.; Main Wharf, Middle draft 12 m.; Main Wharf, South, draft 12 m.; Coasters Wharf, draft 6·50 m.

HONFLEUR; 49.25 N. 00.14 E.

DOCUMENTS: See "Le Havre".
PILOTAGE: Served by Le Havre pilotage (address 9 Chaussee Kennedy, 76 Le Havre). Ships bound for Honfleur are received on the Carosse Roads where Pilots are called by means of following signals: by day, flag "G" of International Code; by night, by Morse signal call with lights. Complementary signals which can be used on arriving in the Roads: by day, Globe or ship's national flag hoisted at masthead; by night, red light at main mast head. At all times – sound signal of five long blasts.

A Pilot is obligatory for every ship of more than 5 net tons. Advice of ETA is to be signalled to pilotage as well as to Agent's and ship's brokers.
RESTRICTIONS: Access to port made through channel 100 metres wide, protected by 2 dykes about 500 m. long, which leads to outer harbour. A tidal port, Honfleur possesses three floating basins:

1 Crew List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).
PILOTAGE: ETA to be sent to Harbour Master (see Radio). Advisable then to confirm directly either to pilot boat (call sign FNZH) or to Havreport between 24 and 12 hours before arrival (see Radio). Pilot boats have black hull with "Pilote Havre" in white letters on both sides, white funnel with black top stripe, green flag with white anchor on fore-mast. Located off Le Havre channel entrance East of the intermediate landfall buoy (LH 2) except at low tide when pilot boat comes back to harbour for revictualling.
Vessels may anchor near LH 2 South of entry alignment in good weather and further off in bad weather.
Light or sound signal to be made by vessels requiring a pilot· letter G in morse code.
ANCHORAGES: Anchorages forbidden in the channel between both parallels 100 metres South and North of channel and in a zone 1 nautical mile long and 500 metres wide in prolongation of channel.
ENTRY RESTRICTION: Advice given by Havreport upon receipt of vessel's ETA. No time restriction for vessels berthing in tidal docks (Bassin Théophile Ducrocq) with draft around 30 ft. For inside docks, lock (sas Quinette de Rochemont) is open from 2h 20 min before high tide until 30 minutes after. During this period vessels of maximum length 210 metres and max. breadth 26 metres may pass through Otherwise maximum length authorised is reduced to 180 metres. In some circumstances locks are completely closed around low tide.
C.I.M. berth no. 10 may receive tankers up to 250,000 tons DW with draft varying between 63 and 68 ft. depending upon tide. Such vessels enter only by daylight and must arrive at light-vessel at least 3 hours before high water.
MAX. SIZE: Tankers: length 1300 ft., draft approx. 65 ft. subject tide.
HEALTH: Free pratique automatic for vessels coming direct from Continent or Italy and Q flag not to be flown. From other countries including Spain and Portugal usual procedure applies. Free pratique may be obtained by radio message to Sanipor Le Havre specifying name of vessel – where coming from – total number of crew members, number of crew members vaccinated (smallpox, yellow fever, cholera).
Tankers: For tankers it is advisable to ask free pratique by radio in order start operation as soon as vessel berths.
RADIO: Masters of ships are requested to send to Le Havre Harbour Master their expected time of arrival at Le Havre light-vessel.
The message will be sent through radio stations of: Boulogne-radio/FFB (working frequencies 1771 kHz and 2747 kHz) or Brest le-Conquet radio/FFU (1806/2726 kHz).

It will give the date and time GMT of ETA, and the maximum draft. It will be sent about 12 hours before arrival and corrected by another message if necessary. This service is free. Same stations of Boulogne and Brest to be used to contact Agent and in addition Saint Lys/FFL.

Port operation radio service: The Havreportradio station keeps a permanent watch on the the following frequencies: 156.6 MHz (Channel 12); 156.8 MHz (Channel 16); 157.0–161.6 MHz (Channel 20 duplex). This station sends and receives all messages for the port operations control.

Ships call Havreportradio directly on Channels 12 or 20. Ships arriving, leaving or moored on roads *must keep watch on Channel 16.*

Ships with Pilot on board must keep watch on Channels 12 or 20 from pilot on board until arrival at berth, and from departure of berth until disembarking Pilot. Havreportradio/FFY keeps watch on 2.182 kc/s. This frequency will be used only in a radius of 22 miles from Havre light-ship and only when it is not possible to use VHF.

TUGS: Normally join the vessel inside the jetties in outer harbour. Ship's lines or tug's line used at ship's option. Charges are: Frs. 39,90 per tug's line for vessel under 3,000 GRT; Frs. 79,90 per tug's line for vessel above 3,000 GRT.

BERTHING: Agents generally inform Master by radio of berthing prospects, arrival time limits and any special requirements.

BRIDGES: No special restrictions. Opened upon request. Master will be informed as above in case any bridge stopped for repairs.

STEVEDORES: 2 normal shifts (07.00–15.00 and 15.00–23.00) every week-day including Saturday. Night shift in overtime 23.00–07.00. For fruits and reefer cargo and passengers ships possible working 2 hours overtime before morning shift to start at 05.00 subject ordering gang the previous day at 06.00, with 23 hours notice to stevedores. Night gang ordered the same day at 14.00 with nine hours notice to stevedores (same consequently involves 36 and 12 hours notice to Agents for morning and night overtime respectively).

For vessel completing loading/discharging may order 2 hours overtime from 15.00 to 17.00 after morning shift or only 1 hour overtime from 23.00 to 24.00 after afternoon shift. No possibility of dividing the shift of 8 hours. Consequently time lost between completion of work and end of shift is charged to the vessel at the cost of about Frs. 560,00 per hour (depending upon tvpe of cargo).

No work possible on Sunday and legal holidays nor during night between Sunday or holiday and next working day. Necessary to give Agent soonest possible accurate ETA and hatch partition in order to enable his arranging work at the best, keeping in mind that shift cannot be split.

Work done with shore crane. Ship's derricks used only exceptionaly. No hatch tents available from shore.

It is compulsory to put a net under the gangway before starting work, for lack of which stevedores refuse to go on board.

RADAR/VHF: Radar assistance may be obtained by calling Le-Havre-Radar on Channel 16 (156,80 MHz). Then working frequencies are Channels 14 and 22.

MEDICAL: It is not necessary for Agent to receive advance notice of required medical attention except when Master requests a doctor on board. The Master must after berthing inform Agent of number of patients and nature of disease, name of patient, rank, in order agent may arrange corresponding appointment with doctors, dentists, specialists, etc. Hospital facilities available provided admission ordered by local doctor.

Inoculation. Yellow fever – effected only at the hospital once per week on Thursdays 14.00 to 15.00 p.m. Other inoculations may be effected by local doctors (with appointment) but smallpox may also be effected at the Town Hall sanitary office on Tuesday and Saturday from 09.00 to 12.00 a.m.

TANKERS: Berth at C.I.M. piers no. 1 to 10. Diameter or connections at different berths of C.I.M.: No. three, four and five 10 in., six and seven 12 in., eight and ten 16 in.

Tankers calling first time at Le Havre recommended to inform Agents of position of manifold connection. Slop reception facilities available up to 1,000 tons per hour.

DENSITY: In outer port and tidal docks: salt water. In inside docks brackish. Density depending upon season and amount of fresh water brought in by river Seine and Canal de Tancarville.

FRESH WATER: Most berths supply by shore hydrants. Otherwise by barge minimum quantity invoiced then being 50 cbm. Price of cubic metre: Frs 1,66 per shore hydrant; Frs 4,50 by barge. Overtime charged in addition. Late cancellation of barge invoiced at Frs 157,00 per hour lost if quantity ordered above 80 cbm, Frs 41,65 per hour otherwise.

FUEL: All grades available, viscosities from 200 sec. to 3000 sec. Redwood. Minimum 48 hours advance notice required to prepare barges.

FIRE PRECAUTIONS: Dangerous cargo must be declared on "Inbound Bill" and in order not to delay vessel's entry it is highly recommended to inform Agent of quantity and exact nature of dangerous cargo on board 48 hours prior to arrival, thus enabling agent to get in touch with Harbour Master and take necessary steps which may go from a single smoking prohibition up to a fire-picket on the quay during all the call.

Tankers: A "notice to masters of ships loading/unloading hydrocarbons" is handed to Master upon arrival. This notice specifies *inter alia:* repairs, ventilation/cleaning of tanks, handling of goods subject to Harbour Master's authorisation. All naked lights and fires prohibited, boiler furnaces and galley ranges excepted, such exception cancellable on simple order of Harbour Master or Depot Manager.

DEVELOPMENTS: The building of the new lock (length 400 metres, breadth 67 metres, max. draft 22 m.) will be completed end of 1971 and will allow locking up and down vessels of more than 200,000 tons dw, enlarging at the same time the port area and the number of berths available.

The building of a new oil terminal on an artificial island off Cap d'Antifer is also planned but official decision not yet taken though project has government approval. Such terminal would allow receiving tankers of 500,000 tons and more. In case this project not materialised in near future, it is planned to dredge the entrance channel of Le Havre to a depth of 18 metres below the zero of French charts and to build 2 new berths suitable for tankers of 300,000/350,000 tons Dw.

GANGWAY/DECK WATCHMEN: Not compulsory. Sworn watchmen in uniform and equipped with a VHF set may be obtained from the Port Authority at the price of Frs 20,95 per hour for day and night, working days and holidays. Some other companies may also supply watchmen (not sworn) at lower prices around Frs 6,97 per hour.

OPENING/CLOSING HATCHES: May be done by stevedores at the same price as shifting of cargo i.e. between Frs 667,55 and Frs 1.030,70 per hour depending upon the type of cargo and consequent number of men included in the gang.

It is highly recommended to carry out opening by the crew before beginning of shift to avoid both loss of time and expensive charges and also risk of accident to stevedores who are sometimes not well aware of vessel's closing system.

It is emphasised that for reefer cargo stevedores wait for cold exhaust half an hour after opening hatches before getting down in the holds. Consequently it is strongly advised to stop ventilation and start opening hatches with crew about one hour before beginning of shift keeping in mind that for reefer cargo, the morning shift may commence at 05.00.

PILOTAGE: Vessels proceeding to the ports of Rouen and Honfleur are met by pilot boat on La Carosse Roads (Rade de La Carosse). Pilotage is compulsory between the mouth of the Seine and Rouen for all vessels of 55 metres length and over; each vessel taking a Pilot for the downriver stage between La Carosse Roads and Villequier, or vice-versa, and a Pilot for the upriver stage between Villequier and Rouen, or vice-versa.
The following signals should be made for summoning a pilot on La Carosse Roads: By Day: flag G of the international code of signals. By Night: in morse by signalling lamp. Failing this, the vessel should hoist her national ensign at the foremasthead.
The following additional signals can be made when arriving on La Carosse Roads: By Day: hoisting a ball or the national ensign at the foremasthead. By Night: a red light from the mainmasthead. At Any Time: by the sound signals of 5 prolonged blasts (– – – – –).
Vessels leaving harbour or shifting berth should apply for a Pilot to the Pilotage office, 18 rue Duguay-Trouin, Rouen (tel. 71–68–50).
The Rouen pilot boat keeps a telegraphic and telephonic watch during the following period of all tides: from 1 hour after low water Le Havre until 4½ hours after high water (middle point stay tide). The watch is kept in the following manner: 1. Telegraphy: 50 kHz (600 m.) call sign FORI. 2. Telephony: 2·182 kHz (137·50) m.) frequency modulation (VHF) 156·8 mHz, Channel 16 call sign Pilot Rouen.
Since the pilot boat's watch is not permanent, Masters wishing to enter into direct contact with her are recommended to signal their

position during the high water prior to that by which the vessel expects to enter the roads.
RESTRICTIONS: The height of water above chart datum at Le Havre is broadcast on Channel 11 every 10 minutes by Honfleur VHF port radar station starting 2½ hours before, until 4 hours after the initial point of stay tide.
PORT RADAR: The radar station at the extreme end of the eastern jetty of Honfleur can, on request, inform vessels of their position in the estuary, aiding in particular those vessels unequipped with radar and running into fog. Working hours and R/T frequencies are the same as those indicated above for the transmission of water heights.
ANCHORAGE: In the outer roads at La Carosse.
MAX. SIZE: Vessels over 205 metres length have entered. Draft approximately 2·10 metres more than height of tide at Havre. Maximum about 33 ft.
HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive free pratique, Master should radio Agent before arrival, advising full details.
RADIO: Vessels are obliged to give their ETA and draft at least 5 hours before arrival to Rouen Information Centre via Brest – Le Conquet Radio or Boulogne Radio. Failure to do so may result in a fine. Port operations can be contacted by VHF as follows: below Tancarville, call Le Havre radio on Channels 26 or 23. Above Tancarville, call Rouen radio on Channels 25 or 21. Vessels should keep watch on Channel 16 for information from Havre or Rouen radios, and keep this channel free for incoming calls.
TUGS: Permanently available in the port of Rouen. Tug assistance in the River Seine is available on request.
BERTHING: The main Maritime Port of Rouen extends from the Jeanne d'Arc bridge as far as La Bouille over a distance of 11 miles. Quays and wharves cover the length of both banks of the Seine. There are also five basins in direct connection with the river without the interposition of any locks;

On the Right Bank: St-Gervais docks; on the Left Bank: the Timber dock, the Rouen-Quevilly dock, the Floating Docks tidal basin, and the "Bassin aux hydrocarbures" at Petit-Couronne.

The extent of quayage in the Maritime Port is 32,900 ft., and in the river docks 5,900 ft.

Between the downstream limits of the port of Rouen and the sea are a number of maritime establishments serving local requirements. The most important of these, all of them managed by the Port Authority of Rouen, being the petroleum terminal at Port Jérome.
STEVEDORES: Normal working hours: 07.00–11.00 and 13.00–1700. Overtime possible.
MEDICAL: All facilities available. Vaccination certificates required if vessels coming from a North African port. Yellow fever inoculations required if vessel coming from south of parallel 30° N.
TANKERS: Petit Couronne, Shell, 3 berths for vessels up to 11·00 metres draft.

Port Jerome, Standard Oil, 2 berths for vessels up to 11·00 metres draft.

Honfleur, 1 berth for vessels up to 9·00 metres draft.

Deballasting facilities available at all berths except at Honfleur.
DENSITY: Except at Honfleur, all berths are in fresh water.
FRESH WATER: Supplied by pipeline at all berths.
FUEL: All grades available from berths or by barge.
WATCHMEN: Recommended to employ watchmen on board tankers and vessels handling dangerous cargo.
HATCHES: Opening and closing hatches always performed by ship's crew.
REPAIRS: All deck, engine and radio repairs can be effected.
DRY DOCKS: Three floating docks, the largest of which is 180 m. long, 25 m. wide for vessels up to 14,000 tons.
AIRPORT: Le Havre, Octeville, 80 km. away. Paris, Orly, 120 km. away.
TIME: GMT plus 1 hour all year round.

PILOTAGE: No official radio station, pilotage not necessary to approach Port Gentil Roads.

For the private tanker ports at Pointe Clairette and Cape Lopez, pilotage is compulsory. The mooring master will board vessel in approximate position 0° 37′ S. 8° 44.5′ E, in a launch carrying proper pilot signals. The mooring master will stay on board throughout the vessel's time in port to assist in mooring, hose handling and loading operations.

ANCHORAGE: The whole of Baie du Prince is a good anchorage, sheltered from winds from S.S.E. through W. to N.W. Depths about 40 metres, hard sand, good holding ground. Two buoys mark the 10 metre line to the South.

It is necessary to guard against violent tornadoes occurring between December and May coming from the East or the North. These tornadoes occur very suddenly and are extremely strong.

MAXIMUM SIZE: S.E.R. Terminal, Pointe Clairette: up to 30,000 tons. Elf-Spafe Terminal, Cape Lopez: up to 66,000 tons.

RESTRICTIONS: Berthing is effected only in daylight hours. Vessels which arrive between 1730 hours and 0600 hours local time should anchor about 800 m. north of Cricri Buoy so as to facilitate moving to the moorings. Unberthing is effected by day or night.

Berthing is not effected in rough weather. At the berth mooring lines must be in good condition and well tended. In case of storm or tornado loading operations must cease and vessel be prepared to leave the berth if so directed by the loading Master.

RADIO: Private radio station of Cape Lopez call sign TRP394; transmitting on 2705 kHz and watching on 2506 kHz during loading operations. Before vessels arrival watch is kept on 2182 kHz.

TUGS: Owned by Elf-Spafe, can be contacted on 2182 kHz. Ship's tow lines not required. 3 tugs are available up to 400 h.p. There is a launch for handling mooring lines.

BERTHING: Both anchors are required for mooring operations. Depth of water in the berth is about 40 metres. Mooring lines will be run to two buoys, one on each quarter, with generally three lines to each buoy. Manilla mooring lines are preferred. Additional moorings required for larger vessels.

Vessel's engines must be ready for immediate operation all the time vessel is at the berth. A small tug will remain standing by.

HOSE HANDLING: Three 8 in. floating hoses are connected on the port side. A derrick of 5 tons SWL should be prepared for lifting hoses. A pilot ladder should be positioned on the port side as soon as mooring is completed. Hoses are handled by ship's personnel.

BALLAST: Vessels must arrive with clean ballast only. There are no facilities for discharging dirty ballast at the terminal. In no circumstances should dirty ballast be pumped overboard.

LOADING: The following signals are used for communication between ship and shore loading installations: Green flag or green light, or 6 short blasts on the whistle signifies "we are ready".

Red flag or red light, or 2 long and 1 short blast on the whistle signifies "slow pumping is necessary". 2 red flags or 2 red lights or 2 short and 1 long blast on the whistle signifies "pumping rate will be increased to maximum".

Waving flags and extinguished lights or 6 long blasts on the whistle signifies "pumping to be stopped".

International code pennant or a white light signifies "we wish to talk". The loading terminal should be given 10 minutes notice of the time when loading is to be completed.

MEDICAL: Doctors and hospital facilities available. All vaccinations can be arranged.

DENSITY: Varies between 1021 and 1025.

FRESH WATER: Can only be provided in case of absolute necessity. Cost for supply by barge is about 700 francs C.F.A. per metric ton plus 95% tax.

FUEL: 1,500 secs. and 3,500 secs. fuel can be supplied by barge subject to 48 hours notice.

CUSTOMS ALLOWANCES: No restrictions for quantities tobacco and spirits held on board the ship. It is prohibited to allow dutiable articles to leave the ship.

CONSULS: France. Tel. 2086.

REPAIRS: There are facilities for hull and engine repairs for barges and river craft. Slipway for vessels up to 300 tons.

AIRPORT: Can be reached in 15 minutes by road. Regular services to Europe.

TIME: GMT plus 1 hour all the year round.

HOLIDAYS: French national holidays are observed and in addition Independence Day (17th August). Holidays do not affect tanker working.

IDENTIFICATION CARDS: Not required.

CONSULS: None, French consul in Port Gentil.

REPATRIATION: Facilities available.

AIRPORT: Gamba airport is local airstrip and is connected to Port-Gentil by daily service. Port-Gentil airport is connected to Libreville International airport by daily services. Mail reaches any European country within five days.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: None which effect loading.

GENERAL: The use of Channel VHF 9 is forbidden.

SHORE LEAVE: Not allowed.

PORT AUTHORITY: Gamba Harbour Master, Shell Gabon Marine Superintendent, BP. 146 – Port-Gentil (Gabon). Telex Libreville 214.

AGENTS: See Port Gentil.

LIBREVILLE: 00.23 N. 09.26 E.

DOCUMENTS: See Port Gentil.

PILOTAGE: None available.

ANCHORAGES: Bottom of roads in Libreville slopes very gently down towards open sea. The greater the vessel's draft, the further out it must moor. E.g., ship of 7 to 8 metres draft will be moored approx. 1,500 metres from Harbour Pier. Ship 5–6 metres draft will be able to approach the Harbour Pier as near as 5 to 600 metres. For reasons of safety, forbidden to come nearer, particularly during tornado season – February to May and September to December.

RESTRICTIONS: No restriction imposed on entering or leaving the Estuary. Channel marked by 5 buoys provided with radar reflectors and flashing lights. Sixth buoy, called a 'landing buoy' moored in roads, where vessels moor.

HEALTH: If there is sickness on board, Health Service warned by Consignor of vessels. Health Service can go on board to check state of crew's health. Immigration Service can also board to check crew list and condition of passengers, if any.

RADIO: Central Radio Office at Post Office. When ship announces arrival, if in a port near at hand, sends telex; if further away ships consignor sends a telegram via Post Office.

TUGS: Tugs intended only for towing lighters, horse power 150 to 250, unsuitable for any harbour towing.

BERTHING: Only for lighters and small coasters with a draft of less than 2 metres. Crews working unloading or loading of vessels in roads supplied by Consignor of the ship. Harbour Services have no radio apparatus, Shipping companies all have radio-telephone extensions, which allows them to be in permanent contact with vessel moored in roads. Unloading or loading operations of goods carried out by lighters which, towed by small tugs, ensure rotation between vessel in operation and quay. All this equipment belongs to shipping companies dealing with consignment of vessels in the roads. Every vessel arriving in roads must have its consignor.

STEVEDORES: Available.

RADAR/VHF: None available.

MEDICAL: Hospital available, and in case of necessity, patient or patients will be admitted.

FRESH WATER: Water supply real problem, as there is no tanker to transport it. Therefore strongly recommended that any ship touching Douala coming from the North or Pointe-Noire coming from South, should fill up at one of these ports. Water costs 900 Frs. CFA per ton.

FUEL: There are fuel-tankers belonging to shipping companies. The ship-tanker which provisions Libreville 2 or 3 times a week is brought alongside buoys in roads, at 1,650 metres (position: longitude 9° 25′ 71″ East; latitude 0° 23′ 51″ North); fuel is transhipped by sea-line to tank on shore.

FIRE PRECAUTIONS: No special precautions.

GANGWAY/DECK WATCHMEN: Carried out by crew.

OPENING/CLOSING HATCHES: This is done with the tacit agreement of the ship's Officer and the Consignor.

CARGO GEAR: Ship's own gear used.

DEVELOPMENTS: Three berths in 12 metres depth at Owendo, operational end 1971.

PILOTAGE: For Main Harbour pilotage compulsory for all vessels of more than 100 net tonnage, when arriving or leaving harbour, or shifting berth, but for both Fishing Harbours obtainable on request.
Time of pilotage as follows: for Main Harbour:
(*a*) dry cargo vessels: arrivals 0600–1800 (on special request to 2000 hrs.) departure 0600–2100 hrs.
(*b*) tankers: arrivals – daylight only; sailings – 0600 to 2200 hrs.
(*c*) Valco-carriers: all handling, during daylight only.
For Fishing Harbours: during daylight only.
Vessels arriving or wishing to enter harbour must await Pilot between E. and S.W. off Fairway light-buoy, up to 1½ miles distance. Ships embarked by Pilots from 0600, according to time of arrival Quarantine Anchorage.
ANCHORAGES: Good anchorage, ¾ to 2 miles from E.N.E. to S.W. off main entrance with depth 30 to 60 ft., with good holding ground. Eastern area of anchorage is more comfortable, without additional swell reflected from main breakwater.
TIDES: Maximal tides rise 6 ft. 2 in., minimal tides rise 3 ft.
PREVAILING WINDS: Light to fresh breeze from W. and S.W. during all year, except December to February when N.E. Harmathan is dominating with poor visibility. Dangerous winds are tornados from East, May to July, but occasionally isolated tornados are to be expected from January to December. There is a swell in harbour, especially after tornados, when lying alongside the berths.
HARBOUR: Harbour (still under development) consists of three basins:
(*a*) The large basin of Main Harbour, formed by Main Breakwater 6,250 ft. long, and Lee Breakwater 3,650 ft. long.
(*b*) Outer Fishing Harbour, East of Lee Breakwater.
(*c*) Inner Fishing Harbour on Northern side of former one.
Entrance to Main Harbour 600 ft. wide and together with the approaches has minimal depth of 35 ft. (Admiralty Chart Datum to which all depths refer). Ships entering Harbour 2–3 cables before entrance roll heavily, up to 4–8° during some seasons. Ship's deeper than 30 ft. enter only during high tide with maximum possible draft limit 33 ft. during neap tide. Bottom of harbour consists of sand and mud, with frequent hard rocky ground. Depth increases in direction of Main Breakwater. Two pairs of mooring buoys in depth of 34–36 ft. Inside harbour, alongside Lee Breakwater is an Oil-wharf for tankers with depth of 34 ft.
TUGS: Use of one tug compulsory for all ships over 2,000 GRT and 2 tugs over 5,000 GRT (but at pilot's option), and 2 tugs compulsory for tankers and Valco-carriers. At least two steam tugs, about 800 h.p. each available between 0600 and 2100, otherwise one tug. Tug's wires to be used.
BERTHING: Alongside the berths, the draft limits are as follows:

Berth No. 1	29′ 0″	Berth No. 8	24′ 6″
Berth No. 2	28′ 0″	Berth No. 9	24′ 0″
Berth No. 3	27′ 0″	Berth No. 10	24′ 0″
Berth No. 4	23′ 6″	Berth No. 11	25′ 0″
Berth No. 5	24′ 6″	Berth No. 12	24′ 0″
Berth No. 6	24′ 6″	Oil Wharf	32′ 0″
Berth No. 7	25′ 0″	Valco-berth	31′ 6″

Berths No. 6 and 7 for loading cocoa-beans equipped with four high-speed conveyers, transporting bags directly to ship's hold, from 4 cocoa sheds (totalling 2,400,000 cubic ft.) situated at Westerly corner of harbour.
Usually ships moor starboard side to berths No. 1, 2, 6–9 and port-side to berths No. 3, 4, 5, 10–12.
STEVEDORES: Available. Dry cargo is handled from 0730 to 1200 and from 1400 to 1700 on normal working hours, and overtime after 1700 to 2000 (for finishing ships 2030) and on Saturdays p.m., Sundays and holidays. Oil-Wharf and Valco-Berth are working around the clock.
TANKERS: Tankers always moored starboard side to dolphins, and ropes to breakwater and bow-buoys. Crude oil pumped to refinery, by ships pumps, a distance of 18,000 ft.
North of Oil Wharf about 2 cables on same breakwater is Valco Berth for discharging of bulk materials for "Valco" aluminium smelter (mostly alumina). Narrow channel 250 ft. wide leads to berth with depth 33 ft. 6 in.
FRESH WATER: Water pipes alongside all wharves, and under state's sanitary control. Rate of supply 50 tons/hr.
FUEL: Fuel and diesel-oils available by tanker-trucks only. No coal-bunkers available.
REPAIRS: Good marine-workshop.
DRY DOCKS: Dry dock 350 ft. long, 44 ft. wide on the gate, and with depth of 16 ft. 9 in. Also there is one slip with capacity 160 tons, and one 20 tons. Diving pontoon fully equipped, and with 3 divers and crane 10 tons. Graving dock 910 ft. long with necessary facilities is completed.
GENERAL: Recommended to send ETA message at least 24 hours in advance. Essential that ETA message reaches Agent's office before 1500 week-days or before 1000 during week-ends, because of booking of gangs. Ships from Abidjan should also send 48 hours ETA message.

Skaramanga Yard's three floating docks have been designed in such a way as to eliminate delays of any kind in the raising of large vessels and to ensure that the work is carried out in minimum time and with the least possible inconvenience to the crew living on board.
The basic equipment of the docks is the following: Two 5-ton cranes, two fire extinguishing pumps 120 m^3/h at 90 m. WC, DC current supply to ships 1200 A 220 V, AC current supply to ships 600 A 440 V 60 cycles, multipoint welding rectifier 2500 A, two oil pumps for supply of fuel oil from the dock to the vessel 60 m^3/h at 50 m., two compressors 17 m^3/min. at 7 atü, emergency diesel generator set 200 KVA, foam fire extinguishing system, steam boiler and water distilling plants.
New Graving Dock
The Graving Dock is 327 m. (1,100 ft.) long, 53.6 m. (176 ft.) wide and 9.25 m. (30ft.) deep at the entrance. It can take ships in the 240,000 ton range.
Ships are manoeuvred at the dock entrance with the assistance of two 5-ton capstans situated on each side of the entrance gate. They are then shifted inside the dock by two 15-ton auto-tensioning winches and hauling-in trolleys (mules) running on tracks on each side along the dock subway.
The dock floor is fitted with specially designed keel blocks for easy fitting and removal and with electricity operated side blocks.
The Graving Dock is served by two 100-ton cranes, one 50-ton crane and a small 5-ton crane.
TUGS: A fleet of five powerful tugs is on hand at Skaramanga Yard to assist docking and undocking operations of all vessels calling at the yard.
AIRPORT: Athens Airport. Regular international flights.
HOLIDAYS: Cargo operations can be effected during usual Greek holidays, following submission of application to Harbour Workers' Union and subject cost increase of 75% above normal.

IVIGTUT: 61.12 N. 48.10 W.

(Also see "General Information" at beginning of Greenland Section)
OPERATORS: A/S Kryolitselskabet Oresund.
CONDITIONS: (*a*) Current: strongest about 3 hours before and 3 hours after high water, and vessels arriving and sailing should

take this into consideration. (*b*) Tide: height of average high tide 3 m. (max. 3·4 m), low tide 1·6 m. (*c*) Wind: calm for about half the year otherwise winds are usually from South or South-east. The dangerous winds for moored ships are the infrequent storms from North or North-east; these storms seldom occur but if they do occur they do so in the autumn. (*d*) Ice: winter ice usually occurs from December onwards in the fjord outside Ivigtut and disappears in the beginning of April. Outside Ivigtut winter ice always occurs, sometimes reaching a thickness of about 1 m. Information concerning ice conditions always obtainable on telegraphic request to GLK.
ENTRY: Day and night and usually all year round.
PILOTAGE: No official Pilot but an acting Pilot can be arranged through connection with Port Authority, cable address "Manager Ivigtut", at least 24 hours prior arrival.

REPAIRS: Machine tool workshop. Diver assistance obtainable.
MEDICAL: Hospital in Ivigtut, but doctors and dentists are in Gronnedal.

JAKOBSHAVN: 69.13 N. 51.06 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is a narrow open bay, entrance to the North-west, having outer port and inner port. In outer port is Atlantic quay and bunkering station, and inner port has another quay and a fishing harbour.
CONDITIONS: (*a*) Tide: height of average high tide 2·8 m. (max. 3·3 m.), low tide 1·6 m. (*b*) Wind: usually East to North-east. In autumn winds are strong especially in the morning. (*c*) Ice: impression can be gained when approaching port that port is closed due to icebergs. On closer approach channels between icebergs will be found but if these openings appear too narrow a wider passage should always be found to the North. (*d*) "Kanele": a natural phenomenon that occurs at this port causing regular and heavy swell, height up to 2 m. Wave characteristic, long and flat, frequency about 6 minutes. Pilot should be consulted for full information.
ENTRY: Port usually open day and night, from mid May to end November.
DAYLIGHT: Polar darkness between 1st December and 12th January and midnight sun between 21st May and 24th July.
PILOTAGE: A Pilot should always be used by larger vessels and request made to Port Authority in ETA cable. Pilot boarding place to be agreed with Authority.
MAX. SIZE: Largest vessel to berth at Atlantic quay was length 86 m., draft 6·8 m.
TUGS: None. Port boats take lines and assist mooring.
BERTHING: Outer port depth 6·5/7 m., inner port 5·5/6 m. Atlantic quay length 40 m. Depth alongside Atlantic quay 7 m. at average low tide. Height of quay about 1·1 m. above w/l. Permission to enter port should be obtained prior arrival from Port Authority. Mobile crane capacity 5 tons, also fork-lift trucks.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Obtainable alongside Atlantic quay.
AIRPORT: Heliport.
REPAIRS: Machine workshop.
GENERAL: Police, Fire Brigade, Port and cable office.
AUTHORITY: Director of Commerce who acts as Port Manager.

JULIANEHAB: 60.43 N. 46.02 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is an open bay, facing South with Atlantic quay.
CONDITIONS: (*a*) current: flows North-westerly, but in Southern part of port from little current effect. (*b*) Tide: average height of high tide 2·8 m. (max. 3·2 m.); low tide 1·4 m. (*c*) Ice: drift ice between January and July occasionally fills whole port. (*d*) Wind: the most frequent wind is from East or North-east, normally occurring as storms during winter months and as strong winds in summer. Winds can be violent and cause rapid rise in temperature. Very secure moorings are advisable.
PILOTAGE: Port office is equipped with VHF which should always be used to contact Port Authorities before arrival, and to arrange Pilot's boarding position.
MAX. SIZE: Largest vessel to berth at Atlantic quay was length 100 m. and draft 6 m.

NORTH STAR BUGT (Thule Air Force Base): 76.36 N. 68.52 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Supply port for the Thule Air Force base. Port is operated by and belongs to the American Defence Department.
DAYLIGHT: Polar darkness from 1st November to 10th February and midnight sun from 23rd April to 20th August.
CONDITIONS: (*a*) Ice: port is frozen over from end October to beginning July. From beginning of November, large areas of compact ice appear, and these can sometimes be up to 20 miles wide. During May, compact ice areas commence breaking up and by end May/early June there is normally open water; however, large quantities of drift ice remain along the coast until end July. Winter ice is normally about 180 cubic metres thick. (*b*) Temperature: in January and February average temperature is 29° below zero. In July, June and August, average temperature is usually above freezing-point, but for the rest of the year it is below freezing. (*c*) Tide: average high tide is 3 m. (max. 3·4 m.). Low tide 1·7 m.
ENTRY: Normally, port is not open until August or September, depending upon ice situation.
PILOTAGE: No authorised pilot, but American Port Authority assists in mooring and should be advised of ETA well in advance.
TUGS: None. Port boats assist mooring.
ANCHORAGE: Good holding ground in depth between 20 and 40 m., but anchoring should only be carried out following advice of Port Authority.
MAX. SIZE: Largest vessel to berth alongside quay was length 130 metres, and draft 7 metres.
BERTHING: Two vessels may berth at the quay. Depth alongside about 7 m. Height of pier about 2 m. above w/l. Mobile cranes and fork-lift trucks; however, equipment varies from year to year and Port Authorities should be contacted well in advance. Good supply of barges and amphibious craft for vessels discharging in the roadstead.
FRESH WATER: Available alongside quay.
AIRPORT: A marine Helicopter is stationed at this base.
REGULATIONS: The area is a Military Defence area and special permission is necessary to enter the port. Shore leave is prohibited.
MEDICAL: Hospital, doctor and dentist available.
AUTHORITY: Marine Defence Department.

SONDRA STROMFJORD (Camp Lloyd): 66.00 N. 53.35 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is used for the supply of an American base, transit port for passenger carriage, and for air communication to Copenhagen. Port has a quay and a sea terminal for tankers.
DAYLIGHT: Camp Lloyd is situated South of the border for polar darkness but has a midnight sun from 15th June to 1st July.
CONDITIONS: (*a*) Current: the current at entrance and at the West of Sondra Stromfjord is North-eastern at flood tide, and South-west at ebb tide, and can reach a speed of 7 knots. (*b*) Tide: high water at Camp Lloyd is about 3 hours later than at the entrance of Sondra Stromfjord. Height of average high tide 3 m. (max. 3·6 m.). Low tide 1·6 m. (*c*) Ice: Sondra Stromfjord is frozen during winter throughout whole of inner harbour, but about 55 miles from Camp Lloyd, ice thickness varies from 5 cm to 90 cm. (*d*) Winds: strong winds can occur from East and South-east.
ENTRY: On account of ice, the fjord is closed from beginning of

January to end-June, but can be used day or night from beginning of July to end-October.
PILOTAGE: No authorised Pilot, but Harbour Master will assist berthing.
ANCHORAGES: Good anchorages about 2 miles South-east of Emmons Pynt in depth of about 40 metres. Great care should be taken in anchoring, since sea bottom is shelving.
BERTHING: (*a*) A quay which is located North of Emmons Pynt, depth alongside only 3 m. (*b*) Tanker sea terminal about 700 metres S.S.E. of Emmons Pynt where there is mooring with discharge lines. Depth of water 24–26 metres on the South side of the mooring position; 15 metres at the mooring, and 10 metres on Northern side of mooring with rapid shelving to the North.
The Port Authorities should be contacted before mooring at the sea terminal. There are mobile cranes with lifting capacity up to 5 tons, and fork-lift trucks.
RADIO: ETA should be given well in advance of arrival to the Royal Greenlandic Commercial Representative and also to the Port Authority. The arrival should be reported at least 24 hours in advance through GLK. The Harbour Master can be contacted on 2716 kc/s. and this contact should be established at least one hour before vessels arrival.
MEDICAL: Hospital, doctor and dentist available.
REGULATIONS: Camp Lloyd is an American Defence Area and is restricted. American supply ships have preference in mooring at all installations.
AIRPORT: Heliport.
AUTHORITY: The Royal Greenlandic Commercial Representative – Harbour Master.

PILOTAGE: Vessels apply for Pilots through local Agents or direct to Chief Pilot, Georgetown, through "Demerara Radio, 8 Romeo Bravo", 12 hours in advance of ETA at pilot station when vessel is proceeding in to Georgetown Harbour. Pilot boarding ground is in North-western quadrant of circle with radius 5 cables and centre the Outer Georgetown Light. Normal international day or night signals for "I require a Pilot" are used. All pilot cutters are painted black (hull) and white (superstructure) with the word "Pilot" painted in white on black ground. Cutters are approximately 50 ft. in length.
ANCHORAGE: There are 5 with a least depth of approximately 20 ft. MLW named A to D from North to South. Vessels are safely anchored at any of the above anchorages 1½ to 2 cables from Georgetown park line. Bottom is soft mud and provides good holding ground.
RESTRICTIONS: No entry restrictions except those on draft imposed by the bar at estuaries.
MAX. SIZE: Draft 21 ft. 6 in.
HEALTH: Pilot may grant pratique if vessel has just arrived from a British port, and if vessel has not been to a Central or South American Spanish-speaking port or French-speaking port (West Indian or otherwise) or any of the ports of New Orleans, Mobile or Tampa within 4 weeks of its arrival at the pilot station. If a vessel is "suspect" or "infected" Master should advise Harbour Authority by special message through Demerara Radio or Georgetown Lighthouse and await advice of Port Health Officers; meanwhile, if in the vicinity of Georgetown, vessel may anchor at the specified quarantine anchorage near the Outer Georgetown Beacon as entry into the limits of the port without the authority of the Ministry of Health is prohibited if the vessel is suspect or infected.
RADIO: Name of radio station "Demerara Radio", call sign "8RB", always standing by on 2182 kc/s., will give latest weather report or RDF bearings on request. Georgetown Lighthouse operates VHF on Channel 16.
TUGS: At present, vessels dock stem on to the tide without aid of tugs.
BERTHING: There are 14 main wharves all privately owned, situated along the river frontage at Georgetown and varying in length from 210 ft. to 730 ft. Depths alongside range from 16 to 20 ft. at low water springs, but as the bottom is soft mud vessels may safely lie aground alongside. Ships work cargo with their own appliances.
STEVEDORES: Ship's Agent normally arranges for gangs in accordance with cargo plans or Master's cable advice. Gangs are unionised. Stevedores work around the clock every day of the week though they are paid overtime between hours of 4.00 p.m. and 7.00 p.m. and they earn time-and-a-half or double time on public holidays according to which one of the twelve public holidays they work.
MEDICAL: No special advance notice of required medical attention is necessary, and hospital facilities are always available. All crew members need to have valid smallpox vaccinations certificates on entry.
TANKERS: There are no residue discharge facilities in this port. There are 3 tanker berths in the Georgetown area. Rome (Shell), Ramsburg (Esso), and Atkinson Field. Maximum depth alongside: Rome 15 ft., Ramsburg 16 ft., Atkinson Field 16 ft.
DENSITY: Average density in port is 1015, though during the rainy season (March–May; October–December) density of water may be as low as 1000 at low water in the harbour.
FRESH WATER: Fresh water is available, and is delivered alongside at 75c per ton. The ship is required to pay for labour, overtime, etc., involved in the delivery.
FUEL: In case of emergency, providing advance notice is given by Master, vessels may be partially bunkered at any of Shell, Texaco or Esso installations. Vessels may be required to go alongside 2 hours before high water and leave not later than 1 hour after high water at the above-mentioned installations. Grades of fuel available are "Bunker C" and diesel fuel.
FIRE PRECAUTIONS: There are no stated precautions other than regulations against pumping out residual heavy oil (e.g. "Bunker C"). Ships having cargoes of ammunition, high explosives, dynamite, etc., are required by Harbour Regulations to anchor North of Georgetown Lighthouse prior to proceeding alongside wharf to unload.
DEVELOPMENTS: Proposals are in hand for the dredging of the Demerara Bar and the Georgetown Harbour to permit entry of ships up to 27 ft. at high water.
GANGWAY/DECK WATCHMEN: Services of watchmen are necessary and can be obtained through a watchman's pool by ships' Agent.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CUSTOMS ALLOWANCES: Each crew member is permitted up to 200 cigarettes aboard held out of bond, but is only allowed to take ashore 40 at any time. Only on a *final discharge* would a member of crew be permitted a tobacco allowance of ½ pound. Each crew member is allowed to keep out of Bond, 1 (one) bottle of wine or spirits, but is prohibited from taking any of it ashore. Each member of crew is allowed tax-free only one-sixth gallon wine and one-sixth gallon spirits *when he is finally discharged.*
IDENTIFICATION CARDS: Not required.

PILOTAGE: Pilot boats have VHF and Radio telephone Channels (2182, 2638, 2733). Order avoid delay, arrival time should be sent as early as practicable with minimum 24 hours notice.
At Hilo, Pilot boards on starboard side in position $\frac{3}{4}$ mile due East of Paukaa light. In picking up Pilot, vessels should be on Southerly course with enough speed for steerageway. Special instructions will be given by radio telephone.
At Kawaihae pilot station in position 1 mile 287° true from No. 2 buoy. Pilot usually boards on port side with vessel on course for the entrance at dead slow speed.
ANCHORAGES: No safe anchorages either Hilo or Kawaihae for vessels awaiting Pilot. In this situation, a vessel should heave to or steam. Under good weather conditions, safe anchorage can be had in Hilo Bay. Anchorage is inside pilotage waters and requires local knowledge for safety; vessels should not anchor without Pilot.
RESTRICTIONS: Under good weather conditions, vessels up to size of T–2 tanker with draft 32 ft. handled any time. Normal tidal change only 1 to 2 ft.
MAX. SIZE: Providing suitable tugs are available and weather conditions are favourable, a vessel of 700 ft.×90 ft.×32 ft. can be handled at Hilo. Kawaihae can take vessels of 635 ft.×72 ft.×32 ft.
HEALTH: Usual quarantine regulations, doctor and Customs and Immigration and Agriculture and meat inspectors board at dock for vessels arriving from foreign ports. Serious or contagious diseases should be reported by radio. No quarantine for vessels from United States or Canadian ports.
RADIO: Communicate through RCA or ITT stations in Honolulu.
TUGS: Tugs join vessels at entrance at Kawaihae and at Coconut Island at Hilo. Tugs lines are usually used at no extra charge.
BERTHING: There are many factors which affect berthing at Hawaii Island ports, the most important of which are surge and wind. Vessels should be well equipped with long mooring lines and sufficient additional line to make up two 900 ft. buoy lines. In all instances, berthing instructions will be given after details concerning vessel and her cargo are received.
MEDICAL: All facilities available.
DENSITY: Variable in Hawaii area due to fresh water run-off.
FRESH WATER: Available from county of Hawaii by pipe-line.
FUEL: Can be supplied subject advance notice.
GANGWAY/DECK WATCHMEN: Required for tankers. Other ships as may be necessary due to special circumstances.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one bottle U.S. quart, wine or spirits.

PILOTAGE: Vessel's Agent orders Pilot 48 hours in advance by telephone, correcting ETA as necessary with 2 hours final notice if a last-minute change occurs. Tug-boat Lihue III serves as pilot boat for Nawiliwili and Port Allen, 64 ft. long, hull black, house white, topsides orange. Radio telephone and VHF communication within 1 hour of arrival and while tug is working. 2638 and 2738 kc/s. and Channels 6, 12 and 16 on VHF. Pilot boards 1 mile East of Nawiliwili and ½ mile South of Port Allen. Signals in accordance with International Code.
ANCHORAGES: Nawiliwili: between Nawiliwili Light and Carters Point in 5–9 fathoms. Not good in strong trade-wind weather. Fair holding ground. Not recommended.

Port Allen: half mile South of Port Allen breakwater light in 5–10 fathoms. Fair holding ground. Untenable in Kona or South-west storms which occur from November to March.
RESTRICTIONS: 24 hours notice of arrival is obligatory. Nawiliwili: no entry at night. From October 21 to March 21 Pilot boards at 0630. Balance of year 0600. Port Allen: no time restrictions.
MAX. SIZE: Nawiliwili: Maximum 650 ft. length × 90 ft. beam × 33 ft. draft. Port Allen: 650 ft. × 90 ft. × 32 ft. North side. 28 ft. on South side. Pier is 600 ft. long, so large vessels overhang up to 100 ft.
HEALTH: Usual quarantine regulations, doctor and Customs and Immigration and Agriculture and meat inspectors board at dock for vessels arriving from foreign ports. Serious or contagious diseases should be reported by radio. No quarantine for vessels from United States or Canadian ports.
RADIO: Communicate through RCA or ITT stations in Honolulu. Also KQM marine operator for radio telephone and telephone to Kauai.
TUGS: One 1,100 horsepower tug meets vessels off port and in outer harbour. Both ship's lines and/or tug's line may be used. No

charge for tug's line. Tug has bow fender and is used for pushing. Has radio telephone, WP 4371 and VHF with Channel 12 usually used. Extra tugs available from Honolulu.
BERTHING: Limited to two large vessels at Nawiliwili and two at Port Allen. Considerable barge traffic. Prior reservations by Agent necessary with District Manager. Berth conflicts usually solved in Honolulu by rerouting of Island ports.
STEVEDORES: All stevedoring by McCabe Hamilton and Renny Co. Ltd., with headquarters in Honolulu and branches in outports. 48 hours notice by Agent for labour and equipment. Inward cargo is containers, general, bulk fertiliser, petroleum products, and building and construction materials. Outward is raw sugar, canned pineapple, general and molasses. Foreign vessels are subject to heavy fines for carrying stevedore gear inter-island without Customs clearance.
MEDICAL: Two hospitals on Kauai with two doctors under contract to United States Public Health Service. Standard international inoculations and vaccination required. Advance notice by Agent desirable but not necessary.
TANKERS: All piers have pipe-line connections for incoming cargo and outgoing molasses. Fuel oil 10 in., molasses 10 in., water line 6 in., gasoline, kerosene and diesel 8 in. These are the main lines under the wharves. Hose connections to ships vary with the type of riser and hose so size of fittings should be checked with Agent. No slop discharge facilities available. 4 tanker berths available.
DENSITY: Varies from full salt to brackish in periods of heavy rainfall with freshets in the streams. No specifics available.
FRESH WATER: Available from 2 in. dock hydrants via ship's hose. About 100 gallons per minute at $0.75 per 1,000 gallons plus $12.000 for connecting and disconnecting meter. More in overtime periods.
FUEL: Bunker C not available for large vessels. Diesel fuel available via tank truck with 6 hours notice. Weekend and holidays order previous day.
DEVELOPMENTS: Turning basin may be enlarged to handle liners and large bulkers. Project depth 35 ft.
GANGWAY/DECK WATCHMAN: Tankers discharging gasoline required to have uniformed dock watchman. Usually off duty policeman at $4.00 per hour. All ships provide own gangway and deck watch.
OPENING/CLOSING HATCHES: Normally done by stevedores. A few foreign ships prefer doing it with own crew.
CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars per man, and one bottle, U.S. quart, wine or spirits.
IDENTITY CARDS: Desirable but not required by law.
CONSULS: All in Honolulu.
REPAIRS: Light machine shop, welding and burning and pipe work available. Plantations may do some heavy repairs if part can be sent to their shop. Their engineers are helpful in emergencies. Heavy or technical repairs must be done in Honolulu.
REPATRIATION: Agent can arrange by air via Honolulu. Immigration clearance necessary.
AIRPORT: Lihue is 3 miles from Nawiliwili and 20 miles from Port Allen; served by inter-island regular carriers. Numerous lines, and charter flights available.
TIME: Local time is GMT plus 10 hours all year round.
HOLIDAYS: National: New Year's Day (Jan. 1); President's Day (Feb. 22nd); Memorial Day (May 30th); July 4th; Labour Day (first Monday in September); Election Day (first Tuesday in November); Veterans' Day (Nov. 11th); Thanksgiving Day and Christmas Day (December 25th). APPROACHES: A. (Dry-cargo vessels): Enter harbour by Lei Yue Mun in the East with drafts up to 36 ft., by Sulphur Channel in the West with drafts of 28 ft., or South of Stonecutters' Island also with drafts of 28 ft. The approaches are reasonably free from hazards and are well marked by day or night.
B. (Tankers): The tankers which berth at the Esso Company installation at Tsing Yi, and at the Mobil installation, also at Tsing Yi enter the harbour, but with the exception of the approaches to the Esso Terminal which was specially dredged for the purposes of accommodating vessels at 45 ft. draft, there is no limitation on depth save that at the individual berth.
C. Buoyage. The system of buoyage used in Hong Kong harbour conforms to the uniform system of maritime buoyage adopted by the lighthouse authorities in Britain. The main stream of flood tide within the harbour limits is from East to West and buoyage is laid accordingly. Several terrestrial navigational beacons within the waters of Hong Kong are also painted to conform with the uniform system of maritime buoyage.
PILOTAGE: Although pilotage is not compulsory in the port, pilots licensed by the Pilotage Board are available to board ships at either entrance on request. The Hong Kong Pilotage Association, with 22 licensed Hong Kong Harbour Pilots and five apprentice Pilots as its members, provide pilotage services. Pilots generally board in-bound ships using the Eastern entrance in the vicinity of the Lei Yue Mun turning buoy (latitude 22° 16.4′ North, longitude

114° 15.3′ East) and disembark at the same point from outward-bound ships. At the Western entrance, pilots embark and disembark to the West of Green Island. It is a contravention of regulation 3(1) of the Merchant Shipping (Control of Ports) Regulations, for any vessel to pick up or discharge a Pilot within a distance of 7·5 cables from the centre of either the Lei Yue Mun Pass or Sulphur Channel. Maximum speed inside harbour, 10 knots.

ANCHORAGES: Examination anchorages (quarantine and immigration) for clearance inwards are situated within the harbour limits to cover the entry of shipping from East and West. The main dangerous goods anchorage is located at the Western end of the harbour, while others are established next to the major oil installations.

An anchorage for the discharge of logs was established in 1963. This was necessary because logs, which were being discharged and stored within harbour limits were endangering small craft, waterside installations and navigation.

MAX. SIZE: Largest vessels calling regularly have been, dry-cargo: length 819 ft., draft 32 ft. 8 in.; tankers length 776 ft., draft 42 ft. Maximum size governed by draft of vessel. No limit as to length and beam. Draft in harbour: "A" class buoys 25 ft. to 44 ft. "B" Class buoys 18 ft. to 27 ft.

HEALTH: Radio Pratique. The following conditions must be fulfilled before radio pratique can be granted: The ship must not have called at an infected port within 14 days prior to arrival at Hong Kong. There must be not more than 24 passengers on board at the time of arrival, provided that a vessel carrying more than 24 passengers may, at the discretion of the Chief Port Health Officer, be granted radio pratique if there is a ship's doctor on board.

The master must furnish the following information to the Port Health Office not more than 20 hours and not less than eight hours before his expected time of arrival at Hong Kong:

1. ports of call during the 14 days prior to arrival;
2. number of passengers on board;
3. a statement that all persons on board are healthy and in possession of valid international certificates of vaccination against smallpox;
4. a statement indicating whether any case of infectious disease has occurred on board during the voyage;
5. whether any person on board is sick;
6. the date of issue of the deratting or deratting exemption certificates.

Note 1: Shipping companies or agents must send their applications for radio pratique in writing and, if granted, will be responsible for notifying the master concerned.

Note 2: Maritime declarations of health and passenger and crew lists must be collected by the shipping companies or agents and forwarded to the Port Health Office within 24 hours of the ship's arrival.

Note 3: Ships granted radio pratique will be required to display the following signal on arrival in the quarantine anchorage: Day: International code flag "TO". Night: Three white lights in a vertical line six feet apart.

Note 4: The master of the ship concerned will be held responsible for the accuracy of the statements contained in his cablegram requesting radio pratique.

Port Health. The hours of duty of port health officers in the examination anchorages are similar to those of the Immigration Department. The Port Health launch exhibits the international code flag "Q" by day and a red light over a white light at night. The appropriate quarantine signal should be flown by a vessel until the Port Health Officer has completed his inspection.

IMMIGRATION: Immigration formalities take place at the Eastern or Western examination anchorages after clearance by the Port Health authorities. Immigration launches are on duty 24 hours a day in the Eastern anchorage and from *6 a.m.* to *7 p.m.* in the Western anchorage throughout the year.

RADIO: Cable Agent via Radio Hong Kong call sign "VPS".

Signal Stations. Four signal stations operated by the Marine Department are situated in the Eastern and Western approaches to, or within, the harbour limits as follows:

Eastern approaches: Waglan Island, (latitude 22° 11′ North, longitude 114° 18.1′ East). Western approaches: Green Island (latitude 22° 17.1′ North, longitude 114° 06.5′ East). Harbour limits: Marine Department Headquarters (latitude 22° 17.3′ North, longitude 114° 09.1′ East). Harbour limits: North Point Signal Station (latitude 22° 17.7′ North, longitude 114° 11.8′ East). These stations are manned 24 hours a day throughout the year and contact can be made by means of international code flags or the international Morse code by flashing. An inter-departmental radio link, in addition to a normal land telephone line, provides communications between these stations.

It is mandatory for the Master of every ship arriving within signalling distance of any of the above signal stations to hoist the national colours and (if one shall exist) the house flag and the signal letters of the ship, and to identify the vessel to the signal station by visual signals if requested. On recognition of a ship in the approaches to Hong Kong, the name is immediately relayed to the Port Control Office of the Marine Department, and the ship's owners or agents can be notified on request.

Wireless Telegraphy: Radio communication apparatus on board a merchant vessel is not permitted to be used while the vessel is within Hong Kong territorial waters except in the following circumstances:

When a vessel is proceeding through Hong Kong territorial waters such apparatus may be used to communicate on minimum power with the nearest coast station or, if communication with the nearest coast station is impracticable and the safe navigation of the vessel so requires, with a more distant coast station or another vessel;

For the purpose of summoning assistance on an occasion of danger to the life of any person or to the vessel;

For the purpose of carrying out experimental tests for which permission in writing must first be obtained.

Broadcasting arrangements—Typhoon Warnings: After the hoisting of local storm signal No. 5 or above, Radio Hong Kong and Commercial Radio will extend their hours of operation and simultaneously broadcast typhoon warnings in English and Chinese at two minutes to the hour and half past the hour precisely, throughout the day and night. Warnings in English will be broadcast by an announcer at each station; warnings in Chinese will be broadcast by a Chinese announcer from the Radio Hong Kong booth at the Royal Observatory. On certain occasions these arrangements will come into force should local storm signal No. 3 remain hoisted at the time when the radio stations normally close. The foregoing arrangements continue until the signal drops below No. 5 once again.

Frequencies: Radio Hong Kong (English Service) 545 Khz., 91 Khz.; (Chinese Service) 640 Khz., 94 Khz. Commercial Radio (English Service) 1530 Khz., 196 Khz.; (Chinese Service No. 1) 1050 Khz.; 1170 Khz.

VHF: Control Station, Hong Kong Port Radio call sign "Mardep" Channel 12. 24 hours listening watch. Range up to 35 miles.

Maritime VHF Radio-telephone Service (Hague Plan): This service operates in Hong Kong on two international channels, Nos. 16 and 26. Channel 16 (156.8 mc/s) is the simplex distress and calling frequency on which contact is made between shore and ship before changing over to the public correspondence channel, No. 26. The latter is a duplex channel and Hong Kong transmits on 161.9 Mc/s and receives from ships on 157.3 Mc/s.

Local connection to the service is *via* the Hong Kong Telephone Company and is made in the same way as for overseas radio-telephone calls by dialling "100". Tho local operator should then be informed that a telephone call is required on "the Maritime VHF Hague Plan Service". The operator will ask for details of the call, such as the name of the ship and the person required, and will then connect the call *via* Cable & Wireless. Calls can also be sent from ship to shore. The range is about 50 miles and the service is available at all times of the day and night.

Harbour phones: Cable & Wireless Ltd., on behalf of the Hong Kong Telephone Company, will install and maintain VHF radio-telephones on ships at buoys in the harbour for the duration of a ship's stay in port. Calls may be made between any two ships so equipped, and between a ship and any telephone number on the Hong Kong or Kowloon exchanges.

TUGS: Available for berthing and unberthing. Advance booking is required. See Table B.

BERTHING: See Table C. A. *Wharves.* The Hong Kong & Kowloon Wharf & Godown Co. Ltd. operates six ocean berths on the Kowloon peninsula. In addition, an ocean terminal pier caters for four average size vessels or two large passenger ships. A further two ocean berths are operated on the Kowloon peninsula by Holt's Wharf.

On Hong Kong Island, North Point Wharves Ltd. operate two ocean berths. The Taikoo Sugar Refining Co. Ltd. also have two ocean berths at a pier in Quarry Bay adjacent to their factory.

Berthing of dry-cargo vessels alongside wharf can be performed any time during day and night. Berthing at tanker wharf not permissible after sunset. Ships carrying explosives must obtain permission from the Marine Department before berthing is alloted.

Ocean Terminal completed. Berthing signals will be exhibited on the signal station on top of the Kowloon Star Ferry pier. Code flag Y by day and one green light over red light at night indicates anchor and await instructions. Crossed bamboo poles on which are displayed code flags N and B, when sited at the end of a pier denotes that the vessel is required to berth stern to the praya wall. Telephones are available at all alongside berths for installation on board ship. Applications for telephones should be made to the H.K. Telephone Co. Ltd. Fresh water from hydrants is available from shore connections at all berths. Vessels' cargo gear must be used for working cargo at all alongside berths.

Oil fuel is not available from shore connections at any of these berths but there are no restrictions on harbour oilers supplying bunker fuels to ships alongside wharves.

Boatmen. Labour to handle ships' mooring lines when berthing and unberthing at any of the wharves in Hong Kong waters is supplied by the owners of the wharf concerned, the cost being included in the berthing fee. For berthing at a Marine Department mooring buoy it is usual for the ship's agent to arrange for boatmen to handle the ship's slip wire and anchor cable, unless the ship's crew undertake this task. The services of boatmen are generally obtained through the Hong Kong Pilotage Association. For night berthing two boats are normally required—one to handle the wire and cable and the other to provide a lighted marker for the mooring buoy.

B. *Mooring Buoys.* See "Max-size." All ships are required to secure to Marine Department mooring buoys by their chain cable. The maximum length of a ship permitted to berth at an "A" class mooring is 600 ft., the swing circle encompassing each buoy having a radius of 700 ft. The maximum length of a ship permitted to berth at a "B" class mooring is 450 ft., the radius of swing circle around such buoys being 550 ft. It is therefore within the limits of safety for a vessel, when secured to a Marine Department mooring, to slack out to "one shackle on the windlass" and still clear ships berthed at adjacent buoys, except in exceptional circumstances. As all Marine Department moorings are of the one-legged type, it is permissible, should circumstances make it necessary, for a ship, when attempting to secure to a mooring, to drop an anchor at not less than 50 feet from the buoy without fouling the mooring chain. It should be noted, however, that moorings sited within the man-of-war anchor-

age and the Hongkong and Whampoa Dock Company's private mooring H.W.D. No. 1 in Hung Hom Bay are either of the two or three-legged type, and it is therefore not permissible to use an anchor when berthing.

STEVEDORES: The following table shows the average handling rates per gang hour:

Cargo	*Place*	*Load tons per gang hour*	*Discharge tons per gang hour*
General	Wharf	12	15
General	Stream	10	12
Bale or bag	Wharf	20	25
Bale or bag	Stream	15	20

Stevedores work 24 hours per day except Mid-Autumn Festival and Chinese New Year Holidays.

TANKERS: Any leaking of oil to water will be subjected to heavy fines. If not gas-freed, not allowed through harbour. Maximum draft for berthing 42 ft. See Table A.

DENSITY: 1017.

FRESH WATER: Available but the supply is sometimes limited, depending on the storage levels in Hong Kong's reservoirs. The supply to ships is made at commercial wharves and from water boats. See Table D.

FUEL: Excellent facilities exist for bunkering vessels with fuel oil and coal. Fuel oil can be obtained either at the wharves adjacent to the oil installation, or from harbour oilers owned and operated by the oil companies. Fuel oil from these vessels can be pumped on board without impeding cargo operations. Adequate stocks of good quality bunker coal suitable for coal-fired marine boilers are maintained in the port. Fuel oil available with viscosity up to 1,000 sec. Redwood. 24 hours notice for supply is required. Also gas oil and marine diesel available. See Table F.

FIRE PRECAUTIONS: The Fire Services Department operates fire floats. One of these, the "Alexander Grantham" is one of the largest and most powerful in the world, being equipped with machinery capable of pumping 10,500 gallons a minute at a pressure of 90 lb. per square inch through a battery of monitors. This vessel is equipped to deal with any type of fire on any size vessel, and is designed to operate both in the port and at sea.

DEVELOPMENTS: Cross-harbour tunnel under construction.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: Following certificates to be presented to the Marine Office before clearance could be granted:

Ship's Register and/or Tonnage Certificate.
Load-line Certificate.
Radio Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Derating Certificate or Derat Exempt Certificate.
Last Port Clearance.

CUSTOMS ALLOWANCES: In-Port Duty-Free Consumption: The issue of stores will be based on the scheduled stay in port or seven days, whichever is the shorter period, and calculated as follows: Tobacco: 30 cigarettes *or* five cigars *or* two ounces of pipe tobacco per person per day. Liquor: Quarter pint of Spirit or one pint of table wine or three quarts of beer or stout per person per day. In addition, for officers and saloon passengers, a quarter pint in all of port, sherry, liqueur.

Duty-free allowances for disembarking passengers: Passengers from ports other than Macao disembarking in Hong Kong may be exempted duty on one quart of wine or spirit, and one half pound of tobacco, or 200 cigarettes, or 50 cigars. For members of any vessel and passengers in direct transit through the Colony the duty free allowance is 20 cigarettes or two ounces of pipe tobacco per person on disembarkation.

Dutiable goods allowed in possession of passengers and crews: No passenger in or crew member of any ship or aircraft, while such ship or aircraft is in Hong Kong, without the permission of the Director of Commerce and Industry, shall have in his possession, custody or control on board such ship or aircraft any dutiable liquor or tobacco in excess of the quantities stated hereunder:

Officers and saloon passengers: (i) liquors—spirits one opened quart bottle, or table wine one quart, or beer or stout four quarts and in addition port or sherry or liqueur one pint; (ii) tobacco one-half pound, or 50 cigars, or 200 cigarettes;

Crew members and deck passengers: tobacco one-half pound, or 200 cigarettes.

Provided that quantities in excess of the above amounts which are the property of any officer, crew member or passenger and are stored in the place provided for the safe custody of stores under the provision of Regulation 7 of the Dutiable Commodities Regulations, 1963 and are shown on the record required by the same Regulation and are included in the Import and Export Statement and in any application for ship's stores shall be permitted and shall not be liable for forfeiture.

CARGO GEAR: Normal routine gear, wire and rope slings, nets, grabs, boardtrays and floating cranes up to 100 tons available.

CREW IDENTIFICATION CARDS: No identification card is required for crew or passengers going ashore except when vessel has exceeded a limit of stay of 14 days, after this period all crew members must deliver to the Immigration Office through the agents a signed copy of the Immigration Disembarkation Card.

REPAIRS/DRYDOCKS: See Table E. The two main shipyards are the Taikoo Dockyard & Engineering Co. Ltd. and the H.K. & Whampoa Dock Company Ltd.

In addition to their building berths, they have excellent and extensive facilities for the repair, maintenance and drydocking or slipping of all classes and types of vessels up to 35,500 deadweight tons in the case of bulk oil tankers, or 750 ft. in length and 88 ft. beam in the case of passenger liners and large dry cargo vessels.

In addition to ship and engine maintenance and repair work, the dockyards have facilities for many miscellaneous services such as are provided by modern dockyards. These include physical tests on materials such as anchors and cables, for which test certificates can be supplied, chemical analysis, drawing office requirements, chemical cleaning of engines and boilers, shot and sand blasting, zinc spraying to name but a few.

REPATRIATION: All formalities connected with engagement and discharge on board British ships, and on foreign ships whose flag is not represented by a consular officer resident in Hong Kong, are required by law to be conducted at the Mercantile Marine Office. Hong Kong continues to be one of the main recruitment centres of Asian seamen and a Seamen's Registry Office, which is an adjunct to the Mercantile Marine Office, maintains records of all Hong Kong seamen. The Seamen's Recruiting Office, controls the recruitment, selection and supply of Chinese seamen to ships requiring them, and is situated at the Rumsey Street Reclamation, adjacent to the Marine Department.

Seamen's Travel Documents. The Hong Kong Government Seaman's Discharge Book is issued by the Marine Department and is a record of employment. The Kong Hong Government Seaman's Identity Book is issued by the Immigration Department and enables the holder to return to Hong Kong without a visa during the validity of the book (initially three years, with three-year renewals), and also within 12 months after the expiry of the validity of the book.

A Seaman's Certificate of Nationality and Identity is issued at the Immigration Department only to seamen of British nationality, whereas the Seaman's Discharge Book and the Seaman's Identity Book may also be issued to alien seamen. It is the equivalent of a British passport and no visa is required for return to Hong Kong.

All crew members signing-off for repatriation must first obtain permission from the Director of Immigration. All crew arriving to join vessel must produce a guarantee letter through the agents responsibility for all maintenances and other eventual expenses.

AIRPORT: Regular International flights. Airstrip capable of any size of jet planes. Transportation from port to airport terminal about 40 minutes bus drive.

TIME: Local Standard Time is GMT plus 8 hours except for the period when summer time is in force when Local Summer Time is GMT plus 9 hours. The date on which summer time becomes operative is governed by the interpretation and General Clauses Ordinance. The relevant sub-section of which is quoted below:

"Section 68(2) The period of summer time shall be the period between 3.30 (standard time) in the morning of the first Sunday after the 15th April and 3.30 (summer time) in the morning of the first Sunday after the 15th October in each year."

HOLIDAYS: Public holidays in Hong Kong occur mainly on festivals whose date is governed by the lunar calendar.

Every Sunday; First week-day in January; Chinese New Year's Day; Second day of Chinese New Year; Third day of Chinese New Year; General holiday in lieu of that for the Ching Ming Festival; Good Friday; Day following Good Friday (Ching Ming Festival); Easter Monday; Birthday of Her Majesty the Queen; Tuen Ng Festival; First week-day in July; First Monday in August; Last Monday in August, which shall be Liberation Day; Day following Chinese Mid-Autumn Festival Day; Day following Chung Yeung Festival; Christmas Day; First week-day after Christmas Day.

POLICE/AMBULANCE/FIRE: When the services of the fire brigade, immigration, port health or police are required, appropriate signals should be made in accordance with the list of "Hong Kong Port Signals".

Police. The Marine Division of the Police is responsible for internal port security. Its fleet of launches maintain constant patrols in Hong Kong's territorial waters.

GENERAL: No waste to be disposed into harbour. Chain required for mooring to buoy. Unnecessary use of ship's sirens prohibited. "British Ensign" should be hoisted during vessel's stay in port.

SERVICES: Services available including tank cleaning, painting, washing, compass adjusting, calibration of direction finder, radar repairs, 24 hours service laundry, supply of stores and provisions, motor-boats service between ship and shore.

SHORE LEAVE: Crew members are usually allowed ashore.

CLASSIFICATION SOCIETIES: The following Classification Societies with British technical committees are represented by their own exclusive officers in Hong Kong: Lloyds Register of Shipping, P. & O. Building, Hong Kong; The American Bureau of Shipping, 1007, Takshing House, Hong Kong; Society for the Bureau Veritas, 2703, International Building, Hong Kong; Det Norske Veritas (Oslo), China Emporium Building, Hong Kong.

WEATHER: 1st June to 31st October usually considered as typhoon season. No operation of cargo when typhoon signal No. 3 or upward is hoisted.

AUTHORITY: Director of Marine, Marine Dept., 102 Connaught Road, Central.

AGENT: Wallem & Co. Ltd., Hongkong & Shanghai Bank Building, 2nd Floor, Hong Kong. Cables: "Wallem Hong Kong". Telex 3217 and 3695.

PILOTAGE: Telegraphic address of Pilot Station: VWST. 48 hours advance notice of ETA, giving deepest freshwater draft. Pilot boards vessel Sandheads from pilot vessel fitted with W/T, DF, gear, radar, echo sounder and other navigational equipment, maintains continuous watch on 500 kc/s. (600 metres) and receive ETA messages of incoming vessels.
As an aid to navigation, navigable channel in river is marked with lights and channels buoys. There is a lighthouse at Saugor and downstream from this point, 3 attended Light Vessels are stationed at the Western Channel and 2 unattended Light Vessels at Gabtola and Lower Long Sand at Sandheads. Navigable channel leading to port from sea is about 126 miles long. 14 bars are in different reaches of river, 11 of these are upstream of Diamond Harbour and remaining 3 in estuary below Diamond Harbour. Since these bars are subject to fluctuations and there are sharp bends in river, the navigation of ships between port and Sea requires services of trained Pilots employed by Port Commissioners. River Pilots take charge of vessels at Sandheads, navigate to Garden Reach and then make over to harbour Pilots who manoeuvre vessels to riverside jetties, moorings or dock berths. Movement of ships inside docks guided by Berthing Masters.
ANCHORAGES: Anchorage in River Hooghly at Saugor Roads, Haldia, Kalpi, Diamond Harbour, Royapur, Ulubaria and Garden Reach of which Royapur, Ulubaria and Garden Reach utilised only by ships on passage to and from the port in emergency. Depths of anchorages vary on day to day basis according to River Draft Forecast but on average 30 ft. deep.
RESTRICTIONS: Navigation on River Hooghly is carried out only with Pilot on board and according to tide. Speed of vessel important factor and must be declared to Pilot on board, preferably telegraphed 48 hours in advance to Pilot vessel.
MAX. SIZE: Maximum LOA 530 ft. with beam of 70 ft. for King George's Docks and 515 ft. LOA with beam of 66 ft. 6 in. for Kidderpore Docks. Maximum LOA of tankers for tanker terminal at Budge Budge is 600 ft. No restriction of beam for vessels berthed in Budge Budge only, as no lock entrance. Deepest draft alongside dock berths in King George's and Kidderpore Docks 30 ft. At Budge Budge deepest draft at any berth also 30 ft. Berthing of vessels, depends on prevailing draft of day published in Draft Forecast for month.
HEALTH: Procedure for obtaining pratique: To obtain Radio Pratique incoming vessels communicate by wireless to Port Health Officer, Calcutta, Cable address: "Quarantine Calcutta":
(*a*) No sickness or death from sickness on board within last 15 days.
(*b*) No sand, earth, pig, poultry, crew or passenger taken aboard from E. Coast of Africa between Port Sudan and Durban, both ports included.
(*c*) Ship not touched within last 30 days any port in E. Africa between Northernmost point of Eritrea and Southernmost point of Tanganyika, including Island of Zanzibar or any other yellow fever infected area.
(*d*) Nor abnormal mortality of rats or mice on board.
(*e*) No monkey on board.
(Item (*a*) to be sent in code under usual standard quarantine messages required by ships; rest in plain language through local wireless station.)
In case of any suspected disease or fever on board, local agents may be contacted by cable who arrange for doctor to be sent or for removal of a patient if necessary. Vessels calling at another port in same country are exempted from obtaining pratique.
RADIO: Calcutta Radio is best for routing messages of ETA and also used by Agents for cabling Masters of vessels approaching Calcutta.
TUGS: Tugs used for vessels after passing lock entrances at King George's and Kidderpore Docks. Tugs used for deep draft vessels to turn (if tide strong). Vessels own lines.
BERTHING: Vessels brought in for berthing according to tide. Movements from one berth to another inside dock not dependent on tide, but according to convenience of port. Vessels berthed at riverside jetties or river moorings required to have starboard anchor unshackled in order that stbd chain could be tied to buoy. Vessels at river jetties and river moorings if left during Bore Tide are to comply with following:
Half an hour before low water:
(*a*) Gangway to be hoisted up.
(*b*) Pipelines disconnected and triced up (for vessels at Budge Budge Jetty).
(*c*) Heave tight on forward chains to keep vessel about 6 ft. off pontoon. Make sure weight is on bore springs and not on chains aft.

(*d*) Tighten all buoy ropes.
(*e*) When bores expected, all vessels in stream shall have steam on main engines, windlasses and winches and a sufficient number of officers and crew on board to tend vessel in case of emergency.

After bore made, and vessel stopped ranging, slack forward chains to old mark. Bore springs could be had through Agents from local suppliers at Rs. 120/- a set per day of actual use.

Budge Budge (oil terminal) on banks of River Hooghly has river jetties, hence above instructions also apply to vessels berthed at Budge Budge Jetties.

BRIDGES: Two bridges, one collapsible, one swing, situated inside Kidderpore Dock are open for navigation to suit convenience of port.

STEVEDORES: 48 hours notice of arrival at pilot station required by Agent.

RADAR/VHF: No port radar service. RT facilities:
(*a*) HF RT for long-range communication.
(*b*) IF RT for short-range communication.
(*c*) BHF/RT for Port Operational Channel just introduced.
(*d*) WT facilities: as per Solas 1968.

MEDICAL: Masters in need of medical services required cable agents. Hospital facilities. Ships leaving for foreign port or minor Indian port (where no Port Health Officer) required to ensure officers and crew have valid health certificates (for cholera, smallpox and yellow fever if proceeding to a yellow fever area).

TANKERS: Not permitted discharge residue into dock (at C. berth KG Dock).

FUEL: Redwood 600/700 sec. supplied at Calcutta and require at least week's notice for supplying vessels lying inside dock. Fuel also supplied at Budge Budge terminal, three days notice to suppliers and Port Authorities.

FIRE PRECAUTIONS: Usual non-smoking precautions and Master, Owners, Charterers or their Agents of vessels carrying import cargo or intending to load export cargo of hazardous or inflammable nature, furnish 6 copies of list of cargo involved to Traffic Manager in prescribed form, at least ten days before vessels intend to land or ship cargo. Traffic Manager on receipt of list, categorise items enumerated in list and landing delivery and storage of such cargo be done strictly in accordance with instructions.

DEVELOPMENTS: Subsidiary port to be at Haldia on right bank of Hooghly 56 miles downstream of Calcutta and North of outfall of River Haldia. New port would be on river route to Calcutta and other important cities on banks of Ganges, yet, being on right bank, Haldia would be more effectively linked by road and rail with vast hinterland. By 1971 it would be possible for vessels with 40 ft. draft for about 70 days in year as dredging and other corrective works progress in estuary. Expected by 1974, vessels with 40 ft. draft to use Haldia almost through year, with 42 ft. for 209 days and drawing 44 ft. for about 70 days in year. Project in its first phase is expected to be completed by 1971, envisages following:

1. An Oil Jetty – to provide berthing accommodation for super-tankers with LOA of approximately 875 ft. and draft up to 42 ft. This jetty on river has already been commissioned since August 11, 1968.

2. A Finger Jetty – equipped with grab-bridge cranes capable of transferring salt, rock phosphate and other bulk cargo from ship to barge, or vice versa at an average rate 5,000 tons per day.

3. A Coal Berth – capable of loading bulk carriers of the 60,000 dwt. class at rate 3,000 tons/hour.

4. An ore berth – rate of loading 6,000 tons per hour and with provision for increasing to 8,000 tons per hour. Accommodation for carriers up to 80,000 dwt.

5. A Fertiliser Berth – for handling rock phosphate and sulphur from ships up to 50,000 dwt. class at a rate of 6,000–8,000 tons per day.

6. Two general Cargo Berths – each with a quay of 720 ft. and 120 ft. wide and back-up area of 18 acres. Both will have adequate cranage, latest in cargo handling machinery and direct rail–road facilities. One berth will have a modern 100,000 sq. ft. transit shed and a 30-ton payload Portrainer Crane for handling containers.

7. Container Marshalling Yard – area 180,000 sq. ft. served by two rail-mounted Transtrainer Cranes of 30-ton payload, capable of storing 1,500 containers at a time.

GANGWAY/DECK WATCHMEN: Necessary and recommended by Agents at rate of three watchmen per shift of 8 hours. Rate of wages:

Per head for I and II shifts Rs. 5/-; per head for III shifts Rs. 6/-.

OPENING/CLOSING HATCHES: Normally undertaken by stevedores, unless specifically mentioned that same will be attended to by crew.

CUSTOMS ALLOWANCES: ¼ lb. tobacco and 200 cigarettes. Wine and/or Spirit: One bottle of wine or spirit per head for consumption on board.

CARGO GEAR: Proof of cargo gear tested by a competent authority required.

IDENTIFICATION CARDS: Not necessary if holding seamen's books or passport.

GENERAL: This is an artificial harbour situated on a low and sandy coast exposed to heavy seas. Cyclonic season prevails usually during North-east monsoons from October to January. Maximum wind velocities of 100 m.p.h. have been recorded. Tidal range is of the order of 3 to 4 ft. during spring tide and 1 to 2 ft. during neap tide. Currents on coast vary from 1 to 3 knots – their direction depending on monsoons – being Northwards during South-west monsoons and Southwards during North-east monsoons. There are two natural phenomena faced by this port viz. (1) Ranging; it causes three dimensional movements on ships, which is due to artificial geometrical shape of harbour and occurs mainly during depression in Bay of Bengal. (2) Drifts; of about 0·8/1·4 million tons annually around harbour causing silting.

Temperature varies between 12·7° C (55° F.) to 43·3° C. (110° F.). Humidity varies between 62% to 85%. Annual rainfall is about 50 in. (127 cm.).

There are in all 18 cargo berths, 3 moorings, 1 petroleum berth and 1 explosive berth for dangerous and hazardous cargo, which is situated outside harbour. Drafts at these berths/moorings vary from 26 ft. to 35 ft.
RATE OF DISCHARGE/LOADING: Grains, by hooks/derricks:
Bulk: 300 tons per day per hook.
Bagged: 300 tons per day per hook.
By Vacs: 250 tons per Vac. per day.
Fertiliser. By hooks/derricks.
Bulk: 200 tons per day per hook.
Bagged: 300 tons per day per hook.
General Cargo: 150 tons per hook per day.
Liquid Cargo: About 150 tons per hour.
There are spacious and good storage/warehousing facilities; there is about 47,000 sq. metres of uncovered and about 33,000 sq. metres of covered storage area. Harbour encloses a basin of an area of 196 acres. Port entrance on Northern side of harbour is 400 ft. wide.
SERVICES: All special services available.
SHORE LEAVE: Crew members allowed ashore after securing shore passes issued by port security officer. However, they must restrict themselves to city limits.
PORT REGULATIONS: Normal Port Regulations.
DELAYS: When there is heavy arrival of bulk grain and fertiliser, vessels may expect a delay of about a week or so. General cargo vessels may expect a delay of about 2/3 days during congestion.

Crew Lists (6 copies).
Ship's Currency List (in triplicate).
Arms and Ammunition Declaration.
Passenger List – if any.
Through Cargo Manifests.
Departure:
Medical Inspection or Examination Certificate (Bill of Health).
Port Clearance.
Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).
PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Bombay Radio to Port Officer, Redi, Cable Address: Port Officer Redi (Ratnagiri), ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about 1 to 1½ miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with man-ropes and step-down, ready for Pilot.

No fixed anchorage marked at pilot station; however, vessel should not proceed beyond one mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.
ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat 15° 44′ N. Long. 73° 39′ E.) is a flat rocky projection, Western extremity of which is 50 ft. (15m2) high. Foul ground and shoal water extend about three-quarters of a mile South-south-westward and about half a mile Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11m) high and steep. Vessel should not proceed into depths of less than 6 fathoms or within one mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).
MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.
HEALTH: On arrival, Customs Authorities board and grant free pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for radio pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants pratique after boarding vessel with mosquito party deputed from Bombay at Owners' cost. Mosquito Party can only be arranged on advance information failing which vessel would have to proceed either Bombay and/or Marmagoa for free pratique. Master and/or Owners to give Agents prior notice to avoid delay in arranging pratique. Vessels transitting through above infected areas for bunkers or water only do not require mosquito party for obtaining pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.
RADIO: Bombay Radio.
BERTHING: No berths. Open roadstead port.
STEVEDORES: Port only exporting iron ore in bulk and suppliers, The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOBT terms.
MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savanwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations and smallpox vaccination done through Port Health Officer and if required this information may be passed on to agents for arranging with Port Health Officer.
DENSITY: Average 1025.
FRESH WATER/FUEL: None.
GANGWAY/DECK WATCHMAN: Not necessary.
OPENING/CLOSING HATCHES: As per Charter Party. However, opening done by stevedores to save their time and commence loading earliest during free time.
CERTIFICATES: All certificates, particularly Cargo-gear Certificate to be in order and valid.
CUSTOMS ALLOWANCES: 200 cigarettes per week of 7 day per crew. Wine and/or Spirit, one bottle each per crew of spirit or beer as required.
IDENTIFICATION CARDS: Necessary.
CONSULS: None.

REPATRIATION: Facilities for crew changes. 4 days advance notice required with full particulars of crew.
AIRPORT: Belgaum and/or Vascodagama 90 miles distant.
TIME: Indian Standard Time GMT plus 5½ hours.
HOLIDAYS: Cargo work can be arranged on overtime on all holidays except 26th January, Republic Day; 2nd October, Mahatma Gandhi Birthday; 15th August, Independence Day. On these holidays work not permitted even on overtime.
GENERAL: Regular Post and Telegraphic Officer about 2½ miles from jetty.

Vessels on arrival and at departure thoroughly examined by Customs, and Masters therefore requested to ensure that crew private property list is correctly presented to Customs Authorities and its accuracy maintained throughout stay of vessel.

Ship's wireless station not to be used for despatching cables during the vessel's stay.

Discharge of bilge water and/or dirty waste oil or cargo prohibited.

Fresh vegetables, etc., supplied in limited quantity from 90 miles distance.
SHORE LEAVE: Crew of Chinese and Pakistani nationality not allowed land on shore. Other crew permitted land only after obtaining requisite permission from Police Authorities from Ratnagiri, distant about 160 miles and thereafter from Customs Authorities. On arrival, crew list and guarantee duly signed by Master, are furnished to Police Authorities at port and telegram sent to Ratnagiri requesting landing permission from District Superintendent of Police.

Obtaining landing permission takes 3 days; and therefore, Masters requested not to allow crew members to land on shore unless written landing permission sent on board. Crew members not allowed beyond Port Redi limits, without permission obtained from Police Authorities, Ratnagiri.
PORT REGULATIONS: Port Officer conducts Final Draft Survey on completion of loading in consultation with Master. Master's refusal to allow shifting creates complications. Master should not shift vessel without Pilot on board or permission from Port Officer; this does not apply in case of emergency.
DELAYS: Only two vessels (i.e. one at each jetty) can work at a time on a first come first served basis. Overlapping vessels have to wait turn. Waiting time about 4/5 days.

PILOTAGE: The Dumai crude oil loading installations can be reached by deep draft vessels by proceeding from Malacca Strait into Bengkalis Strait and following a buoyed channel on a Southerly course for a distance of 22 miles to the junction of the Rupat Strait. Vessel must make a turn of approximately 180 degrees to enter the Rupat Strait and thence Westerly for a distance of 33 miles to Dumai. The Bengkalis and Rupat Strait fairways have been wire-dragged clear to a depth of 16 metres (52·5 ft.) LWS. Approach channels marked by lighted radar reflecting beacons and buoys. Channel Pilots are not provided. However, vessels above 225 cubic metres (gross) are subject to pilot fees. Mooring Masters moor, unmoor and supervise the movements of all vessels in the vicinity of the wharves.

ANCHORAGE: The Dumai general anchorage area is North and West of oil wharves. Minimum depth of water in this area 43 ft. 35 ft. shoal spot to East of general anchorage should be noticed. Holding ground in anchorages considered good, bottom clay. Area large with sufficient manoeuvring and swinging room for several vessels of size to be accommodated at oil wharves.

MAX. SIZE: Length: 1,000 ft., draft 54 ft.

ETA ADVICES:

1. Proceeding direct from ports other than Palembang and not stopping at Singapore en route:
   (*a*) Radio 96 hour ETA to "Calpaking Dumai" (include operational data).
   (*b*) If any time this estimated arrival time changes by 2 hours, send an amended ETA message immediately.
   (*c*) 24 hours before arrival, *confirm* or *amend* the ETA message regardless of any change from the last advice.
2. Proceeding from Singapore:
   (*a*) Prior to arrival at Singapore, radio 96 hour ETA Dumai (include words ("From Singapore") to "Calpaking Dumai" predicted on estimated time of stay at Singapore.
   (*b*) At Singapore, when departure time from Singapore is known, confirm or amend the ETA to "Calpaking Dumai" through your Singapore ship's Agent.
   (*c*) Immediately upon departure from Singapore, and when able to use the vessel's radio legally, again *confirm* or *amend* the ETA to "Calpaking Dumai".

RESTRICTIONS: All vessels inbound to Dumai from the time abreast Raleigh Bank light buoy until anchored off Dumai Terminal must display the following recognition signals.

By day: The International Code Flag hoist "CAL" flown from a single hoist from the signal yard.

By night: A red light 6 ft. above a white light both visible all around the horizon at a distance of not less than 2 miles.

Vessels should be prepared to answer identification queries from Indonesian naval patrol crafts. The foregoing is subject to change.

RADIO: There is a Government coastal radio station at Dumai. Any message for Dumai Terminal should be sent through this radio station which operates as follows: Name: Dumai Radio. Call Letters: "PKP".

A CPI operated VHF station is maintained 24 hours a day, and is available for information concerning vessels' port activities. Channel 12 is utllised only. Frequencies: 156·6.

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dumai. These signals shall be displayed continuously until pratique is granted. These signals are: Sunrise to Sunset, Quarantine flag "Q". Sunset to Sunrise, Signal lights (red over white). The boarding officials attend the vessels alongside the wharf and normally do not board vessels at the anchorage.

TUGS: Mooring and unmooring assistance is provided by two 1,500 h.p. diesel electric tugs which stationed in the immediate vicinity of the wharves. While rendering assistance the tug-boats are under orders of the mooring master on duty.

BERTHING: At Dumai there are four wharves. Three wharves are utilised for loading of crude oil only and referred to as Oil Wharf No. 1, Oil Wharf No. 2 and the T–2 Wharf respectively. The fourth wharf is utilised to handle general cargo. However, this wharf is also equipped to handle crude oil as well as refined products.

(*a*) Oil Wharf No. 1 is located in approximate position latitude 1° 41′ 14″ N., longitude 101° 27′ 1″ E. The basic design is for 84,000 dwt. vessels but it is capable of receiving 100,000 dwt. vessels under favourable weather and sea conditions. In terms of vessel's size this would be a LOA of approximately 940 ft. and a draft of 48 ft. The least depth at the face of the wharf is 51 ft. (MLWS). The overall length of the wharf is 1,170 ft. between dolphins.

(*b*) Oil Wharf No. 2 is located in approximate position latitude 1° 41′ 14″ N., longitude 101° 28′ 7″ E. The basic design is for 150,000 dwt. vessels. In terms of vessel's size and design this would be a LOA of approximately 1,008 ft. and a draft of 54 ft. The least depth at the face of the wharf is 57 ft. (MLWS). The overall length of the wharf is 1,210 ft. between dolphins.

(*c*) The third oil wharf, referred to as the T–2 Wharf, is located between Oil Wharf No. 1 and the Cargo Wharf. The T–2 Wharf is utilised mostly for handling crude oil to inter-insular vessels. The basic design of the T–2 Wharf is for 16,500 dwt. vessels, but it is capable of receiving 28,000 dwt. vessels. In terms of vessels' size this would be a LOA of approximately 625 ft. and a draft of approximately 34 ft. The least depth of the wharf is 36 ft. (MLWS). The overall length of the wharf is 680 ft. between mooring dolphins.

(*d*) The Cargo Wharf is located in approximate position latitude 1° 41′ 14″ N., longitude 101° 27′ 4″ E. The basic design of this wharf is for 16,500 dwt. vessels; however, under favourable weather and sea conditions this wharf will be capable of receiving vessels up to 23,000 dwt. In terms of vessels' size this would be a LOA of approximately 600 ft. and a draft of 33 ft. The least depth of the wharf is 34 ft. (MLWS). The overall length of the wharf is 750 ft. between dolphins.

There are Chicksan units on the Oil Wharves Nos. 1 and 2 for use in loading tankers. These units are equipped with four 12-in. aluminium pipe loading arms which are U.S. Standard flanged, faced and drilled. Loading, including topping off, is under pressure from pumps ashore. The maximum average loading rate is approximately 50,000 barrels per hour. There are two 10-in. cargo hoses for use in loading tankers at the T–2 Wharf. The hoses are U.S. Standard flanged, faced and drilled. The hoses are swung on board by the wharf's derricks and by assistance of the vessel's derrick. The maximum average loading rate is approximately 18,000 barrels per hour. On the Cargo Wharf, if required, on short notice there are two 10-in cargo hoses for use in loading tankers. Both are U.S. Standard flanged, faced and drilled. Hoses are swung on board by ship's gear and with the assistance of a mobile crane on the wharf. Loading, including topping off, is under pressure from pump house ashore. The maximum average loading rate at this wharf is approximately 18,000 barrels per hour.

Hose handling and Mooring Lines

Wharf crews and launch crews are on duty to handle loading arms and/or oil hoses and mooring lines on the wharf. Mooring lines on board vessels will not be handled by CPI personnel. Rat guards must be rigged on all mooring lines.

BALLAST: There are no shore facilities at Dumai for disposal of dirty ballast water. Vessels should arrive with sufficient clean ballast water to enable safe manoeuvring under prevailing weather conditions. All ballast water must be pumped overboard after arrival at berth, and prior to loading, unless "load on top" procedures apply. If, after arriving alongside, a vessel is found to have oily ballast water on board, such vessel will be sent to sea to accomplish the necessary tank cleaning. A new Notice of Readiness to load must then be tendered.

FRESH WATER: Available in limited quantities at all wharves.

FUEL: Not available.

MEDICAL: The port health doctor has only limited facilities for medical treatment. If the services of more complete and/or specialised medical assistance are needed or emergency cases arise on board tankers calling at Dumai, the port health doctor might refer such cases to CPI hospital facilities. However, Masters of all vessels bound for Dumai are requested, if possible, to call at Singapore for medical assistance.

REPAIRS: No repairs shall be carried out to the main propulsion machinery and/or essential auxiliaries while alongside. The vessels' main propulsion machinery shall be in readiness for instantaneous use on short notice.

CUSTOMS: Ships' bonded stores will be sealed by the Indonesian Customs officials on arrival and will remain sealed until the vessels leave Indonesian waters.

WATCHMEN: Strongly suggest that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before vacated.

TIME: GMT plus 7 hours all year round.

REPATRIATION: Due to stringent Indonesia Government regulations, normally no passengers and/or crew members from any vessel are allowed to disembark for repatriation purposes.

SHORE LEAVE: Shore liberty may normally be granted to ship's officers and crew after clearance of the vessel by harbour authorities, except between 2200 hours and 0600 hours. Recreational facilities are not available for seagoing personnel at present and few facilities exist in the village of Dumai. Personnel proceeding on shore liberty should be provided with ship's pass and advised that the CPI compound is out of bounds with the exception of the road from the wharves to the village road.

GENERAL: While alongside, vessels must have the eye of towing (fire) wires lowered to the water's edge from offshore bow and quarter for emergency use. The eye of the wire should be painted white.

AUTHORITY: Caltex Pacific Indonesia (CPI).

Iran

ABADAN: 30.20 N. 48.16 E.

Port of Abadan situated on right bank of the Shatt, about forty miles up river from Rooka Buoy.
OPERATORS: Iranian Oil Refinery Co.
DOCUMENTS/PILOTAGE: See "Khorramshahr".
ANCHORAGES: On arrival of pilot boat vessel can anchor with no depth restriction. On entering the Shatt-el-Arab River the following are the recognized anchorages: Kasba Anchorage position about 2 miles above Fao with a maximum draft of 35 ft. in fresh water. Bawarda Anchorage position about 2 miles above Abadan with a maximum draft of 35 ft. in fresh water. Vessels which are too deep to pass out of the river on one tide will be required to anchor at Kasba.
RESTRICTIONS: The port is open for day and night navigation with arrivals and sailings being controlled by the tide. Vessels normally enter the river at two hours after high water at the bar, and leave Abadan, for sea, from six to four hours before high water at the bar.
MAX. SIZE: Max. draft at jetties 29 ft. fresh. Max. length 600 ft.
HEALTH: Inward clearance is affected on board after receiving free pratique. Also see "Khorramshahr" – "Documents".
RADIO: Masters should radio Agents via station EQK Khorramshahr (500 kc/s) of ETA at Rooka buoy at least 48 hours in advance asking for load/discharge instructions.
TUGS: Not available.
BERTHING: While no changes have actually occurred in the production capacity of the Abadan Refinery, the number of jetties on the Abadan riverside have been reduced to six. Nos. 3, 4, 5, 9, 11, and 26 have been maintained and are used for bunkering purposes and dry cargo operations.
Ships pass day and night so it is necessary that mooring lines be kept taut at all times to prevent surging on the jetties thereby breaking lines and causing damage to Company property.
MEDICAL: Emergency cases: an ambulance will be dispatched on demand by calling telephone number 5555.
In ordinary cases of sickness or dental treatment: Agents will arrange transportation of patients, and advise Masters regarding necessary medical attention forms. If patient does not speak English he should be accompanied by an interpreter. Only in exceptional cases will a medical officer visit a patient on board.
TANKERS: Deliveries of the refined oil products of Abadan Refinery are effected to ocean-going tankers at Bandar Mahshahr since the inauguration of the new products terminal of the Iranian Oil Refining Company at that port, therefore such shipments are not taking place from Abadan any more.
DENSITY: Fresh.
FRESH WATER: Available at all jetties.
FUEL: Ships' bunkers are available; however not all types are available at all jetties, therefore, ships' Master should advise by radio the exact quantity and kind of bunkers required. Bunkers are delivered concurrent with loading unless otherwise requested by Master. Due to heavy bunkering commitments it is mandatory that vessels take their bunkers when convenient for the terminal, any delay incurred by a vessel taking bunkers after loading is the responsibility of the Master.
GENERAL: All other items, see "Khorramshahr."
AGENT: See "Khorramshahr."

BANDAR ABBAS: 27.15 N. 56.19 E.

GENERAL: Khor Musa is deep tidal inlet at head of Gulf. Consists of triangular-shaped entrance 35 miles wide and 22 miles long followed by a channel, approximately 14 miles long with average width about 1,000 ft., ending at Port of Bandar Mahshahr. Khor Musa is entered by deep water approach channel 25 miles long and 0·8 miles wide, commencing at Khor Musa light float, located in position 29° 36′ 32″ N. 49° 34′ 47″ E. At end of approaches channel, near buoy no. 12, restricted depths and channel widths extend for distance of 8 miles, in vicinity of Khor Musa Bar. A deep water channel then exists up to commercial port of Bandar Shahpour, and to oil port of Bandar Mahshahr, a total distance of 37 miles from end of Bar Channel. Refined products delivered to Bandar Mahshahr Terminal from Oil Company's Refinery at Abadan.
TERRITORIAL WATERS: The 12 mile limit of Iranian territorial waters crosses approaches channel in vicinity of Khor Musa Approaches Buoy no. 8, which is approximately 20 miles from Khor Musa light float.
KHOR MUSA APPROACHES:
Navigational Dangers. Numerous shoals and sand banks in Khor Musa with low-lying shore lines and few conspicuous marks. However, shipping channels well marked with light beacons and buoys and present no navigational difficulties in clear weather. A small unlit tide gauge platform located on edge of shoal West of shipping channel in 29° 42′ 30″ N., 49° 03′ 48″ E., approximately 1·75 miles West of Khor Musa Approaches Buoy no. 4, and shown on Admiralty Chart.
Outer Khor Musa Channel. Approaching vessels should steer for Khor Musa light float, in position 29° 36′ 32″ N., 49° 34′ 47″ E., and from there a course should be set along marked channel for buoy no. 12 in position 29° 56′ 03″ N., 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.
Note: Buoys South of and including buoy no. 12 above are referred to as Khor Musa Approaches Buoys. Buoys North of no. 12 above are referred to as Inner Khor Musa Buoys.
PILOTAGE: Compulsory. Service operated by Bandar Shahpour Port Authorities up to Bandar Shahpour, and by Oil Company between Bandar Shahpour and Bandar Mahshahr. Pilot vessel maintains station approximately 1 mile, 135° from Khor Musa Approaches Buoy no. 12. Vessels requiring Pilot should approach within 2·5 cables of pilot vessel. During adverse weather conditions, pilot vessel may proceed above bar for shelter; in such cases vessels should not attempt to proceed inward without Pilot. Essential that ETA Bandar Shahpour is transmitted to Coastal Radio Station EPY8 as soon as possible after Pilot has embarked at pilot station. If for any reason a vessel is required to wait for any time at Bandar Shahpour, it will be advised through EPY8. See under "Radio". Marine Operations Section, Bandar Mahshahr Terminal, on receipt of ETA Bandar Shahpour, will arrange for Berthing Master to board vessel at Bandar Shahpour Anchorage and allocate jetty berth Bandar Mahshahr.
BANDAR MAHSHAHR APPROACHES:
Navigational Dangers. Khor Musa channel well marked with buoys and beacons, but attention is drawn to following:
(*a*) *Outer Khor Musa Bar.* 29° 59′ N., 49° 04′ E. and inner Khor Musa bar 30° 02′ N., 49° 01′ E., where restricted channel widths and depths exist and minimum depth 30 ft. Buoyed channel over bar is 600 ft. wide, but declared minimum depth of 30 ft. only applicable to central half of channel. Towards edges of channel, shallower depths exist.
(*b*) *Qassar bin Siswan.* A rocky shoal, in 30° 12′ N., 48° 58′ E. approximately 10 miles North of inner Khor Musa bar, marked by buoy no. 9 with minimum depth 6 ft.
(*c*) *Khor Wastah to Beacon* 18. Near sharp bend to East in channel, where tidal streams reach rate of over 4 knots at ebb.
Khor Musa Bar. Reached approximately 5 miles North-west from pilot vessel, and normally does not restrict passage of inward vessels.
Khor Musa Channel. After leaving bar, channel is followed up Khor Musa for about 32 miles to anchorage at Government Bandar Shahpour.
Bandar Shahpour. All inward bound ships required to anchor on arrival off Bandar Shahpour, where Pilot disembarks and a Government Medical Officer comes on board to grant pratique. For this purpose an accommodation ladder should be rigged and ready before arrival.
Bandar Mahshahr Roadstead. Shortly after leaving Bandar Shahpour, channel to Bandar Mahshahr entered between two beacons: port hand, no. 2, flashing red and starboard hand, no. 1, flashing white. Channel well marked by light beacons to entrance of Bandar Mahshahr, at beacon no. 4. All port hand lights flash red and all starboard hand lights flash white. Distance from Bandar Shahpour Anchorage to Bandar Mahshahr about 7 miles. Before arriving at Bandar Mahshahr, the accommodation ladder must be taken in and the ship's side cleared for tugs and berthing.
ANCHORAGE: No anchorages in Bandar Mahshahr or Bandar Mahshahr roadstead. Inward bound vessels must anchor on Northern side of Khor Musa channel, West of Bandar Shahpour, and await arrival of Oil Company Berthing Master.
WIND AND TIDE:
Khor Musa Bar. Classified as Standard Port in Admiralty Tide Tables, Volume II. Tidal predictions considerably affected by strong winds. Variations up to 3 hours in time, and 3·5 ft. in height have been recorded. North-westerly winds tend to lower level and retard predicted times of high and low waters; South-easterly winds have opposite effect. At Khor Musa bar, Mean Higher High Water has rise of 11·6 ft. and Mean Lower High Water has rise of 9·6 f.. above chart datum. Rise of tide at bar is also given by automatic tide indicator established near inner Khor Musa buoy no. 8. Masters may obtain expected depth of water on Khor Musa bar at any time by telephone to Marine Operations Office, Mahshahr, 4264.
Khor Musa. Tidal range increases between bar and Mahshahr. Maximum tidal velocities in Khor Musa about 3·5 knots on flood and 4·5 knots on ebb, at bend near inner Khor Musa beacon no. 18.
At Ports of Shahpur and Mahshahr. Average time high water is 1 hour 35 minutes later, and low water 16 minutes later than on Bar. Mean High High water has rise of 17·0 ft., and Mean Lower High Water rise of 14·6 ft. above Mahshahr chart datum.
Mahshahr Terminal. North-west prevailing winds blow across jetties, from shore. On average, 60% of prevailing winds from North-west, 30% from South-east, and 10% variable. North-west and South-east winds frequently reach Force 8, but winds from other directions normally do not exceed Force 4. Maximum tidal range 18·9 ft. At springs, flood tide has velocity of 2 knots and ebb tide velocity 3 knots.
MAX. SIZE: 35,000 to 60,000 d.w.t. Least water depths: 37 ft. Berth No. 4, up to 43·5 ft. Berth No. 6, subject rise of tide on bar, and maximum LOA 780 ft.
HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. Medical officer boards at Shahpur Anchorage. Subject no infectious diseases reported on board during voyage, Medical Officer will grant pratique.
RADIO: Oil Company has coastal radio station near Mahshahr Terminal, call sign EPY8. Station handles messages to and from oil ports of Mahshahr, Abadan, Kharg Is and Cyrus Terminal.
Nomination and Loading Orders. Signalled by Iranmash on receipt vessels' first ETA. Vessels should signal tentative ETA Khor Musa bar, 72 hours in advance, confirming ETA not less than 48 hours before arrival Khor Musa pilot vessel station.
Radio Watches. Continuous watch on 500 kc/s. to be maintained

at all times while navigating Khor Musa waterway, and ordinary listening watches maintained when at anchor.

During Scheduled Watches on HF, while station EPY8 is not actually working a ship, traffic lists are transmitted automatically and continuously on frequency 8740 kc/s.

TUGS: Three tugs at terminal, one 1,500 b.h.p. and two 1,000 b.h.p., all fully equipped for fire fighting. Incoming ships are met by tugs in channel about 1 mile below port limits. Two tugs always used berthing, and one or two unberthing, according to state of tide and direction of ship's head. Vessels take tug's ropes.

BERTHING: Vessels arriving on flood tide berthed starboard side to jetty, vessels arriving on ebb tide berth port side to jetty. Six bulk loading jetties, each fitted with Woodfield loading unit. 12-in. loading arms, 10-in. bunker arms. Minimum number mooring ropes or wires required is 14, as follows: (Forward) – 4 head ropes, 2 breast ropes, 1 back spring. (Aft) – 4 stern ropes, 2 breast ropes, 1 back spring. For additional security one extra breast line forward and aft should be used. Unless breasts of adequate strength are used, there is every possibility of vessel when in light condition being blown off jetty by North-west wind and damaging loading equipment.

Maximum loading rates are:

Liquid propane/butane	1,500	tons	per hour
Aviation gasolines	1,000	,,	,,
White spirits (solvent)	450	,,	,,
Motor gasolines	3,000	,,	,,
Naphthas	3,000	,,	,,
Turbine fuels	3,000	,,	,,
Kerosines	1,500	,,	,,
Gas oils	3,000	,,	,,
Marine diesels	1,250	,,	,,
Fuel oils	5,000	,,	,,

VHF: Mahshahr Terminal equipped with International Maritime VHF/FM Radio Telephone Service, using standard international frequencies. Masters recommended use this facility when within range of Mahshahr Terminal. Channels available on continuous watch basis:

No. 16 Safety and Calling.
No. 20 Port use, tankers and tugs.
No. 20 Port use, telephone extension.
No. 26 Port use, telephone extension.

Initial contact should be made on Channel 16 and then transfer to Channel 12 for port operations, or Channel 20 or 26 for telephone extension.

MEDICAL: No medical facilities at terminal. Agents may arrange medical attention through Oil Company clinic in Abadan. In event hospital treatment required, patient would be taken Abadan.

FRESH WATER: Limited supply potable water available all jetties, but supply very limited during months June to October.

FUEL: Fuel and diesel oil available each jetty. 10-in. loading arms connected to 6-in. flexible hoses. Loading rates, fuel max. 1,000 tons/hour, diesel max. 500 tons/hour. 48 hours notice required.

FIRE PRECAUTIONS: On arrival Shahpur Anchorage Master is given six copies of Fire and Safety Regulations. Fire Station and Emergency tel. 48.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

CONSULS: Consulates situated in Khorramshahr.

REPAIRS: No repair facilities at Mahshahr or Shahpur. In emergency, the Oil Company may be able to undertake minor repairs. No main engine repairs whilst alongside loading jetties without permission from Terminal Superintendent.

TIME: GMT plus 3·5 hours.

TELEPHONES: Available at each jetty. If requested, telephone may be placed aboard.

SHORE LEAVE: Restricted to foreshore area only. Recreation centre opposite No. 2 jetty.

CURRENCY: The unit of currency is the Iranian rial. The official rate of exchange is 75 rials to 1 U.S. dollar or 180 rials approximately to 1 pound sterling, the latter rate being subject to small day-to-day fluctuations. It is illegal to use any other than Iranian currency ashore and heavy fines have been imposed for infringement of this regulation. Masters are requested to bring this matter to the individual notice of their officers and crew. Currency denominations are:

Notes: 5,000, 1,000, 500, 200, 100, 50, 20 rials.
Coins: 10, 5, 2, 1 and ½ rials.

AGENT: Gulf Agency Co. (Iran) Ltd., Bandar Mahshahr. Cables "Confidence". Iranian Head-office: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Tel. 2280, 2791; Cables "Confidence", Khorramshahr. Telex: 4033 (answer back: "Confidence Kor").

Due difficulty reaching Khorramshahr with international telex messages, communicate via Tehran office, telex No. 2507 Tehran, (answer back: "Confidence" Tehran), stating "For Khorramshahr".

Ships' mail and spare parts for vessels calling at Bandar Mahshahr to be routed by flights arriving directly to Abadan Airport without transshipment at Tehran, and addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

Cables from vessels should be sent via Khorramshahr Port Radio to "Confidence", Khorramshahr, as well as to "Confidence" Bandar Mahshahr.

Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Shahpour Agents as far in advance of vessel's arrival as possible:
Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported earliest possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: Application for Pilot to be made well in advance through Bandar Shahpour Port Radio – EQN – 500 kc/s. If Agents required to arrange Pilot they should be informed well in advance.

Pilotage operated by Shahpour Authorities up to Shahpour. Pilot vessel approximately one mile, 135° from Khor Musa approaches Buoy No. 12. Approach within 2·5 cables of Pilot vessel. During adverse weather pilot vessel may proceed above Bar, in such cases, do not attempt proceed inward without Pilot.

APPROACHES: Shipping channels well marked with lightbeacons and buoys and present no navigational difficulties in clear weather.

Small unlit tide gauge platform located on edge of the shoal West of shipping channel in lat. 29° 42′ 30″ N., long 49° 03′ 48″ E., approximately 1,75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Approaching vessels should steer for Khor Musa light float, in position lat. 29° 36′ 32″ N., long 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position lat. 29° 56′ 03″ N., long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

WEATHER AND TIDE: (*a*) *Khor Musa Bar.* Khor Musa Bar classified as Standard Port in Admiralty Tide Tables, Volume II. Tidal predictions considerably affected by strong winds. Variations of up to 3 hours in tide, and 3·5 ft. in height have been recorded. North-westerly winds tend to lower level and retard predicted times of high and low waters; South-easterly winds have opposite effect.

At Khor Musa Bar, mean higher high water has rise of 11·6 ft., and mean lower high water has rise of 9·6 ft. above chart datum. Rise of tide at bar is also given by automatic tide indicator established near Inner Khor Musa Buoy No. 8.

(*b*) *Khor Musa.* The tidal range increases in Khor Musa between bar and Shahpour. Maximum tidal velocities in Khor Musa are about 3·5 knots flood and 4·5 knots on ebb, at the bend near Inner Khor Musa Beacon No. 18.

(*c*) *Shahpour.* Average time high water is 1 hour 35 minutes later, and low water 16 minutes later, than on bar.

Mean high high water has a rise of about 17·0 ft., and mean lower high water a rise of about 14·6 ft., above chart datum.

MAX. SIZE: Draft not exceeding 29 ft. Entry day or night.

HEALTH: Medical Officer boards at Shahpour. Subject no infectious diseases reported on board during voyage, Medical Officer will grant pratique.

RADIO: Bandar Shahpour Port Radio EQN 500 kc/s.

Continuous watch on 500 kc/s. is to be maintained at all times while navigating in Khor Musa Waterway,

TUGS: Normally not required, but available if necessary due to bad weather.

VHF: Channels 13, 16, 18 and 25.

MEDICAL: 24 hours advance notice of requirements to be sent to Agent.

FRESH WATER: Not available at Shahpour, but if absolutely necessary *non-chlorinated* water may be supplied by railway wagon from Ahwaf, which it is understood has been taken from Karoon river. Approx. cost 110 Rials per ton including pump hire and overtime costs.

FUEL: Not available. In case of absolute need can be arranged at Bandar Mahshahr but jetty fees extremely high (approx. U.S.$2000).

DEVELOPMENT: Improvement of jetties and facilities.

HATCHES: Opening and closing by ship's crew.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited

items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.
IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.
CONSULS: See "Khorramshahr."
REPAIRS: Radio and radar repairs can be arranged from Khorramshahr. At B. Shahpour minor technical and mechanical repairs possible by private workshops. Repair shop and slip of 1,500 tons capacity in process of construction.
AIRPORT: Distant 110 km. Regular flights.
TIME: GMT plus 3½ hours.

CYRUS TERMINAL: 29.01 N. 48.29 E.

Oil loading terminal of the Iran Pan American Oil Company.
LOCATION: Open, unsheltered submarine export mooring, Lat. 29° 01′ 27″ N. Long. 49° 28′ 51″ E. Storage vessel (S.S. "Pazargad"). Lat. 29° 01′ 57″ N. Long. 49° 29′ 30″ E.
APPROACHES:
Obstructions. In addition to submarine export mooring and storage vessel "Pazargad", various oil wells and production structures located in immediate vicinity, which constitute hazard to navigation, as follows:

	Lat.	*Long.*
Well C–2A and the Production Stations	29° 03′ 07″ N.	49° 29′ 57″ E.
C–3	29° 02′ 38·7″ N.	49° 27′ 23·1 ″ E.

C–12	29° 03′ 33″ N.	49° 23′ 56·5″ E.
C–13	29° 02′ 41″ N.	49° 25′ 39·5″ E.

Safest and most desirable direction of approach to Cyrus Terminal is from South-east. Due to numerous obstructions noted above any approach should be made with extreme caution.
Navigation Aids. All structures located within Cyrus Terminal area display interrupted quick flashing white lights and sound a fog horn. The storage tanker "Pazargad" displays, as required, those day and night signals as prescribed by articles 4 (b) and 11 (c) of International Rules. The six mooring buoys for the Cyrus Terminal are not lighted. A spar buoy located approximately 50 ft. N.N.W. of submarine terminal proper displays an interrupted quick flashing white light.
DOCUMENTS:
Bill of Health.
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consulate. If vessel is in ballast, no legalisation dues).
Clearance (from last port).
Register.
5 Crew Lists.
Passenger Manifest (if any passengers are on board).
5 Store Lists.
Bonded Store List.
PILOTAGE: Vessels will be boarded by Mooring Master of IPAC within 2 miles, approximately 180 degrees true from "Pazargad". Mooring Master will advise Master on approaches to berth, mooring and unmooring, connecting and disconnecting submarine hose and all other operations within berthing area. All manoeuvring within loading berth area shall be done only in accordance with advice of an IPAC Mooring Master, subject to understanding that Master shall remain solely responsible for safety and proper manoeuvring. Master or qualified deck officer must be on bridge at all times while ship manoeuvring.
Vessels requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. If at night, adequate lighting must be rigged overside for Mooring Master to approach side of ship and climb ladder safely. Adequate searchlights should also be rigged on both wings of bridge when mooring at night, to assist in running lines to buoys.
ANCHORAGE: Area bound by: 28° 59′ 00″ N. to 29° 01′ 00″ N. between meridians 49° 28′ 00″ E. to 49° 31′ 00″ E. Depth of water 24 fathoms.
Masters cautioned not to anchor North of Lat. 29° 01′ 00″ and East of Long. 49° 31′ 00″ as there are numerous flow lines on sea bed connecting various structures, storage tanker and submarine terminal. During winter months, November through March, severe South-easterly storms often encountered with little or no indication of impending storm. Vessels at anchor, and loading in submarine terminal, must have engines ready with full power for immediate use. Masters cautioned to use adequate scope of chain while anchored awaiting berth.
RESTRICTIONS: None. Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.
MAX. SIZE: Ship loaded by means of submarine pipe-line and one hose at one loading berth, located in approximately 140 ft. of water. Mooring buoys numbered 1, 2, 3, 4, 5 and 6. Starting with no. 1 East of mooring and numbered consecutively in clockwise direction. Max. capacity 150,000 dwt., max. length 950 ft.
HEALTH: The rules governing quarantine are the same as found in other ports of the world. Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.
RADIO: *Advice of arrival:* Incoming tankers must send ETA at least three days before arrival. The IOE and PC main radio stations at Bandar Mahshahr will handle IPAC's radio traffic, pre-arrival messages etc. for vessels calling Cyrus Terminal. The station call sign is EPY8. Messages for IPAC should be prefixed with "Cyrusiran IPAC", with copy to Agent. Further ETA messages should be sent when vessel 24 hours and 12 hours distant from Cyrus Terminal and at any other time any appreciable change occurs in original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.
EPY8, Schedules and Frequencies

(*a*) A 24-hour watch is kept on 500 kc/s. (distress frequency) and any calls answered on that frequency.

(*b*) Traffic is passed on 460 kc/s. and incoming signals are accepted in the band 405–535 kc/s.

Traffic lists are transmitted on 460 kc/s. following an announcement to that effect on 500 kc/s. at: 0105, 0305, 0505, 0705, 0905, 1105, 1305, 1505, 1705, 1905, 2105, 2305 hours GMT.

(*c*) A schedule watch is maintained over 4 Mc/s. band (i.e. 4177–4187 kc/s.) and calls are answered on 4290 kc/s.

Traffic is accepted in the band 4187–4238 kc/s. Traffic lists are transmitted at 1605 GMT on 4290 kc/s.

(*d*) A scheduled watch is maintained over the 8 Mc/s. band (i.e. 8354–8374 kc/s.) and calls are answered on 8740.

Traffic is accepted in the band 8374–8476 kc/s. Traffic lists are transmitted at: 0605, 0805, 1005, 1205, 1405, and 1605 hours GMT on 8740 kc/s.

During scheduled watches on HF while the station is not actually engaged in working a ship, an automatic and continuous traffic list is transmitted on 8740 kc/s. or 4290 kc/s.

The scheduled watches are at the following times GMT:

0600 hrs. – 0900 hrs., 8740 kc's.
1000 hrs. – 1300 hrs., 8740 kc/s.
1400 hrs. – 1600 hrs., 8740 kc/s.
1600 hrs. – 1700 hrs., 4290 kc/s.

Radio Watches. While at the anchorage off Cyrus Terminal, vessels should maintain normal listening watches on both HF and W/T.

TUGS: A charge for each tug movement will be made in accordance with rates established by IPAC. When tug/tugs are standing-by vessel mooring/unmooring, for use if required, the full fee will be charged. IPAC maintains launches to assist in mooring and unmooring.

BERTHING: (Also see "Max. Size".) Tankers to have ready: (*a*) Windlass and deck winches fore and aft. (*b*) Ten good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. (*c*) On port or starboard side as directed, opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5·5 tons. (*d*) One bower anchor ready for immediate use, with minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition. (*e*) Equipped to fit flanges on submarine hoses, which are of ASA standards.

Permanent moorings in the berth consist of six steel cylindrical buoys each fitted with a quick release hook to which ship's mooring lines attached by mooring launches. The berth is laid out on a two heading basis, using ten mooring ropes (two bow, four beam, and two quarter and doubled on windward bow and quarter).

LOADING: Maximum crude oil loading rates for a tanker using one 12-in. deck hose and 20 p.s.i. at ship's rail is approximately 12,000 b.p.h. Requested that ships receive oil as fast as it can be delivered, with due regard for safety, also that any fittings on manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into the ships, be removed before arrival at terminal. Preferable that connections be provided so that a 12-in. deck hose can be used.

VHF: Cyrus Terminal base ("Pazargad") is not equipped with VHF radio telephone and does not maintain a radio watch. Vessels arriving at Cyrus Terminal may communicate with the "Pazargad" via blinker light.

MEDICAL: Neither medical nor hospital facilities provided by IPAC. Private doctors and hospital facilities available at Tehran or Abadan. Emergency hospital cases only can be handled on Kharg Island, approximately 53 miles from Cyrus Terminal.

DENSITY: Salinity approximately 20% more than normal sea water.

TIDE/CURRENT: Tidal range between 6 and 8 ft. Currents generally on axis of ship berthed in mooring; however, rotary currents can be expected.

FRESH WATER: No fresh water available.

FUEL: No bunkers or lubricants available.

FIRE PRECAUTIONS: A continuous and efficient fire watch must be kept on deck and in engine room. In event of fire breaking out in any part of a vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid continuous ringing of ship's bell.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain a maximum of 50 cigarettes or 1 oz. of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel is subject to a fine.

CONSULS: No consulates at Cyrus Terminal; consular or diplomatic representatives for most nations maintain offices in Tehran.

REPAIRS/STORES: Port is considered an "open roadstead", and under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities for making vessel repairs. No spare parts, stores or supplies should be sent to Cyrus Terminal for delivery to a ship.

REPATRIATION: No facilities.

TIME: GMT plus 3½ hours.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities. No visitors permitted on tankers loading.

INSPECTION SERVICE AND MARINE SURVEYS:

Petroleum inspection services available at Cyrus Terminal from Saybolt. IPAC also inspects cargoes on specific request of off-taker companies.

Classification agencies: Lloyds Register of Shipping (maintain office with Surveyor in Khorramshahr). American Bureau of Shipping (to be arranged from Bahrain where nearest ABS office available, with at least 5 days advance notice. A non-exclusive Surveyor available in Tehran). Bureau Veritas (Agents and Surveyor in Khorramshahr). Norske Veritas (Agents in Khorramshahr). German Lloyd (Agents and Surveyor in Khorramshahr).

AGENT: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Tel. 2278, 2280. Cables "Confidence", Khorramshahr. Telex 4033 (answer back: "Confidence Kor").

Due difficulty reaching Khorramshahr with international telex, communicate via Tehran office, telex no. 2107 Tehran (answer back "Confidence" Tehran), stating "For Khorramshahr".

Ships' mail for vessels calling Cyrus Terminal to be addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

KHARG ISLAND: 29.14 N. 50.19 E.

A. DARIUS TERMINAL. Oil-loading terminal of the Iran Pan American Oil Company.

B. KHARG TERMINAL. Oil-loading terminal of the Iranian Oil Exploration and Producing Company.

C. KHEMCO TERMINAL. Loading terminal of Kharg Chemical Co.

GENERAL: (Items common to all Terminals): There are no ballast disposal facilities at Kharg and it is of the utmost importance that all vessels arriving at the anchorage should ensure that all water ballast and pipe-lines are completely clean.

FLAG: All vessels required to fly Iranian Ensign on foremast during daylight hours in Iranian waters. Iranian territorial waters extend 12 miles seaward from mainland and adjacent islands. Iranian flags may be obtained from Agent.

DOCUMENTS:

Bill of Health (certified by Iranian Consulate port of origin or port of call. If no Iranian Consul available, the legalisation fees are payable at Kharg Island).
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consul (see "Bill of Health" above). If vessel is in ballast, no legalisation fees due).
Clearance (from last port).
Register.
Crew List.
Passenger Manifest (if any passengers are on board).
Store List.
Bonded Store List.

APPROACHES: Vessels approaching Kharg from South, should keep at least 2 miles to East of Island. Vessels approaching Kharg from North should keep to West of Island, as Khargu Island to the North is very low lying and difficult to see at night until dangerously close-to.

Landfall. 3 high gas flare towers, 2 in the South and 1 to the North of the Island, make a most conspicuous landfall. At night, from a distance, the light from these flares tends to obliterate the various navigation lights. At night the glow from the 3 gas flares is visible from great distance, far beyond the range of any navigation lights. However on occasions, one or more or all of the flares may not be burning, making the main navigation lights more readily visible.

Navigational Dangers. Eastern coast is open and free from navigational dangers, except for coral reef, which extends for about ¼ mile seawards along whole coast line. To South-west of Island, numerous oil platforms in positions up to 5 miles offshore.

Kharg South Beacon. 29° 12′ 46″ N., 50° 19′ 15″ E. At Southern end of Island, rotating white light, on steel tower, 295 ft. above MHHW, 2 flashes every 12 seconds, visibility 24 miles. Obscured by high ground and oil tanks between 151° and 160° from seaward. Light beam partly diverged upwards for aircraft. This is the main navigation light for Kharg area.

Kharg North Beacon. 20° 15′ 02″ N., 50° 18′ 18″ E. At Northern end of Island, white light on steel tower, 261 ft. above MHHW, 2 flashes every 6 seconds, visibility 12 miles. Obscured by high ground and oil installations between 330° and 352° from seaward.

Khargu Beacon. 29° 20′ 20″ N., 50° 21′ 18″ E. At Northern end of Khargu Island, on a steel tower 59 ft. above MHHW, a white light with 10° red sectors towards Ganaveh and Kharg Island to indicate general directions of submarine pipe-lines, 3 flashes every 8 seconds, visibility, 10 miles red sector, 15 miles white sector. Obscured between 011° and 041° from seaward by Kharg Island. Radar reflectors fitted to North and East sides of tower top.

Ganaveh Beacon. 29° 35′ 20″ N., 50° 29′ 50″ E. On mainland, at start of submarine pipe-lines to Island, 2 miles North-west of Ganaveh village, on steel tower, white light with 10° red sector along general direction of submarine pipe-lines, one flash every 5 seconds, visibility 10 miles red sector, 15 miles white sector. Light beam partly diverged upwards for aircraft.

South-east Buoy. 29° 12′ 22″ N., 50° 20′ 02″ E. Red can buoy, white light, one flash every 2 seconds. Near edge of reef, South-east Kharg Island.

North East Buoy. 29° 14′ 54″ N., 50° 20′ 18″ E. Red conical buoy, white light, one flash every 6 seconds. On Northern boundary of port limits.

Channel Buoy. 29° 16′ 42″ N., 50° 20′ 30″ E. Red conical buoy, white light, one flash every 3 seconds. In Eastern end of channel between Kharg and Khargu Island.

Radio Masts. At South end of Kharg Island a high radio mast painted red and white positioned at 29° 12′ 47″ N., 50° 19′ 15″ E., approximate elevation 510 ft. Fitted with fixed red lights. Another radio mast, also painted red and white, positioned at 29° 14′ 10″ N., 50° 18′ 26″ E., approximate elevation 367 ft., fitted with fixed red light.

Dideban Tomb. On highest point of Kharg Island, 29° 14′ 57″ N., 50° 18′ 29″ E., a small domed building located, elevation 290 ft.

Mir Muhammad Tomb. On North-eastern part of Kharg Island at 29° 15′ 10″ N., 50° 18′ 46″ E., conical shaped tower surmounted by small dome, elevation 165 ft.

Khargu Trees. On Khargu Island, at 29° 18′ 45″ N., 50° 20′ 30″ E., a small group of trees, only ones on island, visible from long distances.

Notice Boards. On North South-east coast and South-west of Kharg Island and along coasts of Khargu Island, large white notice boards indicating prohibited anchorages surrounding submarine pipe-lines.

Port Area. The area within:

29° 12′ 23″ N.	29° 14′ 53″ N.
50° 18′ 36″ E.	50° 21′ 17″ E.
29° 12′ 21″ N.	29° 14′ 53″ N.
50° 21′ 40″ E.	50° 20′ 20″ E.

offshore from Kharg Island has been proclaimed a port area. Port area used by vessels manoeuvring to and from oil-loading terminals. The whole of area within port limits declared a Prohibited Anchorage, and, a Restricted Manoeuvring Area. Vessels must not enter within port limits unless Berthing Master is on Board.

PILOTAGE: Vessels should proceed to Eastern Anchorage, outside port limits (Prohibited Anchorage and Manoeuvring Area) approximately 1½ miles East of Terminals, and await arrival of Berthing/Mooring Master.

ANCHORAGE: The approved Anchorage Area is to East of Eastern boundary of Port Limits, where holding ground is good. All vessels on arrival at Kharg must proceed to anchorage area and await instructions.

Prohibited Anchorages. Three Prohibited Anchorages in the Kharg Area:

(*a*) Submarine Pipe-lines. Anchorage prohibited in vicinity of submarine oil pipe-lines laid between North coast of Kharg Island and mainland near Ganaveh.

(*b*) Offshore Oil Platforms. Anchorage prohibited to South-west of Kharg Island in vicinity of numerous oil wells and drilling platforms extending 5 miles or more out to sea.

(*c*) Port Area. Area within 1½ to 1¾ miles offshore from East coast of Kharg Island generally, has been proclaimed a Port Area. Anchorage within Port Area prohibited.

Cautions. (*a*) Unlit mooring buoys at south east of Kharg Island (see Darius Terminal). (*b*) Oil Platforms to South-west of Kharg Island. (c) Aircraft approach lane South-east of a point mid-way between Naval Boat Harbour and Kharg North Buoy, in North-west corner of Port Area.

HEALTH: On completion of mooring, after ship's gangway has been lowered, Medical Authorities will board vessel and grant pratique, subject no infectious diseases having been reported on board during voyage.

N.B.: Owners of vessels proceeding to Kharg from Iraq, India or Pakistan, should check latest quarantine regulations with Agents. For example, in the past, regulations have been in force requiring vessels coming from Iraq to pass a 24-hour quarantine period from time of arrival at anchorage, and vessels coming from Pakistan to pass a quarantine period of 5 days from time of leaving Karachi before Oil Company accepts respective Notices of Readiness. Understood that these regulations presently withdrawn, but might be re-imposed from time to time on basis of cholera situation. Voyage from Karachi to Kharg takes about 3 days, therefore, tanker proceeding directly from Karachi could incur one or two days delay, if quarantine ban in operation.

RADIO: IOE and PC main radio station at Bandar Mahshahr will handle radio traffic. Call sign EPY8. Vessels bound for Kharg Terminal should prefix messages with "Khargiran", and vessels bound Darius Terminal should prefix with "Khargiran Ipac" in both cases with copy to Agents.

Advice of Arrival. It is important that ships establish radio contact when three days distant from Kharg Island and maintain this contact until just previous to arrival. All ships should send a 72 hours ETA message with copy to Agents, giving best estimate of ship's arrival time. (First ETA message should also include a definite statement of details of any equipment required from shore for connecting submarine hoses to ship's manifold – Darius Terminal.) Further ETA messages should be sent when vessel 24 hours 12 hours distant from Kharg Island and at any other time any appreciable change occurs in original ETA or those subsequent thereto. 12 hours ETA should include a positive statement regarding "ship's readiness to load" on arrival, and number of hours that will be required to discharge clean ballast after ship is berthed/moored; any expected delays for repairs or other reasons, prior to berthing, should also be included in the message.

Radio Watches. While at anchor off Kharg Island, vessels should maintain normal listening watches with station EPY8 on WT, and Kharg Terminal on VHF. Use of the ship's radio station and/or battery charging equipment prohibited during cargo transfer operations.

STATION EPY8 SCHEDULES AND FREQUENCIES

1400–1600 hrs.	8354–8374	8740	8374–8476	GMT

During Scheduled Watches on HF, while station EPY8 is not actually working a ship, traffic lists are transmitted automatically and continuously on frequency 8740 kc/s.

VHF: Kharg Terminal equipped with VHF radio telephone, using international frequencies. Continuous watch kept on international calling and emergency Channel 16, frequency 156·80 Mc/s. Other channels, available after contact has been established are: No. 12 (first choice, Simplex), No. 20 (second choice, Duplex). Masters recommended use this facility when within range, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF communication may be the means of avoiding delay in mooring/berthing.

MEDICAL: Small hospital with clinic on Kharg operated by National Iranian Oil Company for minor medical treatment. More serious cases may have to be sent by air to Abadan Hospital. Any medical services required should be brought to attention of Medical Officer when he boards vessel to grant pratique.

DENSITY/TIDE WINDS: Salinity of sea approximately 20% more than normal sea water. Surface temperature of sea ranges from 63° to 97° F depending on season. The extreme tidal range between 7 and 8 feet with maximum rate of about 1½ knots. Wind directions and velocity subject rapid change without warning and precautions necessary to avoid difficulties. Heaviest seas and swells while in port are from North-east through South-east.

FRESH WATER: Not available.

STORES: Commissary supplies, as well as steward's stores, in limited quantities, can be arranged through Agent with at least 5 days advance notice.

LAUNDRY: No laundry services available.

DEVELOPMENTS: Planned construction by IOE and PC of new loading terminal on West side of island, completion expected end 1972. Terminal to be capable of accommodating 2 vessels simultaneously of 250,000 to 500,000 tons, and respective vessels to be able to load 2 grades Iranian crudes (light and heavy) simultaneously at the rate of 15,000 tons per hour for each grade, or if only loading one grade, at 30,000 tons per hour. Loading expected to be through four 24-in. diameter hoses to each vessel.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain maximum 50 cigarettes or 1 ounce of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel subject to fine.

CONSULS: No consulates at Kharg Island; however, consular or diplomatic representatives for most nations maintain offices in Tehran, and some in Khorramshahr.

REPAIRS: Masters of vessels loading or discharging at Darius Terminal are advised that this port is considered an "open roadstead" and, under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities at Darius Terminal for making vessels repairs, and it is emphasised that all vessels in submarine moorings must be in condition to clear immediately on instructions to do so. No repairs allowed alongside the Oil Loading Jetty at Kharg Terminal. Ship's main engines must be available at all times while alongside jetty.

REPATRIATION: Crew members joining ships at Kharg Island should always be routed via Abadan and not via Shiraz. Crew change accommodation (for 10) at Recreation Centre.

AIRPORT: Small airport used by Oil Company aircraft and Iranair flights to and from Abadan. Due security arrangements movement of crew must be programmed through Agent.

TIME: GMT plus 3½ hours.

A. DARIUS TERMINAL (Additional requirements and details).

Terminal operates 24 hours per day, seven days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

LOCATION: A submarine terminal at South-east corner off Kharg Island 29° 12′ 40″ N. 50° 20′ 40″ E.

MOORING: Vessel requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. Adequate searchlights should be rigged on both wings of bridge, when mooring at night, to assist in running lines to buoys.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by crew as advised by Mooring Master, who will remain on board while ship in moorings. A capable winchman to be provided by ship.

Mooring buoys for Darius Terminal not lighted with exception of spar buoy at North end of mooring buoys, which has characteristic of one white flash every one second. Permanent moorings in berth consist of 5 steel cylindrical buoys each fitted with quick release hook, to which ship's mooring lines are attached by IPAC's mooring launches. The berth is laid out on the one heading basis, using both ship's bower anchors with seven mooring ropes (four beam, two quarter, and one stern). Mooring buoys numbered 1, 2, 3, 4, and 5. Starting with no. 1 East of the mooring and numbers running consecutively in a clockwise direction.

Tankers to have ready: (*a*) Windlass and both bower anchors, each with not less than 120 fathoms of chain. (*b*) Seven good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. (*c*) On port side opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5 tons.

LOADING: Ship loaded by means of submarine pipe-line and two hoses at 1 loading berth, located approximately one mile offshore in over 65 ft. of water. Crude oil loading hoses lifted on port side. Maximum crude oil loading rate for tanker using two 12-in. deck hoses and 20 p.s.i. at ship's rail is approximately 5,000 tons per hour.

Order save ship time as well as to make berth available for others, requested that ships receive oil as fast as it can be delivered, with due regard for safety. Also requested that any fittings on ship's manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into ship, be removed before arrival at terminal. It is preferable that connections be provided so that a 12-in. deck hose can be used. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

FIRE PRECAUTIONS AND SAFETY: Full instructions will be given by Mooring Master but, vessel's personnel responsible for safety of vessel and must take all necessary precautions, whether or not so advised by Mooring Master.

During time vessel moored in Darius Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. In the event of fire breaking out in any part of vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid and continuous ringing of ship's bell.

COMMUNICATION: Ship-to-shore communications, while ships in moorings, will be by portable VHF radiotelephone units. Mooring Master will advise Masters and Officers regarding emergency whistle signals set up for use in event VHF radiotelephone units become inoperative.

EMERGENCY MEDICAL ASSISTANCE: Vessels requiring emergency medical assistance should hoist international code flag "W" in daylight, and at night send "W" (·––) on blinker light. To attract immediate attention, the same signal "W" (·––) should be given on ship's whistle in either day or night hours. The signal should be repeated until acknowledged visually by either another ship in the moorings, or from IPAC launch. As soon as signal is received, Terminal officials will advise Agent as soon as possible of the emergency medical aid required.

FUEL: No bunkers available at submarine mooring. Bunkers may be loaded at I.O.E. and P.C. main jetty having obtained nomination through Iranian Oil participants in London. Tankers loading crude oil at I.O.E. and P.C. jetties have at all times priority for berth, over the vessels lifting bunkers only. Marine lubricants not available, except through marketing representatives by arrangement through Agent.

CURRENTS: Generally on the axis of the ship berthed in the mooring; however, rotary currents can be expected.

SHORE LEAVE: For personnel of vessels loading or unloading at the Terminal is arranged between Agent and Iranian Security Officer aboard vessel. Ship's personnel (other than medical or emergency cases) not allowed to disembark or embark at Terminal. All personnel going ashore must land at I.P.A.C. Small Boat Harbour. Sufficient personnel must be aboard at all times for letting go lines and clearing moorings immediately.

B. KHARG TERMINAL (Additional requirements and details)

OIL LOADING JETTY: "Tee" head with overall length of 6,038 ft. between fender faces. The fender to fender width is 138 ft., for the section South of trestle approach, and 124 ft. for North section. Jetty face is aligned in direction 172° 35′–352° 35′. Deck level 22·0 ft. above chart datum. The jetty, being on eastern side of Island, is sheltered from prevailing North-west winds, but exposed to South-east, when during winter storms, waves of 8 to 10 ft. often occur. A maximum wave height of 15 ft. has been recorded at Southern end of jetty, under such conditions.

10	58	76,000	5×12 in.	11 to 62

* Subject to weather, tidal conditions and lengths of vessels at adjacent berths.

† 12 in. Bunker arms at all berths. All Chiksan arm flanges are series 150 API.

Outer Berths: 9, 7, 1, 3, 5. Inner Berths: 10, 8, 2, 4, 6. Berths Nos. 7, 8, 9 and 10 located North of trestle approach.

Note: Vessels up to 1,135 ft. length and 312,000 tons dwt. have loaded part-cargo of 200,000 tons at this Terminal.

TUGS: Vessel normally berthed with assistance of two tugs which, together with Berthing Master, meet vessel at port limits. The tugs will come alongside, normally one to the bow and one to the stern, as far forward and aft as is safe and practical. Tugs' towing equipment will be used on all occasions.

BERTHING: Approaching berth, two fibre-rope headlines should be lowered to mooring launch, for transfer to jetty. Two stern lines are then handled, preferably one at a time, to avoid possible fouling of vessel's propeller. Positioning of vessel's loading manifold in relation to Chiksan loading arms on jetty has to be carried out to a close tolerance, as directed by Berthing Master, to requirements of jetty operator. On inner berths, particularly nos. 2, 4 and 8, vessels are berthed head outwards, i.e. stern to trestle. In these cases, vessels are towed stern first by after tug's hook wire, with forward tug either alongside or on towing hook, depending on tidal and weather conditions.

Mooring System. Under normal conditions, 12 lines are used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft.: 3 stern lines, 2 breast lines and 1 spring.

During winter South-easterly storm period, it is usual to use one each additional headline and breast line, at each end making a total of 16 mooring lines. Breast lines and springs of wire rope are acceptable.

Berthing Limitations. Various combinations of wind, sea and tidal conditions, also size, length, ballasted trim and handling qualities of a vessel and available berth space, can effect decision to berth a vessel at Kharg. All these factors have to be evaluated before a final berthing decision is made.

Manfold Position. No berthing where manifold of vessel cannot be positioned, within horizontal limits of Chiksan loading unit arms, due to adjacent occupied berths.

Note: On outside berths, very large vessels of light free board in excess of 70 ft., may be required to retain sufficient ballast, to ensure that their manifolds remain within the vertical range of the "Chiksan" loading arms, until sufficient cargo is loaded.

LOADING: Both Iranian light and heavy crude oils available at all jetty berths. Crude oil is delivered to jetty from Tank Farm, situated on central plateau of Island, by gravity flow through four 48-in. diameter pipe-lines. Loading rates of up to 11,500 tons per hour to one berth can be achieved at Kharg Terminal. Up to 45,000 tons per hour can be delivered to all 10 berths simultaneously.

FUEL: Bunkering facilities at each berth. Two grades available, Marine fuel oil and marine diesel oil. Bunkers may be loaded up to a maximum rate of 1,000 tons per hour, and bunkering will normally commence before loading cargo.

FIRE PRECAUTIONS: A copy of the "Fire and Safety Regulations" notice is given to Master of every vessel by Berthing Master, at Anchorage. Five additional copies are passed aboard vessel when it arrives alongside jetty. These extra copies must be posted in conspicuous places throughout the vessel. While a vessel is within Port Area a continuous and efficient Fire Watch shall be maintained on deck and in the engine room. In event of fire, however minor it may be, the Fire Alarm shall be given immediately as follows:

On Board Vessel: Rapid and continuous ringing of ship's bell, together with a succession of long blasts on the ship's whistle or siren.

On Jetty or elsewhere in Port Area: Rapid and continuous ringing of the gongs on the jetty. A push-button alarm system is provided at each berth.

SHORE LEAVE: Fully air-conditioned Recreation Centre operated by United Seamen's Services, situated close to shore end of the trestle to the Oil Loading Jetty. Facilities include: cinema, film exchange, restaurant, dining-room and bar, library and waiting-room, PX gift shop, 2 billiards and snooker tables, 2 table tennis tables, darts, chess, etc., official money exchange.

Note: Shore leave restricted to grounds and buildings of Recreation Centre only.

C. KHEMCO TERMINAL: 29.13 N. 50.20 E.

LOCATION: Khemco Terminal dolphin jetty is located at the South-east corner of Kharg Island 29° 12′ 45″ N. 50° 20′ 05″ E.

APPROACHES: Vessels entering Kharg Island road must not approach or anchor West of long. 50° 21′ 30″ East (being approximately one mile East of Khemco Terminal), unless a company's Berthing Master is on board.

PILOTAGE: Company has own Berthing Masters, who will board vessels outside the port area and will pilot and berth the vessel alongside Khemco jetty. Berthing Masters will also carry out the duties of safety officer.

Vessels with the Berthing Master on board shall display the international flag "H" in a prominent position while manoeuvring under his advice. This flag will be in addition to the "Q" flag, being already hoisted for quarantine purposes.

Vessels are requested to have a clean pilot ladder safely secured at the leeside of the ship for the Berthing Master. The pilot ladder should be long enough to reach the pilot tug or launch. At night adequate lighting for the pilot ladder shall be installed.

Pilotage, berthing, mooring and sailing of vessels will be carried out in accordance with instructions of the Mooring Masters, subject to the understanding that in all circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety, proper navigation and manoeuvring of his vessel. The Master or a qualified ship's deck officer must be on the bridge at all times while the vessel is underway or unmoored.

NOTICE OF READINESS: Notice of readiness will not be accepted at the time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the berthing Master boards the vessel or the time that the vessel anchors, whichever occurs first.

RESTRICTIONS: Vessels can be berthed day or night in two

directions using ship's moorings. Occasionally bow anchor will be used during berthing operation.

MAX. SIZE: Length of pier is 1180 ft. with maximum of 42 ft. water alongside at MLLW.

RADIO: Radio Facilities. The IOE & PC main radio station at Bandar Mahshahr will handle Khemco's radio traffic. The station call sign is "EPY8". Messages for Kemco should be prefixed with Khargiran Khemco, with copy to Agent.

Advice of Arrival. It is important that ships establish radio contact with Khemco, when three days distance from Kharg Island, and maintain this contact until just prior to arrival at the terminal. All ships should send a 72 hours ETA message to Khemco, giving the best estimate of the ship's arrival time at Kharg anchorage. The first ETA message should also include a definite statement of the details of manifold dimensions, cargo requirement, agent and any other necessary information. Further ETA messages should be sent to Khemco when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time if any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival, and the number of hours required to discharge clean ballast after ship has berthed.

TUGS: Two 2,000 h.p. and one 1,000 h.p. diesel tugs are provided by the Company. Normally two tugs are used for berthing and one for unberthing, depending on the Berthing Master's discretion. Tugs moorings are provided by the company and vessels are requested to have good heaving lines handy on the deck for picking up the tug lines. All tugs are equipped with fire-fighting equipment, including a foam system, which can be used when required.

MOORING: If, in the opinion of the Berthing Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event shall not be brought into berth until such facilities, lines or gear are deemed satisfactory.

Mooring Launches. Four powerful mooring launches are provided by the Company and normally one is used during berthing and unberthing operations.

Mooring Lines. Under normal weather conditions the following mooring lines are required: forward: 3 head lines, 2 breast lines, 1 spring; aft.: 3 stern lines, 2 breast lines, 1 spring.

All lines to be of 120 fathoms, with the exception of the breast lines, being of shorter length. No wire lines are to be used at Khemco jetty.

During abnormal conditions, especially during winter periods, some additional four lines are required for extra moorings.

In most cases it might be necessary to pass all forward lines from the bow and all stern lines from the poop.

Dolphins. The jetty consists of one main and eight smaller dolphins. Four on either side of the main dolphin are for ships mooring. The main dolphin is connected to the shore via a trestle and causeway. Head and stern lines are passed to the dolphins by means of line handling launches and others by heaving lines. All mooring dolphins are fitted with quick-release hooks.

BERTHING: A. Berthing Masters. Vessels to be berthed at Khemco jetty will be boarded by a company's Berthing Master at Kharg anchorage and after advising the ship's Master of all port formalities, will normally take two tugs (one to the bow and one to the stern) alongside while proceeding to the jetty.

B. Berth Turn. Vessels to load at Khemco jetty will normally be accepted and the berth will be assigned to the vessel in order of arrival and nomination. In the event the berthing is delayed by weather or other reasons, vessels will keep their positions in line. Vessels leaving the port area on account of weather or other reasons should keep in contact with the terminal in order that they will be available when weather moderates. Khemco reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading out of turn does not materially delay the loading of other vessels in line. For example, in the event that weather or other reasons make it necessary for vessels awaiting berth to leave the terminal and put to sea, Khemco may load another vessel after the port opens, but before the return of the vessels waiting in line ahead of it. And further, Khemco reserves the right to decline to berth a specific vessel if its condition or facilities are unsafe for berthing or loading, but berths other vessels "out of turn".

C. Gangway. When alongside the jetty, vessels shall provide an efficient gangway with a net rigged underneath. During the hours of darkness, they shall install adequate safe lighting for the gangway. These lights are in additions to those used for the deck illumination.

D. Sailing. All lines are dropped by means of quick-release hooks, fitted on all dolphins and under normal conditions one tug is used on the hook at the bow of the vessel in order to clear her off the berth. Usually the documents are signed before departure, unless the berth is needed for another ship.

BALLAST: A. Rules and Regulations. Vessels arriving at Kharg should maintain a reasonable draft fore and aft for safe manoeuvring and berthing. When conditions permit, the Berthing Master will advise the Master to commence discharging ballast. It is the Master's responsibility to see that dirty ballast, whatsoever, is not pumped or spilled over board. Only clean ballast or bilge water may be discharged within 50 miles of the coast-line. In the event of contaminated ballast or bilge water, the vessel will be required to divert this material to a ship's slop tank. Otherwise, the vessel may be unberthed and returned to a point not less than 50 miles from the coast line to discharge contaminated ballast.

There are no ballast disposal facilities at Kharg Island.

Masters are requested to arrive at Kharg with clean tanks, pipelines, sea suctions, strainers and pumps. Ships will not be accepted for loading if evidence of any dirty ballast is observed.

Any vessel returned to a position at least 50 miles off-shore to discharge dirty ballast, or for any similar reason, automatically nullifies any "Notice of Readiness" already tendered and loses any priority held for loading. The vessel will be entered for loading at the time of second arrival when a new "Notice of Readiness" will be tendered.

B. Loading and Deballasting Simultaneously. Vessels are permitted to load cargo and discharge clean ballast at the same time provided all safety and other aspects are observed.

C. Tank Cleaning. Ship-tank cleaning will not be allowed at the pier. Ships will be allowed to draw sea water ballast while alongside.

LOADING: A. Ship's Gear. Although the jetty is equipped with a boom to handle loading hoses, ships are requested to rig jetty side boom in a proper and safe manner for possible use. Masters will be responsible for ensuring that the ships gear or fittings are in good working order and will not in any way interfere with or hamper the working of the facilities.

B. Inspection. After the vessel has been berthed and all formalities carried out the vessel will be boarded by the loading Master. A joint inspection will be made by an authorised ship's officer and the loading Master after the exchange of information and documents. If the ship's tanks, piping or equipment are in such condition that a potential hazard exists, the ship will be refused permission to load until such hazards are corrected. In any case, the owners or charterers of the ship will be notified of any delay or refusal to load because of hazardous conditions and any expense due to such delay or refusal to load will be borne by owners.

If the ship does not arrive with tanks and/or piping sufficiently cooled to permit loading, the time required to cool down shall not be counted as lay time. Any expenses, including LPG furnished by company, demurrage, etc., involved with the cool-down period and operation shall be borne by the owners or charterers of the vessel.

Should the vessel arrive at the loading terminal with inert gas in its tanks, after purging from a previous cargo of ammonia or other gas to prevent contamination of shore lines and facilities, the inert gas should be vented if possible before ship is moored. If the ship's tanks to be loaded previously contained a product different from what is to be loaded, the Master shall verify that the tanks are clean and ready to receive Kharg Chemical cargo.

C. Loading Propane and/or Butane. 1. General Information. No loading will begin until the ship is safely moored with fibre mooring lines, gangway lowered and secured, the ship grounded and ground tested, ship's and shore emergency fire hose pressurised and ready for use, fire wire in place, and ship/shore communications tested and in good working order.

All loading personnel will wear fibreglass hard hats, leather-palmed gloves, cotton long-sleeved shirts, long cotton trousers, cotton socks, and sandals or shoes that do not have spark-generating material, such as steel nails, cleats, toe or heel plates. Non-sparking tools will be used in making hose and ground connections. Silk clothing or headgear will not be permitted due to its affinity for collecting static electricity. Ship's grounds will be tested for continuity to shore before product or vapours pass through hoses.

Since the LPG may not contain an odorant, particular care shall be taken that the atmosphere does not become explosive. If there is no air movement, explosimeter readings will be taken hourly, and if an explosive atmosphere exists, loading shall stop until conditions change. Prior to loading the main cargo a small quantity of propane and/or butane will be loaded or circulated initially for cooling down purposes. The amount set aside for cooling down will depend on whether the cool down is for the ship's lines or ship's tanks. Generally, the ship's lines will be cooled down before loading each parcel.

Although a small amount of refrigerated LPG is normally retained in the bottoms of the ship's cargo tank during the trip to Kharg Island, the tank vapour space and tank walls are warmer. For a period of about an hour while low temperature circulation of the shore lines continues, a small amount of propane may be taken by the ship from cargo holds and sprayed into ship's tanks. This method cools the upper parts of the ship's tanks and vapour spaces. If propane is taken from shore lines, this is replaced from shore tankage as the circulating pump suction is "floating" on the shore tank outlet line.

The enclosed spaces around ship cargo tanks and double bulkheads should be frequently monitored by ship's personnel for cargo leakage.

The measures for dealing with any leakage to prevent the temperature of the hull structure from falling below a safe level depends upon the ship's design. The Master shall have standing orders for dealing with any leakage observed on the ship and shall so inform the Loading Master.

2. Loading Master and Jetty Operator. Once the vessel has been berthed, berth will be manned at all times by an operator, who will be stationed in the immediate vicinity of the berth loading bay. All information and forms will be passed by the Loading Master prior to commencement of loading.

3. Alarms. All alarm systems on vessel and communications between the jetty and control room shall be checked before loading is begun. Masters are requested to make the Loading Master fully familiar with the vessel's alarm systems. Otherwise, confusion may occur between loading alarms and fire alarms.

4. Connecting Loading Hoses. The loading and vapour-return hoses will be well supported and laid along the pier. Each hose and hose valve will be supported by jacks on ship's deck. Hoses will be protected by rope mesh. Once the loading hoses are connected they will be adjusted during loading operations. The shore and ship personnel shall be careful not to kink, stretch or damage hoses. Hoses not used will be blanked. Hose flanges will be completely bolted and shrouded.

Size of Hoses: propane 8 in. (with 8 in. ASA 150 flanges); butane

8 in. (with 8 in. ASA 150 flanges); vapour 6 in. (6 in. ASA flanges).

5. Air. It is most important that no air is allowed to enter either the ship or shore loading lines. All hoses and spools must be purged free of air after being connected.

Provision is made on shore for purging air from LPG and vent hoses on completion of hose connection to ship and for purging LPG vapour from hoses before disconnecting when loading is finished. Provision is made to supply inert gas for this purpose. Provision is also made for disposal of remaining liquid in hoses safely and effectively from shore connection of hoses before disconnecting and gas purging of hoses when loading is finished. Valves and connections are provided for this purpose on the shore end. All ice must be removed from around hose insulating gasket prior to hose disconnection. Cargo hoses shall be blanked and be removed from ship. Ground wires will remain connected until ship's gangway is removed and ship is ready to depart.

6. Loading Pressure. Loading pressure should not exceed 50 psi at any time.

7. Ship's Compressor. During loading, the ship may pump vapours ashore via the ship's compressor. The Loading Master should be advised before the compressor is started or stopped.

8. Loading Rates. Maximum loading rates for LPG products are as follows:

Propane (two lines)	10,900	barrels	per	hour
Butane (two lines)	7,800	,,	,,	,,
Propane (one line, pumping)	7,000	,,	,,	,,
Butane (one line gravitating)	3,900	,,	,,	,,

It is more important that the Loading Master be informed before any changes are made by the ship in the vapour compression operation. He then will inform the shore loading area. Starting and stopping compressors on the ship affect the shore tank pressures and can result in damage to tanks and pumps. Ship's valves should under no circumstances be partially or completely closed against LPG flow without first informing the Loading Master. Pumping rates will normally be adjusted from the shore loading area.

The ship's Master is responsible for his ship at all times. The company Loading Master will advise the Master in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect their terminal's facilities or to prevent any hazards. Manipulation of ship's valves is the direct responsibility of ship's personnel.

LPG loading will be done on a 24-hours basis; hence the Master of the vessel, while alongside the LPG loading pier, will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading of LPG.

The ship's pipelines/vent system and/or liquification system shall be manifolded so that only those pipelines connected to the ship's tank being loaded will be open. All other pipelines' lines shall be closed and outlets blinded.

All doorways, vents, ports, air-conditioner intakes and other openings into which gaseous vapours could enter shall be closed.

During loading, there shall be no smoking, no open lights and no galley fire on the ship or in the vicinity of the pier.

Package goods, bunkers, water, freight and ship stores shall not be loaded or discharged during loading. Visitors will not be permitted on the ship during loading.

Loading of LPG shall be stopped whenever weather or sea conditions are hazardous to the ship, dolphins, LPG hose and manifold, adjacent vessels or personnel. The Senior Terminal Representative and authorised Ship's Officer shall jointly judge if such conditions exist. In case of dispute, the Senior Terminal Representative's judgement shall be followed.

During severe thunder storms, sand storms and electrical storms in the vicinity of the ship, loading shall cease until the storm subsides.

9. Strainer Boxes. It is important that no ice, pipe scale, etc., be allowed into the vessels' tanks. The ship should have strainers placed immediately upstream of the manifold valves. A careful watch must be kept on the pressure to prevent the strainers being blocked and periodically the strainers should be cleaned by using the built-in wiper, which should be turned clockwise only. In case of an absolute blockage loading will have to be suspended and the strainer cleaned, if necessary by removal. If one of the vessel's strainers is blocked, it may be possible to continue on the other hose.

10. Completion of Loading. A reduction in loading rate before topping of the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge. When the vessel asks for a slow rate, the loading pump will be shut-down and valves re-aligned for circulation. The vessel should then complete loading at its own controlled rate off the circulation flow. The terminal might ask for a suspension of loading while realigning the circulation pump. When required to stop completely, the Loading Master should be advised.

11. Hose Disconnection. When disconnecting hoses in order to change or clean a strainer at the time of completion of loading, the following points must be remembered:

(a) All ice must be removed from around the hose insulating gaskets prior to disconnecting.
(b) The hoses and hose valves must be secured to the vessel to avoid slipping or twisting. This is best done with rope and/or pulleys.
(c) The hose valves and ship's manifold valves must be shut.
(d) The vessel's vent valves must be open either to the atmosphere or to the vapour return hoses.
(e) The ship's strainer and all pipes and flanges between the hose and manifold valves must be de-iced.
(f) The hose can then be disconnected, but the ship's manifold valves, vapour return valves and hose valves must be shut.

D. Loading of Bulk Sulphur. All rules and regulations concerning LPG loading also apply to sulphur.

1. Inspection. The joint inspection of the ship and the ship's holds to be loaded with sulphur will be made by the Loading Master and authorised ship's officer. If the condition of the ship's holds presents a potential hazard to personnel, sea or shore facilities, the ship will be refused permission to load until conditions are corrected. The Master shall bear the responsibility for notifying the owners or charterers of the ship of any delay or refusal to load because of hazardous conditions and any expenses due to such delay or refusal to load shall be borne by them. The company reserves the right to refuse loading and their decision is final.

If the ship's cargo holds are not clean or are so hot and/or contains residue (such as excessive rust, sand-scrap iron, minerals, or mineral dust) that alone or in combination with sulphur or sulphur dust would contaminate sulphur being loaded, oxidise with sulphur, or cause a fire or explosion of the sulphur cargo, permission to load sulphur will be withheld until this condition is corrected.

2. General Information. Bulk Sulphur is loaded at 500 tons per hour via a conveyor. The conveyor extends from the shore storage area along the causeway, trestle and finally to the main dolphin close to the ship's holds.

No loading will begin until the ship is safely grounded, moored with fibre lines, fire hoses pressurised, ship-to-shore communications operable and the chute grounded.

In order to minimise movement of fine sulphur dust, cowl ventilators serving hold into which sulphur is being loaded shall be blanked off to prevent circulation of air. Package goods, bunkers, water, freight, ship stores shall not be loaded or discharged during or after sulphur loading.

When sulphur is loaded in a deep hold with general cargo in the tween deck hold above the sulphur, the ship's Master will be responsible for installing a dust proof wooden bulk head enclosure in the hatchways from the over deck of the lower hold to the weather deck forming a tight enclosure to prevent sulphur dust from entering the tween decks during loading. Ceilings shall be tight to prevent sulphur dust from entering bilges. Any chinking at tank tops or bilge will be of non-combustible material.

Masters to maintain sufficient personnel to adjust and maintain chute position, gangways and keep mooring lines taut as ship is loaded.

If sulphur is loaded into a hatch already containing sulphur, representative samples may be requested by the terminal to determine quality.

Since the sulphur loading facility at the pier is fixed the ship will be warped and moored so that various ships holds that will receive sulphur can be loaded.

After each warping the ship will be moored and grounded and chute grounded. The hold to be loaded will be checked with an explosimeter to be certain that the hold is not in the explosive range. Personnel entering cargo holds for inspection must be equipped with life-lines and belts with non-sparking hardware, goggles with green tinted lenses, and self-contained breathing apparatus with a mask covering eyes and nose. The life-lines shall be of sufficient length and strength that one line could be used to pull a man out of a hatch. For each man working in the hold one man on deck must attend his life-lines. Personnel in the hold must wear gauntlet gloves, high-top shoes, long cotton socks, a fibre glass hard hat with a cotton cap ear flaps covering the head and ears, pants fastened at the cuff and long-sleeve shirts buttoned at the neck and wrists. Silk clothing or headgear will not be permitted due to its affinity for collecting static. Cotton clothing material is preferred.

Only the hatch being loaded with sulphur will be open. All other ship hold hatches must be closed. All doorways, vents, ports, air scoops, air conditioner intakes and other openings into which sulphur dust could enter should be closed during loading. After loading and trimming a hold, the hold hatch cover shall be closed and the next hatch to receive sulphur will be opened. The pier sulphur loading tower can be raised and lowered as well as rotated in order that the cargo hold being loaded can be evenly trimmed with little or no manual trimming. Each time the tower is moved the chute shall be grounded. No hand cargo load trimming will be allowed while the pier loading sulphur tower is in operation. The tower downspout drop distance will be adjusted to minimise sulphur dusting.

The loading-tower operator will be advised by authorised ship's personnel on the deck by use of agreed hand signals of any hazards such as deck cargo, life boats, aerial guy wires, etc., that can do damage to loading tower. Personnel will work upwind as much as possible to minimise sulphur dust inhalation or sulphur on skin. Eye baths and showers are located at the dock and will be ready for use if needed.

No loading will be done until all personnel are out of ship's cargo holds. The ship's authorised officer shall assign personnel to sweep sulphur dust into cargo holds to minimise pollution of the adjacent sea water. If shovels or scoops are used the shovels must be of a non-sparking material such as monel. Personnel working cargo holds or on deck shall not be permitted to wear shoes with steel nails, or metal heels or toe plates that could cause sparking.

Loading of sulphur will be stopped whenever weather or sea conditions are hazardous to the ship, pier, dolphins, sulphur loading tower, pier equipment, adjacent vessels or personnel.

Sulphur dust, like most poor electrical conductors rapidly acquires a static charge under dry atmospheric conditions. To minimize this hazard the loading tower is equipped with water spray nozzles to humidify the sulphur and reduce dusting. Conveyor hoppers are also equipped with sprays.

During severe weather conditions loading will cease and cargo hold hatches shall be closed until the storm or seas subside.

Sulphur loading will be done on a 24-hour basis. The Master of the vessel while alongside the sulphur loading pier will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading. The Master of the vessel will assign authorised ship's officers and men as deemed necessary for the safe loading of the ship and to adjust mooring lines and keep sulphur dusting to a minimum.

FUEL: Presently no bunker facilities are available at Khemco jetty. However, two grades (marine fuel oil and marine diesel oil) are available at IOE & PC main jetty. This is supplied to vessels having made previous arrangements and obtained nomination.

WEATHER: A. Climate. The climate along the coast of Kharg Island is generally mild. The days in mid-summer are extremely warm and humid with the temperature reaching 117° F. (47° C.) and a relative humidity ranging from 10% to 98%. The winter months, from November to March, are pleasant with a minimum temperature of about 39° F. (4° C.). Freezing weather is uncommon.

B. Weather Data and Summary.

Average annual rainfall	8 in.
Mean maximum temperature	87° F.
Mean minimum temperature	66° F.
Extreme maximum temperature	117° F.
Extreme minimum temperature	39° F.
Average relative humidity	59%

C. Winds. Wind directions and velocity are subject to rapid change without warning and precautions are necessary to avoid difficulties. The heaviest seas and swells are from the North-east through South-east. The prevailing wind for most of the year is from the North-west, but during the winter period strong South-easterly storms occur with very little warning. The Khemco jetty is sheltered from the North-west winds.

D. Tides. The tidal range is between 7 and 8 ft., with a maximum rate of about one and a half knots. The tidal streams run approximately parallel to the line of the jetty, with occasional cross currents.

E. Sea Temperatures. The surface temperature of the sea ranges from 63° F. to 97° F., depending on the season.

SAFETY: Masters of vessels are responsible for the safety of their vessels including, but not limited to compliance with official precautions, and must take all necessary precautions while the vessels are alongside the Khemco jetty. While the vessels are alongside the jetty, all personnel must comply with all ports' safety rules and regulations.

GENERAL: (*a*) Shore Leave. Shore leave at the terminal must be arranged between Master and ship's agent. Sufficient personnel must be on board at all times for emergencies.

(*b*) Visitors. Due to hazards involved, no visitors are allowed while the vessel is alongside the Khemco jetty.

(*c*) Light Dues. A charge of half a rial per gross registered ton is levied on each vessel for light dues by the Iranian Government. This is in addition to light dues for Middle East navigation. The company shall have no responsibility in respect of any taxes, dues, or other charges levied by the Iranian Government or any of its departments or agencies.

(*d*) Painting and Scaling. Painting, chipping, scaling and any repairs on deck or overside is strictly prohibited while vessel is alongside the Khemco jetty.

(*e*) Garbage. Dumping of garbage and refuse strictly prohibited in port area.

(*f*) Repairs. No workshops or other facilities for repairs at Kharg Island.

(*g*) Customs. There are customs and other official offices on the Island. Vessel will normally be boarded by a custom director, immigration officer and director of Ports and Shipping.

(*h*) Consulates. No consulates on Kharg Island. Nearest consulates or diplomatic representatives are at Khorramshahr.

(*i*) Marine Surveyor. No marine surveyor on the Island, but can be available in 48 hours notice through ship's agent.

(*j*) Recreation Centre. Use of Seamen's Club will be cleared through NIOC and Consortium. If used, transportation to and from Club will be provided by the Agent.

(*k*) Supplies. No provision of any kind is available at Kharg Island. No fresh water is available for delivery to the ships. No laundry services are available at Kharg Island.

(*l*) Mail. Regular plane services between Kharg Island and the mainland and mail receiving and dispatching can be arranged through ship's Agent.

AGENTS: Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Tel. 2280, 2278, 4755/58. Cables: "Confidence", Khoramshahr. Telex. 4033 (answerback: "Confidence Kor").

Due to the difficulty in reaching Khorramshahr with international telex messages recommend you to communicate via our Tehran office, Telex No. 2507 Tehran, (answerback: "Confid Tn"), stating in your message "For Khorramshahr".

Recommend that all urgent communications be sent by Cable directly to Khorramshahr.

Ships' mail and spare-parts for vessels calling at Khemco Terminal are to be routed by flights arriving directly to Abadan Airport without transhipment at Tehran, and addressed to: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran.

KHORRAMSHAHR: 30.26 N. 48.10 E.

Khorramshahr is in Province of Khuzistan. Town is the seat of a Governor and a base for Imperial Iranian Navy with an admiral permanently stationed in command.

Khorramshahr lies at confluence of Karoon and Shatt-al-Arab Rivers and is principal commercial port of Iran. Khorramshahr is terminus for Imperial Iranian Railway system and regular train service to rest of country is available. Good asphalt road connecting Khorramshahr to other major cities in country.

DOCUMENTS:

(*a*) *Iraqi Quarantine Officer.* Vessels arriving Outer Bar (Shatt-al-Arab pilot station) will be boarded by Iraqi Quarantine Officer who will check all crew vaccination cards. Masters requested notify Fao Quarantine Office at least 18 hours prior vessel's arrival Outer Bar giving exact arrival time Outer Bar enabling Quarantine personnel board vessel immediately. Upon arrival Outer Bar, Master should have ready a copy of crew List and crew vaccination certificates for presentation to Quarantine Officer.

(*b*) *Iranian Quarantine Officer.* Upon arrival Khorramshahr anchorage and prior berthing, the Iranian Quarantine Officer will board vessel. He requires one copy Crew List, and all vaccination cards should be available for inspection.

(*c*) *Customs Officer.* Customs officer boards ship at anchorage or alongside Khorramshahr jetty (in case of immediate berthing) and requires following documents:

Crew List (2 copies).
Stores List (2 copies).

(*d*) *Port Authorities.*

Crew List plus (1 copy).

Arrival information form of the port Administration will be supplied to the Master in duplicate upon arrival, by a port representative. This form should be filled and returned to the port Berthing Master.

(*e*) *Agents.*

Crew List (2 copies, for arranging shore passes).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Khorramshahr Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions etc. (if any) be reported earliest possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and Hatch Lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: With exception of ships of Government of Iran or Iraq and sailing craft, pilotage compulsory for all vessels entering, leaving or navigating in the Shatt-al-Arab. Pilotage in river outside harbour limits of Khorramshahr conducted by river pilot; within limits of Port by Harbour Master.

Vessels entering Shatt-al-Arab boarded by river pilot from pilot vessel situated in proximity of Rooka Buoy (29° 49′ N. and 48° 47′ E.), showing a white flash every six seconds and equipped with Radar Reflector.

Vessels bound for Khorramshahr are conducted by river pilot as far as Khorramshahr Anchorage, from where a Harbour Master (Iranian) will board vessel and berth her as necessary.

Pilotage, dredging and other navigational dues are collected by Basrah Port Authorities and must be settled directly with Iraqi Maritime Transport Co. Ltd., Basrah, Iraq.

N.B. Owners having vessels bound for Khorramshahr or Abadan should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir", Basrah, about arranging of Shatt-al-Arab pilotage. Owners should also put Messrs. Iraqi Maritime Transport Co. Ltd. in funds by remittance well in time before vessel reaches the Outer Bar of Shatt-al-Arab in order to cover port tonnage dues, pilotage and dredging dues for sailing from Outer Bar to Abadan or Khorramshahr and return.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-el-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a maximum draft of 35 ft. in fresh water.

Bawarda Anchorage, position about 2 miles above Abadan with a maximum draft of 35 ft. in fresh water.

Hartha Point, position about 20 miles above Abadan and 15 miles below Khorramshahr with a maximum draft of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessel's to lighten to 29 ft. in fresh water to enable them to cross the Karum Bar.

Abu Flus, position about 16 miles above Hartha Point and about 14 miles below Basrah (Khora Anchorage) with a maximum draft of 29 ft. in fresh water.

MAX. SIZE: Maximum permissible length for vessels calling Khorramshahr is 525 ft. Maximum draft for crossing Karoon Bar and also at Khorramshahr (Failieth) anchorage is 29 ft. fresh water. The depth alongside Berth Nos. 1 to 3 is 27 ft., Berth Nos. 4 to 7 is 26 ft., and Berth Nos 8 and 9 is 29 ft.

SHIPS' REGISTRATION:

(1) *Conditions of Registration*

(*a*) This registration scheme to apply at all times whether jetties or anchorages are conjested or not.

(*b*) Registration for berthing turn at Khorramshahr can only be effected provided all Khorramshahr cargo is available and vessel in all respects ready to discharge. Availability of cargo must be proven by submission of the respective stowage plan if a vessel is required to discharge at Abadan and/or Basrah whilst awaiting berthing turn.

(*Note:* A vessel arriving in the river with a draft exceeding 27 ft. may register and reduce her draft to 27 ft. while awaiting turn.

Should the turn be lost the vessel may re-register turn as at the date and time her allotted berth became vacant.)

(2) *Times of Registration*

(*a*) Vessels arriving from sea will register on arrival at Shatt-al-Arab Outer Bar (when anchor has been dropped according to ship's log book) plus six hours. Vessels to despatch a telegram to their respective Agent and to Port Director via "EQK" indicating exact time of arrival at the Outer Bar in GMT as a basis for registration.

(*b*) Vessels proceeding from Abadan to Khorramshar will register at the time of unberthing at Abadan (or if at anchorage at the time of weighing anchor) plus two hours.

(*c*) Vessels having to anchor at Abu Flus when proceeding from Basrah to Khorramshahr can register from time of arrival there plus one hour. Time of arrival as per log book should be confirmed by telegram as per (2*a*). Vessels proceeding direct from Basrah to Khorramshahr without anchoring at Abu Flus will register on arrival at Khorramshahr. If such vessel should proceed to Abadan she will register when passing Khorramshahr.

(3) *Method of Registration*

(*a*) On receipt of each vessel's registration time the Port Officer Khorramshahr will determine the date on which her turn is due at Khorramshahr.

(*b*) To enable the Port Officer to assess the berthing delay Agents will indicate in their arrival lists (which are to be submitted to the Port Administration daily before 9 a.m.) the estimated number of days their vessel(s) will occupy the jetty. It is thereby understood that the number of days thus declared is not binding upon the Agents concerned but merely used as a basis of calculation to assess berthing turns. To avoid possible abuse of the registration scheme no alteration may be made in the number of days declared during the last 48 hours preceding each vessel's arrival.

(*c*) Once the berthing turn has been established the vessel concerned will not lose her turn provided she arrives at Khorramshahr or Abu Flus (depending space available at the anchorage) not later than 12 noon on the preceding day. Vessels have the option to arrive later if their Agents have been able to ascertain that their berthing turn has been delayed but they do so entirely at their own risk. In this case any subsequent delay in arrival – even in case of force majeure – will automatically result in the loss of turn, if the vessel is not in all respects available to occupy her berth immediately it is vacant.

(*d*) If the ship reported back in time the following three contingencies may arise:

(a) If the estimate proved to be accurate the vessel will berth straight away.

(b) If the berthing delay is greater than the estimate made on registration the vessel will retain its original turn in the queue and berth accordingly.

(c) If the estimate proved pessimistic and the ship's berth became vacant before its return date the berth will immediately be given to the next available vessel in turn of registration. If in such cases the ship indeed returns at 12 noon on the date preceding the day on which its turn was originally due as fixed by the Port Authorities, it will take the first place in in the queue and obtain the first berth becoming vacant thereafter.

(4) *Loss of Turn*

Any vessel having lost her turn will be required to re-register as indicated above unless her delay was due to one or more of the following cases of *force majeure:*

Bad weather.

Unavailability of Pilots at the Outer Bar.

Delay in supply of pilot at Abadan, Basrah or Abu Flus, for which a satisfactory *written* explanation must be given to the Co-ordinator.

Note: For the purpose of calculating whether a vessel could have arrived in time to occupy her berth at Khorramshahr, had the Pilot boarded her as scheduled, it is hereby established that, counted from time Pilot boards it takes a vessel two hours from Abadan, three hours from Basrah, and one hour from Abu Flus to arrive at Khorramshahr.

Delay due to awaiting the next high water during daylight at Karun Bar.

Quarantine regulations: Any vessel placed under quarantine will be permitted to register and be allowed to retain her berthing turn if the quarantine has not been lifted when its allocated berth becomes vacant. The vessel will then take the first available berth after the quarantine has been lifted. The date and time quarantine expires must be mentioned in the daily port position list for publication by the Port Authorities.

(5) In case of dispute arising over the interpretation of the above rules or of situations not properly covered by them the Secretary of KSAA will appoint three arbitrators, preferably not involved in the issue, to work out a solution. Any decision thus arrived at to be accepted by all parties and to be communicated to the Ship's Movement Controller by the Secretary in writing or in case of extreme urgency verbally, written confirmation to follow. A decision once taken cannot be reversed.

(6) In taking advantage of this permissive system it is clearly understood that the estimated berthing delay originally established by the Port Administration will on no account be binding on them.

HEALTH: See "Documents". Inward clearance is effected on board after receiving free pratique.

RADIO: See "Ship's Registration". Khorramshahr Port Radio – EQK – 500 kc/s.

TUGS: The Port Organisation of Khorramshahr owns two tug-boats which are used for assisting berthing and unberthing whenever necessary. No tug boats which could be used for long-distance towage. Employment of tug-boats is not compulsory.

BERTHING: See "Ship's Registration". Berthing and unberthing performed by Iranian Harbour Masters supplied by Iranian Port Administration, Khorramshahr. Berthing turn, allocation of berth and anchorage space is under the control of Iranian Port Administration, Khorramshahr.

The Port consists of 3,199 ft. long jetty constructed with wooden piles (Berths 1 to 7) plus the new extension covering 1,000 ft., built by steel/concrete piles (Berths 8 and 9) running parallel with river bank. Jetty can receive nine ocean going vessels at a time.

CARGO HANDLING: (*a*) *Jetty*. All cargo handling/operations on shore, under control of Khorramshahr Port Administration. General cargo discharged from ships alongside jetty is received on domestic railway wagons and trailers controlled by Port Administration, and transported to Port Warehouses or open yards. Port Warehouse/Store keepers will later deliver cargo to consignees against clearance papers issued by Customs. There are no shore cranes and no floating cranes available for the purpose of discharging cargo. All cargo must be discharged by ship's own gear, and vessels calling at Khorramshahr should not accept cargo beyond their gear capacity to discharge.

(*b*) *Barges*. (i) General Cargo: Vessels carrying less than 500 tons cargo are permitted to discharge their cargo into barges, in which case all extra expenses and costs of barging, discharging ex barges, etc., are to be borne by the carriers and such operation is entirely at the risk and responsibility of the respective carrier.

(ii) Structural Iron/Steel: Structural iron/steel is always to be discharged in barges for unloading at Failieh Creek. Barges must be arranged by vessel's Agents, who also have to arrange labour for discharging the cargo ex barge at Failieh, sorting of the iron, and delivery to consignees. Agents should also emply watchmen for protecting the cargo while awaiting delivery to consignees, also tally clerk for supervising sorting and delivery of iron to the respective consignees. Against these services Agents are presently collecting Rials 110 per ton of 1,000 kilos as a landing charge from the consignees. This rate has been agreed upon between the Agents and the Chamber of Commerce of Khorramshahr.

(*c*) *Cranes*. For use in loading/unloading cargo *in the storage areas,* cranes are all used in the port yard *for unloading cargo ex rail wagons* and loading on to merchants' trucks.

(*d*) *Storage*. 19 warehouses (goods sheds), plus an open yard between the warehouses used for storing iron goods, as well as cargoes which can be stored in the open.

(*e*) *Wagons/Trailers*. For receiving cargo ex-vessels alongside jetty the Authorities have 160 rail wagons and 77 trailers with average capacity of 10 tons, but number of wagons/trailers provided to each vessel not sufficient to last 24 hours work at jetty. Although 24-hours working alongside jetty is compulsory, due to shortage of wagons hardly 12/18 hours work can be accomplished efficiently. A stand-by of 6/7 hours in summer and of 9/11 hours in winter is unavoidable.

(*f*) *Delivery of cargo discharged at jetty*. Port Authorities considered as direct receivers of the cargo discharged, who in turn deliver same to ultimate consignees against presentation of the carrier's agents' Delivery Order.

Carrier's responsibility for cargoes discharged in good condition cease under tackle; slings are opened by labourers provided on wagons alongside each vessel. Broken packages are not permitted (by Customs) to be discharged on the wagons, and are therefore collected on board. Once daily under full control of ship's officer, port supervisor and carrier's supervisor, the broken packages are delivered to Port Authorities and an official Process-verbal will be drawn by respective warehouse-keeper corresponding to remarks noted at the time. This arrangement is to prevent any delay to operations of the vessel.

(*g*) *Overtime Costs*. Wages of port staff on board for official hours are borne by port Authorities but overtime and food allowance are paid by carriers.

(*h*) *Port Working Hours* (*Ordinary*). Summer 0600 to 1400; 1700 to 0100. Winter 0700 to 1500; 1700 to 0100. (Overtime) 0100 to 0500.

24 hour discharging at jetty is compulsory. The only stoppages are for lunch and dinner, one hour each. In summer season, however, due to heat, discharging at jetty is stopped from 1400 to 1700.

FREIGHT TAX: As tax on freight has to be settled without delay after vessel's departure it is suggested that the respective freight amount be sent to Agents according to terms and conditions of Charter-Party, otherwise heavy fines will be applicable to those who do not comply with this regulation.

MEDICAL: Private doctors and hospitals located in the town for medical and dental treatment and hospitalisation. Arrangements for patients' visits to the doctors, dentists and hospital will be made by Agents upon request. In case of emergency special medical attendance on board can also be arranged. X-Rays, radiographies, blood and urine tests can also be conducted by equipped hospitals existing in Khorramshahr and Abadan.

DENSITY: Fresh.

FRESH WATER: Fresh water supply alongside berth available by pipelines and at anchorage is delivered by barges, capacity 100 tons. The price for fresh water alongside berths is 30 Rials, and at anchorage 90 Rials per ton.

FUEL: Bunkers are not available at Khorramshahr Jetty, and cannot be supplied by barge. All classes of bunkers are supplied at Abadan jetties only. Bunkers could be obtained from Abadan provided arrangement for supply has been made beforehand with Iranian Oil Participants, London (Iranop London).

DEVELOPMENT: Intention to extend use of trailers and tractors and to eliminate use of railway wagons.

CUSTOMS ALLOWANCES: After receipt of documents, the Customs Officer will seal the store room. All liquor and cigarette stocks will be sealed and reasonable ship's requirements while in port should be taken from store before sealing. This amount recommended to be assessed and be ready for removal from the stores prior to the vessel's arrival in port. During the stay at the port, and upon request and giving prior notice to the Agents' supervisor on board, arrangements may be made to have the Customs officials open the stores to issue further quantities of stores for crew consumption.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

All officers and crew of ships lying at jetties or anchorage of the Port of Khorramshahr to carry their Seamen's Books with them when going ashore. At the gate, the Seamen's books will be checked by the Police against the shore pass of each crew member, the Seamen's Book will then be kept by the Police and will be returned to the holder when returning through the gate.

REPAIRS: Minor repairs can be carried out to a limited extent by private workshops existing at Khorramshahr. However due to lack of skilled workers the workshops in question do not undertake any responsibility or guarantee for the jobs performed, and charges are high.

For radar, wireless, echo-sounders, etc., as well as refrigerator and air condition service there are few engineering groups at Khorramshahr as well as Abadan, and technicians of these groups will attend to the repairs on board both at Khorramshahr and Abadan jetties or at anchorage, upon request.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register; Det Norsk Veritas; Bureau Veritas. Surveyors for ordinary damage to cargo and/or ship as well as for on-hire/off-hire survey can be arranged by Agents.

AIRPORT: Abadan International Airport about ten minutes by car.

TIME: GMT plus 3½ hours.

TELEPHONES: May be placed on board.

DELAYS: The port of Khorramshahr is generally congested, with a waiting time of about 2/5 days. Port Administration sometimes orders vessels to discharge their Khorramshahr manifested cargo in Bandar Shahpour to ease the congestion at Khorramshahr.

PROVISIONS: Fresh provisions in limited quantity can be obtained, but large quantities of provisions sometimes may not be possible to arrange due to the fact that the Municipality is controlling the market and sometimes may prohibit the supply of the items which are in short supply. Due to certain formalities involved in supplying provisions to vessels, it is requested that 24-hour notice be given to the shipchandler.

STORES: Local commodities only available. Bonded stores not available.

LAUNDRY: Laundryman can be arranged upon request.

6 Manifests.

PORT LIMITS: Limits of port extend approximately one mile Westward from East coast of Lavan Island, from Terminal Sea Buoy to half a mile Westward from Sassan Submarine Pipe-line Buoy.

Vessels must not enter the Port Limits unless a Lapco Mooring Master is on board.

Flag: Vessels required fly Iranian Ensign on foremast during daylight hours (green uppermost).

FORMALITIES: (*Arrival*): After Mooring Master has boarded vessel at Port Limits, and before vessel allowed proceed, Master will be required to sign following forms. (*a*) Condition of use of Port of Lavan Island, (*b*) Tug Requisition.

Master will also be provided with copies of Fire and Safety Regulations and a Safety Inspection Form. After berthing has been completed, Master will be required to complete and sign "Mooring Master Time Sheet" before Mooring Master disembarks. (*Customs*). After pratique granted, Customs inspection carried out. Master will be required to furnish particulars of vessel including bonded stores, cargo, bunkers, and other information. Five copies of the crew list and stores remaining on board will be required before clearance is granted. *Customs surveillance is strict.* (*Clearance*). On completion of loading, documentation and final clearance formalities will be carried out aboard vessel, either alongside jetty, or in Anchorage Area, as circumstances dictate.

WEATHER: In summer time from May to September temperature reaching 50°C (122°F) and humidity ranging from 10 per cent to 100 per cent. The winter (November to March) mild and pleasant with minimum temperature approximately 6°C (43°F). The wind for most of year from North-west, but sometimes particularly during winter strong South-easterly storms likely to occur lasting for several days. Oil Loading Pier partly sheltered from North-west winds, but exposed to winds from South.

APPROACHES: Vessels approaching Lavan Island from due South will have a clear approach.

(*a*) *Landfall*, Two high gas flare towers. The small one is in position 26° 47′ 37·5″ N., 53° 20′ 41″ E. and the large one in position 26° 47′ 34″ N., 53° 20′ 39·5″ E. On shore, vicinity of port area, the flares, when burning, make conspicuous landfall for Lavan Island. At night, from a distance, the light from these flares tend to obliterate various navigation lights.

The Terminal Tank Farm of which No. 2 tank is located on the South-east corner in position 26° 47′ 57″ N., 53° 20′ 24″ is conspicuous from seaward. No. 2 Tank is painted a light green colour.

(*b*) *Navigational Dangers.* South side of Island is open and free from dangers, but care should be exercised approaching from seaward as soundings shallow rapidly near coast with depths of 200 ft. only 4,500 ft. off shore.

PILOTAGE: Pilotage compulsory for vessels berthing on, or departing from Oil Jetty, and when manoeuvring in restricted area. Cargo vessels and men-of-war do not require Pilots as they are accommodated in cargo anchorage. Pilots provided automatically on arrival for tankers if berth available. If no berth available due to bad weather or other causes, vessels will be instructed accordingly. The normal international pilot signals are to be used.

Channel 12 VHF is to be used to call Control Room. Pilots will normally board vessels one mile S.E. of Oil Loading Jetty. ETA is to be signalled 72 hours before arrival and confirmed, correcting ETA, if necessary 24 hours before arrival.

Ships requested to have pilot ladder safely and securely rigged, and ready for immediate use, and long enough to reach Mooring Master's launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder, until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard Mooring Master's equipment. There should be adequate lighting at night. Vessels will provide a lee for Mooring Master both when boarding and leaving.

NAVIGATIONAL AIDS AND RESTRICTIONS: *Note:* Master's are cautioned to consult their latest Notices to Mariners and Light Lists for most recent information regarding navigation aids.

Lavan Island Terminal Beacon. 26° 48′ 6″ N., 53° 21′ 22″ E. Located in vicinity of Terminal on South-eastern end of Island, a rotating white light, on a steel lattice tower, painted aluminium, 184 ft. above MHHW exhibiting three flashes every 12 seconds, with visibility 18 miles.

Light Float. 26° 47′ 00″ N., 53° 23′ 14″ E. Located approximately 1·1 miles Southward of Eastern extremity of Lavan Island. Painted red exhibiting a white group flashing light showing two flashes every 7 seconds.

Pipe-line Lavan Island Rear Beacon. 26° 48′ 16″ N., 53° 20′ 09″ E. is located to West of Tank Farm on a steel lattice tower. This light displays a fixed red range light over a 10° sector beamed to seawards and centred along submarine pipe-line coming to Island from Sassan Oilfield. The light is 167 ft. above MHHW, range 17 miles in clear weather.

Pipe-line Lavan Island Front Beacon. 26° 47′ 35″ N., 53° 20′ 06″ E., located in a position 3,500′ bearing 188° from "Pipe-line Lavan Island Rear Beacon" and is on a steel lattice tower. This light displays a fixed red range light over a 10° sector beamed to seaward and centred along submarine pipeline coming to Island from Sassan Oilfield. The light is 70 ft. above MHHW, range 17 miles in clear weather.

The lights in sub-section "Pipe-line Lavan Island Rear Beacon" and the above section, when in transit from seaward, will indicate that observer is over submarine pipe-line and, therefore, should not anchor in the proximity of this line of berthing.

Oil Loading Dock Lights. North-west and South-east ends of dock marked by single fixed red navigation lights placed on Mooring Dolphin nos. 1 and 4, respectively.

Terminal Sea Buoy. Located position 26° 46′ 23″ N., 53° 22′ 08″ E. Red Can Buoy with radar reflector and bell, white flash every 5 seconds (·5 sec. on 4·5 sec. eclipse). A temporary buoy is stationed on this location. Characteristics, black can buoy group flash white (3) every 12 seconds. Visibility five miles.

Sassan Submarine Trunk Pipe-line Buoy. Located position 26° 46′ 45″ N., 53° 19′ 53″ E. Black Can Buoy with radar reflector and bell, red flash every second (·4 sec. on ·6 sec. eclipse). This buoy is in immediate vicinity of submarine pipe-line from oilfield to Terminal.

ANCHORAGES: Vessels must not enter port limits (which enclose a Prohibited Anchorage Area and Manoeuvring Area). They should proceed to vicinity of suggested Anchorage Area East of Oil Loading Dock and East of longitude 53° 22′ 00″ E., and in suitable depths of water wait for LAPCO Mooring Master. Sea bottom generally hard and reported to be poor holding ground. Depth about 26 fathoms.

Prohibited Anchorages

A. *Submarine Pipe-lines.* Anchorage prohibited in vicinity of Sassan Submarine Pipe-line located as described in "Navigational Aids", and for a distance of 2,000 ft. on both East and West sides of pipeline and parallel to same.

To draw attention to Prohibited Anchorage Area in vicinity of Sassan oilfield to Lavan Island 22 in. submarine pipe-line three noticeboards have been established. Notice Boards three metres high and eight metres long, painted yellow, with words "No Anchorage" painted in red. These notice-boards are in the following positions:

Latitude 26° 47′ 28″ N., longitude 53° 21′ 13″ E.
Latitude 26° 47′ 34″ N., longtiude 53° 20′ 05″ E.
Latitude 26° 47′ 36″ N., longitude 53° 19′ 34″ E.

B. *Terminal Port Area.* Area bounded by a line joining position 26° 47′ 38″ N., 53° 22′ 00″ E. to position 26° 46′ 41″ N., 53° 22′ 00″ E. to position 26° 46′ 49″ N., 53° 19′ 22″ E. to position 26° 47′ 34″ N., 53° 19′ 23″ E. declared a Port Area. Anchorage within Port Area prohibited. Port Area used by vessels manoeuvring to and from oil loading jetty, and no vessel permitted enter Port Area until Company Mooring Master on board.

C. *Offshore Oil Platform.* Anchorage prohibited in area of Tassan Oilfield, some 90 miles South of Lavan Island Marine Terminal, due to existence of numerous submarine oil pipe-lines connecting oil wells and production platform.

RESTRICTIONS: 24-hour service. No restrictions for vessels up to 206,000 dwt as regards time of arrival. Tankers in ballast required to have on board at least 33% of their dwt in ballast (including permanent ballast). The state of the tide does not effect entry.

MAX. SIZE: With present facilities is 206,000 dwt. No restrictions apply to size of cargo vessels using cargo anchorage, but their proximity to the shore will be governed by their draft.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. In the case of tankers, doctor will board when ship berthed at Loading Dock and for cargo vessels after ship has anchored. Should vessel, in either case, arrive from another Iranian port and carry a Clear Bill of Health, doctor will not normally board, and pratique automatically granted.

Signals to be exhibited for vessels entering from foreign port: by day: "Q" Flag flown at Masthead; by night: Red all-round light, over white all-round light. If suspected that ship has disease or fever on board, ship will report details by VHF Channel 12 to Lavan Island.

RADIO: Call LAPCO LAVAN ISLAND on VHF Channels 16, 12, or 7. Tugs keep constant watch on Channel 12 VHF and call at intervals on 2182 kc/s. when vessel believed to be approaching, or scheduled call at Lavan Island. This applies to Tankers only.

Khorramshahr Radio Station normally passes on a ship's ETA to the Agent resident on Lavan Island, through Abadan. There is a radio-telephone link from Abadan to Lavan Island.

Nomination and Loading Orders. Ship's Masters should signal their ETA Lavan Island Loading Terminal 72 hours before arrival, and confirm (correcting ETA if necessary) 24 hours before arrival. This message should include amount of cargo to be loaded by vessel, destination as per charter, hours required to de-ballast, number and size of ship's manifold connections, maximum loading rate and whether any sickness on board. This message should be addressed to LAPCO, Tehran Office, Cable address "LAPCO, Tehran", Telex address LAPCO, Tehran, No. 2420, and routed through nearest coastal radio station handling such messages.

Radio Station. There is no CW radio station on Lavan Island.

Sassan Oil Field Radio Beacon. Located in position 25° 32′ 16″ N., 53° 09′ pp″ East. Station identification signal is LA transmitting on 397 kc/s sec., primarily meant as an aircraft beacon but can be received clearly by ships.

Terminal Radio Beacon. Located in position 26° 48′ 06″ N., 53° 21′ 22″ E. Station identification signal is LD transmitting on 310 kc/s. from tower on this location. Primarily meant as aircraft beacon, but can be received clearly by ships. It is so located that its bearing from seaward will enable ships to establish their line of bearing in relation to the Sassan Oilfield submarine pipe-line.

TUGS: 2 diesel powered tugs. Both tugs are twin screw, 3,400 b.h.p. Kort Nozzle types with a static bollard pull of 40 long tons. Normally, two tugs used to handle a vessel.

For each tug employed berthing, 3 copies of Towage Certificate to be signed by Master and delivered to LAPCO Mooring Master. For each tug employed unberthing, 3 copies of Towage Certificate to be signed by Master and delivered to LAPCO Mooring Master.

The LAPCO tugs and mooring launches assist in mooring and unmooring vessels. These are under the direct supervision and control of the LAPCO Mooring Master. Service and facilities provided by the company including the services of the LAPCO Mooring Masters, tugs, mooring launches, or berthing equipment, are at the vessel's risk.

Note: On occasions when tugs are employed standing by vessels whilst in the berth for use, if required, the full tug charge will be charged.

BERTHING: Deck level is 32 ft. above sea level Mean Low Water Indian springs. Under normal conditions, 12 lines used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring (not wires). Aft: 3 stern lines, 2 breast lines and 1 spring (not wires).

During winter South-easterly storm periods, usual to use one each additional headline and breast line at each end, making total of 16 mooring lines. Breast lines and springs of wire rope acceptable, and normally secured to jetty bollards or patent quick-release hooks, where fitted. Three-inch circumference messenger lines, 240 ft. in length available each berth for hauling lines for mooring launches, up vertical face of jetty fendering and along jetty deck, with assistance of electrically operated capstans sited at intervals along jetty.

‡ Chart Datum is Mean Low Water Indian Springs and Maximum range of tide is 7 ft.

STEVEDORES: For cargo vessels the Agent requires four days Notice of Arrival in order to transport labour from Bandar Abbas. Agent provides labour for working cargo "to the rail" and receiver provides lighterage and labour thereon.

VHF: *VHF Radio-Telephone.* Lavan Island Marine Terminal equipped with International Maritime VHF/FM radio telephone service using standard international frequencies. Masters recommended use this facility when within range of Lavan Island Marine Terminal, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF Communication may be means of avoiding delay in berthing. The following VHF Channels available on a continuous watch basis.

No. 16 (156·8 Mc/s.) (Safety and Calling Channel).
No. 12 (156·6 Mc/s.) (Port Operations, First Choice, Simplex).
No. 7 (156·35 Mc/s.) (Port Operations, Second Choice, Simplex).

Initial contact should be made on Channel no. 16 and then transfer to Channel no. 12 for Port Operations.

High Frequency Radio. HF frequencies used by LAPCO office at Lavan Island for voice communication as follows: High Frequency Single Side Band System.

Channels	*Frequencies*
1	4133 kc/s.
2	5233 kc/s.
3	6840 kc/s.
4	7383 kc/s.
5	9208 kc/s.
6	9153·5 kc/s.

LAPCO normally stands by on Channel no. 5, Upper Side Band.

Marine Frequencies. The tugs presently equipped for voice communication with Marine Frequencies as follows:

1	2182 kc/s.
2	2570 kc/s.
3	2628 kc/s.
4	2738 kc/s.
5	4133 kc/s.

Additional frequencies will be added at a later date.

Radio Telephone Frequencies. LAPCO Tugs fitted with VHF radio telephones covering all international maritime VHF radio telephone frequencies (156–162 Mc/s.).

Radio Watches. LAPCO Radio Station on Lavan Island keeps a 24-hour watch.

MEDICAL: LAPCO maintains small clinic on Lavan for minor medical treatment of LAPCO staff. No medical services available except in emergency and subject to availability of doctor. Valid vaccinations for smallpox mandatory, cholera vaccination advised due to occasional incidence of this disease.

TANKERS: An Iranian Crude Oil of approximately 34·0 degree API at 60°F is available at the Pier Berths.

1. No dirty ballast.
2. Tankships to have ready:

(*a*) Windlass, Port and Starboard Bower Anchors.

(*b*) After Mooring Winches and/or Capstans, minimum sixteen good Mooring Lines 120 fathoms each with suitable stoppers, Chain Stoppers for 5 in. Circumference Wires.

(*c*) Hose Lifting Winch, Derrick and Gear.

3. Ship's crews perform all operations of mooring, connecting hoses, and unmooring, on board ships.
4. Do not close valves against crude oil flow.
5. Emergency Flow Stop Signal if all communications fail will be a continuous sounding of the ship's whistle.

6. After vessel berthed and pratique granted, a LAPCO official will board to discuss loading arrangements. Before any crude loaded all ship's scuppers on main deck must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted. Vessel's tanks are inspected by LAPCO officials, and, when satisfactory, a certificate is issued before loading operations commence.

7. Loading rate of up to 5,680 tons per hour to Berth no. 1 and 4,560 tons per hour to Berth no. 2 can be achieved at Lavan Terminal. Up to 4,230 tons per hour and 3,570 tons per hour can be achieved to both berths simultaneously.

BALLAST:

(*a*) Master's are warned that no dirty ballast, or bilge water should be disposed of in sea within 50 miles of coast of Iran. When so disposing of ballast all pipe-lines, sea suctions, strainers, and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of sea pollution when the clean ballast is pumped out.

(*b*) As soon as practical after arrival, all vessels' tanks will be inspected for oil in ballast. During discharge of ballast similar inspections will continue.

(*c*) Should ship's tanks be found leaking it will not be later accepted for loading, unless satisfactory evidence duly certified by "Lloyds" or "ABS" Surveyors, or other recognised Surveyors of repair is submitted.

(*d*) Any vessel rejected because of dirty ballast or sea pollution will automatically nullify "Notice of Readiness" and will lose any priority of position for loading. On return from sea, Masters should tender new Notice of Readiness to LAPCO. If this accepted by LAPCO the vessel will be entered for loading as of new time of acceptance. Vessels will be rejected for dirty ballast at all times.

(*e*) Vessels equipped with separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the LAPCO Terminal Superintendent and provided NIOC Petroleum Inspector agrees.

DENSITY: Average 1026.

TIDE: Mainly diurnal with mean range between lower low water and higher high water of 5·5 ft. and extreme range of 8·4 ft. Chart datum is Mean Low Water Ordinary Spring Tides. Tidal streams run approximately parallel to line of oil loading pier with maximum rate of about 1 knot. Tide board installed at shoreward end of trestle to oil loading pier and on main loading pier which indicate heights above chart datum.

FRESH WATER: None available.

FUEL: Bunkering facilities installed at each jetty berth, but bunkers are not available at this time. Diesel Oil Tank (used primarily to store fuel for LAPCO facilities operations) has a capacity of 20,000 bbls.

CARGO GEAR: Ship's discharging dry cargo to barges in the cargo ship anchorage use ship's gear.

FIRE PRECAUTIONS: Vessel receives full detailed instructions from Mooring Master. Vessels must have fire-wires and engines not to be immobilised.

CONSULS: No consular representation on Lavan Island. Nearest consulates at Khorramshahr near Abadan.

REPAIRS: No repairs allowed alongside oil loading jetty. No workshop or repair facilities available. Ships' main engines must be available at all times while alongside jetty.

MARINE SURVEYS: Surveyor based at Khorramshahr and can usually be called through vessel's Agent at 72 hours notice.

AIRPORT: No scheduled or regular air flights to Lavan Island. All aircraft required for transportation of goods or passengers must be made by charter. Airport is used by Oil Company Charter planes only and no other passengers are carried except in an emergency situation.

TIME: Iranian Standard Time which is GMT plus 3 hours 30 minutes.

POLICE/AMBULANCE/FIRE: There is a Government Gendarmerie Station on the Island. There are no telephones established for these services. Emergencies will be handled by LAPCO Staff in case of Tankers.

SHORE LEAVE: Ship's crew not allowed to go ashore.

CREW CHANGES: Not permitted.

REGULATIONS (Miscellaneous): Painting and Scaling. Painting, chipping, scaling or spray painting on deck or overside *strictly prohibited* while vessel at any jetty berth.

Garbage. Dumping overside of garbage and refuse prohibited in Port Area.

Sanitation. Government Health Regulations require suitable covers to be fitted over all lavatory discharge outlets, etc., to prevent fouling of jetty or craft alongside.

Damage to Port Facilities. If a Master has reason to suppose that any damage has been caused by his vessel to any Port Facilities, he must agree, in writing, with LAPCO Mooring Master as to nature and extent of such damage, and this must be confirmed by LAPCO Port Captain.

Rat Guards. All ships berthed alongside must provide Rat Guards for Ship's Moorings.

No Visitors. No visitors allowed on terminal dock, or on board vessels alongside dock, unless by written permission of Terminal Superintendent. Only persons having authorised work will be given access port limits, dock or vessels.

AUTHORITY: LAPCO Administrative Offices. LAPCO has offices at the following addresses: Head Office: PO Box 3243, Tehran, Iran. Terminal Office: Lavan Island, Persian Gulf.

AGENT: Gulf Agency Co., Lavan Island.

Head Office: Khorramshahr. Gulf Agency Co. (Iran) Ltd., POB 110, Khorramshahr, Iran. Cables "Confidence", Khorramshahr. Tel. 2280, 2278, 4755–58. After office hours 2670, 2950, 3193. Telex 4033 (answer back "Confidence Kor").

Due to the few available Telex lines to Khorramshahr, messages from abroad to Khorramshahr to be sent to Tehran office, Telex 2507 (answer back "Confid TN"). Stating: "For Khorramshahr".

Air-freighted spare parts and ships' mail should be addressed: Gulf Agency Co. (Iran) Ltd., POB 62, Abadan, Iran, and sent to the Abadan International Airport, marked "In Transit for M/S. . . ."

Air-freight consignments should be routed by flights arriving *directly* to Abadan Airport without trans-shipment at Tehran. Cable advise "Confidence", Abadan, of flight details and airway bill number.

RAS BAHREGAN: 29.48.30 N. 50.11.30 E.

TERMINAL: Bahregan Oil Centre.

OPERATORS: Societe Irano Italiene des Petroles (SIRIP).

COMMUNICATION: Radio contact ship/shore on 2477 kc/s from 0530Z–0630Z and 8230 kc/s from 1130Z to 1230Z. ETA notices to be sent to the Oil Company: cable address "Sirip Khorramshahr" via Khorramshahr port radio call sign: EQK – 500 kc/s.

LOADING: Loading through 18 in. submarine line to midships. One hose connection 12 in. dia. adjustable to 10 in. dia.

DRAFT: Alongside the buoy the draft is 14·5 metres.

CARGO: Bahregan Sar Crude, API 32, Temperature 85°F.

BUNKERS: Not available.

WATER: Not available.

STORES: Not available.

SERVICES: No facilities for crew change, etc., or any other vessel's requirements, as the terminal is situated off-shore in the Persian Gulf and there are no transportation facilities other than Oil Company's flights from Abadan which are meant for their own personnel.

DEVELOPMENT: (Nowruz Terminal.) Extension to existing facilities expected ready end 1971. New off-take position will be about 15 km. from shore with 36 in. sea-line. To be a single buoy mooring with a loading capacity of 450 cm. per hour. Depth of water said to be about 30/31 metres and facilities capable of handling vessels up to 250,000 tons dwt.

AGENTS: See "Khorramshahr". (Actual handling is effected by Oil Company SIRIP, but Khorramshahr Agents are in a position to handle ETA messages, etc., addressed to them via Khorramshahr Port Radio EQK, also to communicate messages to and from SIRIP Khorramshahr and shipowners. Agents can also pass arrival and sailing details to principals, and despatch copies of loading cargo documents as required by Owners. Forwarding ship's mail to Bahregan and despatching official and crew mail received from ship, can be arranged by Agents. Such services are not undertaken by the Oil Company, and it is advisable to appoint an Agent at Khorramshahr.)

Iraq

BASRAH (Margil and Umm Qasr): 30.31 N. 47.50 E.

DOCUMENTS: On arrival at pilot station vessel requires following: Ship's Register, letter from Owner confirming that vessel has not called at Israel port, all Health Certificates of Crew must be valid against cholera and smallpox, 2 copies Crew List, 2 copies Provision List, 2 copies Manifest, Freight manifest for Baghdad Rail cargo, Breakdown list and Stowage Plan, Dangerous cargo list (if any).

PILOTAGE: Owners having vessels bound for Basrah should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir Basrah" to arrange Shatt-al-Arab Pilotage. Owners should also put Iraqi Maritime Transport in funds by remittance well in advance of vessel reaching Outer Bar of Shatt-al-Arab in order to cover port tonnage dues, pilotage and dredging dues, for sailing from Outer Bar to Basrah and return.

The Pilot Boat is located usually in position 29° 46′ 45″ N. 49° 48′ 37″ E. and on arrival vessel should contact pilot boat immediately for instructions. Pilots are available for vessels proceeding to Abadan and Khorramshahr (in Iran) and Basrah (Margil and Umm Qasr). Providing Master has given Agent 48 hours notice of vessel's ETA Pilot will board immediately providing tide is suitable to allow vessel to continue to destination. Master should use call sign YIR4 on 500 kc/s for Basrah Radio in order to pass messages to Agent. Vessel should listen for messages on 440 kc/s from YIR2 or use VHF on Channels 14 and 15. On boarding the river Pilot will hand Master various forms for completion in respect of Light Dues and River Pilotage. He will also request the Master to Hoist the National Flag of the country to which vessel is proceeding.

The Pilot boat is called "Alwalid" and on both sides amidships the word "Pilot" is painted in white.

The Navigation of the Shatt-al-Arab River is under the jurisdiction of the Iraqi Ports Administration which takes in the approaches to Abadan and Khorramshahr in Iran.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-el-Arab River the following are the recognized anchorages:

Kasba Anchorage, position about 2 miles above Fao with a maximum depth of 35 ft. in fresh water.

Bawarda Anchorage, position about 2 miles above Abadan with a maximum depth of 35 ft. in fresh water.

Hartha Point, position about 20 miles above Abadan and 15 miles below Khorramshahr with a maximum depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 16 miles above Hartha Point and about 14 miles below Basrah (Khora Anchorage) with a maximum depth of 29 ft. in fresh water.

Khora Anchorage, position about 2 miles from Basrah Wharves (Margil) with a maximum depth of 29 ft. in fresh water.

Jubailah Anchorage, position at Basrah Silo about half-mile below Basrah Wharves (Margil) with a maximum depth of 29 ft. in fresh water.

The maximum length between perpendiculars permitted by the Iraqi Ports Administration for vessels in the Shatt-el-Arab river is 560 ft.

RESTRICTIONS: The Iraqi Ports Administration issue a booklet on Tide Tables each year and the movements of vessels in and out of the Shatt-el-Arab River are restricted to the high water tables for vessels using Basrah and Khorramshahr. Movements to and from these ports are only permitted in the hours of daylight. The maximum draft for a vessel proceeding to Basrah is 29 ft. in fresh water. If vessel's draft exceeds this lightening takes place at Hartha Point Anchorage below the Karun Bar. Although the draft obtainable alongside the wharves is 31 ft. the maximum draft for moving in the river is 29 ft. on account of the restriction at the Karun Bar.

MAX. SIZE: For vessels proceeding to Basrah the maximum length between perpendiculars allowed by the Iraqi Ports Administration is 560 ft. There is no restriction on the breadth. The maximum draft in fresh water for vessels to and from Basrah is 29 ft.

HEALTH: Masters are requested to call the Chief Medical Officer at Fao on 500 kc/s. call sign "YIS4" requesting free pratique between 8 and 12 hours before vessel's arrival. All crew vaccination certificates should be valid and available for the Medical Officer's arrival on board. He will also expect to find a valid Deratisation Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the Q Flag is still hoisted is liable to a fine. Special precautions are taken in the case of a vessel arriving direct from an epidemic area and even if the crew are holding valid inoculation certificates the vessel may be delayed at the pilot station. The Iraq Government is very sensitive about the spread of cholera in particular.

RADIO: It has been found from experience that when a vessel is over 3 days away from Basrah, that radio messages are best transmitted via Bahrain Radio. When vessel is within 3 days of arrival, Basrah Radio can be used. The call sign for Basrah Radio is "YIR4" (transmitting on 500 kc/s. and receiving on 440 kc/s.)

List of Coast Stations (Iraq). Summary of Procedures:

I. Whilst inside Iraq territorial waters, ships under way will maintain watch on channel 16 (156·80 MHz) and/or 461·5KHz to ensure immediate reception of instructions issued by the controlling authorities.

(a) Khor Al-Amaya Radio maintains listening watch on channel 16 (156·80 MHz).
(b) Pilot Station (Al-Rasheed Radio YIBE) maintains listening watch on channel 16 (156·80 MHz) and 500 KHz.
(c) Fao Radio (YIS) maintains listening watch on channel 16 (156·80 MHz) and 500 KHz.
(d) Al-Wasiliyah Radio (YIT) maintains listening watch on channel 16 (156·80 MHz) and 461·5 KHz).
(e) Basrah Control Radio (YIR) maintains listening watch on channel 16 (156·80 MHz) and 500 KHz.
(f) Umm Qasr Radio (YIU) maintains listening watch on channel 16 (156·80 MHz) and 500 KHz.

II. Special Instructions:

(a) Navigational Warnings are transmitted on 500 KHz by Basrah Control Radio (YIR).
(b) North Arabian Gulf Weather Forecast is transmitted by:
1. Basrah Control Radio on:
440 KHz at 0530, 1330 GMT and on request. 6493·25 KHz at 0530 GMT and on request. 8668 KHz at 1330 GMT and on request.
2. Khor Al-Amaya Radio on channel 16 (156·80 MHz) at 0530, 1330 GMT and on request.
(c) Traffic Control Signals on channel 16 (156·80 MHz) and 500 KHz by Basrah Control Radio (YIR).
(d) Traffic Control Signals on channel 16 (156·80 MHz) and 461·5 by Al-Wasiliyah Radio (YIT).
(e) Traffic Control Signals on channel 16 (156·80 MHz) and 500 KHz by Fao Radio (YIS).
(f) Traffic Control Signals on channel 16 (156·80 MHz) and 500 KHz by Umm-Qasr Radio (YIU).
(g) Traffic Control Signals on channel 16 (156·80 MHz) by Khor Al-Amaya Radio.

III. Commercial and public correspondence: Call Basrah Radio (YIR) on channel 16 (156·80 MHz), 500 KHz, 4, 6, 8, 12 and 16 MHz bands and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Basrah Radio follows the following time-table:

Hours	*Listen on*	*Answer on*	*Traffic Lists*
H24	500	440 461.5	–
0400–0600	6265·5–6280·5	6493·25	0505
0600–0800	16708–16748	16968	0705
0800–1000	8354– 8374	8668	0905
1000–1200	16708–16748	16968	1105
1200–1400	8554– 8374	8668	1305
1400–1600	12531–12561	12986·5	1505
1600–1800	4177–4187	4356·5	1705

TUGS: River-and sea-going tugs are available. Tug-boat services are offered as and when deemed necessary by port Pilot or Harbour Master, and are available at all times during day and night.

BERTHING: See "Restrictions". All berthing of vessels at Basrah is done during daylight hours only and according to suitable tide. The Harbour Master joins vessel on her arrival at Khora Anchorage which lies about 2 miles from the Margil Wharves. In the case of Umm Qasr the Harbour Master joins vessel on arrival off the wharves.

Height of pier (quay) at berthing places above mean low water:
(*a*) Margil – Plus 12·5 ft. above zero port datum. Port datum is 3·96 ft. above mean zero level at Fao.
(*b*) Umm Qasr – 24·65 f . above lowest water of spring tide which is referred to as Umm Qasr Port datum.

Difference between high and low water:
(*a*) Margil: A daily variation of 5 ft. between tides and max. of 8 ft.
(*b*) Umm Qasr: An average of 12 ft. between tides, and maximum of 17 ft.

Margil (Ma'gal). Wharves vary in length from 155 to 170 metres, depth alongside 8·84 metres.

Umm Qasr. The wharves are of reinforced concrete with a continuous frontage of 2,100 ft. with a depth of 33 ft. alongside, and capable of accommodating three cargo ships at one time. Each berth is 600 ft. long. The wharves are provided with a total of 8 electric gantry shore cranes from 3 tons to 15 tons capacity. A floating-crane of 150 tons capacity is in operation.

BRIDGES: There are no bridges across the river from the entrance to Basrah Wharves (a distance of about 70 miles).

STEVEDORING: Information on the numbers of gangs required on board on vessel's arrival should be passed to the Agent together with vessel's ETA through Basrah Radio Call Sign YIR4 receiving on 440 kc/s. The average rate of discharge of general cargo at Basrah (Margil and Umm Qasr) is 6 tons per ganghour per 16 hour day. Contractors will place labour on board to discharge or load cargo but at the risk of the vessel as a Contractor will not accept any responsibility for damage done by labour.

Unloading of vessels basically carried out from vessels to wharves by Port cranes or ships derricks. Heavy lifts and some dangerous cargoes are discharged overside into barges. Loading from jetty is by crane directly into ships. Loading at midstream is by lighters.

RADAR/VHF: Port radar service. VHF can be used to call the Iraqi Port Administration at Basrah on Channel 16.

MEDICAL: For a vessel in to Basrah (Margil and Umm Qasr) no advance notice is required in order to obtain medical attention. Poor hospital facilities and therefore where possible if a seaman is fit to travel he is despatched to Europe by air. A new hospital is expected to be built in the Basrah area. For arrival at Basrah it is necessary to hold valid cholera and smallpox certificates.

TANKERS: See "Khor-al-Amaya".

FRESH WATER: Fresh water is available at the wharves at Margil and Umm Qasr at a charge of 400 fils per 1,000 gallons but where a vessel is moored in midstream and requests water there is the additional charge for the hire of the water tanker at ID. 360/000 per day (from midnight to midnight).

FUEL: There is only one grade of fuel oil available from the Basrah Refinery (Muftiyah) – Red. 1–1500 secs at 100°F – Gas and Diesel oils also available. Fuelling is direct if taken alongside Muftiyah Refinery Jetties, otherwise by barge. No coal bunkers available.

GANGWAY/DECK WATCHMEN: It is recommended that vessels moored or anchored in the river employ Gangway/Deck Watchmen.

OPENING/CLOSING HATCHES: This work is normally done by crew, but if the labour on board are asked to do it they should be supervised by an Officer.

CUSTOMS ALLOWANCES: (Tobacco) The Ship's Bond is sealed on arrival but prior to the sealing each member of the crew can have 200 cigarettes. The Bond will be opened by the Customs on the request of the Master at any time during vessel's stay in Basrah.

(Wine and/or Spirit) Each crew member is permitted to have 1 litre out of Bond. On sailing from Basrah the Master is required to wait till vessel has cleared the Shatt-el-Arab River before opening the Bond. This does not apply when vessel calls at Khorramshahr or Abadan on the way down river.

IDENTIFICATION CARDS: All crew members are required to carry with them some form of identification when going on shore.

REPAIRS: All types of repairs except major engine repairs can be carried out but the costs are extremely high.

DRY DOCKS: There is no dry dock available for cargo vessels. The present dry dock called "Ajnadeen" built in Japan in 1965 has a displacement of about 4,220 and lifting capacity of 4,000 tons and has following measurements l×b×d – 105·35 ×29·20×10·95 m. This however is only for use by Iraqi Port Administration craft.

REPATRIATION: No difficulties in arranging the repatriation of crews from Basrah. Emergency visas are easily obtained for joining and departing crews.

AIRPORT: The Basrah Airport formerly an International Airport is now used only as a domestic airport and is situated about 2 miles from the Margil Wharves but 50 miles from Umm Qasr. There is a daily flight to Baghdad to connect with International flights, also 3 flights per week to Kuwait to connect with international flights.

TIME: Iraq time is 3 hours ahead of Greenwich Mean Time and there are no alterations made to clocks during the year.

HOLIDAYS: The official holiday of the week in Iraq is Friday. The other official holidays in Iraq are: Id-el-Fitr; Army Day; 14th Ramadan Revolution; Id-el-Adha; Hijra; Ashura; Labour Day; Birth of

Prophet Mohamed; Republic Day; "18th November" Revolution; Id-el-Fitr. These holidays are advanced 12 days each year.

POLICE/AMBULANCE/FIRE: A call to 7601 or 7606 will connect to the department required.

TELEPHONES: Telephone is placed on board a vessel as soon as secured alongside wharf.

GENERAL: The rain season in Basrah is between November and April and during the summer months from May to October the temperature can be as high as 55°C. It is important that crew members keep the backs of their necks covered whilst working on deck during the heat of the summer. The use of salt tablets are recommended during the heat of the summer.

SPECIAL SERVICES: There is a laundry service available but the quality of the work is very poor.

SHORE LEAVE: There is no restriction on crew members going on shore but it is important that they carry a form of identification.

REGULATIONS: The Port Authority have requested that no photography takes place from the ship whilst passing naval or military installations.

DELAYS: As the port of Basrah is considered very well equipped, cargo vessels usually receive a very quick despatch and it is very seldom that a vessel experiences waiting time for a berth for discharging, loading or bunkering. All discharge takes place at the wharves and all loading takes place in midstream at mooring buoys. Where a vessel can load whilst discharging, this is permitted.

AUTHORITY: Iraqi Ports Administration, Basrah.

AGENTS: The business of Shipping Agencies relating to all ships calling at Iraqi ports is entrusted solely and exclusively to Messrs. Iraqi Maritime Transport Co. Ltd. The addresses of Iraqi Maritime Transport Co. Ltd. are the following:

Main office: Iraqi Maritime Transport Co. Ltd., POB 3052, Baghdad/Iraq. Cable address: "Bawakhir", Baghdad.

Basrah Branch: Iraqi Maritime Transport Co. Ltd. POB No. 3, Basrah/Iraq. Cable address: "Bawakhir", Basrah.

FAO: 29.58 N. 48.29 E.

Formerly operated by the Iraq Petroleum Company, who disposed of their interest in operation of the Terminal loading facilities in 1970, but retain the tank farm installations at Fao for submarine pipeline crude oil supply to their shipment facilities at Khor-al-Amaya.

Fao is expected to be re-activated as a loading port for deep-sea oil-carriers in 1972, when up-to-date information will be published by Shipping Guides Limited in the form of a Supplement to this *Guide*.

KHOR-AL-AMAYA: 29.46.45 N. 48.48.37 E.

OPERATORS: Iraq Petroleum Company Limited.

LOCATION: Island Terminal about 20 miles out in the Gulf from the mouth of the Shatt-al-Arab River.

ADMINISTRATION: All waters of the Shatt-al-Arab and of the approaches to Khor-al-Amaya are controlled by the Iraqi Ports Administration.

APPROACHES: (a) *Lights*. One white all-round navigation light has been fitted to the top of the radio mast on the centre piled structure at a height of 153 ft. above MHWS. Character: flashing every 5 seconds, visible for 18 miles; candlepower 7,400.

Red lights are fitted at the four extreme corners of the structure which is 1,300 ft. long. Character: fixed red visible 2 miles.

Additionally there are several aircraft warning lights (red) on various parts of the structure marking the upper extremities of towers and other erections including the central radio tower.

(b) *Tides*. High water at the Terminal may be expected to occur about 30 minutes before high water at the Shatt-al-Arab, Outer Bar. This may vary due to local meteorological and spate conditions. Tidal streams in the vicinity are rotatory and are not likely to exceed 2 knots. The maximum streams are generally along the berthing faces of the Terminal, but at certain states of the tide, cross sets, at right angles to the berthing faces, may be experienced. These are unlikely to exceed $\frac{3}{4}$ knot.

DOCUMENTS:

Crew List (5 copies).

Store List (2 copies).

PILOTAGE: Masters of vessels bound for Khor-al-Amaya Terminal should contact the pilot vessel which cruises in an area about 2 miles South-east of the Terminal. They will receive instructions as to whether to lie off, anchor or proceed towards the Harbour Master's launch.

HEALTH: Quarantine Officer boards after berthing. Vaccination Certificates required.

RADIO: Procedure for contacting Basrah Petroleum Company. Vessels are requested to establish contact with Basrah Petroleum Company Limited, Basrah, 48 hours prior to arrival, and to re-establish contact for 48 hours after departure. Telegraphic Address: (Baspetco Basrah), (Baspetco Fao). Position: Lat. 30° 35′ 36″ N. Long. 47° 48′ 32″ E. Call sign "HNT" (FC). (a) Transmission 8,582 kHz. (b) Reception, tankers call on 8,354–8,374 and work on 8,347–8,476 kHz. Periods 0400–0430, 0800–0830, 1200–1230, 1600–1630. All times GMT. Services: CV. Class of Operation: C.W. Class of Emission: A1.

Vessels should indicate their date and time of arrival, quantity of cargo required and whether in a state to receive cargo. In the event of vessels being unable to establish direct wireless contact with Basrah Petroleum Company Radio Station, messages should be passed through the Iraqi Ports Administration.

Procedure for contacting Iraqi Ports Coast Stations

1. Summary of Procedure. Whilst inside Iraqi territorial waters, ships under way will maintain watch on Channel 16 (156·80 MHz) and or 461·5 kHz to ensure immediate reception of instructions issued by the controlling authorities.

(*a*) Khor al-Amaya Radio maintains listening watch on Channel 16 (156·80 MHz).

(*b*) Pilot Station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156·80 MHz) and 500 kHz.

(*c*) Fao Radio (YIS) maintains listening watch on Channel 16 (156·80 MHz) and 500 kHz.

(*d*) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156·80 MHz) and 461·5 kHz..

(*e*) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156·80 MHz) and 500 kHz.

(*f*) Umm-Qasr Radio (YIU) maintains listening watch on Channel 16 (156·80MHz) and 500 kHz.

II. Special Instructions.

(*a*) Navigational warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).

(*b*) North Arabian Gulf weather forecast is transmitted by: 1. Basrah Control Radio on: 440 kHz at 0530, 1330 GMT and on request. 6493·25 kHz at 0530, GMT and on request. 8668 kHz at 1330, GMT and on request. 2. Khor al-Amaya Radio on Channel 16 (156·80 MHz) at 0530. 1330 GMT and on request.

(*c*) Traffic Control Signals on Channel 16 (156·80 MHz and on 500 kHz by Basrah Control Radio (YIR).

(*d*) Traffic Control Signals on Channel 16 (156·80 MHz) and 461·5 kHz by Al-Wasiliyah Radio (YIT).

(*e*) Traffic Control Signals on Channel 16 (156·80 MHz) and 500 kHz by Fao Radio (YIS).

(*f*) Traffic Control Signals on Channel 16 (156·80 MHz) and 500 kHz by Umm-Qasr Radio (YIU).

(*g*) Traffic Control Signals on Channel 16 (156·80 MHz) by Khor al-Amaya Radio.

III. Commercial and Public Correspondence. Call Basrah Radio (YIR) on Channel 16 (156·80 MHz), 500 kHz, 4, 6, 8, 12 and 16 MHz bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Note. All messages are chargeable except those concerning navigational aids, distress, pratique and medical advice messages.

TUGS: I.P.A. tugs (of 2,000 b.h.p.) are available to assist in berthing and unberthing.

BERTHING: The Terminal consists of a piled structure, in 12 fathoms of water, having one tanker berth on each side with suitable mooring dolphins and platforms ahead and astern which are connected by catwalks. The orientation is 320°/140°. There are two berths. The maximum loading rate, with only one berth in use, is 9,000 tons per hour. With both berths in use the maximum loading rate at each is 4,500 tons per hour. Fire-fighting towers are provided, also helicopter platform. Loading is by "Woodfield" flow booms offering 2 or 4, 12 in. hoses. Vessels of the order of 120,000 dwt can be accepted at either berth.

Vaccination against smallpox is required from arrivals, except those who were resident in a European country, in Canada or in the U.S.A. for more than 14 days before disembarkation in Israel, provided those countries are free from smallpox.
TUGS: Vessels obtain tug assistance, if required, for entering or leaving the harbour and for shifting.
BERTHING: Ships moor normally to wharves and jetties, and to a lesser extent stern to the main breakwater.

Main Harbour

The main harbour is situated on the Southern shore of Haifa Bay at lat. 72° 48″ N., long. 35° 01″ E. It is protected by two breakwaters: the main breakwater, 2,210 m. long, in the North, and the lee breakwater, 745 m. long, in the East.

The harbour basin covers an area of 1,050,000 m² (about 260 acres). The main port's land area amounts to 630,000 m² (about 155 acres).

Kishon Auxiliary Harbour

To the East of the main port, around the lower reaches of the Kishon rivulet, lies the Kishon Auxiliary Harbour. It consists of an outer harbour basin that is protected by two breakwaters of 600 m. and 350 metres length respectively, and a main channel of 1,045 m. length, of which the first stretch of 700 m., measured from the entrance to the outer harbour basin, has a depth of 8 m. while the second stretch of 345 m. has a depth of 6·50 m. A side channel, 213 m. long and 4 m. deep, which branches off the main channel toward the East, serves as a fishing dock. Another side channel 350 m. long and 8 m. deep serves as holding basin of the shipyard.

3 Lists of Passengers in Transit.
Manifests of Cargo carried, with specification of port of origin and whether for local discharge or in transit. If stowed on deck or below deck.
List of Articles in possession of each crew member, such as cameras, binoculars, portable radios, cigarettes, tobacco or any kind of cheap-priced goods.
Other Certificates required to be on board:
Certificate of Ship's tonnage.
Load Line Certificate.
Deratisation Certificate.
RT Certificate.
Safety Certificate.
Anchorage Dues Receipt (if previously paid).

PILOTAGE: Vessel approaching port should apply for Pilot by hoisting the "G" flag, if by day-time. By night-time, letter "G" will have to be signalled by Morse, to port semaphore (Signal Station) which is located under shore lighthouse showing white flashes.

Telegraphic address of Pilot Station is "Piloti Porto, Brindisi". No ETA required for Pilots as station not equipped with wireless apparatus. Characteristics of pilot boat: gross tonnage, 9·4; power, 65 HP; speed, 8 Knots.

Area where Pilot boards vessel:

In good weather: One mile from harbour entrance.

In bad weather: (*a*) If vessel is heading for inner harbour and is of small tonnage (up to 3,000 tons) pilot boat will steer in a direct line, bows pointing towards vessel, up to entrance to "outer" harbour, where Pilot will board vessel. If vessel is of higher tonnage, she will have to take a "crosswise" position so as to form a sheltered area for Pilot, about one mile from harbour entrance. (*b*) If vessel (tanker) is bound for outer off-shore terminal (Montedison Installation) for discharge of crude-oil, pilot boat will endeavour to approach vessel to communicate impossibility of immediate mooring. Anchorage roads, pending possibility for Pilot to board vessel, are 0.8 miles East/North/East of "Punta Penne" (Capo Gallo).

ANCHORAGES: Besides anchorage point described above, there exists safe anchorages in bay for vessels having a draft of 9 m. (29 ft. 6 in.) and in external harbour for vessels of less than 3,000 tons (gross).

RESTRICTIONS: Tankers of over 1,500 tons gross may berth only from sunrise till sunset. Port berths are inaccessible in unfavourable winds. Passenger or cargo vessels no restrictions.

MAX. SIZE: *Inner Harbour:* Draft not to exceed 9·4 metres (30 ft. 10 in). *Outside Main Port area:* For discharging crude oil at off-shore terminal, maximum draft allowed 11·50 m. (37 ft. 8 in.). For discharging or loading of other refined products of Montedison Installations, depth of berths varies from 4 to 9 m. (from 13 ft. 1 in. to 29 ft. 6 in.).

HEALTH: Apply to "Sanimare, Brindisi" by radio, 12 hours before arrival, and not later than 4 hours before arrival, according to provisions of Health Regulations, notifying in message state of health of crew and port of origin of vessel. Procedure not required if vessel entering after calling at another port in same country.

RADIO: Vessel can communicate ETA messages to Agents through Bari Radio (nearest station) or through Rome Radio which can pick up messages from vessels at sea almost in any part of the world.

TUGS: Tug service is generally effected from Punta Riso–Faro Della Pedagne junction, up to inner harbour. It is customary to use tugs' lines for mooring and unmooring of tankers at terminals outside main port area, in view of the peculiarity of mooring operations and the area where tugs are to operate (subject to surf, choppy seas, winds). Charge for use of tugs' lines is 20% extra on normal towing rates.

STEVEDORES: Always advisable to notify in ETA messages to Agents number of hatches vessel intends working simultaneously to arrange gangs. Normal working hours: From 7 a.m. to 12 p.m. and 2 p.m. to 5 p.m. Overtime: Week-days, 70% increase on normal tariffs. Sundays and holidays: Work performed during normal hours, 50% increase. On overtime, 100% increase.

MEDICAL: Hospital facilities available. For any kind of medical attendance or hospitalisation, if needed, it will be helpful to have port Agents advised by radio in advance.

FRESH WATER: Almost all mooring points alongside wharves are fitted with fresh water distributing hydrants. At off-shore terminals, supply is effected by tugs.

FUEL: Types of fuel available: Bunker "C", viscosity Engler at 50° (centigrade), 16/20; specific weight, ·950/960. Gasoil, viscosity Engler at 20° (centigrade), 1.4; specific weight, ·830. 48 hours advance notice for any supplies required.

FIRE PRECAUTIONS: Firemen always in attendance during loading/unloading operations by oil carriers.

DEVELOPMENTS: Under construction: one pier in outer harbour, which is scheduled to be 200 m. in length (219 yards) with a depth of 12 m. (39 ft. 4 in.).

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: For vessels over 500 tons effecting international voyages:

(*a*) Passenger vessels:
- Safety Certificate.
- Radio and Radiophone Certificates (latter if included in vessel's equipment).

(*b*) Freighters:
- Safety Construction Certificate.
- Safety Equipment Certificate.
- Radio and Radiophone Certificates.

CUSTOMS ALLOWANCES: 50 cigarettes a day for each crew member, if vessel's stay in port exceeds 24 hours. No allowance if stay is shorter than 24 hours. ⅓ of a bottle of liqueurs only.

IDENTIFICATION CARDS: Not particularly needed besides regular seaman's books.

CONSULS: Vice-Consulate of Denmark, Portugal and Holland, all having the same telephone number: 21123. Vice-Consulate of Spain: telephone: 21039.

REPAIRS: Only minor deck and engine repairs can be carried out locally.

REPATRIATION: Adequate facilities exist for effecting crew changes and repatriations as necessary.

AIRPORT: Distance from local airport 5 kilometres (3 miles). Airport regularly served by Alitalia Airline, ensuring 2 daily flights to Rome, and one daily flight to other Italian cities, including, among others; Naples, Catania, Palermo, Cagliari, and other destinations via Rome. Direct international flights not scheduled from Brindisi.

TIME: Local time one hour ahead of GMT (generally from early June to end September), 2 hours ahead of GMT (summer time).

HOLIDAYS: Officially recognised. Both national and religious holidays include: Sundays; New Year's Day; Epiphany (6th Jan.); St. Joseph's Name Day (19th March); Easter (Easter Monday); Anniversary of Liberation (25th April); Labour Day (1st May); Ascension, Corpus Domini (oscillating dates); Proclamation of the Italian Republic (2nd June); the Saints Peter and Paul Name Day (29th June); Assumption (15th August); All Saints' Day (1st Nov.); National Unity (4th Nov.); the Virgin Immaculate Conception (8th Dec.); Christmas, Boxing Day.
